PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, FIRST SESSION

## SENATE—*Tuesday, September 15, 1981*

*(Legislative day of Wednesday, September 9, 1981)*

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the Honorable RICHARD G. LUGAR, a Senator from the State of Indiana.

### PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Our Father in heaven, Thou hast given us another day in which to serve Thee. We thank Thee for the rest of the night, for brief but precious time with our families. We thank Thee for strong bodies and alert minds, for eyes to see and ears to hear and hearts to love. We thank Thee for comfortable homes, for more than enough to eat, for good friends and faithful associates. We thank Thee for the pleasure of laboring in this place of extraordinary privilege and position.

Grant us wisdom and strength for this day that we may dispose of our responsibilities in ways that honor Thee. Help us in all our relationships to be constructive and edifying. Keep us from attitudes which demean others and are socially destructive. Help us find joy in our work despite pressure and opposition.

May Thy glory fill this place, Thy love be shed abroad in our hearts, and Thy will be done for the Nation. In Jesus' name. Amen.

### APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER (Mr. CRANSTON). The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
*Washington, D.C., September 15, 1981.*

*To the Senate:*

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable RICHARD G. LUGAR, a Senator from the State of Indiana, to perform the duties of the Chair.

STROM THURMOND,
*President pro tempore.*

Mr. LUGAR thereupon assumed the chair as Acting President pro tempore.

### RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDING OFFICER (Mr. PROXMIRE). Under the previous order, the acting majority leader, the Senator from Indiana (Mr. LUGAR), is recognized.

### THE JOURNAL

Mr. LUGAR. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. I thank the Chair.

### THE FARM LEGISLATION DEBATE

Mr. LUGAR. Mr. President, this is a day on which we continue our debate on farm legislation. It is a debate which has ramifications which go well beyond that particular legislation, important as it is. Clearly, the farmers of America are people who work hard, who have produced well, who really stand as the epitome of efficiency in our market economic system.

They are in difficulty, as are many Americans from high interest rates, from inflated expenses that they are paying, even at a time when the remarkable production for which they and those who have preceded them in American agriculture are responsible, is bringing down prices, cash markets, and futures markets in anticipation of those large crops.

Mr. President, it is truly ironic, as we debate the farm bill in this country, that a comparable debate in the Soviet Union would center on the failures of the Soviet agriculture—in part, because of adverse geographical circumstances, but in large part because of poor organization of that system—lack of production efficiencies, lack of human rights of Soviet farmers, who are collectivized, herded about, hardly given their due in a totalitarian society. The result is that vast shortages have occurred which will be of grievous importance to individual human beings, who will suffer, and of great importance to the Soviet State, which now stands in jeopardy once again of failure to produce the most essential product, food to feed people.

It is probable that the Soviet Union will import feedgrains to eat. It is probable given the scenario of events in recent months, that the United States will stand well back of the end of the line as a residual market for those imports. It is probable that the very problem of logistics of Soviet ports, that have crowded out the grain ships, may prevent the importation of as much grain as might be imported from American markets that are efficient.

In any event, it is ironic that one of the great strengths of the United States of America is its ability to grow agricultural produce and to do it so well and that a part of our dilemma this morning comes from the fact that we do it so well and we must try to encourage American agriculture to continue to be productive.

There are differing viewpoints, Mr. President, as to how we should proceed. At least one point of view, which this Senator holds, is that American agriculture is as eager as any other sector of American life to see lower interest rates, to see control over Federal governmental expenditures, to see a movement toward a balanced budget, to see an aggressive export policy, to see a reasonable policy in which the Secretary of Agriculture might have the maximum flexibility to meet the coming problems of the next 4 or 5 years through a system of loans, farmer-held reserves, incentives for exporting agricultural research, and assistance to farm families in trying to retain the family farm.

There are differences of opinion as to how that might come about, but clearly, at a time when our Nation is attempting to get its fiscal picture in order to make sure that our Government moves toward a balance so that interest rates come down, we must strike a balance in our agricultural policy.

That will not mean business as usual and it will not mean taking extravagant chances by setting in motion fixed target price systems that guarantee, in years of poor weather, which we shall surely have in a case of 5 years ahead, very large exposures.

If there is one thing Mr. President, that we are certain of, it is that uncontrollable expenditures must be brought under control rather than brought into the fore again in a way that might be the outcome of our debate.

I conclude, Mr. President, by saying that I am certain that not only American agriculture looks at this debate with a great deal of interest, but, clearly, since it is the first debate we have had since the recess, the American public as a

whole looks with a very close scrutiny at how we shall deal with this very, very difficult problem. I am hopeful that the faith of the American public in our ability to deal fairly and yet, at the same time, to move toward economic strengths in this country will be justified by the outcome.

Certainly, all Senators participating in the debate are of good will and moving toward that result.

Mr. President, at this point, I yield a portion of my time to the distinguished Senator from Kansas (Mr. DOLE).

Mr. DOLE. Mr. President, I thank the Senator from Indiana. I shall take just 2 or 3 minutes.

## GRAIN SALES TO THE SOVIET UNION

Mr. DOLE. Mr. President, before we get on the debate on the farm bill, because I think the Senator has indicated that there are some differences of opinion—not major differences, but some that will be worked out—I wanted to relay some assurances from President Reagan this morning that the administration intends to offer a large additional amount of grain for sale to the Soviet Union when consultations are held on September 30 on the 1-year extension of the United States-Soviet grains agreement.

I received a letter from the President last evening which indicates that this is administration policy. It is not Secretary Block's policy. It is not anyone else's policy. It is the administration's policy. It is the President's policy.

I believe there has been some confusion so far as trade is concerned, perhaps even on the part of the Soviets, on this theory: Is this the policy? Is this what the Secretary of Agriculture thinks may be the policy?

I believe that the best way to clear the air is to read the President's letter.

Mr. President, on September 4, 1981, Secretary Block announced that United States and Union of Soviet Socialist Republics grain trade negotiators will meet in Moscow on September 30 and October 1. The discussions will concern the supply availabilities and trade needs during the 1982 fiscal year.

The September USDA crop report showed that supplies in the 1981–82 marketing year for corn, wheat, and soybeans would be more than ample to meet U.S. domestic and export needs. I have received the following assurances by the President regarding United States offers to the Soviets on additional sales beyond the 6 to 8 million tons of grain and for other commodities. The letter is self-explanatory, and reads as follows:

THE WHITE HOUSE,
*Washington, September 14, 1981.*

Hon. ROBERT J. DOLE,
*U.S. Senate,*
*Washington, D.C.*

DEAR BOB: Your letter of September 10 has been received, and your interest in maintaining a free and unrestricted policy for agricultural trade is appreciated.

I assure you that the Administration fully intends to pursue the best interests of the United States and our farm sector by maximizing agricultural exports to all foreign buyers. Sales of grain and other agricultural products will in no way be singled out for restriction in any trade embargo that may be imposed by this Administration.

In view of our current abundant supplies of corn and wheat, and prospects for record harvests this year, the Administration intends to offer a large additional amount of grain for sale to the Soviet Union when consultations are held September 30, on the one-year extension of the U.S./U.S.S.R. Grains Agreement. These quantities will be in addition to the specified minimum and maximum levels.

I trust that this letter serves to clarify our policy regarding agricultural trade and to express the Administration's wholehearted support for this vital part of the Nation's economy.

Sincerely,

RON.

This proposed sale of U.S. grain will provide thousands of new jobs and improved prices for farmers, and lighten the dark cloud placed over the American farmer on January 4, 1980, when President Carter announced the embargo on the shipment of 17 million tons of grain, plus significant quantities of other commodities sold to the Soviet Union.

In order to understand the importance of the administration's stated position on agricultural trade, it is necessary to retrace the events over the last 18 months following the imposition of export controls by President Carter. The immediate reaction of producers to President Carter's embargo was one of apprehension. American farmers remembered only too well the high costs of previous export embargoes in 1973 and 1975. Both times farmers were forced to carry the burden of the price declines precipitated by the embargoes.

Further, foreign customers for U.S. agricultural commodities began to question the reliability of the United States as a supplier for their food imports. The long term impact of previous embargoes on American producers has been catastrophic and continues to this day. Farmers remember all too well the increased competition that was created when customers turned to Canada, Australia, the European Economic Community, Brazil, Argentina, and others to supply their needs when they realized that the United States was not a reliable source of supply.

I have opposed such limited embargoes for many years, and immediately announced my opposition to the embargo on the evening of January 4, 1980.

I said that the embargo of grain sales to the Soviet Union would be an ineffective tool for the United States in dealing with Russian foreign policy, and would be a disastrous move for American farmers.

The 1980 embargo was one of the worst economic decisions in the history of our country. I thought then, and still do, that the decision was irresponsible.

Despite the embargo, through alternative sources, the Soviets were able to import record quantities, as indicated by the following USDA information, which I ask unanimous consent to have printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

| | *Million metric tons* |
|---|---|
| 1978–79 | 15.6 |
| 1979–80 | 31.0 |
| 1980–81 | 34.5 |

Mr. DOLE. Mr. President, in addition, the U.S.S.R. imported 1.5 million tons of soybeans and 1.5 million tons of soybean meal in 1980–81 from Europe, produced from U.S. soybeans, and from Brazil. This deprived U.S. labor from jobs and U.S. processors of running time. The U.S. farmers lost an opportunity to sell and received lower prices for the balance.

I ask unanimous consent to have printed in the RECORD, a table showing how the Soviet found other sources for needed grains.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

U.S.S.R. IMPORTS OF WHEAT AND COARSE GRAINS BY SOURCE, 1978/79–1980/81

[In millions of metric tons, July/June years]

| Country | 1978/79 | 1979/80 | Preliminary 1980/81 | 1980/81 versus 1978/79 |
|---|---|---|---|---|
| United States | 11.2 | 15.2 | 8.0 | −3.2 |
| Canada | 2.1 | 3.4 | 6.8 | +4.7 |
| Australia | .1 | 4.0 | 2.9 | +2.8 |
| Argentina | 1.4 | 5.1 | 11.2 | +9.8 |
| EC | .2 | .9 | 1.2 | +1.0 |
| Others | .1 | 1.8 | 4.0 | +3.9 |
| Total [1] | 15.1 | 30.4 | 34.0 | +18.9 |

[1] Totals may not add due to rounding. Excludes rice and pulses.

Mr. DOLE. However, Mr. President, the U.S.S.R. signed long-range grain agreements for minimum annual amounts, as follows:

[In million tons]

| | |
|---|---|
| Argentina | 4.5 |
| Australia | 3.9 |
| Canada | 5 |

The net effect has been to stimulate production by competitors and lost markets for U.S. farmers. This was foreign aid for our competitors.

On July 3, 1980, flanked by two great friends of the American farmer, Senator JEPSEN and Representative HAGEDORN, I stood on the ramp in front of the administration building of USDA, and read a most significant statement by the then candidate and now President Ronald Reagan, who said:

However well-intentioned it may have been at the time, it was ill-conceived, improperly implemented—and was simply ignored by many other grain producing countries.

Later in the statement, the President said:

Jimmy Carter's grain embargo should be ended . . . Now.

If the President persists in imposing this unilateral, ineffective and financially painful burden on the farmer, I will, when elected, fully assess our national security, foreign policy and agricultural trade needs to determine how best to terminate yet another of the inequitable and ineffective policies of the Carter Administration.

President Reagan is a man of his word, and has ended the embargo. A 1-year extension of the current grain agreement

with the U.S.S.R. was developed, and already is being implemented by sales of millions of tons of corn and wheat to the Soviets. This agreement provides assurance that between 6 and 8 million tons of grain will be exported to the U.S.S.R. in the 1982 fiscal year.

Moreover, article VI of the current agreement reads as follows:

Whenever the Government of the USSR wishes the foreign trade organizations of the USSR to be able to purchase more wheat or corn grown in the USA than the amounts specified in Article I, it shall immediately notify the Government of the USA.

Whenever the Government of the USA wishes private commercial sources to be able to sell more wheat or corn grown in the USA than the amounts specified in Article I, it shall immediately notify the Government of the USSR.

In both instances, the Parties will consult as soon as possible in order to reach agreement on possible quantities of grain to be supplied to the USSR prior to purchase/sale or conclusion of contracts for the purchase/sale of grain in amounts above those specified in Article I.

President Reagan and Secretary Block are two of the greatest fighters for American agriculture to serve in such high offices. They believe that our ability to trade in agricultural products, including processed products, is one of our great strengths. This letter from the President reaffirms his commitment to the expansion of exports based on the principle of uninterrupted trade and freedom from Government restrictions. Only in that atmosphere can the American farmers be given the opportunity to compete and will the market be truly free.

Never again shall American farmers be held hostage to a failed policy.

Mr. President, there should be no doubt, based on the President's letter, as to what his policy is, what the administration's policy is. I hope that this will send the right signal to the markets across this country.

We have seen the Soviets buy grain in increasing quantities from countries which, in effect, have cashed in on the embargo. Let us just take Argentina. In the 1978–79 marketing year, Argentina sold about 1.4 million tons. This jumped to 5.1 million tons in 1979–80, 11.2 million tons in 1980–81; and they will have almost that much in the next year.

So we have lost some markets to other countries, and I am certain that this amounts to foreign aid to our competitors.

But now, with the President's statement not only on this particular meeting but also on embargo policy, I hope it will offer assurance to people such as the Presiding Officer, the Senator from Minnesota (Mr. BOSCHWITZ), who has deep concern about embargoes and has expressed his concern in the Agriculture Committee.

The President now has said, as recently as yesterday, when the letter was delivered about 5 p.m., that we are not going to single out agriculture. He said that we are going to offer large quantities of grain to the Soviet Union, which indicates to me that it is going to be in excess of 10 million tons. So this should be good news for the American farmer today.

I believe it will have some impact on the debate as we go through the farm bill, and I wanted to make this announcement before that debate started, because it is important.

I thank the distinguished Senator from Indiana for yielding.

Mr. LUGAR. Mr. President, I thank the distinguished Senator from Kansas for extraordinary good news. It makes a big difference in the outlook for American farmers.

Mr. President, I yield back the remainder of my time.

## RECOGNITION OF THE ASSISTANT MINORITY LEADER

The PRESIDING OFFICER (Mr. BOSCHWITZ). The Senator from California is recognized.

Mr. CRANSTON. Mr. President, I yield 4 minutes to the Senator from Wisconsin, and I reserve the remainder of my time.

Mr. PROXMIRE. I thank the Senator from California.

## THE EMBARGO ON BUTTER

Mr. PROXMIRE. Mr. President, I plead with the Senator from Kansas to use his influence with the administration to see if he can persuade them also to lift the embargo on butter. They lifted the embargo on wheat, so the Russians have bread and nothing to put on the bread.

I suggest that if the administration is going to be consistent—this is a farm product—the embargo on butter should be lifted.

Mr. DOLE. I agree with the Senator from Wisconsin. We cannot have bread without butter.

Mr. PROXMIRE. I appreciate that.

I point out to the Senator from Indiana that his statement was very reasonable and statesmanlike. I am sure farmers would agree with it.

The dairy farmer is in a position now in which, if we do not provide for some reasonable increase in price supports, he is going to have to suffer the entire burden of inflation by losing it from his net income.

The administration has the discretion to reduce dairy price supports and keep them from increasing. University of Wisconsin figures show that until we get rid of the surplus, it could cost dairy farmers 70 percent of their net income. No other group in America is being asked to make that kind of sacrifice.

So, while the Senator from Louisiana is correct in arguing that the farmer has a great stake in a balanced budget and in the stabilization of prices, it is murder for the dairy farmer not to have some sort of reasonable compromise here which would let him survive.

## A TRIBUTE TO DR. LEMKIN

Mr. PROXMIRE. Mr. President, August 28 marked the anniversary of the death of Dr. Raphael Lemkin. In 1959, he died a tired and disappointed man.

The originator of the international movement to fight the mass killings of people for religious and racial reasons, Lemkin was a relentless and valiant crusader against the crime for which he gave a name—genocide.

Lemkin lost all of his 50-member Polish Jewish family, except for a brother, in the gas chambers of Auschwitz. Lemkin himself was on a Nazi list which targeted him for liquidation. Yet Dr. Lemkin's lifelong crusade to fight genocide began with his search for answers as a young child.

Upon reading Quo Vadis in 1912, the 14-year-old Lemkin was horrified to read about Roman mobs throwing early Christians to be devoured by lions. Lemkin read of other massacres in history: The destruction in Carthage, the murders of 50,000 Protestants in France, and 30,000 Catholics in Japan.

Lemkin knew of more modern examples of genocide: The Jews killed in pogroms, the Armenians massacred by Turks in 1916 and 1921. At the 1933 League of Nations conference on criminal law held in Madrid, Lemkin unsuccessfully attempted to ban what he called the "crime of barbarity—the destruction of national, religious, or racial groups."

Literally a one-man lobby, Lemkin persuaded delegates of Cuba, Panama, and India to present a resolution in the U.N. General Assembly calling for a treaty against genocide. The General Assembly did pass a resolution in 1946 declaring that genocide is an international crime and directing a treaty to be drafted under Lemkin's supervision.

Two years later, the General Assembly unanimously adopted the Genocide Treaty. Dr. Lemkin's efforts did not stop with the General Assembly's adoption of the treaty, however. In poor health, and in debt, he traveled around the world to use his persistence and knowledge of nine languages to secure ratifications of the treaty.

I give tribute to Raphael Lemkin, a man who deplored the mass slaughtering of human beings, not just in this century but from the time of the early Christian martyrs. He was a man who dedicated his life to the crusade against genocide, forgoing personal health, a family, and material possessions.

Lemkin was not unrealistic in his hopes for the treaty:

Not that I will live to see the treaty enforced strictly, . . . Nor will the children of my generation. But their children will. Of that I am convinced.

Perhaps Dr. Lemkin had too much confidence in us. How can a treaty be enforced if it is not even ratified?

Mr. President, I plead once again with the U.S. Senate to act on the Genocide Treaty and ratify this treaty, which is long overdue.

## RECOGNITION OF SENATOR BENTSEN

The PRESIDING OFFICER. The Senator from Texas.

Mr. BENTSEN. Mr. President, I understand that the Senator from Missouri is scheduled next, but I do not see him in the Chamber. If the Chair wishes me to proceed on my time at this point, I am prepared to do so.

## SENATE RESOLUTION 211—HIGH INTEREST RATES

Mr. BENTSEN. Mr. President, I noticed my friend from Wisconsin, Senator PROXMIRE, in the Chamber a moment ago. He was talking the other day about how it is so easy to criticize the Federal Reserve Board for high interest rates, but so difficult to offer a constructive solution or alternative course of action that did not add to inflation.

I think there is one solution which can be offered. I am submitting a resolution today outlining that solution which I hope my colleagues in the Senate will endorse and cosponsor. It is a resolution which says, "let us stop making unproductive bank loans, let us stop having one big company buy another big company when it does not add to productivity or production." For example, in the recent case of DuPont buying Conoco, to quote Business Week, "not a single new job will be created, not a single new barrel of oil will be discovered." Yet, that merger sopped up a great deal of credit. In an afternoon, DuPont put together a reported $4 billion in bank credit for a $8.8 billion purchase. Then when we add Seagrams and Mobil—the unsuccessful suitors for Conoco—to it, we are talking about $10 billion in bank credits that were put together for just that one merger.

So, Mr. President, I am submitting a Senate resolution designed to reduce the demand for credit for such unproductive purposes as giant business mergers, and thereby to reduce interest rates. The resolution calls for action by the Board of Governors of the Federal Reserve System to mitigate the severe nationwide impact of today's high interest rates.

Specifically, my resolution urges the Board to undertake an aggressive campaign of encouraging banks to cease making credit available for speculative and unproductive applications and to provide inexpensive loans to those persons and businesses that are most in need of credit today. Excessive bank lending for unproductive purposes has pushed up credit demand and helped to produce the staggering interest rates we face today. Eliminating that demand will free up bank credit for farmers, small businesses, homebuilders and homeowners and ease interest rate pressure, as well.

Mr. President, the devastating effects of today's interest rates have been described by a number of my distinguished colleagues. I will not dwell on them at length. However, let me note a few current statistics which reveal the destruction which high rates are having on the lives of American citizens.

Homebuilding and real estate sales have plummeted due to the inability of Americans to afford mortgage loans which now carry average interest rates exceeding 16 percent. New home construction has dropped to barely one-half the level needed to meet the minimum demands of our growing population. Only 1 family in 20 seeking to buy a first home can meet the monthly payments on average priced new homes due to soaring mortgage costs. These soaring costs and declining housing demand have devastated the homebuilding and realtor industries. Bankruptcy, liquidation, mergers and consolidation are the order of the day in these industries experiencing a genuine depression. The thrift institutions serving them are in very weak financial condition, as well. And, a wave of mergers is building that could reach the staggering rate of one a day shortly.

In the automobile industry, high interest rates have been a major factor causing the slump of sales of new and used cars. Depressed sales volumes, in turn, have led to the layoff of thousands of autoworkers and the shutdown of manufacturing facilities. Poor sales caused by oppressive interest rates have also forced more than 2,270 automobile dealers out of business in just the last 2 years.

Farmers have been hard hit by our high interest rates, as well. Pushed by sky-high interest costs, farm production costs have continued to escalate most recently at an annual rate of nearly 17 percent, according to the U.S. Department of Agriculture. At the same time, high interest rates are preventing farmers from qualifying for loans to carry these additional costs. The resulting squeeze, as my colleague Senator BOREN has earlier pointed out, due to high interest rates will play a major role in forcing 25,000 full-time farmers out of business this year.

Finally, let me note the destructive impact of today's interest rates on small businesses generally across the United States. Small business is the heart of this Nation. It is the largest employer, and the most innovative and fastest growing sector in our economy. Yet, high interest rates are drying up the great reservoir of talent and resources that comprise our small business sector. Their sales are down in real terms. Yet, their costs of carrying inventories and other routine financing obligations has soared. This classic cost squeeze may soon see many of our small businesses going the way of farmers, closing their doors, selling out while they can—which directly cuts employment and reduces Federal tax receipts, resulting in a larger Federal budget deficit and even higher interest rates. They are caught in a profit squeeze, and the result is to put our Nation in a vicious circle where our high interest rates are unable to fall.

The need to finance our staggering deficit is only one of many factors pushing up interest rates. Some of these factors, such as the amount of borrowing by the Federal Government, will take years to control. Over just the last few years, we have seen Government borrowing rise from 10 percent of all credit borrowings in the United States to almost 35 percent this year. That is way too high and the solution is to cut back the deficit as quickly as we can and balance the budget.

Other factors creating credit demand and pressure on interest rates, can and should be dealt with immediately, as well. One of these factors is the huge amount of recent bank lending or the establishment of lines of credit for unproductive purposes such as commodities speculation and mergers by giant business concerns.

Loans for giant mergers, for example, are reaching breathtaking levels. Since the middle of 1979, over 30 major business mergers—worth at least $500 million each—have been proposed or completed. Together, these mergers have diverted over $50 billion with a sizable portion of the money coming as cash in loans from Wall Street, and that is just the tip of the iceberg.

Many more mergers are being proposed, as well, creating additional demand for scarce credit as banks provide lines of credit to finance business mergers or to fend off takeover attempts.

New York investment houses now are going over natural resource company balance sheets to decide who next to pick off, trying to see who is the next merger candidate. We see, as well, apparently more leniency toward such mergers by the Antitrust Division of the Justice Department—which has further excited the interest of New York investment houses.

This enormous loan demand has had the effect of pushing up interest rates across the board as all borrowers compete for a relatively stagnant supply of loanable funds.

Mr. President, you and my colleagues are aware of my keen support for permitting the market mechanism to allocate resources. Yet, I am less than enthusiastic with the surge of speculative lending now underway, characterized by the sharp rise in giant business merger activity. As I said moments ago, such loans have not been employed in many cases for productive purposes. They have not generally been used to finance needed capital investments in modern manufacturing processes or new products that will increase productivity, output, or economic efficiency.

We recently cut taxes and Federal spending to free up capital and create the incentive for new productive investments to be made. Yet, we are instead seeing massive loans not made for that purpose, but for mergers instead where there is a real question whether productivity is increased.

I believe the Government must address the problem of bank lending for unproductive purposes as a key part of its effort to bring down interest rates. I also believe the Government has a responsibility to insure that small businesses, homebuyers, farmers, and others have access to the least expensive credit possible during these times of extraordinary interest rates.

The resolution I am introducing today represents an effort to deal with both of these concerns. It calls on the Board of Governors of the Federal Reserve System to discourage banks from lending funds for unproductive purposes and urges the Board to promote an expansion of credit for particularly needy and important sectors of the economy such as housing, autos, farming, and small business.

We should have the Federal Reserve Board call in the New York banks. They should call in the lead banks who are syndicating mergers, and say to them: "Gentlemen, we are not arguing with you about whether it is appropriate for this company to be buying that company, whether or not that merger should be made or that one should not be made; what we are saying is that now is not the appropriate time to be financing giant mergers. We are seeing many small businesses go bankrupt because they do not have an ability to pass on the kinds of interest rates we face today." We are heavily debating a farm bill because the American farmer has seen his real net income, which over the last 10 years averaged about $13 billion in 1967 dollars, cut back by soaring interest costs to $9 billion or less. We are seeing commodity dealers not able to finance the purchase of commodities because of sky high interest rates. When we see those kinds of things taking place, the big New York banks should be told, it is not the time for large acquisitions and the kinds of mergers we have recently seen to occur because they compete with the homebuilder, the homebuyer, and the consumer, with the farmer and the small businessman, with all of these people who are hanging on the ropes because of high interest rates.

There is ample precedent for such action by the Federal Reserve System. At least three times in the past 15 years, the Federal Reserve System has "jawboned" banks in an effort to influence their lending policies. In 1974, for example, the Board of Governors of the Federal Reserve System sent a letter to its member banks. The letter said:

Bank restraint in lending policies, . . . best serves the public interest when limited credit resources are used in ways that encourage expansion of productive capacity, sustain key sectors of national and local economies, provide liquidity for sound businesses in temporary difficulty, and take account of the legitimate needs of individuals and of small as well as large businesses.

The Board then issued recommended guidelines for the banks to follow in making loans.

In 1980, the Board again reacted to nationwide inflation by issuing lending guidelines to its member banks. These guidelines largely mirrored its 1974 advisory concerning bank lending policies. Among other things, the Board specifically recommended that banks:

First, discourage financing of corporate takeovers or mergers and the retirement of corporate stock, except in those limited instances in which there is a clear justification in terms of production or economic efficiency commensurate with the size of the loan.

Second, avoid financing for purely speculative holdings of commodities or precious metals or extraordinary inventory accumulation.

Third, maintain availability of funds to small business, farmers, homebuyers, and others without access to other forms of financing and, whenever possible, adjust lending rates and other terms to take account of the "special needs" of these groups.

The Resolution I am introducing today calls on the Federal Reserve System to undertake a similar jawboning exercise now. I believe that such admonitions, if taken to heart by banks, will prove critical in the Nation's war against high interest rates and will aid in guaranteeing that those being hardest hit by high interest rates can look forward to lower rates and more abundant credit in the weeks and months ahead.

I urge my colleagues to join me in support of this resolution designed to send a crystal clear message to the Federal Reserve System and banks that something can and should be done to reduce interest rates. It is time for them to take positive action to reduce the explosion in credit for speculative, unproductive purposes—which will permit interest costs on other types of credit to fall.

I ask unanimous consent to have my prepared resolution printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S. RES. 211

Whereas, the United States confronts an interest rate crises of major magnitude with interest rates at record high levels and little prospect for their reduction soon;

Whereas, these excessive interest rates are well above the rate of inflation and the levels which are necessary to protect lenders from erosion of principal through inflation;

Whereas, these excessive interest rates are creating a major depression in the housing and auto industries, forcing many families into a position where they cannot afford to buy homes, large consumer durables or safe and reliable transportation, and forcing thrift institutions, home builders, building material suppliers, realtors and auto dealers into bankruptcy;

Whereas, these excessive interest rates have driven up the cost of doing business for all small businesses and farmers and have raised their costs even while sales revenues are dropping and threatening them with bankruptcy;

Whereas, these excessive interest rates are threatening to create a recession which would increase unemployment and welfare lines, reduce tax receipts and increase the Federal deficit which may increase interest rates further;

Whereas, one major factor responsible for the excessive level of interest rates is credit demand created by the use of scarce bank loans for unproductive purposes, such as precious metal speculation or mergers by giant business concerns which do not increase productivity, output or economic efficiency; and

Whereas, the Board of Governors of the Federal Reserve System in the past has discouraged the use of bank funds in unproductive ways when such funds were scarce or expensive:

Now, therefore, be it *resolved*, That the Board of Governors of the Federal Reserve System undertake an aggressive campaign designed to encourage banks to:

(1) cease providing loans or lines of credit for unproductive and speculative purposes, while increasing the supply of credit available for productive uses; and,

(2) ensure that consumers, thrift institutions, the housing industry, auto dealers, small business, farmers and home buyers have access to the cheapest possible credit in order to avoid a national recession.

Mr. BENTSEN. Mr. President, I yield back the remainder of my time.

## REAGANOMICS

Mr. EAGLETON. Mr. President, the news from Wall Street these days has come as a shock to the administration, but scarcely a surprise to anyone else who has tried to reconcile the contradictory elements of the Reagan economic program.

The amazing thing is that we did not hear sooner from these sages of Wall Street. With only a few notable exceptions such as Henry Kaufman, Wall Street stood silent as the President strode through the Congress to the cheers of his partisan followers without an economic stitch on his back. It was nonsense from the beginning and I think most of us up here knew it. But, in what Aristotle called "a willful suspension of disbelief," we went along with this unlikely fairytale. It is the sort of crowd psychology that moviemakers count on. The audience knows the plot is implausible, they know the real world never works that way, but sometimes they just love to be fooled.

Mr. President, it may be premature to pronounce the administration's economic program an irretrievable failure, but the voices now being heard from Wall Street certainly indicate it is in deep, deep trouble.

The President has dismissed these critics as alarmists, pointing out that his program does not even take effect until October 1. And, he is right—the worst is yet to come. Wait until the working families of this country wake up to what the budget and tax cuts mean for them. What President Reagan is hearing from Wall Street today will sound like a love song compared to what he will hear from Main Street when the impact of this program is fully felt.

Mr. President, as one who consistently campaigned against Reagan-Kemp-Roth in 1980 and one who has consistently opposed this same fairytale dogma in 1981, I realize that my objections to Reaganomics can be written off as partisan griping. Be that as it may, however, you cannot write off the criticism of Reaganomics as voiced by some of the most conservative economic minds in the country.

Mr. President, I ask unanimous consent that a series of quotations from various economic authorities be printed in the RECORD.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

COMMENTS FROM ECONOMIC AUTHORITIES

HERB STEIN

Herb Stein, Chairman of the Council of Economic Advisors under President Nixon, warns: "The presently available evidence on such matters does not support the view that we can get a big boost to productivity in the next few years from the Reagan Program." (AEI Economist, 4/81)

ARTHUR BURNS

Arthur Burns, former Chairman of the Federal Reserve Board, cautions: "Skepticism concerning the underpinnings of the Reagan program is not confined to traditional liberals. It is also felt to some degree by economists, businessmen, and others who are entirely sympathetic to the President's philosophy." (AEI Monograph "The Reagan Economic Program", 4/81)

HENRY KAUFMAN

In his National Press Club speech (4/22/81), Henry Kaufman, perhaps the most celebrated, indeed venerated, economist on Wall Street (Salomon Brothers), was particularly hard-hitting in his commentary on the Reagan-Kemp-Roth plan. He states as follows: "The powerful stimulative combination of large tax cuts and sizable increases in defense spending is likely to more than offset the restraining influence of a slowing in Federal expenditures, even with some presumed revenue feedback from the tax cut.

"The stimulants are bound to have a greater demand multiplier impact than the negative impact coming from a slower growth in non-defense outlays.

"The new fiscal policy, however, is exceedingly expansionary, does not pursue a course that fights inflation vigorously along the way, and will place nearly all the anti-inflation effort squarely on monetary policy.

"I am not convinced that there is real historical evidence to suggest that across-the-board tax cuts will quickly encourage Americans to work harder or to save more. Can it really be assumed during the next year or two that this fiscal strategy will reduce wage settlement increases to single digits, or will remove the rigidities in our wage and price structure? Calling attention to the beneficial impacts of earlier tax cuts is misleading. There is no precedent for taxes being lowered against a backdrop of rising defense expenditures and high inflation.

"Massive tax cuts, large leaps in defense spending, and a slowdown in other Government outlays will not, in my opinion, be enough. These measures will place an extraordinary strain on monetary policy, leading to further distortions in financial markets, much higher interest rates, and additional fragility of our financial system."

Just a few days ago, Mr. Kaufman predicted that the prime rate, then at 20.5 percent, could hit 24 or 25 percent by late fall. Long-term bond rates, which are already at record levels, could rise another few percentage points before they peak. He said the following: "I think we have not yet seen the high in interest rates. And we have not seen the full impact on the financial markets of the tax cuts the Administration is proposing, or of the actual results of what the Federal Reserve is doing to stabilize monetary policy when fiscal policy is so extraordinarily expansionary.

"There is hope by everyone, including the Treasury, that interest rates will come down. But you cannot talk interest rates down, no matter what President Reagan thinks. The central bank is being overburdened by the Administration. It is encouraging tighter monetary policy while fiscal policy is in the process of becoming even more expansive."

According to the Wall Street Journal (8/28/81), "The Reagan program, he says, is 'imbalanced' because it 'on the one hand stimulates fiscally and on the other restrains monetarily.' As a result, Mr. Kaufman considers the program highly inflationary and sure to push up interest rates. He also predicts that the municipal-bond market will be hurt the most by these policies, which, he says, require the continuing sale of so many new Treasury securities that the market for federal debt is turning 'into a thundering herd that is trampling other markets in its path.'"

JUDE WANNISKI

Jude Wanniski was one of President Reagan's principal economic advisors between 1977 and 1980. Some refer to him as Reagan's "Gold Bug."

"At the outset of the Reagan Administration the die was cast when it was arranged that the supply-siders would dominate the fiscal side of Treasury and monetarists would get the monetary side. These forces are basically incompatible: the economy cannot advance as the forces pull it in different directions. By letting people keep more of their earnings after taxes, the fiscal changes are encouraging them to increase their production. But the Fed and the Treasury monetarists see this as an inflationary impulse and try to choke off economic activity with higher interest rates." (The New York Times, 8/27/81)

"Outlandish interest rates are making it so costly to finance the government's debt that there is talk of slashing defense spending and Social Security to make room for more debt service. High interest rates, in turn, are widely attributed to the size of the deficit.

"That is, the deficit expands because of the high interest rates, yet high interest rates are supposedly caused by the deficit.

"A dismal vicious circle, indeed, if there were any truth to it. After all, this country has had deficits before, some much bigger than any we have in prospect. But never in U.S. history have we seen long-term interest rates like this. In the entire century, until 1968, high quality 30-year bonds rarely paid more than 5 percent." (The Kansas City Times, 9/11/81)

ALAN GREENSPAN

"Alan Greenspan, the New York economist who played a central role in the Administration's February forecast, has become less bullish. 'Our forecast is that this economy is dead flat into the spring,' Mr. Greenspan said by telephone.

"He said that with high interest rates 'hanging in there longer than we had projected,' the 'capital goods markets are not moving enough to create a significant strength in the first quarter' of 1982.

"Mr. Greenspan said he thought that movement in the gross national product for the third quarter of 1981 would be 'very close to zero.' The economic figures for July, he said, were below the second-quarter level.

"Asked if he, like the Administration, expected the fourth quarter to be positive, Mr. Greenspan replied: 'If it is, not by much.'" (The New York Times, 9/3/81)

JOHN D. PAULUS

"In a similar vein, John D. Paulus, the chief financial economist at Goldman, Sachs & Co., notes that 'the tax cuts are so much bigger than the spending cuts'—a situation that, he contends, 'implies large budget deficits.' He also cites major 'contingent liabilities,' such as possible needs to bail out the ailing savings and loan industry and also the Social Security system.

"'The financial markets are very concerned about the Reagan program and the prospects for very large budget deficits extending out for several years,' Mr. Paulus says. Investment managers are 'increasingly concerned that the Reagan program isn't a serious effort to fight inflation—and may turn out to be inflationary itself.'" (The Wall Street Journal, 8/28/81)

DONALD E. MAUDE

"Economists particularly question the Reaganites' budget projections. For example, Donald E. Maude, the chief financial economist at Merrill Lynch & Co., says he is 'very disappointed' by the continued suggestion by administration officials this week that the federal deficit in fiscal 1982, which begins October 1, will be about the $42.5 billion originally forecast. 'Almost every private analyst knows the deficit is going to be at least $60 billion—and you'd think the administration is aware of this,' Mr. Maude says.

"'Either they aren't being honest to the market, or they don't have a handle on the budget—and either of those (possibilities) is highly disconcerting,' he concludes." (The Wall Street Journal, 8/28/81)

ALVAN MARKLE

"'You're seeing a classic case of "crowding out" in the fixed-income market,' Alvan Markle, who heads municipal research for Butcher & Singer Inc., said. 'The Treasury always gets its money, while corporations and municipalities scramble for what's left.'

"In his view, the worst is not over. 'I think all interest rates are going to rise further this autumn,' he predicted." (The New York Times, 8/25/81)

WILLIAM M. LEFEVRE

"'Wall Street likes to see results and the Reagan Administration has got a major problem with credibility,' William M. LeFevre, a vice president at Purcell, Graham & Company, said yesterday. 'The question is no longer whether the Administration can balance the budget—it's now doubtful that a balanced budget could be achieved by 1984—but whether the whole supply-side concept will ultimately work.'" (The New York Times, 8/26/81)

JAMES J. O'LEARY

"As James J. O'Leary, economic consultant to the United States Trust Company, observes, the collapse of the long-term bond and mortgage markets looks like a permanent revolution, dangerous to United States growth, as the big traditional investors in long-term obligations are cutting back in the interest of their own survival. Mr. O'Leary warns: 'Unless investors can be convinced that the odds are that the rate of inflation can and will be brought down significantly in the period ahead, the erosion in availability of fixed-rate, long-term funds will continue and long-term interest rates will move to even higher levels.'" (The New York Times, 9/2/81)

ALAN LERNER

"'The Fed can decide to monetize this huge debt,' says Bankers Trust Company money-market economist Alan Lerner, 'but if it does, it can kiss the long-run economic outlook good-bye.' Lerner, like Kaufman, believes that 'we will see historical highs in interest rates before the year is over.'" (New York Magazine, 8/3/81)

EDWARD YARDENI

"'Whereas the consensus has been that the economy is remarkably resilient in the face of these high interest rates, we are finding that the economy has turned much weaker as a result of the Fed's aggressively tight monetary policy,' says Edward Yardeni, the chief economist at E. F. Hutton. 'A decision has been made in Washington to deliberately engineer a period of protracted economic slack,' he notes. 'But the Fed, we've learned, if it errs, is going to err on the side of being too tight rather than too easy.'" (New York Magazine, 8/3/81)

DENNIS FARNEY

Dennis Farney, a columnist for the Wall Street Journal, says in his 8/31/81 column: "Indexing—combined with an unforeseen Minnesota recession—has been a political and budgetary disaster. There may be lessons here for President Reagan, who's just starting down the indexing path. . . . You can't help wondering: Is there a parallel here to President Reagan? Here in St. Paul, as in Washington, optimistic economic projections undergirded the indexing plan. The conventional wisdom was that Minnesota's diversified economy was all but recession-proof. The conventional wisdom was wrong."

JAMES R. CAPRA

Vietnam kicked off the current inflation, and the Reagan military buildup in the midst of huge tax cuts could give inflation another cruel twist. An analysis by James R. Capra in the current Quarterly Review of the Federal Reserve Bank of New York finds that the Reagan military buildup, con-

centrated in procurement, "will apparently far exceed the Vietnam procurement increase."

WASSILY LEONTIEF

Wassily Leontief of New York University, who won the Nobel Memorial Prize in Economic Science for his analysis of interindustry flows, has warned that enormous new military outlays will concentrate scarce capital in the military area and "will starve the rest of the economy on the investment it desperately requires to remain competitive in the tightening worldwide market."

ANTHONY LUDOVICI

Anthony Ludovici, vice president of Tucker, Anthony & R. L. Day Inc., said that prevailing high interest rates and a rapidly slowing economy that seemed to be bordering on another recession "is putting considerable downward pressure on the stock market."

LEONARD BROOKS

Leonard Brooks, Jr., investment strategist of Cowen & Company, said that the market would continue to decline until the rate of return on investment funds "narrows between money market funds and equity yields."

JAMES R. SCHLESINGER

James R. Schlesinger, economist, and Cabinet officer under three Presidents including Acting Budget Director and, later, Secretary of Defense in the Nixon Administration recently characterized the Reagan tax bill as "likely to go down in history as the single most irresponsible fiscal action of modern times." In his Washington Post column, Schlesinger went on to say, "The fiscal consequences may be briefly, if sadly stated. Unless tax reductions are reversed—which seem unlikely—on the basis of present legislation and projected defense spending, the nation faces growing budget deficits of $65 billion in 1982, $90 billion in 1983 and $120 billion in 1984. Non-defense reductions will be increasingly hard to achieve. Thus, only the total jettisoning of the Administration's goal of a balanced budget will permit even a modified defense buildup to survive."

THOMAS JOHNSON

Thomas Johnson, Executive Vice President of Chemical Bank, said: "The Reagan administration forecast a balanced budget based on unrealistic projections of growth and interest rates, and the bond market knows it." (The New York Times, 9/11/81)

ARNOLD X. MOSKOWITZ

" 'The new supply-side view is that deficits don't matter,' says Arnold X. Moskowitz, first vice president at Dean Witter Reynolds. 'We think that they do—deficits are simply not the hallmark of good economic management.' " (Newsweek, 9/21/81)

SAM I. NAKAGAMA

"Sam I. Nakagama, chief economist for Kidder, Peabody, argues that—far from doubting the Administration's veracity—the markets are taking Reagan at his word. 'They believe that there will be rising defense spending, that it will be difficult to make further cuts in non-defense spending and that we now have tax cuts that go on forever,' he says. 'That will all add up to deficits.' " (Newsweek, 9/21/81)

JACK W. LAVERY

"Lavery is executive vice president of Merrill Lynch Economics. 'There are some things that don't ring true in all of this. There is concern in the financial markets that Reagan's numbers don't add up,' he said." (The Philadelphia Inquirer, 9/11/81)

ROBERT H. CHANDROSS

"One big problem, said Robert H. Chandross, financial economist for Kidder, Peabody & Co., is the federal budget, which is being viewed in an increasingly gloomy way. Speaking to a meeting of the Baltimore Economic Society, he said the budget now looks as though it may stay in a large deficit position for a long period of time.

"He based that pessimism on several factors.

"One is doubt that the U.S. economy will provide robust growth or sharply reduced inflation in the near future. His forecast calls for 'modest' real economic growth (after inflation is subtracted) of 2-to-2½ percent a year between now and the end of 1982. Inflation will not decline much, remaining at an annual rate of 8½-to-9 percent, he said.

"Another problem, according to Mr. Chandross, is that interest rates are unlikely to drop much. He said any decline in short-term rates is likely to be small and of brief duration, and the drop will be reversed by early next year with rates by then 1 or 1½ percentage points higher than they are now.

"Beyond that, the final version of the administration tax bill Wall Street earlier had cheered now looks like 'they're giving away the store,' Mr. Chandross asserted. Government revenues will be reduced substantially and spending cuts will be limited by the political problems of cutting expenditures for the defense or Social Security programs, he said.

"He said that as a result of all those factors, which are part of the transition toward a different kind of economy than in the past, the Reagan administration already may be considering some tax increases. It now accepts, according to Mr. Chandross, that there will be large deficits and inflation during the economy's transition years." (The Baltimore Sun, 9/11/81)

DONALD MILLER

"Says Donald Miller, vice chairman of the Continental Illinois Corp.: 'Supply-side economics has been oversold, and people have come to expect too much.' " (Time, 9/21/81)

MARTIN FELDSTEIN

"Adds Conservative Economist Martin Feldstein, president of the National Bureau of Economic Research: 'I think the Administration hurt itself by a series of unbelievable statements, starting with those optimistic forecasts about growth of the economy.' " (Time, 9/21/81)

ROBERT LUCAS

"Said Robert Lucas, professor of economics at the University of Chicago: 'This Administration has committed itself to a whole series of tax cuts, and it's going to be hard as hell for them to reverse course. They have locked themselves into some very tough arithmetic, especially since they have been overoptimistic about the benefits of the tax cuts.' " (Time, 9/21/81)

FRANCIS H. SCHOTT

"Says Francis H. Schott, chief economist for the Equitable Life Assurance Society: 'Guys like Economist Art Laffer and Congressman Jack Kemp are O.K. to have around as long as you just take note of what they say and look for the kernel of truth in it. But you don't necessarily do what they prescribe. That's just a prescription for disaster.' " (Time, 9/21/81)

AUDREY FREEDMAN

" 'It might be easier politically to rescind part of the tax cuts,' said Audrey Freedman, labor economist at the Conference Board, a business-sponsored economic research organization, 'than go through the additional cutbacks in defense and social program spending that will be required if the President is to reach his deficit target; something is going to have to give.' " (The New York Times, 9/15/81)

LEONARD SANTOW

" 'What we are really talking about,' said Leonard Santow, senior vice president and economist for the J. Henry Schroeder Bank and Trust Company, 'is a complete reassessment of the entire Reagan program and the premises upon which it was based.'

"In his view, the Administration is 'finally coming to realize what the financial markets realized a long time ago: that the tax cuts have tied their hands on the receipt side.' He said, 'Unless they cut more spending or introduce some new form of taxation, the Government deficit in fiscal 1982 will be an inflationary $15 billion to $20 billion more than the $42.5 billion they have projected.' " (The New York Times, 9/15/81)

Mr. EAGLETON. Finally, Mr. President, what the Reagan administration is faced with is an internal economic war amongst its own key people.

On the one hand, you have the JACK KEMP "monetarist school"—including Sprinkel, Ture, and Roberts at Treasury—who believe, to use Mr. KEMP's own phrase, that "Republicans no longer worship at the shrine of a balanced budget."

On the other hand, you have some "traditionalists" like Secretary Regan and OMB Director Stockman who do believe that huge deficits mean a hell of a lot.

The Reagan administration, first of all, must resolve its own economic civil war. After it has done that, it then must face up to the incredible revenue drain caused by the bloated $750 billion tax cut, recently enacted into law. If defense spending is still an "untouchable"—the President's slight nudge of a $13 billion defense cut over 3 years so indicates—then the President must contemplate increasing Federal revenues or making such draconian domestic budget cuts as are almost too frightening to contemplate.

As Henry Kaufman has said in a recent Newsweek interview:

We are in a difficult position, from which we have limited chances to extricate ourselves unless we take draconian measures.

## ORDER OF PROCEDURE

Mr. CRANSTON. Mr. President, I yield back the time that was allocated for Senator HOLLINGS. He will not speak this morning.

## ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 5 minutes with statements therein limited to 1 minute each.

## THE DEVASTATING EFFECT OF HIGH INTEREST RATES

Mr. BOREN. Mr. President, each day when I rise to speak about the devastating effect that high interest rates are having on the economy, I do so with the hope that I can bring good news to my colleagues in the Senate. News that interest rates are coming down or that the administration is proposing some action that will lead to that desired result.

Unfortunately, each day I have only been able to recite a litany of worsening

economic conditions and continued stubborn inaction by the administration. Such is the case today.

The announcement was made today that the home mortgage rate last month increased another full percentage point to 17½ percent. That is a record high for Government-backed home mortgages. It means that young farm couples in Oklahoma and others across the country are 1 percent further away from ever hoping to own their own home. This is a tragic commentary on the economy of the greatest Nation in the world.

One might expect the administration to take note of this latest worsening of the interest rate vice. However, that does not seem likely in view of the most recent statements by the Secretary of the Treasury, Donald Regan.

Mr. Regan this morning reiterated that he sees no signs that the Federal Reserve Board will lessen its monetary policy. Indeed, with the apparent approval of the Secretary of the Treasury, there is little hope that the Fed will ease the tight money policies it has pursued, even in the face of this latest evidence that we are moving rapidly in the wrong direction.

Frankly, Mr. President, it is entirely proper to begin to wonder whose side the Secretary of the Treasury is on. There are a considerable number of people who look at Secretary Regan and see a person who aggressively supported money market strategies in the past and many are expressing concern over whether he understands or has compassion for the average American citizen's economic difficulties in these times.

When these sorts of questions are asked of me by people in Oklahoma, or in other parts of the country, I must confess I am at a loss for a proper response. I would hope that such questions could be answered with reassuring words, but if the old adage that "actions speak louder than words" is true, then such speculations about the Secretary of the Treasury become hard to refute.

In any event, if the home mortgage rate continues to climb then the proper and indeed the only place to find a short term solution to the high interest rate dilemma lies with the administration. That solution will not be found in the not-so-tacit approval of the actions of the Federal Reserve Board by the administration's chief economic spokesman—the esteemed Secretary of the Treasury.

## THE PRODUCTION AND DEPLOYMENT OF NUCLEAR WEAPONS

Mr. LEAHY. Mr. President, in Vermont and throughout the United States, there is a growing awareness of the danger posed to all of us by the unrelenting production and deployment of nuclear weapons. I share this concern, and ask unanimous consent that the following article which I wrote for the Burlington (Vt.) Free Press on August 6, 1981, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

### WE CAN PULL BACK FROM BRINK OF NUCLEAR WAR

(By PATRICK J. LEAHY)

In his recent television series on the cosmos, Professor Carl Sagan offered a startling idea: in our universe, thousands of planets have developed great civilizations, mastered the atom, and then destroyed themselves. Only a few have escaped this cycle of progress and self-immolation.

Sagan's speculation is designed to shock whether it is valid or not. In one respect, however, it is also right on the mark. Our own planet has reached the nuclear threshold. The superpowers have developed a capacity to destroy each other and much of the rest of the world, and that awesome capacity continues to grow. Without major change, today's generation faces the probability of a nuclear war which could leave the earth virtually uninhabitable.

This frightening prospect overwhelms all other issues. Inflation, unemployment, deprivations, violence in our society, the population explosion and the depletion of our natural resources—these are all secondary in importance to the threat of nuclear war.

We prefer not to talk about the prospect of the self-destruction of our civilization, not only because we recoil at the thought of a holocaust, but because questions of nuclear proliferation and verification are so difficult to understand.

The prospect of nuclear war is so frightening that we prefer to think it could never happen. We hope the next generation will discover new ways to render nuclear weapons inert before they reach their target.

All of this is wishful thinking. Already the danger of nuclear war is a "clear and present" one and not simply a contribution to fiction horror stories.

I cannot cover all facets of the nuclear weapons debate here in a few paragraphs, but I would like to begin a discussion of the issue by concerned people in Vermont.

My own interest also reflects a growing concern that by ignoring the nuclear nightmare we have, in effect, heightened the danger that we will delay beyond the point of averting calamity. In this article, I hope to outline the principal parts of the debate as I see them, and to invite Vermonters' discussion.

Some basic premises are in order. The first is that nuclear proliferation and arms control cannot be considered in a vacuum. We have compelling and legitimate foreign and defense needs and we must address a wide and growing range of problems at home and abroad at the same time as we take a good hard look at the danger of nuclear war.

Second, we must realize that there are no simple or final solutions, whether they be unilateral disarmament at one extreme or a frenzied arms race on the other. Simple solutions serve only to hide the complexity of the problem, and they distract us from the painful and thorough examination of options needed.

Third, reasonable options have both merits and drawbacks, and our choices must take this into account.

Fourth, we must recognize that reining in the nuclear arms race is a moral imperative as well as a political goal.

What are our options? Two options are clearly unacceptable: unilateral disarmament and undisciplined expansion of our nuclear arsenal.

I lack any faith that the Soviet Union would follow the example of unilateral disarmament. At the other extreme, a policy of nuclear arms expansion and no negotiations, at least until the United States has established a clear superiority in nuclear weapons, won't work.

Not only is such a goal unattainable with today's technology, but this policy would delay the resumption of substantive negotiations for at least several years. This raises the possibility of a nuclear confrontation in the interim. It also means that yet another generation of sophisticated and extraordinarily expensive weaponry on both sides would be in place to complicate negotiations.

I would hope this country would not naively trust the Soviet Union without verifiable safeguards. At the same time, we must assume that the Soviets, like us, know it's in their best interest to have a cap placed on the arms race, and that the Soviet leadership is prepared to share with us the heavy responsibilities of making a settlement work.

We have already seen, nonetheless, how difficult it is to negotiate with the Kremlin, and we must face problems posed by a search for a satisfactory verification system.

We want an early and even dramatic pullback from the abyss of nuclear war, but we also need to resolve difficult technical problems. We must keep in mind the interests of our allies, and recognize the chilling fact that other nations are taking out membership in the nuclear club.

At the risk of oversimplification, I see four bilateral, general proposals deserving serious consideration: (1) a moratorium on the production and installation of new weapons systems; (2) an across-the-board reduction of all nuclear (and perhaps conventional) weapons systems; (3) a reduction of nuclear weapons (and possibly non-nuclear weapons) and forces in a particular geographic region, especially Western and Eastern Europe; (4) ratification of a Strategic Arms Limitation Treaty and an early start on another round of negotiations.

In each case we must be absolutely certain that there are adequate means to insure that the reduction in armaments is equitable, that the Soviet Union complies with the agreement and that the relationship with the Soviet Union is not based simply on trust.

Each option, of course, raises serious problems. Would a moratorium on production and deployment of nuclear weapons grant the Soviet Union a substantial advantage in the European theater? Would the Soviet Union be able to accommodate its concern about China in proceeding with an across-the-board reduction? How useful would a European theater reduction be in the context of an escalation of the arms race elsewhere?

Finally, how much enthusiasm exists within the Reagan Administration for a resumption of SALT talks? It is quite clear that prospects for ratification of SALT II are remote, and that some administration advisers are urging an extended delay before beginning new talks. It would be a shame to lose the momentum towards a settlement established in early negotiations.

The list of problems is very long indeed. But time is short. If we allow ourselves to be overwhelmed by the political and technical problems posed by any effort to reverse the nuclear arms race, we will further reduce the prospects of avoiding a catastrophe of proportions never before faced by mankind.

Pessimists say that the march to destruction has already proceeded to a point where it cannot be reversed, that the Earth will be counted among those civilizations of Professor Sagan's hypothesis which failed to curb the destructive use of nuclear power.

Optimists believe that there is still a chance to pull back from the brink. If we have the will we can prove the optimists right.

## THE NEW ECONOMIC RHETORIC

Mr. HOLLINGS. Mr. President, this spring, the Reagan administration told the country how to get itself out of its se-

rious economic difficulties. The President asked Congress to enact massive spending cuts and to pass a large tax cut. He promised that this combination would restore the country's economic vitality and bring us to the promised land of a balanced budget by fiscal year 1984. Congress complied by doing just what the President asked. We gave him the largest budget cuts in history. We gave him the Reagan-Kemp-Roth tax cut. The President left town in a blaze of glory at the end of July, and Congress basked in the reflection.

Supposedly, the corner had been turned and the economic atmosphere had been completely changed. All would be well, we were assured by the apostles of the new wisdom. The unity of theory and practice had finally been achieved in the theology of supply-side economics—the faith of George Gilder made tangible by the good works of David Stockman.

Not all of us, of course, were taken in by the new economic rhetoric. And now, our fears are proving to be true. Just 1 short month after passing all of the administration's economic program, those promises of a corner turned and an economy invigorated ring hollow. The stock market has dropped out. The prime interest rate remains above 20 percent. Ninety-day Treasury bills draw over 15 percent interest. And we end the fiscal year with the discouraging news that instead of budget deficits shrinking, the prognosis is for far more red ink than the administration had ever planned on. Instead of the $42.5 billion deficit predicted by the administration as late as just a few weeks ago, we are now looking squarely in the face of a 1982 deficit of as much as $65 billion. It gets worse, not better, in the outyears—as much as $70 billion in 1983 and $80 billion and more in 1984. No wonder Wall Street is not convinced. No wonder the market has dropped 100 points since August. The bottom line of the national budget is not improving. All the trauma of cutting programs we have been through in recent months, all the lobbying and cajoling have yielded no improvement in the bottom-line figures.

By irresponsibly diminishing Government revenues, and by promising guns and butter both via increased defense expenditures and decreased taxes, the Reagan administration is inevitably headed toward 4 more years of busted budgets and high inflation. Dress it up in the fancy new title of supply-side economics, present it as a revelation from on high, paint it how you want—it is the same old tired economic practice that has been tried and found wanting for a decade and more.

"The old business as usual treatment can't save us." President Reagan told the Nation on February 5. And then he prescribed, you guessed it—business as usual. For a Congress that had cut income taxes in 1964, again in 1969, again in 1971, twice in 1975, again in 1976, again in 1977, and again in 1978, there was no novelty in the Regan proposal for yet another reduction in tax revenues.

Fundamental flaws inhered in the Reagan administration approach to budgeting and taxes.

Flaw No. 1 was the idea that by spending cuts alone we could achieve a balanced budget. I applaud the President for his diligence in helping the Congress cut $35 billion in 1982 through the reconciliation bill. Last year, you may remember that the Democratic controlled Congress enacted reconciliation cuts reducing $8 billion from the deficit. The main point, however, is that we have been fooling ourselves. We have been cutting programs right along, and congratulating ourselves on the cuts. But we are almost to the point of trying to get blood out of the turnip. There is not much there.

There is still the need for additional budget cutting, but we will not reach a balanced budget with spending cuts alone. In order to eliminate the kind of deficits we are looking at now, and still preserve funding for defense and interest payments in the social "safety net" that the President has promised to maintain, we would have to cut approximately 60 percent of the rest of the budget in 1984. No Congress is going to make cuts on that order and no President is going to propose them.

Flaw No. 2 was the decision that entitlement and tax expenditure programs were sacrosanct. Nobody underestimates the difficulty of tackling entitlements. Certainly I do not underestimate them. But the lesson of all the budget exercises we have been through thus far in 1981 is clear: There is no painless way to balance the budget. It cannot be done by sleight-of-hand, public relations wizardry, or fine tuning. It requires a frontal assault against the excesses which have pushed your Government and mine to its present budgetary condition. But the President chose not to lead, and not unexpectedly, Congressmen and Senators were not champing at the bit to take this one on without Presidential support.

Flaw No. 3 is the proposal to impound spending. Rather we should be impounding the tax cut. The impoundment proposal assumes, Mr. President, that the Congress is going to appropriate more than is needed. There is nothing in the record of this Congress to support such an assumption. Consequently, there is no reason to give the President blanket power to impound spending. Uncontrolled Presidential impoundment would destroy the discipline of the budget process.

I was here when Congress reasserted its constitutional prerogatives in fiscal matters against the illegal and unprecedented actions of the Nixon administration. I did not participate in that exercise only to relinquish the same power in September 1981. There is talk of the administration's courage and bravery because it is willing to take this responsibility. There is talk about a proviso that both Houses have a veto over any impoundment, so that we would have a shared responsibility. That is the typical Washington solution—a shared approach with no fixed responsibility. It is bad. It breaks our fiscal discipline and destroys the credibility of the budget process we have worked so diligently to vindicate. How much better to have a fair fight, an up or down vote, on the appropriation bills, and let the President, if he thinks there is too much money appropriated in any bill, veto it. I believe the mood in these Halls is such as to sustain such action.

The summer confidence of August has turned to the doubting despair of September. It is apparent that the administration underestimated the magnitude of the economic problems it confronted. It is clear that it is not just a matter of time until the new policy takes hold and turns America around. It is obvious that tinkering and patchwork and fine tuning cannot salvage the misbegotten economics of the new theorists. It is not so simple as designating a sweepstakes winner in the Stockman-Weinberger debate.

White House and Capitol Hill are a cacophony of conflicting voices. The majority leader tells the Senate that Wall Street is addicted to the heroin of high interest rates. The chairman of the Budget Committee advocates the McGovern program of cutting $30 billion from defense. Every day brings its new confusion and I am reminded of the old saying aboard ship, "When in danger, when in doubt, run in circles, scream and shout." What is wanting is not proposals, but a comprehensive proposal. What is wanting is not the desire for a solution, but the realization that there is no painless, piecemeal solution. The only viable approach is a comprehensive package addressing the stark budget choices we confront. In such a comprehensive solution, we will find real reconciliation. The second concurrent budget resolution which this committee begins to address today offers us the opportunity for that kind of reconciliation.

Early on, President Reagan said: "If you do not like my plan then submit an alternative." That is the kind of politics I understand. I submitted an alternative solely on the supply side, limited to $20 billion, rewarding savings and stimulating investment. That plan failed in spite of the fact that a majority of my Democratic colleagues here favored it. In the same spirit of trying to be constructive and of responding to the compelling urgency of the situation, I am today proposing a comprehensive package which I hope will eventuate as part and parcel of the second concurrent budget resolution. I would hope that the experience of the past few weeks would lend credence to the effort.

Everyone around this table has been home during the recess and knows the stark impact of high interest rates on his or her constituents. Everyone around this table now understands that Wall Street and the financial community in general cannot be persuaded by pious musings and "sophomore psychology." We should all be able to see as of September 15, 1981, the effects of the President's program: Huge deficits, stretching out as far as the eye can see, to the tune of $60, $70, $80, perhaps $100 billion and it is not just Wall Street that is affected by those defi-

cits, because when the Government goes out to borrow the funds, private investors and consumers all across this land are unceremoniously bumped out of the capital market.

Let us tell it like it is—the administration assured us that if only Congress would put the program in place, the economy would respond with a rush of new activity. The assurance was wrong. The economy has responded with incredulity. We cannot wait 6 months more for results. Interest rates are at their highest level in history, the housing and automobile industries are at rock bottom levels of activity. Congress is faced with the urgency in this second budget resolution not of fine tuning a game plan whose wisdom is already vindicated—it is faced instead with the need to remedy the defects of the program so recently approved. I believe that the package I am proposing today provides this remedy.

I have two tables which summarize my proposal and I ask that they be inserted at this point in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

REVENUE AND SPENDING CHANGES

| | Budget impact (in billions) | | |
|---|---|---|---|
| | 1982 | 1983 | 1984 |
| REVENUE CHANGES | | | |
| Smaller personal tax cut (5/5/5 percent) | | +$25.0 | +$40.0 |
| Repeal indexing provision in tax bill | | | |
| Repeal oil industry tax breaks | +$1.3 | +1.7 | +2.2 |
| Repeal deduction for intangible drilling costs | +3.0 | +3.5 | +4.1 |
| Windfall profit on natural gas | +15.0 | +12.0 | +9.0 |
| Repeal consumer debt interest | +6.0 | +7.1 | +8.0 |
| Total, revenue changes | +25.3 | +49.3 | +63.3 |
| SPENDING CHANGES | | | |
| President's defense budget | −2.0 | −5.0 | −6.0 |
| Reduced interest costs from lower interest rates | −6.0 | −9.0 | −12.0 |
| Total, spending changes | −8.0 | −14.0 | −18.0 |
| Total, reduction in the deficit | −33.3 | −63.3 | −81.3 |
| Federal budget surplus or deficit (-): | | | |
| Using CBO economic assumptions | −32.0 | +8.0 | +31.0 |
| Using Hollings economic assumptions | −42.0 | −17.0 | |

ECONOMIC ASSUMPTIONS

[Calendar years]

| | 1981 | 1982 | 1983 | 1984 |
|---|---|---|---|---|
| Real GNP (percent change): | | | | |
| Hollings | 2.0 | 1.6 | 3.2 | 3.0 |
| CBO | 2.3 | 3.1 | 4.1 | 4.0 |
| Administration | 2.6 | 3.4 | 5.0 | 4.5 |
| Consumer prices (percent change): | | | | |
| Hollings | 9.9 | 7.9 | 7.6 | 7.4 |
| CBO | 10.1 | 7.2 | 7.0 | 6.2 |
| Administration | 9.9 | 7.0 | 5.7 | 5.2 |
| Unemployment rate (persons): | | | | |
| Hollings | 7.4 | 7.7 | 7.4 | 7.1 |
| CBO | 7.4 | 7.3 | 6.9 | 6.5 |
| Administration | 7.5 | 7.3 | 6.6 | 6.2 |
| Treasury bill rate (percent): | | | | |
| Hollings | 15.0 | 14.2 | 12.7 | 11.7 |
| CBO | 14.5 | 12.4 | 11.4 | 10.1 |
| Administration | 13.6 | 10.5 | 7.5 | 6.8 |

Mr. HOLLINGS. Now, Mr. President, let me elaborate a little on these various points.

My first proposal would be for a smaller personal income tax cut. We simply cannot afford a large across-the-board personal income tax reduction. I like tax cuts. All politicians like tax cuts. But when we are increasing defense spending by $100 billion by 1984, how can we afford to cut taxes by $150 billion? Something has to give; the numbers in the President's plan just do not add up to a balanced budget. And a balanced budget is what the people of this country want and what our economic condition compels. In poll after poll last year and this, the people put a balanced budget at the top of their list of priorities, followed by increased defense spending. To be sure, tax cuts are desired, but not before we balance the budget. The American people know, just as Wall Street investors know, that you cannot live forever on borrowed money. A government cannot operate on borrowed money without destroying the private economy.

The situation is that we now have a tax law which does not please the very people the Republican Party wanted so badly to please—the business and investment community. It is not enough to say, "Wait, give it 1 more month or 2 more months or 6 more months." The country cannot wait. The atmosphere that was supposed to be created by the new tax law is myth. All the while, high interest rates are crippling our domestic economy and causing unprecedented havoc overseas.

What can be done about it? It is not too late, Mr. President. But we must act now. We must undo the damage of that tax bill—the one James Schlesinger called the "single most irresponsible fiscal action of modern times"—by reducing the size of the second and third years of the across-the-board cut by half.

The administration's tax cut has devastated the revenue posture of the Government. The tax cuts cost us $93 billion in 1983, $150 billion in 1984, $199 billion in 1985, and $266 billion in 1986. The only outcomes guaranteed by that kind of revenue loss are budgeting in the red, high interest rates, and continued inflation. I worked on the last balanced budget we had in this country—the $3.2 billion surplus which Lyndon Johnson bequeathed his successor in 1969. Now, under the program I am proposing today, we will have, after 15 years of deficits, a balanced budget for fiscal year 1984. The American people will suport this proposal because they understand that the alternative is high interest rates. They will support it because they understand that in the present environment, Kemp-Roth tax cuts provide no genuine relief. Once the budget is in balance and Government's fiscal house is in order, we can proceed with the kind of thoroughgoing and genuine tax relief which all of us want to have.

Second, I propose the immediate repeal of the ill-considered and hastily enacted provision for indexing the income tax. Indexing, scheduled to take effect beginning in 1985, was the most irresponsible provision of all in a bill made distinctive by its irresponsibility. If we start indexing tax rates, we will soon be unable to pay for even the barest-boned Federal Government, national defense, and social security. I think even George Gilder would agree we need those programs.

Third, I also recommend repeal of the oil provisions that were included in the tax bill. Quite candidly, I think that the Congress put politics above reason when it included the royalty income, stripper well and new oil provisions in the tax act of 1981. How can the Congress justify such tax expenditures in light of the budget reductions that were just approved in the Reconciliation Act of 1981? Big Oil is making obscene profits. How can we propose reductions in social security and child feeding programs and at the same time give independent oil companies and royalty owners these unwarranted tax breaks? How can a Member of Congress say that he or she is for a balanced budget in fiscal year 1984 and then turn around to spend $11.6 billion which can only exacerbate the deficit? The inclusion of these provisions in the tax bill was neither sound economic policy nor sound energy policy. I therefore recommend that these provisions be brought to the floor for reconsideration in the form of an amendment repealing the appropriate tax provisions.

Fourth, I propose repeal of that provision of the internal revenue code of 1954 to eliminate the expensing of exploration and development costs of oil, gas, and mineral extraction. Since this tax expenditure was enacted, it has been justified as the stimulus to mineral exploration. However, since 1954 there have been significant changes in the energy situation of the United States. I need not recall all of these changes, but they eventuate, as we all know, in decontrol. Yet, despite all of these changes and despite "decontrol," the "intangible drilling cost" provision remains on the books. Presently, approximately 99 percent of the revenue loss associated with intangible drilling costs involves oil and gas exploration, and this loss is now equivalent to $3 billion per fiscal year.

Fifth, I have long been and continue to be an ardent opponent of the decontrol of natural gas. The gas companies, and the oil companies which are entering the gas business very heavily, are making billions on natural gas in the present environment. However, it is apparent also that the administration will soon submit, and the Congress will approve, legislation decontrolling natural gas. I have therefore come to the conclusion that we should proceed with immediate decontrol and with a windfall profit tax to mitigate the impact of decontrol. I would initially propose that this tax be for a period of 5 years or until such time as $40 billion in revenue has been raised.

I continue to be concerned with the impact natural gas decontrol will have on consumer purchasing power, especially low income residential consumers, and on the economy as a whole. Nevertheless, I can read the political omens and insofar as decontrol is concerned, the future

is almost now. The only way to achieve decontrol while attempting to minimize its impact on the economy and on the consumer is to implement a natural gas windfall profit tax. Not only would this mitigate some of the unforeseen consequences of natural gas decontrol, but it would also provide needed revenues, thereby substantially reducing the Federal deficit.

My sixth proposal is repeal of the consumer debt interest deduction. At a time when we are trying to balance the Federal budget and promote investment and savings, it no longer makes sense to encourage consumers to make all of their purchases on credit by allowing the interest on this debt to be deducted from taxable income. An economy concerned with increasing savings and productivity should not be in the business of allowing a tax write off for interest paid out while at the same time it taxes interest income. So, this change would be sound public and economic policy. Additionally, it will return $21 billion to the Treasury over the next 3 years.

Seventh, my proposal would go along with the President's recent announcement to reduce the size of the increases in the Defense budget. We can afford a few savings in this area, while still increasing overall Defense expenditures by 7 percent a year.

Finally, the above proposals translate into lower interest costs because of a decline in interest rates. The tax changes I have proposed today represent a responsible fiscal policy—the kind of fiscal policy which will open the way toward an eased monetary policy. No longer will the burden fall exclusively on the monetary side. Instead fiscal and monetary policy will be working together to achieve the kind of economic stability which has been so sadly wanting in America these past 15 years.

The bottom line of the Hollings plan, using the economic assumptions of the Congressional Budget Office, is a budget in balance for fiscal year 1983. There are those, myself included, who believe the CBO assumptions are optimistic, even though they are not nearly so rosy as the administration's. But even under the less optimistic assumptions that I have prepared, we would still achieve a balanced budget for fiscal year 1984. This plan may strike some as being politically unpalatable, but it strikes me as economically and politically imperative. We are at a true crossroads in public policy. The decisions we will be making this month and next will determine the future—America's future. Let us seize the moment boldly and enact the kind of comprehensive program which alone can get America moving again.

It requires no revelation from on high, no bright new economic insight, to fathom whither we must go. It requires only an appreciation of the good sense of the American people. They know what needs to be done in 1981 and they will sacrifice to achieve success. Sacrifice is the offspring of leadership, and the present leadership in both the executive and legislative branches will fail America unless it faces up to the difficult choices confronting Government today. We in the Congress will shortly begin writing the next chapter of the story. I hope it is a chapter of vindication for a Government that has too often in the recent past failed to discharge its solemn responsibilities.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The period for morning business is concluded.

## AGRICULTURE AND FOOD ACT OF 1981

The PRESIDING OFFICER. Under the previous order, the hour of 11:15 a.m. having arrived, the Senate will now resume consideration of the pending business, S. 884, which the clerk will state.

The legislative clerk read as follows:

A bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

The Senate resumed consideration of the bill.

PREVENTED PLANTINGS

Mr. COCHRAN. Mr. President, a question has come up with regard to the interpretation of the language for the acreage reduction program which makes the authority of the Secretary unclear.

Specifically, when the Secretary announces an acreage reduction program off last year's acreage, he can take into consideration any prevented plantings a farmer may have encountered.

The Secretary also has the option of requiring farmers to reduce acreage from the average planted in the 2 previous years.

However, there is some question whether or not the Secretary can adjust for any prevented plantings when using the 2-year average.

Mr. President, I would like to ask the managers of the bill if it is their understanding that, when the 2-year average is used, the Secretary may take into consideration prevented plantings in each of those years.

Mr. HELMS. Mr. President, the Senator is correct. It was the intention that the Secretary would have the same authority to adjust for prevented plantings when he uses the 2-year average acreage as he would when only using the previous year's acreage as the base.

Mr. HELMS. Mr. President, I yield to the distinguished Senator from Iowa (Mr. JEPSEN).

UP AMENDMENT NO. 356

(Purpose: To revise the dairy price support provisions)

Mr. JEPSEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Iowa (Mr. JEPSEN) proposes unprinted amendment numbered 356.

Mr. JEPSEN. Mr. President I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 134, beginning with line 13, strike out all through line 12 on page 135 and insert in lieu thereof the following:

"SEC. 103. Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by—

"(a) deleting everything after the first sentence in subsection (c) and inserting in lieu thereof the following:

'Notwithstanding the foregoing, for the period beginning October 1, 1981, and ending September 30, 1985, the minimum level of price support for milk shall be 70 per centum of the parity price therefor: *Provided*, That whenever the Secretary estimates that the net cost of Government price support purchases of milk or the products of milk will exceed $750,000,000 if the support price for milk is established at the level required by the foregoing provisions of this subsection, such level of support may be adjusted to the extent the Secretary deems appropriate but not to a level less than the support level for the prior marketing year: *Provided further*, That the support price shall in no case be less than $13.10 per hundredweight of milk containing 3.67 per centum butterfat: *Provided further*, That the level of support for milk for the remainder of the 1981–82 marketing year may be adjusted in accordance with the foregoing although a level of support for such year has been established prior to the effective date hereof. Such price support shall be provided through the purchase of milk and the products of milk.'; and "(b) repealing subsection (d)."

Mr. JEPSEN. Mr. President, I am proposing an amendment today which would revise the dairy price support program. My amendment would give the Secretary of Agriculture discretion to set the price support level between 70 and 90 percent of parity for the next 4 milk marketing years. At no time could the support price during this period be below $13.10 per hundredweight which is the current level. The Secretary would be authorized not to increase the level of support during any year in which net outlays for the program were projected to exceed $750 million.

This amendment is designed to give the Secretary of Agriculture the needed flexibility to bring the cost of the dairy price support program under control and at the same time assure producers that their current level of support will not be reduced.

The dairy program has served this Nation well. Both consumers and producers have benefited over the long run. However, we have unfortunately reached a point in recent years where the costs of the program have become excessive. Production of milk has been expanding too rapidly—at a rate of about 3 percent per year. The increasing of prices of dairy products brought about by the support level increases of the 1977 Farm Act

have slowed consumption. Unfortunately, consumption of milk and dairy products dropped about 1 million pounds in 1980 and has held at that level until the present time. This has meant that the Commodity Credit Corporation has been forced to purchase vast quantities of nonfat dry milk, butter, and cheese.

For the current 1981 fiscal year CCC will remove 12.6 billion pounds milk equivalent from the market at a cost of $1.986 billion. After taking into account sales receipts the net expenditure to the Commodity Credit Corporation for fiscal year 1981 is estimated to be $1,886 million. This is $875 million more than was spent in fiscal year 1980 and $1.3 billion more than was spent on the average during fiscal year 1976 through fiscal year 1980.

It was hoped that the legislation Congress passed last spring to forego the April 1 price support increase would slow the increase in production. However, the slowing in the increase in milk production that was expected has simply not materialized. Output per cow and cow numbers are still increasing at rates only slightly below those for the same period last year.

My amendment will help dairy producers work out of the problem of excess supplies. The cost of my amendment is about $1 billion less than the current provision in S. 884 over the life of the bill and is more in keeping with the twin objectives of providing adequate support and reducing budget outlays.

During hearings on the farm bill, and even during committee markup, comments were made that action should be delayed on milk supports. A few held the belief that the dairy farmer would adjust to the current oversupply situation. Unfortunately, developments during the past few months have not been on the dairymen's side.

I shall make personal note at this point that I speak here in the Senate today as an individual who has immediate family on our family farm that have within the last year reentered the dairy business with a rather substantial investment.

I have visited with them about this, and with all my heart I can say that fresh milk, the dairy support program as it has been conducted in the past, has been healthy generally for this Nation.

We unfortunately have a situation with the combination of an economic recovery program and a redirecting of this country by way of economy and a huge surplus of milk and milk products that have resulted in the amendment that I am proposing this morning to be brought into focus, an amendment that I believe to be fair, an amendment that I believe to be workable, doable, and an amendment that will be commensurate with the entire climate of this administration, of this country, and one that will be fair in the long run to all people in milk production.

Milk production continues well ahead of last year. On August 1 production was 3.8 percent ahead of last year. Sales, on the other hand, showed very little change.

I point out by way of facts for the record that these are not meant to be offered in any critical sense but in a very factual sense by way of backup for some of the reasons for proposing this amendment at this time.

Cow numbers are at their highest point since 1977, and the demand for replacements continues strong. Dairymen were paying an average of $1,200 for milk cows on July 15—the highest for that date in history. This is double the amount paid just 3 years ago. These prices are firm despite record numbers of replacements available. The 4.6 million dairy heifers reported by USDA on July 1 represent one potential replacement for each 2.3 cows in milking herds. Thus, the industry not only has the largest number of heifers being saved but also has the highest ratio of heifers to milking cows in recent history—accompanied by record prices.

Meanwhile Government purchases and stocks of dairy products are setting new records. The milk equivalent of dairy products purchased through August 28 exceeded 12 billion pounds. Butter stocks on hand August 15 amounted to 440 million pounds versus 278 million last year. Cheese 542 million versus 198 million, and nonfat dry milk 755 million versus 597 million a year ago. Butter is 50 percent and cheese purchases are about 150 percent ahead of last year at this time and nonfat is up about 30 percent.

There is no indication production is moderating.

Mr. President, in closing I would just say this: That as a Senator with a constituency that is overwhelmingly agricultural, as a Senator who has direct agricultural and farming family interests, as a Senator from a great agricultural State, the State of Iowa, it gives me no great pleasure to offer an amendment which is somewhat more rigid in support than the proposal in the original S. 884.

I point these things out to you as a caution that this amendment has been agreed to and been accepted by the Department of Agriculture and this administration as fitting within the total scope of their entire budgeting program and the economic recovery program the President has espoused, and has had the overwhelming support of the people throughout this country as well as the obvious support from both Houses of this Congress by noting the votes on the tax reduction bill and on the reconciliation bill which, for the first time in history changed many hundreds of laws and entitlement programs that had been providing blank checks so that for the first time the Government can start doing what it ought to have been doing a long time ago, and that is handling the taxpayers' money as if it was their own and developing a climate and an atmosphere here that you do not spend more money than you take in over a period of time because you cannot do that and remain a viable institution or operation, I am proposing this amendment today and hope we can pass this amendment and get on with this farm bill.

We have until the end of this month—we really do not have until that time—but at the end of this month I suggest that if we do not have a farm bill in place for the next 4 years, we will resort to and revert by law back to the 1949 farm legislation, which could be very, very expensive—in fact, it would be financially prohibitive in these times.

Let me conclude by saying that this is a bill which, in addition to setting various prices and supports and loans of various programs which are going to be debated, establishes a thrust and creates a climate which is a signal to the agricultural community in this country that the Department of Agriculture will serve and work as a partner in providing for what ultimately has to be the case in all agricultural activities, and that is a profitable economy.

Profit is the bottom line in farming as in everything else. We have had over the years cheap food policies, we have had over the years the Government interfering and tinkering with the closest thing to a free economy that we have, the farm law of supply and demand in marketing products.

Farmers have done a fantastic job at being the most efficient food producers in the world. They are the only part of our economy we have today which is highly productive and, as the breadbasket of the world, America's farmers produce enough food today. Each farmer now individually produces enough food to feed 60 other people. There is not anyone anywhere on the entire globe who comes close.

We want to encourage, we want to support with everything within my office, my constituency, and with every fiber of my body I will see that that is done. That I pledge.

I thank the Chair.

May I inquire of the distinguished chairman of the Committee on Agriculture what is his desire at this time as far as procedure on this amendment is concerned?

Mr. HELMS. I will say to my friend from Iowa, Mr. President, that there is consultation as to the next step in this process. It may be that the distinguished Senator from Minnesota will wish to address the Senator's amendment. The Senator's question might be more properly directed to Senator [illegible]

In the meantime, Mr. President, I suggest the absence [illegible]

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that the pending amendment be laid aside temporarily and that it be the pending business fol-

lowing an amendment to be called up by the Senator from Nebraska (Mr. ZORINSKY).

The PRESIDING OFFICER. Is there objection?

Mr. JEPSEN. Mr. President, reserving the right to object, may I inquire of the distinguished Senator from Nebraska and the distinguished Senator from North Carolina how much time they anticipate this may take? I advise the Senator from North Carolina that I am a cosponsor of the amendment that Senator ZORINSKY is advocating. Do the Senators anticipate any difficulty with this?

Mr. HELMS. As to time, Mr. President, I would say 5 to 10 minutes at the outside.

Mr. ZORINSKY. Not to exceed 5 minutes, Mr. President.

Mr. JEPSEN. I have no objection, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ZORINSKY. I thank the distinguished Senator.

UP AMENDMENT NO. 357

(Purpose: To reaffirm United States policy in fostering family farms and require that the annual report of the Secretary of Agriculture include an assessment of how tax, credit, and other laws affect the growth of non-family farm operations)

Mr. ZORINSKY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Nebraska (Mr. ZORINSKY), for himself, Mr. JEPSEN, Mr. HUDDLESTON, Mr. BOSCHWITZ, Mr. EXON, Mr. COCHRAN, Mr. HEFLIN, and Mr. HELMS proposes an unprinted amendment numbered 357.

Mr. ZORINSKY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 235, between lines 17 and 18, insert a new section 1112 as follows:

"REAFFIRMATION OF UNITED STATES POLICY ON FAMILY FARMS

"SEC. 1112. Section 102 of the Food and Agriculture Act of 1977 is amended to read as follows:

"'FAMILY FARMS

"'SEC. 102. (a) Congress hereby specifically reaffirms the historical policy of the United States to foster and encourage the family farm system of agriculture in this country. Congress firmly believes that the maintenance of the family farm system of agriculture is essential to the social well-being of the Nation and the competitive production of adequate supplies of food and fiber. Congress further believes that any significant expansion of nonfamily owned large-scale corporate farming enterprises will be detrimental to the national welfare. It is neither the policy nor the intent of Congress that agricultural and agriculture-related programs be administered exclusively for family farm operations, but it is the policy and the express intent of Congress that no such program be administered in a manner that will place the family farm operation at an unfair economic disadvantage.

"'(b) In order that Congress may be better informed regarding the status of the family farm system of agriculture in the United States, the Secretary of Agriculture shall submit to Congress, not later than July 1 of each year, a written report containing current information on trends in family farm operations and comprehensive national and State-by-State data on nonfamily farm operations in the United States. The Secretary shall also include in each such report (1) information on how existing agricultural and agriculture-related programs are being administered to enhance and strengthen the family farm system of agriculture in the United States, (2) an assessment of how tax, credit, and other Federal laws may encourage the growth of nonfamily farm operations and investment in agriculture by nonfamily farm interests, both foreign and domestic, and (3) such other information as the Secretary deems appropriate or determines would aid Congress in protecting, preserving, and strengthening the family farm system of agriculture in the United States.'".

Mr. ZORINSKY. Mr. President, in a time of decreasing farm prices and high interest rates, it is imperative to remember the importance of the backbone of American agriculture. Any farm bill must reaffirm the historical policy of the United States to foster and encourage the family farm system of agriculture in this country. I firmly believe that the maintenance of the family farm system of agriculture is essential to the social well-being of the Nation and the competitive production of adequate supplies of food and fiber.

Mr. President, the family farm has provided throughout our history as a nation the fundamental backbone of our great country. It has provided the structure for wh'ch our Nation became strong economically. And it especially provided—and continues to provide—our Nation with a resolute population with values that will continue to keep our Nation strong.

However, Mr. President, the past decade has seen a dramatic decline in the number of family farms in this country.

Any significant expansion of nonfamily-owned large-scale corporate farming enterprises will be detrimental to the national welfare, and it should be neither the policy nor the intent of Congress that agricultural and agriculture-related programs be administered exclusively for nonfamily farm operations. Such programs must not be administered in a manner that will place the family farm operation at an unfair economic disadvantage.

Most importantly, this amendment would mandate an assessment of how tax, credit, and other Federal laws may encourage the growth of nonfamily farm operations and investment in agriculture by nonfamily farm interests, both foreign and domestic.

Mr. President, in order that Congress may be better informed regarding the status of the family farm system of agriculture in the United States, the Secretary of Agriculture shall submit to Congress, not later than July 1 of each year, a written report containing current information on trends in family farm operations and comprehensive national and State-by-State data on nonfamily farm operations in the United States. The Secretary shall also include in each such report:

First, information on how existing agricultural and agriculture-related programs are being administered to enhance and strengthen the family farm system of agriculture in the United States; second, an assessment of how tax, credit, and other Federal laws may encourage the growth of nonfamily farm operations and investment in agriculture by nonfamily farm interests, both foreign and domestic; and third, such other information as the Secretary deems appropriate or determines would aid Congress in protecting, preserving, and strengthening the family farm system of agriculture in the United States.

Mr. President, we need to have an annual assessment of how the laws that we pass in this body affect the very backbone of America's agriculture. We need to evaluate the effect these laws have on the family farm and its way of life that has sustained this Nation for over 200 years. We cannot afford to let the family farm become a relic of our past—instead, we need to insure that it has a long and healthy life as the sustainer of our crucial agricultural economy.

Mr. President, I understand that this amendment has been cleared with the Senator from North Carolina and that side of the aisle in addition to my own side of the aisle. I ask for its acceptance.

Mr. HELMS. Mr. President, if the Senator will yield.

Mr. ZORINSKY. Yes, I yield.

Mr. HELMS. Mr. President, I certainly am willing to readily accept the amendment on this side.

I ask the Senator to include me as a cosponsor.

Mr. ZORINSKY. It is an honor to include the Senator from North Carolina as a cosponsor. I ask unanimous consent that that be done.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I hope the Senators will read the text of this amendment as well as agree to it.

Mr. HUDDLESTON. Mr. President, on this side of the aisle we have examined the amendment. We are very pleased to support it and I am pleased to be a cosponsor. I thank the Senator from Nebraska for offering it to this piece of legislation. I recommend its adoption.

Mr. JEPSEN. Mr. President, I am a cosponsor. I ask unanimous consent that the distinguished Senator from Mississippi (Mr. COCHRAN) be added as a cosponsor.

Mr. ZORINSKY. The Senator has been added as a cosponsor.

Mr. JEPSEN. Mr. President, I congratulate the Senator from Nebraska for bringing this very important principle into focus. It is truly the family farm and small businesses that have been the

keystone to the economic stability and vitality of this great country of ours throughout hundreds of years. To emphasize and focus in on this again to remind us not only of our heritage but, frankly, "where it is all at" in our economy is refreshing in these times. I support the amendment 100 percent.

The PRESIDING OFFICER (Mr. KASTEN). The question is on agreeing to the amendment of the Senator from Nebraska.

The amendment (UP No. 357) was agreed to.

Mr. HELMS. I move to reconsider the vote, Mr. President.

Mr. ZORINSKY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 356

Mr. HELMS. Mr. President, what is now the pending business?

The PRESIDING OFFICER. The pending question is on agreeing to the amendment of the Senator from Iowa.

Mr. HELMS. I thank the Chair.

Mr. President, I yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I am very much opposed to the pending amendment. It would be an absolute disaster for the Nation's dairy farms. As is well known, Wisconsin is an important dairy farming State. Our dairy farmers would suffer an enormous drop in their net income if this amendment should be adopted. Let me take just a minute to review the background of this situation.

As we recall, temporary legislation—that is, the 1977 4-year farm bill—raised minimum dairy price supports to 80 percent of parity until October 1981. We had midyear adjustments—that is, adjustments every 6 months—to reflect changing costs of production. Under this temporary legislation, the support price for manufacturing milk, which was 80 percent of parity on October 1, 1980, was to have been raised on April 1, 1981, to reflect production cost increases since October 1, 1980.

That increase was scrapped by legislation which the administration pushed, signed into law by President Reagan in his hospital bed on March 31, 1981, the day after he was shot. So the $13.10 support price will be in effect for an entire year, during which time farm production costs will likely increase by at least 9 percent, based on projecting the increase in the Department of Agriculture's "prices paid index by farmers" from September 15, 1980, to May 15, 1981, over a 12-month period. Dairy farmers will, therefore, need to "absorb" at least a $1.02 per hundredweight cost increase over average U.S. costs in 1980, with no increase in price supports, and, therefore, little increase in farm milk prices.

That is the situation we have right now. In other words, the dairy farmer already is going to take a terrific reduction in his net income, a $1 a hundredweight cut. This amendment offered by the distinguished Senator from Iowa would go farther than that.

This amendment, as I understand it, would result in a 70-percent parity dairy price support effective October 1, 1981, with no midterm adjustment. The $13.10 per hundredweight support price would carry over for another year until October 1, 1982, because 70 percent of parity on October 1, 1981, in all likelihood, will be no more than $13.10, and very possibly could be less. Very possibly, it could be less. So farmers then would need to absorb 2 years of increased costs of about 18 percent, or $2.04 per hundredweight, with no increase in price supports, and consequently only minor or no increases in farm milk prices.

What they are doing is putting the dairy farmer in a position in which he has to take all the burden of inflation out of his net income. With the dairy farmer, as with any other businessman, his gross certainly is not his net. His costs of operation are far greater than the net he realizes. So when he has to take an enormous increase—and a 9- or 10-percent increase is great—in his cost of production, and that comes out of his net income, it virtually eliminates the net income of many dairy farmers.

So dropping the support level to 70 percent of parity would be a serious economic blow to the farmers and would result in farm milk support prices $1.90 per hundredweight below what they would be at 100 percent of parity.

Farm milk prices will likely closely parallel support prices in the near future because of heavy milk production and large CCC purchases. A $1.79 per cwt. reduction in farm milk prices would slash the annual income for an average Wisconsin dairy farmer $9,021—based on 1980 average milk production per Wisconsin farmer of 504,000 pounds.

A couple of weeks ago, I spent a full day working on a farm in Manitowoc County, Wis. That farmer milked 90 cows. He had a herd of 100. He started 4 o'clock in the morning. I had to get up at 20 minutes past 2 at the motel where I was staying. He worked 3½ hours milking cows in the morning. Then the farmer went to work on his crop and worked on his equipment, filling his silo, and doing all the other things he had to do.

Then, at 4 o'clock in the afternoon, he had to start over and work 3½ hours milking his herd.

He does this every day, 7 days a week, 52 weeks a year, throughout the time he is a farmer. If he fails to milk his cows just once or twice or three times, they dry up. So he has to do this work every day.

It is enormously tough, demanding work. Anybody who does not think this is skilled work should visit a dairy farm and work there. It takes tremendous knowledge of equipment, of the health of animals, of the soil, and many other complex elements.

The dairy farmer, according to the University of Wisconsin figures, in 1980, with 80-percent price supports, had an hourly income of $2.89—15 percent less than the minimum wage, for skilled work, where he makes an investment and takes a risk. Of course, one reason is that the farmer and his wife and children work endless hours on the farm.

The University of Wisconsin found that the average dairy farmer in June 1980 and his wife and children worked 135 to 150 hours a week. This is hard, skilled work, and all the members of the family have to do it. It is not only muscular work—it requires effort in lifting, and so forth, but it is work that requires great skill.

Incidentally, I was working with a highly skilled farmer in Manitowoc County a couple of weeks ago; and in spite of the fact that he knew his equipment very well, one of his pieces of equipment went out because it was overused in filling the silo. That piece of equipment was down and had to be worked on. It took a tremendous amount of knowledge of farm equipment on his part to put it into shape quickly, and he did so.

So this slash in this dairy farmer's income would cut him down to less than $2 an hour, probably about $1.50 an hour, if he made anything.

The tragedy here is that there will be literally hundreds of thousands of farmers who will be making nothing, and many of those farms, unfortunately, are going to be driven out of business.

For U.S dairy farmers, the reduction would be $2.3 billion annually in farm cash receipts, based on 1980 production, if the pending amendment goes into effect.

If we move it to 75 percent of parity, the losses would be very severe but would be about half of what they would be with the Jepsen amendment.

I realize, Mr. President, as I believe all Senators do, that we have a fiscal crisis in this country. We have to cut spending. But we should recognize that the dairy farmers, not only in Wisconsin but all over the country as well, have a very low income. They operate with great efficiency and have operated under a program which has been in existence since 1949.

This program, as I will point out, has not been costly to the taxpayer, has not been costly to the consumer, and has been of only moderate benefit to the farmer, but it is far better than gutting the program, as this amendment would do.

Prices paid by farmers for production items have been increased faster than farm milk prices. For example, May 1981 production costs were 10.3 percent higher than a year earlier, compared to a increase of only 7.1 percent in farm milk prices.

In other words, what I am saying is that the production costs the farmer has to pay are going up much faster than the prices he receives for the milk he produces. That has been true throughout this year.

In the second place, consumer prices for dairy products have increased less than the cost of living. March 1980–March 1981 consumer prices for dairy

products were up 10.1 percent compared to an increase of 10.6 percent in the cost of living.

Furthermore, milk prices have been declining rather than increasing relative to wage levels. The minutes of work required to purchase various dairy products dropped 44 percent for milk, 49 percent for butter, and 59 percent for ice cream in the past three decades.

I say "three decades" because that is the period in which this program has been in effect. This program began in 1949, and during that period, the number of dairy farmers has been cut by about two-thirds, so that we are losing our dairy farmers. We are still maintaining our farm production. We can have that tremendous cut and maintain the production because dairy farmers are enormously efficient. I do not believe anyone can cite an aspect of American life in which there has been a cut of two-thirds in the work force and production has been maintained.

The real difference between this country and the Soviet Union is not in the factories or in the offices. It is on the farms. The Soviet Union has more than 30 percent of their people on their farms producing agricultural products. We have about 3 percent of our people on our farms, and we produce 20 percent more food than they do.

The difference is our family farms, and our family farms cannot continue operating as family farms unless they have something like a reasonable income.

This program we have had in effect since 1949, which has never gone below 75 percent of parity—this would put it below 75 percent of parity for the first time in 30 years—has been a great success for consumers and a great success for taxpayers. I say that because in 26 of the 30 years, the price support has been below the market price.

In some of those years, the cost has been relatively high, because it is an acquisition cost, in which the Federal Government is acquiring an asset. They are acquiring cheese and dried milk which they later dispose of. Over the years, the cost of this program has been very limited. The pay-back or sell-back of the inventory which the Commodity Credit Corporation acquires has been very substantial and will be in this case.

We are still in an inflationary period, and inflation is likely to continue; and the cheese and dried milk that have been acquired will be sold at a later time, almost certainly, for more than they cost. Indeed, we have had bigger surpluses than this under this program, without this kind of savage cut in the income of dairy farmers.

I point out, further, that the cost of 1.5 billion pounds of net imports was indirectly charged to the price support program in the 1980 marketing year, since they resulted in increased price support purchases of approximately that magnitude.

That is, we buy cheese from abroad, and of course that is an indirect burden on our dairy program; because if we did not buy that cheese and bought the cheese in this country, the result would be that we would have a lower surplus, and the situation requiring a reduction in dairy price supports would not exist.

In 1980 casein imports displaced 333 million pounds of domestic nonfat dry milk costing the Commodity Credit Corporation about $300 million. Again, that $300 million would not have been spent and would not have been attributed to the dairy program if we had not imported this casein, some of which comes from countries of the Free World but much of which comes from the Soviet Union.

It is utterly ridiculous for us to import a product which we have in surplus in this country and which competes and makes it necessary for us, of course, to charge more to the dairy farm program.

As a matter of fact, the $300 million constituted 53 percent of the 1980 Commodity Credit Corporation purchases, more than half for the purchases attributed to the fact that we have this very big import of casein.

Mr. President, I have great respect for my good friend from Iowa. I do hope that the Senate will recognize that this kind of an amendment is an unwise amendment. It is a cruel amendment as far as the dairy farmer is concerned. It is an unnecessary amendment as far as the taxpayers are concerned. Not only will this result in a devastating loss of billions of dollars, as I pointed out, for dairy farmers throughout the country, but it will result in a loss to people in small towns throughout the country who depend on dairy farmers. It will be a loss for farm implement producers who produce implements they sell to farmers.

I think that when we look at the secondary effect, the University of Wisconsin figures that whatever loss the dairy farmers suffer, and the estimates are $2.3 billion annually in farm cash receipts, we multiply by 5 to calculate the effect on the economy. I think that is excessive. I think we should multiply it by about 3. So I am being more conservative than the economists of the University of Wisconsin have been in figuring the effect on the economy as a whole, but this would constitute, on my more conservative calculations, a loss of almost $7 billion for the economy as a whole.

If we calculate the loss in tax revenues because of the jobs lost, the loss in tax revenues because of the lower profits of the firms that are involved in selling to farmers and selling to those people who in turn sell to farmers, there is no question that the deficit will be deepened by this amendment, not lessened by the amendment.

So I think from a standpoint of fiscal responsibility we should take a very careful look at the secondary economic analysis here and if we do that we will find that the case is a very weak one for putting this really savage cut into effect against the dairy farmers.

Mr. President, I yield the floor.

Mr. JEPSEN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am happy to yield.

Mr. JEPSEN. Mr. President, first of all, for the record, I am pleased that the Senator from Wisconsin has 1 day's experience on a dairy farm. I have 17 years. What he experienced that 1 day I assure him is correct. They are long, tedious hours and they are 7 days a week. It is a family affair, it is a steady paycheck, and it is a lot of hard work. It is all of those things. I understand that totally and completely. In fact, my family is still doing it.

Having said that and knowing that the Senator from Wisconsin has a desire to be fiscally responsible and his activities and the things that he has stood for here always indicated that, first of all in his statement he indicates this is going to cost some $7 billion. There were other figures that I tried to catch and was not able to as he moved through them, essentially saying there would be a big loss. How will this amendment in reality at this point in time reduce 1 cent in the next 12 months, we will start there, with the dairy industry in this country?

Mr. PROXMIRE. Of course, as the Senator well knows, the effect on the dairy farmer is that instead of getting an increase in the price that he receives for his milk he will get the same price over the next year; meanwhile his costs will increase. Therefore, as the Senator knows as a businessman himself, his net will be cut and cut very sharply. His net, I calculate, will be cut by $9,000 per farmer on the average in our State, and we calculate that for the country as a whole—these are figures the University of Wisconsin supplied me with—the loss would be $2.3 billion in farm cash receipts based on 1980 production. That is $2.3 billion.

The reason I project that $7 billion loss for the economy as a whole is because what the farmer does not have in net income he cannot spend. The farmer cannot buy the implements that he needs to buy. He cannot buy the many other things that he needs in order to maintain his farm. So he buys less. That means that the people, who sell these things in the small towns, to the farmer and rely on the farmer as the principal customer, will not be able to make the sales, and they will suffer an economic loss. It is the rolling effect which persuades me that the effect of this could be as much as $7 billion, although, as I say, the University of Wisconsin figures are that it will be well over $10 billion.

Mr. JEPSEN. The basic figure which I have in this amendment which is a floor, a bottom, is a money figure of $13.10 which is the floor that is put under the dairy price support by this amendment, and then at the Secretary's discretion somewhere between 70 and 90 percent of parity can be used as a support percentage figure, but in no event less than $13.10.

Does the Senator perchance know what $13.10 per hundredweight today

represents by way of percent of parity as of this moment?

Mr. PROXMIRE. As of this moment I am not positive. I think it is around 71 or 72 percent, something of that kind.

Mr. JEPSEN. I am not saying this to try to embarrass or in any way verbally manipulate anything that the Senator has said.

I will point out at this point in time unfortunately, with the depressed prices, $13.10 is a pretty good percentage of parity, higher than the Senator is talking about on either the present aid floor or the proposal of the amendments that are going to be offered here to this amendment very shortly.

However, I do not want those prices to remain depressed, and neither does the Senator from Wisconsin. Our $2.30 corn which we had yesterday instead of the $3 corn which we had a couple months ago is a sad testimony as to what is happening in agricultural economy.

I also will point out that the management of this program leaves something to be desired, in my opinion, throughout the years. We just got through selling some 400 million pounds of 3-year-old butter. When I was asked about my opinion on selling that butter, who we should sell it to, I think my statement was we should sell 3-year-old butter to whoever will buy it and do it very quickly before they changed their mind.

To have that type of surplus and that old surplus buildup, as I say, leaves something to be desired, in my opinion, as far as the management of that program.

The fact that we have in the school lunch program, as I understand it, cokes and other types of carbonated beverages with a lot of sugar in them in equal promotion with milk is frankly not acceptable. One knocks the teeth out while the other one builds them. I do not understand the direction in that.

I have a lot of interest in improving the general administration of the dairy programs by the U.S. Department of Agriculture.

But I point out again, as I did earlier, and the Senator was not in the Chamber, that in 1981 the Commodity Credit Corporation, under the way the things are presently going, will remove 12.6 billion pounds of milk equivalent from the market at a cost of $1.986 billion. The net expenditure to the Commodity Credit Corporation for fiscal year 1981 is estimated to be $1.886 billion.

That is something that we do have to take into account, and we can do so without penalizing or having dairy farmers thrown into the red, and that is all I am doing, which is trying to put some commonsense into this.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. If the Chair will bear with me for just one moment.

Mr. President, the distinguished Senator from Minnesota is awaiting the arrival of a typed version of the amendment which he proposes to offer. In anticipation of that, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, it has come to my attention that certain matters are in preparation for presentation to the Senate later today and those documents are not available and cannot be available until a little later this afternoon. There are also certain meetings that are in progress now, briefings on important matters that should have the attendance of most Senators.

In view of those requirements, Mr. President, it seems to me the better part of discretion is to ask the Senate to stand in recess for a brief time. I observe the acting minority leader's presence on the floor. I would ask him if he has any objection if we recess over until 2 o'clock.

Mr. CRANSTON. Of course not.

Mr. BAKER. I thank the acting minority leader.

RECESS UNTIL 2 P.M.

Mr. President, in view of that and the consultations I have now had with the chairman of the committee, the ranking minority member, and the sponsor of the next amendment, I ask unanimous consent that the Senate stand in recess until the hour of 2 p.m.

There being no objection, the Senate, at 12:46 p.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Acting President pro tempore (Mr. LUGAR).

Mr. BAKER. Mr. President, may I inquire of the Chair, what is the pending question before the Senate?

The ACTING PRESIDENT pro tempore. The pending business is unprinted amendment No. 356 to the farm bill.

Mr. BAKER. I thank the Chair.

Mr. President, I understand that the distinguished Senator from Minnesota (Mr. BOSCHWITZ) will be on the floor shortly and that he is prepared now to proceed. In the meantime, in order to provide an opportunity for him to reach the Chamber, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UP AMENDMENT NO. 358

(Purpose: To restore the text of the dairy price support provisions contained in the bill as reported and to make clear that the support price for milk for the year beginning October 1, 1981, will be not less than $13.10 per hundredweight)

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. This amendment is in order because the amendment is an amendment to the pending amendment. The Senator from Minnesota may proceed.

The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Minnesota (Mr. BOSCHWITZ) proposes an unprinted amendment numbered 358 in the nature of a substitute to unprinted amendment numbered 356.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

Strike out all of the amendment and insert in lieu thereof the following:
Viz:

On page 134, beginning with line 13, strike out all down through line 12 on page 135 and insert in lieu thereof the following:

SEC. 103. (a) Section 201 (c) of the Agricultural Act of 1949 (7 U.S.C. 1446(c)) is amended by striking out the second sentence and inserting in lieu thereof the following: "Notwithstanding the foregoing, effective for each of the fiscal years during the period beginning October 1, 1981, and ending September 30, 1985, whenever the Secretary estimates that the net cost of Government price support purchases of milk or the products of milk will exceed $500,000,000 or that net Government price support purchases of milk or the products of milk will exceed 3.52 billion pounds (milk equivalent) during any fiscal year, the price of milk beginning on October 1 of such fiscal year shall be supported at such level, as determined by the Secretary, not less than 70 per centum of the parity price therefor, except that beginning on October 1, 1981, the price of milk shall be supported at not less than $13.10 per hundredweight for milk containing 3.67 per centum milk fat.".

(b) Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by adding thereto a new subsection (d) as follows:

"(d) Notwithstanding the provisions of subsection (c) of this section, effective for the period beginning on October 1, 1981, and ending September 30, 1985, the Secretary shall adjust the support price of milk to not less than 70 per centum of the parity price therefor on April 1 of each fiscal year, if on that date the support price of milk is below 70 per centum of the parity price therefor.".

Mr. BOSCHWITZ. Mr. President, this amendment, which is a second degree amendment to the Jepsen amendment changes and restores some of the language of the underlying bill, S. 884. The Jepsen amendment would allow the Secretary, in the event that he predicted that there would be removals by the CCC in excess of $750 million in a given year, the authority not to make any annual adjustment whatsoever and to leave it at

70 percent of parity—not $13.10, but 70 percent of parity. So, at the October 1 date, it would allow the Secretary to reduce the present parity level because, as the Senator points out, it may be that with the decline of food prices, parity has slipped not to 72 but, perhaps, to 73 or 74 percent.

This amendment would restore, as I say, the language of section 8 of S. 844. The language of that bill is that parity shall be at a 75- to 90-percent range and that, in the event the Secretary predicts there will be removals by the CCC in excess of $500 million—it has not normally been the case in the last 10 years—then, the Secretary could make an adjustment to 70 percent of parity. But, in that event, the parity would have to be adjusted to a semi-annual basis.

The distinguished Senator from Wisconsin pointed out that in all the history of the parity program for milk, in all of its history since 1949, parity has never been below 75 percent. As a matter of fact, in the last 15 years, other than for a 4-month period, parity has not been at 75 percent.

Of course, with the shifting winds of parity, the adjustments are made for the purpose of bringing supply and demand within the dairy industry into some kind of balance. If you look back over the years, if you look at where the balance was, indeed, you will find that milk production and milk consumption have been in pretty fair balance.

Now there is certainly a surplus, a surplus of very large portions, a surplus that must be dealt with. In order to deal with that, we suggest that we go to a level that has never been achieved before—70 percent. We suggest that we go to a level that has never been necessary for the purpose of bringing a balance between supply and demand.

We also suggest that ultimate discretion, if it be given, will give great advantage to the larger dairy operators in this country.

My State is made up basically of a series of small dairy operators. My State does not have operators who have 600, 800, 2,000, or more cows, such as the dairy operations in Florida, Texas, the Southwest, California. Those are people who, either through the advantages of the milk marketing order or perhaps the economies of scale or a better position with their banks, are able to survive in even the most adverse economic times.

However, as my friend and colleague from Wisconsin pointed out, there are today two-thirds fewer dairy farmers than there were not many years ago; and if we are to preserve the continuity of the family farm, we have to give some type of support.

Why support the farmer at all, one may ask? If you look at the millions and millions of people engaged in the business of farming, you also see millions and millions of people who have very little impact on the market they serve. They cannot raise their prices. They cannot somehow make their overhead. The history of production shows that their only defense has been to become more efficient, and more efficient they have become, because certainly their costs have risen faster than their gross income. As a result, their redemption has been to become efficient, and efficient they are. We are faced with surpluses, not only in dairy but also in most of the other major commodities, that dictate that next year probably will have a rather intensive set-aside program, in which land is specifically set aside and will not be planted, so that we will not have too large a crop.

Mr. President, I am joined in this amendment by the distinguished ranking minority member of the Agriculture Committee, Senator HUDDLESTON, by Senator KASTEN, and by Senator PRESSLER.

So it is with the idea in mind that we have never reached a parity level so low, that we have never acceded to the idea that parity should be below 75 percent, that we have never acceded to the idea that the dairy farm, the family farm, could succeed and survive under these circumstances, that we say just that—that there are surpluses. There are surpluses, not particularly larger than at other times.

I note that back in the early 1960's there were removals one year of 11.2 billion pounds, which is not terribly much different from this year, when removals will be 13.5 billion pounds, probably.

Therefore, while parity was at 83 percent in 1961–62 when those surpluses developed, it went down to 75 percent and remained there for 4 years, the only real time it was at 75 percent, and the surpluses were able to be handled.

In a speech this morning, the Senator from Wisconsin said many of the things I have in mind: The difference in rising costs when compared to the ability to make up those costs and prices received for products, the devastating fact that we are losing the family farm. He spoke about the fact that if there is a difference between us and other countries of the world, be it Russia, which he spoke about, or others, it is the family farm; because we are by far the most successful agricultural producer in the world.

If one looks back at 1980, when we had an enormous trade imbalance, then looks at the agricultural situation, then looks at the trade surplus developed there, one has to wonder what would happen if we did not have the efficiency of the family farm.

Last year, we exported between $40.5 billion and $41 billion worth of farm products. We had a trade surplus in farm products alone of $23 billion.

What would have been the condition of our economy, what would have been the condition of our dollar, in the event we did not have that surplus? It was accomplished through the efficiency of the family farm.

So it is necessary that we do what we can to support the family farm. It is necessary because the family farm, other than becoming more efficient, can do little to impact the marketplace. There are millions of producers without any real defense at the marketplace; millions of producers whose only defense has been to become more efficient, with the result that as they gained efficiency, the downward pressures on the market price have become more intense.

The dairy program this year will cost, net, approximately $1.7 billion. That is too much in these times. It most certainly is too much; and it is a figure, when budgets have to be trimmed and when budgets have to be considered, that cannot be tolerated.

It is a figure that also should be reasonably adjusted.

When my friend from Iowa speaks about adjusting parity only if the program is going to cost $750 million or more in a given year, I have to remind him and remind my other colleagues that the cost of the program now is not reduced by the amount that is given by way of donation to the Veterans' Administration, the Department of Defense, and the school lunch program, and those are not insubstantial figures. We have this very creative accounting that goes on, that this is considered apparently a gift from the dairy farmers of the United States which they are supposed to make to the veterans' organizations and somehow become the taxpayer twice. The dairy farmer not only is a taxpayer but then when he seeks to have some relief at the hands of the Government they say the program that we have in support of you is too high, even though that program has donated various dairy products to other agencies of Government.

Perhaps we should charge those other agencies of Government. Perhaps the distinguished Senator from Iowa would consider amending his amendment so that those charges would not be charges against the dairy program and would not be charges that are considered in coming up to the $750-million maximum that he suggests.

Without question, the dairy program has been efficient. Without question it has resulted in a very steady source of dairy supplies for our Nation and dairy supplies and milk at costs that are lower than inflation itself.

Mr. President, there is much more to say about the dairy program and dairy farmer; the fact that his numbers are depleting at such a rapid pace, the fact that he accounts for approximately a third of the farmers in Minnesota. Many dairy farmers, of course, are also raising other kinds of crops. But through him we find the bounty and the strength of rural America and as we look in rural America we see a depressed scene today.

I read into the record yesterday the beginning of an article that pointed out that the agricultural sector of our country is in a depression. The profits in the agricultural parts are, I believe the word was cataclysmally low. They were not at a point where they would be considered just depressing but even beyond that

point. And the impact on rural America is very intense.

One of the most disappointing aspects, I must say, of not only our present administration but the administrations that have gone before it is, in my opinion, the lack of appreciation for the agricultural sector of our country.

Approximately, Mr. President, 10 percent of the people of my State live on the farm. That is a rather large percentage indeed. But they are not the normal consumer. They are not the normal family. They are families and small businesses that indeed bring a large number of dollars that circulate into our society. It adds to just an enormous amount of economic might that we have in this Nation.

Mr. President, when our farms are prosperous those all around them prosper. In my case, in the Northwest, and I know that in the case of the distinguished Senator from Iowa, where the agricultural sectors prosper the entire State prospers. When the agricultural sector prospers the entire Midwest prospers.

It is a great shortfall, a great shortcoming in my judgment that this administration joins other administrations in not seeing the underlying economic soundness required in agriculture, that when that underlying soundness exists indeed not only our States but our entire Nation prospers.

As I pointed out the imbalance of trade that we would have experienced in 1980 without agriculture would have been devastating. In 1981 the imbalance of trade that would have been experienced without agriculture would be even larger, and yet this administration does not appreciate, nor did the administration before it, what it means to have a viable, strong agriculture economy and what it means in bringing about the economic success of our entire Nation.

Mr. PRESSLER. Mr. President, will the Senator yield?

Mr. BOSCHWITZ. I yield to the Senator from South Dakota.

Mr. PRESSLER. Mr. President, I ask unanimous consent to be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRESSLER. Mr. President. I commend the Senator from Minnesota.

Mr. President, I am joining in sponsoring an amendment to restore the original dairy program to S. 884, the 1981 farm bill. This provision would establish a dairy program of 75 to 90 percent of parity unless U.S. Government expenditures on the dairy program exceed $500 million or 3.5 billion pounds of dairy products. Should this occur, the parity level will be permitted to be reduced to 70 percent of parity. This level of price supports is necessary if dairy farmers are to survive.

During these times of high interest rates and inflation, it is hard enough for dairy farmers to stay in business without having to try to survive more reductions in their income. The dairy farmer has a very large investment and many years of work in his dairy farm and it would be very hard to restore milk products if it were reduced. It is important that we keep a dairy program that will assure the American consumer an adequate supply of milk and to do this, we must assure dairy farmers a fair price.

Farmers know as well as anyone that budget cuts must be made, but these cuts must be fair. The dairy farmers have already taken a cut with the passage of S. 509 in March when the semiannual dairy price support adjustments were suspended. The provisions I am cosponsoring today would reduce the parity level to the range of 75 to 90 percent, without this amendment, the dairy parity level may well drop to 70 percent. I do not know of any other sector of the economy that has been asked to accept larger budget cuts than the dairy farmer. I do not feel we can ask them now to take yet another cut.

For these reasons, I am cosponsoring this amendment to keep the dairy price support program at 75 percent, which is needed by the American dairy farmer. I urge my colleagues to join me in support of this amendment and the dairy farmer.

Mr. BOSCHWITZ. Thank you, Mr. President.

I thank the Senator from South Dakota.

Mr. JEPSEN. Mr. President, will the Senator from Minnesota yield for a question?

Mr. BOSCHWITZ. I yield for a question.

Mr. JEPSEN. And for an answer?

Mr. BOSCHWITZ. For an answer or whatever.

Mr. JEPSEN. I have been listening very intently to the distinguished Senator from Minnesota and again we represent much the same constituency. At the actual bottom line, we are both supportive and agree on practically everything in the agricultural community and in most other areas as much as any two colleagues could possibly.

So very respectfully I ask the distinguished Senator from Minnesota to comment on my observations about his amendment.

First of all, is it correct that his amendment provides 75 to 90 percent of parity with semiannual adjustments unless the Commodity Credit Corporation is projected to spend over $500 million or buy more than 3.52 billion pounds of milk equivalent?

Mr. BOSCHWITZ. That is correct.

The other part of the amendment is that the $13.10 base be kept at this first adjustment time, which would be the 1st of October.

Mr. JEPSEN. All right. In my amendment we have not only for the 1st of October, but forever, a bottom floor support of $13.10; is that correct?

Mr. BOSCHWITZ. Is the Senator asking me about his own amendment?

Mr. JEPSEN. I wish to make sure. It is my way of finding out the Senator's understanding.

Mr. BOSCHWITZ. That is my understanding.

Mr. JEPSEN. Then based on the Senator's amendment as it is constructed——

Mr. BOSCHWITZ. Mr. President, will the Senator yield?

Mr. JEPSEN. I yield.

Mr. BOSCHWITZ. My amendment also guarantees $13.10 will be the floor.

Mr. JEPSEN. As mine does.

Mr. BOSCHWITZ. Yes.

Mr. JEPSEN. The Senator's does forever or just for 1 year?

Mr. BOSCHWITZ. We specify $13.10 base, but we would also specify that in the event that 70 percent of parity was more than that in October 1982 or in April 1982 there would be an upward adjustment beyond that point.

Mr. JEPSEN. On the basis of the Senator's amendment, as things now stand and his figures were even, I was interested to hear, greater than the ones that I have presented in that for 1981 fiscal year the Commodity Credit Corporation is on the road to removing 12.6 billion pounds—I believe the Senator said 13.2 or 0.3 billion pounds of milk equivalent. So, therefore, going back to the Senator's amendment which says that the amendment stays in place on the 75–90 percent of parity unless the projections by the CCC is to buy more than 3.52 billion pounds of milk equivalent, since it is going about four times that basis right now, then under the Senator's amendment we would go back to 70 percent of parity; is that correct?

Mr. BOSCHWITZ. That is correct.

Mr. JEPSEN. Which is in fact by overwhelming figures where we are right now and in the conceivable future.

Mr. BOSCHWITZ. That is correct. I agree with the Senator.

Mr. JEPSEN. Then, in addition, the Senator from Minnesota has the additional dimension of a $500 million projected expenditure or net expense; whereas my amendment has $750 million. Can the Senator from Minnesota tell me why that $259 million less is better than my $750 million?

Mr. BOSCHWITZ. My amendment, of course, has a semiannual adjustment. My amendment establishes a floor at $13.10 as does the amendment of the Senator from Iowa. Indeed, incorporating back the language of S. 884 we do use the figure of $500 million, but at best the Senator's amendment is worse than mine. At worst our amendment will say 70 percent with a semiannual adjustment. At the best the amendment of the Senator from Iowa says 70 percent in the event that the removals will be $750 million or less.

Mr. JEPSEN. Seventy percent, but in no event less than $13.10 per hundredweight.

Mr. BOSCHWITZ. That is correct.

Mr. JEPSEN. Then really what we are coming down to is a comparison of apples and apples and oranges and oranges. Here is the sense of the Senator's amend-

ment and it provides for a semiannual adjustment and my amendment does not. Is that correct?

Mr. BOSCHWITZ. Pardon me. I missed the Senator's remarks.

Mr. JEPSEN. Essentially the amendment of the Senator from Minnesota provides for semiannual adjustment with a few odds and ends.

Mr. BOSCHWITZ. That is correct.

Mr. JEPSEN. That is the big difference.

Mr. BOSCHWITZ. That is a big difference, that is right.

Mr. JEPSEN. OK.

Mr. BOSCHWITZ. Not only that, but in the event removals are less than $500 million, which is very often the case, which was the case in 1977, 1978, 1979, 1976, 1975, 1974, all years in the 1970's actually with the exception of one the program cost less than $500 million. In the event it cost less than or projected to cost less than $500 million, then the adjustment would be the 75 percent.

Mr. JEPSEN. Here is where we differ somewhat on the basis of projections, in that fiscal year 1982 there is a projected CCC expenditure for these outyears projected to be $105 million, 1982; $501 million, 1983; $712 million, 1984.

Mr. BOSCHWITZ. If the distinguished Senator will yield, as my colleague well knows those are the latest figures that we got from the Department on Friday and then the following Wednesday. Then we got figures from CBO on Friday again, the succeeding Friday when we got the figures from the Department of Agriculture, and then on Monday we got more figures from the Department of Agriculture.

I do not challenge the Senator's figures. but I must tell him that he can see what he wants in them.

Mr. JEPSEN. I thank the Senator.

Mr. President, I suggest that the primary difference in his amendment and my amendment, the amendment as the distinguished Senator from Minnesota would modify the amendment is primarily a semiannual adjustment. The semiannual adjustment and a semiannual anything in this administration in this time of economic change, I might say change for the better in this country, is something that this administration has tried to at all turns of the road both eliminate and avoid. It is a change in direction but that is indeed what this country is going through now. It is a change in direction and what the people of this country voted for last fall and for 2 years before that to a degree, and I predict even more so in a year from now.

We have had and been at the brink of economic disaster. Part of the reason is that we have had automatic increases for just about everything that exists in our society whether there is any rational reason for it or not, and it has fueled the fires of inflation to a point that we are at a point now with the high interest rates and inflation that we have some serious economic problems and had we not started to change this direction we would have had even more serious economic problems.

So, the fact that we have a primary difference of the semiannual adjustment I say this to the Senator: The administration is opposed to anything by way of semiannual adjustments. The Department of Agriculture has so advised me that they would not accept semiannual adjustments. I have in turn told them that if there is one single place in our economy or in any of the Government programs where a semiannual adjustment fits it is in this particular program, that we are dealing with a very unique perishable product in milk, and fresh milk is very desirable, and to keep the price level stable a semiannual adjustment has done this for this particular industry, and it is a unique sort of product that we are dealing with.

I have further advised the Secretary of Agriculture and the Assistant Secretary of Agriculture, Mr. Lyng, who is out here in the room with some other assistants, that I will be the first to propose this 1 to 2 years from now, and that is essentially when this semiannual adjustment would come into play. Most importantly, we are all right for the next 12 months or so, as I understand it.

I will be one of the first ones to take the lead if there are some serious problems that occur from this happening by way of upsetting or triggering something we do not expect, and reinstating, if need be, the semiannual adjustment. I have been assured by the Department of Agriculture that if indeed that type of situation does exist they will not only seriously consider but they will join with me in trying to remedy the program.

Mr. DOLE. Will the Senator from Minnesota yield to the Senator from Kansas?

Mr. BOSCHWITZ. I yield to the Senator to ask a question of the Senator from Iowa.

Mr. DOLE. I apologize for not being here for the debate. I was making a speech in Bethesda on nutrition, and missed this outstanding debate.

I know the Senator from Minnesota has done an outstanding job, but he does not have the right product at the moment.

As I understand it, the amendment would move us back into the same cost place, and it does not narrow the gap so far as the cost of the dairy program is concerned.

We all have dairy producers. We are not all blessed with the great dairy production they have in the State of Minnesota, but, as I understand it, and unless there has been a change in the last couple of hours, the problem you have is money. It is not that we all do not like dairy producers and dairy products. We all like cheese, milk, and ice cream. The State of the Senator from Minnesota and other States produce a lot of dairy products. The question is we do not have any money.

I would like to ask the Senator from Iowa whether this is what it is all about, unless I missed something during my absence, and as I understand it the Boschwitz amendment restores the costs of S. 884 and that is something that, as I understand it, unless there has been a change of heart by the administration, that we just cannot live with. I do not know whether anybody has the exact figure, but it is close to $1 billion. We might as well take the whole bill down.

Mr. JEPSEN. In the current fiscal year the Commodity Credit Corporation will remove 12.6 billion pounds of milk equivalent from the market at a cost of $1.986 billion. That is even less than the distinguished Senator suggested it might be.

After taking into account sales receipts, the net expenditure to the Commodity Credit Corporation for fiscal year 1981 is estimated to be $1.886 billion by the administration. This is $875 million more than was spent in fiscal year 1980, and it is $1.3 billion more than was spent on the average during fiscal year 1976 through fiscal year 1980.

We are on a record-accelerating path of purchasing stocks of dairy products. The milk equivalent of dairy products purchased through August 28 exceeded 12 billion pounds; butter stocks on hand August 15 amounted to 440 million pounds versus 278 million last year; cheese was 542 million versus 198 million, that is more than double last year; and nonfat dry milk was 755 million versus 597 million a year ago. That is a 50-percent gain.

Butter is at 50 percent, and cheese purchases are about 150 percent ahead of last year; and at this time nonfat is up about 30 percent. We are heading for record surpluses and record deficits.

Mr. DOLE. I correctly understand that. With as much respect that I have for the distinguished Senator from Minnesota, it would seem to me that we are either going to have a farm bill or not have a farm bill. They are not easy to pass in any event. There are still other amendments, other amendments floating around. The Senator from Montana has a few goodies. We cannot exist with those kinds of amendments, all kinds of little time bombs floating around. But if this one goes off, we might as well quit, just pull it down, and go back to the drawing boards because it seems to me this is the one that the administration, I think, for the reasons just stated by the Senator from Iowa, feels very strongly about.

I would just say farm bills are not easy to pass. They are misunderstood by the people who talk about farm bills. There is a feeling that farmers are all running to the mailbox to get the next Federal check and then run to the bank.

It is not an accurate portrayal, but it is a perception that many people have about the farm program. They feel that what we are doing is spending the taxpayers' money by the Congress to pay farmers. That is not the case, as the Senator from Minnesota has stated many times. We do need to provide protection

for the American farmer. We cannot farm the Treasury, there is no money in the Treasury, and that is why they had a meeting this morning at the White House, I understand, talking about spending cuts. That is why we are asking the Finance Committee to consider some other matters, whether it is medicaid, medicare, or social security or whatever. If we are going to add $1 billion here or there, we are going to have to find that much more money to balance the budget by 1984 and hold the deficit to somewhere around $45 billion for fiscal year 1982.

Having gone through that process, and having responsibility of chairing a committee that has to do a great deal of cutting around here, I am convinced that we cannot let farmers avoid the realities either. Most farmers are willing to face up to the realities. My State is about as rural as any State in America, and I am not suggesting that all farmers are going to be happy with what happens on the Senate floor or happy with the administration or happy with the House bill, but I am suggesting that the biggest problems in American agriculture are interest rates, inflation, and the size of the national debt, Federal spending, and Federal regulations.

We can go on and do business as usual, and that is what we would be doing in effect because since we passed 884, we have been told, I think in the right way, that the administration cannot support that bill. So I am going to support the Senator from Iowa.

Mr. JEPSEN. Mr. President, will the Senator yield?

Mr. DOLE. The Senator from Minnesota has the floor.

Mr. JEPSEN. Will the Senator from Minnesota yield for a question?

Mr. BOSCHWITZ. If I may respond for just a moment to my distinguished colleague and the chairman of the Committee on Finance, we are not asking to do business as usual. We are quite willing to go to 70 percent of parity, a level that has never been reached before in the 30-odd-year history of the program. We are not asking for the moon. We are asking for a level that is lower than has ever been reached before.

It really is unclear to me what the cost of those programs is. I see so many different figures. One of the sets of figures I saw showed there was only a $100 million difference between our program and the administration-recommended program on the costs over several years.

The Senator knows that we are negotiable. This position is not locked in concrete. Perhaps the Senator from Iowa would like to assure us there will be an annual adjustment at 70 percent of parity, just an annual, not a semiannual adjustment, and we would accept that. But that would be quite a concession, quite a concession from last May when we negotiated S. 884, quite a concession from any level that has ever been achieved in the farm community.

But to just say that we will not have any adjustment at all, that inflation is going to be able to eat us up, that the small farmers of our States are going to be defenseless against the ravages of inflation is something that we cannot agree to and, as a result, we must ask for this amendment.

Mr. JEPSEN. Mr. President, will the Senator yield?

Mr. BOSCHWITZ. Would the Senator like to adjust his amendment so as to assure an annual adjustment that we would be happy to accept on our side?

Mr. JEPSEN. I am thinking about what the Senator is saying. Will the Senator yield for a question?

Mr. BOSCHWITZ. Yes, I yield.

Mr. JEPSEN. Does the distinguished Senator, who is recognized as one of the outstanding business people in the United States, and I have great admiration and respect for that success, does the Senator have any idea what kind of inflationary impact his amendment would have?

Mr. BOSCHWITZ. What kind of an inflationary impact? Inflationary from the standpoint of adding to the deficit, adding to the spending levels of the Government? It is hard, as I indicated earlier, to know exactly what that is. The figures have been just all over the lot.

Mr. JEPSEN. I can appreciate that, but knowing what the Senator knows, on the basis of comparing his amendment with mine, would it be correct to say that the Senator's amendment would be much more inflationary or more inflationary than mine?

Mr. BOSCHWITZ. Oh, Senator, as you know we could argue about that for awhile. If we keep the farm sector of our economy and rural America as a rule somewhat more healthy, I do not think that that has an inflationary impact; no, I do not.

Mr. JEPSEN. Well, in fact, when you talk about health—you did not answer the question. Do you believe the chances are that your amendment is much more inflationary than mine; is some more inflationary than mine?

Mr. BOSCHWITZ. I do not believe, Senator, that my amendment is inflationary. Inflationary would mean that it would increase the public debt; inflationary would mean that as a result the Government would have to go to the money market and dry up a still larger percentage of the funds; inflationary means that we would have a negative effect on the deficit, and I am not sure what would cause that more. Would it be caused more by the possibility that my program would spend a little more than yours or would the cause of inflation be more enhanced by the lack of tax revenues from the rural side of America, thereby increasing the deficit in that manner?

I asked the Senator a little while ago if he would like to change his amendment to assure the annual adjustment at 70 percent of parity. That would be in the spirit of conciliation. I would be very happy to accept that and withdraw my amendment in that case.

Mr. JEPSEN. Well, as I read and understand my amendment, we are providing the latitude for the Secretary of Agriculture to provide for somewhere between 70 and 90 percent. We guarantee a floor, a bottom of $13.10 per hundredweight by way of an actual dollar and cents figure. I say to the Senator that I think, in the interest of entering into a partnership with the new climate we have in the Department of Agriculture by way of being a friend of the farmer, that this amendment speaks for itself and we essentially have that.

My amendment will help dairy producers to work out their problems of excessive supplies. In the long run, all good, sound, prudent business people will understand what they must do.

I have talked to dairy farmers who said they realize there has been some overproduction; that there is right now. And whether you say: What comes first, the chicken or the egg? We are overproducing or we are consuming less, whatever it is—I am willing to step out and step up front and appear on TV, or wherever it may be, drinking a glass of milk. I drink one every morning and I drink one every evening. I would be glad to double my consumption and urge everybody else to do that, too. That will help the dairy industry. So I am on record as saying and urging that now. That is a positive way to get at things.

That is also the way we have to start solving our problems in America today, by all joining in and building a "can do" attitude. Let us go and do something about it. But we cannot do something about it by artificially containing and jacking up something that, frankly, has produced a very, very serious problem exists in the dairy industry and the dairy support industry now. It will jeopardize possibly, the long-range future if, indeed, we are going to continue on to a point where it is such a burden that we will come through with either legislation or action that will strip it considerably, rather than, as my amendment, frankly, does, which is to help the dairy industry.

The cost of my amendment is about $1 billion less than the current provision of S. 884 over the 4-year life of the bill. It is more in keeping with the twin objectives of providing adequate support for the farm dairy industry and reducing the budget outlays. That is what we are talking about. The dairy farmers are willing to do their share. We are asking them to give in just a little here and join all other Americans in trying to get this economy under control.

Mr. BOSCHWITZ. The Senator will recall, I think, that my amendment does, indeed, ask the farmer to do his share. We are going to go to 70 percent of parity. In the event that inflation continues at the rate projected, that will mean, in midyear, 65 percent of parity toward the end of the year should we accept the once-annual adjustment. So, indeed, these are levels that have never been reached before. This is not an extraordinary surplus.

I thank the Senator for correcting my figure. I thought it was 13.5 billion pounds on a fluid basis of milk. I note that the Senator says it is 12.6, and that this is not a great deal more than it was in 1962 when it was 11.2. We only have to go to 75 percent of parity in order to adjust that difference.

In any case, I hope the Senator will consider my suggestion that he make the 70 percent mandatory and that it occur once a year. I will be happy to accept that amendment in that case.

Mr. DOLE. Will the Senator yield for a question?

Mr. BOSCHWITZ. Yes.

Mr. DOLE. Does the Senator have a fallback position in the event he should lose?

Mr. BOSCHWITZ. Who knows? I think we all have fallback positions, I say to the Senator.

Mr. DOLE. It would be helpful to us if we knew what it was.

Mr. BOSCHWITZ. The Senator has been one of the best fallerbackers around here.

Mr. DOLE. Well, I have had more practice.

Mr. BOSCHWITZ. The Senator has had quite a bit of practice.

Mr. DOLE. Right. Never in the majority; we used to do more of it on the minority side. But now we have an addition: When we fall back, we fall further.

Mr. BOSCHWITZ. I understand that my distinguished friend and cosponsor from the State of Kentucky (Mr. HUDDLESTON) wishes to speak on the bill, and I yield to him.

Mr. HUDDLESTON. I thank the distinguished Senator from Minnesota.

I have been enjoying this discussion very much. I think that, since we came back about a week ago, I have been in at least a dozen meetings in which we have tried to reach some common ground between these two positions that we are faced with right now. The distinguished Senator from Iowa has presented the latest offer that came to us from the administration. The Senator from Minnesota has attempted to amend that, essentially, by substituting virtually the same language that is in S. 884. That is what the majority of the Agriculture Committee agreed to last May. And I think it is well worthwhile remembering that that, in itself, represented a considerable scaling down from what the dairy price support program was. But now we are faced with those two positions, one or the other.

I think all of us were hoping there would be some common ground, someplace in between, that would satisfy the requirements of providing at least some minimal support for our dairy producers and at the same time not be too onerous on the budget of the Federal Government. Obviously, up to this minute, we have not arrived at that particular place.

So I think, given that circumstance, I would have to recommend that we support the Senator from Minnesota; that we recognize that when we passed S. 509 earlier this year, back in March, we saved the Treasury then some $160 million out of the dairy program. S. 884, as originally presented and as now in the bill, will save hundreds of millions of dollars more than would have been saved without those provisions. They are not bountiful by any means, but they are adequate, and I think they are responsible.

But the points of contention between the administration and those Senators supporting the S. 884 dairy program are really small in comparison with the value of the products of the dairy industry. Farm cash receipts from dairy will be approximately $20 billion in the 1981–82 marketing year. And the difference in cost between the provisions of S. 884—or what the Senator from Minnesota is suggesting—and the amendment by the Senator from Iowa amounts to about $40 million in 1982, according to the Congressional Budget Office estimates.

And here again we have had some disagreements, some misunderstandings, about actual cost figures. That has been one of the most interesting things about this past week of considerations and negotiations—this moving target of figures that we are shooting at all the time. There is one thing, I think, we can say about these figures, regardless of what happens here today or what is in this final bill: If the Senator from Minnesota has miscalculated, if the amendment he is proposing is enacted and the figures are not correct and the costs soar far beyond what we are anticipating now, then we will be back here before the end of this 4-year bill to do something about that situation. I think the dairy industry recognizes that we have to move toward a better balance of supply and demand. And if that does not occur under whatever we do here, that problem will be addressed, in my judgment, very quickly. We will be back here making the necessary amendments.

And the same is true with the amendment of the Senator from Iowa. If he has miscalculated, if the provisions that he has recommended cause great difficulty, great dislocation in the dairy industry, if dairymen are driven out of business, if the milk supply falls, then we will be back making those adjustments, too.

So I do not beileve for a moment that we are locking ourselves into concrete as far as what the total cost of this program might be. And we are dealing with some very nebulous figures. We just cannot put our finger—and neither can the administration or the Congressional Budget Office—on the exact amounts that any of these proposals are going to cost.

Now one thing, it seems to me, that the circumstances would provide if the Senator from Minnesota prevails, and that is, first of all, we maintain a mechanism that generally has been successful. It got too costly; we know that and the industry recognizes that, and the adjustments were made. But the mechanism has done pretty well. And I am not sure we ought to throw that out right now to meet the particular situation that we are faced with concerning the budget, particularly when there are tools available to do something about it.

I think the amendment of the Senator from Minnesota might well provide a little incentive for the administration to get out and do something with this surplus, to enter into some aggressive sales and export plans that will help lower those stocks and reduce the cost to the taxpayers and bring the program better into balance.

So, for that reason, and for the fact that we are dealing with these two positions, I think our better course at this point is to stay with the proposal of the Senator from Minnesota and then be prepared to deal with whatever might happen if we get into a situation that requires some additional adjustment down the road.

I yield back my time.

Mr. BOSCHWITZ. I thank the Senator from Kentucky. I agree with him that we, indeed, can come back and that we are not locking it into concrete. However, two-thirds of the dairy farms of our country have already gone the way of so many things and they cannot be brought back and before we condemn more of these farmers to an auction I want to maintain the program as I am suggesting.

I yield to my colleague from Vermont.

Mr. LEAHY. Mr. President, I thank my colleague from Minnesota.

Mr. President, I support the amendment by Senator BOSCHWITZ. I do so, obviously, with concern for the farmers of my own State but, also looking at this as a national farm bill. Basically, I think the farm bill we reported out of committee went far enough. In fact, I thought it made too much of a cut in the dairy program, even as it came out of committee. But I also realized—both as a Senator from a dairy producing State, Vermont, and as a Senator holding an office where we have to reflect the interests of the whole country—that, of course, there are going to have to be cuts made, in a time of fiscal austerity, in all farm programs.

When you look at what the cuts were made, Mr. President, our farm bill set the parity at between 70 and 90 percent, but it allowed for a 70-percent level to respond to increased purchases of dairy products.

I understand that the distinguished Senator from Iowa (Mr. JEPSEN) is presenting an administration proposal. The administration proposal really is a last-minute attempt to change all the work done by the committee on the dairy section. In fact, there have been, as Senator HUDDLESTON mentioned earlier, a number of last-minute or last-ditch attempts by the administration to change just about all the work that we did in the committee on the farm bill.

I think, Mr. President, it should be noted that the committee, in a bipartisan effort, had day after day of meetings and markups on all the various farm

programs—not just dairy, not just wheat, not just corn, not just peanuts, not just soybeans, all the programs—in trying to reach a conclusion that would save money for American taxpayers at the same time it maintained some kind of stability in our farm programs. That is a stability that has been sadly lacking, a stability that was just beginning to show up in our farm programs, a stability that is absolutely necessary if we are to maintain not only individual family farms but, also, that ability not only to feed ourselves but to be able to export food abroad.

Mr. President, at a time when we see what a devastating effect our inability to produce the energy we need in this country has had our own national security, can you imagine how devastating it would be on America if we were no longer able to feed ourselves but actually had to depend on other countries and had to import food from them—countries whose interests may be inimical to that of the United States?

This amendment, Mr. President, that the administration has proposed would freeze the dairy price, for example, at $13.10 and keep it frozen no matter what the parity level may be. That means, quite frankly, that dairy farmers could be faced with a parity level of around 55 percent inside of 4 years. I know what that would do in Vermont. It would destroy most of the family farms in Vermont and that prime agricultural land would be lost forever to some other use. It would mean the same thing in Minnesota, Wisconsin, and a lot of other States.

Our dairy program is operating right now at 80 percent of parity and the committee-reported bill does allow for 70 percent of parity. That is a major change in the program. I think we ought to give that change a chance to work. We recognize the problems in the dairy program. I have told farmers in my State, as I am sure all of us have in our own States, that they are going to have to expect changes, they are going to have to expect cuts. I support realistic, reasonable cuts, whether they are popular or unpopular. But let us go with the cuts we talked about in the farm bill and give them a chance to work. We negotiated this, arrived at it as a bipartisan solution. Let us give it a chance to see if it can work.

The administration amendment really is a raw deal for our Nation's dairy farmers. Again, I do not mean to be parochial, but you look at the farmers in Vermont—we have basically small farms and very conservative people. It is, after all, the most Republican State in the Nation. Our farmers are cautious. They hold down their production, they keep careful account of their budgets. These farmers see some pretty bad economic times ahead. I simply cannot add to their problems by supporting a last-minute administration attempt to balance the budget on the backs of our dairy farmers.

As I said before, I see this bill as a more bipartisan measure. It is the result of hours of work, days of work, morning, noon, and night of work from both Republicans and Democrats. I support the amendment of the Senator from Minnesota to bring us back to what is basically the position that we worked out in the committee, an attempt to support the administration on their budget cuts, but also to have a realistic program.

Mr. President, I understand the distinguished Senator from Oklahoma would like to speak on the bill. I should like to yield to the distinguished Senator if he seeks recognition.

Mr. BOSCHWITZ. Mr. President, I believe I still have the floor and I yield to the Senator from Oklahoma (Mr. BOREN).

Mr. DOLE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. EAST). The Senator will state it.

Mr. DOLE. Did the Senator from Minnesota have the floor?

The PRESIDING OFFICER. The Senator from Minnesota is the last Senator to have been recognized by the Chair.

Mr. LEAHY. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEAHY. Not that it makes any difference to me, because I yielded back, anyway, but I assumed the floor had been yielded to me at the time I spoke.

Mr. DOLE. The Senator from Kansas does not care, Mr. President, but he did not see the Senator from Minnesota here and I wonder how he did that.

Mr. JEPSEN. Will the Senator from Vermont yield to me?

Mr. LEAHY. I had yielded the floor and I understood at the time I was speaking that the floor had been yielded to me, Mr. President.

The PRESIDING OFFICER. The floor cannot be yielded by one Senator to another. The floor can only be obtained by recognition from the Chair.

Mr. JEPSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. JEPSEN. Mr. President, I say to the Senator from Oklahoma (Mr. BOREN) that I shall be very brief.

Will the Senator from Vermont yield for a question?

Mr. LEAHY. Yes, Mr. President.

Mr. JEPSEN. The Senator emphasizes that my amendment would mean there would be no adjustment in support prices for 2 years. Is that correct?

Mr. LEAHY. No; I think the Senator may have been listening to one of the other Senators. I did not say that.

Mr. JEPSEN. Did the Senator say that there would be an adjustment in the price support levels from my amendment?

Mr. LEAHY. The Senator said that, according to this Senator's calculations, in 4 years, dairy farmers could be facing a parity level of approximately 55 percent. It is the same position that the Senator took in the informal discussions that we had earlier among the members of the Senate Committee on Agriculture.

Mr. JEPSEN. On what basis does the Senator make that statement? Actually, if the Senator assumes that the cost of the program will exceed $750 million—that is the only way and only then can the price go down to $13.10 a hundredweight. To this point in time, it is considerably above 70 percent of parity. I am trying to find out on what basis the Senator was making his statement that we would have 55 percent of parity in 4 years.

I do not know where these statements come from, but they are coming like popcorn here in the last couple of hours. I expect some explanation as to their basis.

Mr. President, the dairy industry, under my amendment, can assure itself of an increase by bringing its costs to the Treasury down below $750 million. On the bottom line, that is very simple, $750 million—in no event less than $13.10 per hundredweight. That is a far cry from what the Senator from Vermont was essentially alluding to about this amendment.

Mr. LEAHY. Mr. President, would the Senator from Iowa care to tell us what level of parity he would see in 4 years under his amendment?

Mr. JEPSEN. I do not have a crystal ball any more than the Senator from Vermont does. We are trying to provide a way to bring about an economic recovery in this country from the near disaster, on the brink of which we now stand. To do so, I have offered this amendment in keeping with the objective of doing just that and providing adequate support. My amendment provides the latitude for the Secretary of Agriculture to provide between 70- and 80-percent parity support, with a $13.10 per-hundredweight floor, no matter what. No less than that. It is certainly in keeping with the objective of providing adequate support and reducing budget outlays.

Those are the upfront, on-top-of-the-table, candid, honest, simple, straightforward facts of this amendment.

We have just gone through a time when the Senator from Vermont was helpful in most cases on cutting costs, trying to bring reality to some of the Government expenditures, and that is what we are looking at here.

Mr. LEAHY. Mr. President, I am well aware of the administration's proposals here. I am also aware of the various economic prognostications made by the administration.

When they first sought support for the budget they were predicting Federal Treasury bills around 7 percent this time of year, or slightly beyond this time. That, I believe, was predicted by an administration member known as "Rosie Scenario." It did not quite work. That is now changed to 10 percent, which is still not about to work.

I say to my distinguished colleague from Iowa the same things I have said before, and the Senator from Minnesota said them even stronger today: We would have to have a pretty flat level of inflation or a very significant cut in inflation, not only in inflation but also in interest rates, to make this thing work out anywhere near what the administration predicted.

I am not willing to gamble that "Rosie" is right in this regard. In representing the farmers of Vermont, I realize that the administration, which has

been wrong in many areas and which is suffering a bit of an economic credibility gap at this point, as it faces the largest deficits in the Nation's history, is going to be wrong in this one.

In any event, I am not too sure what the parliamentary situation is, but I believe we are intruding on the time of the Senator from Oklahoma, and I yield the floor.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BOREN. Mr. President, I support the motion of the Senator from Minnesota to restore the provisions of the bill as originally reported by the committee as they apply to price supports for dairy products.

I share the concerns that have been voiced by the Senator from Minnesota and the Senator from Vermont, that under the proposal of the Senator from Iowa there is no guarantee that there would be sufficient adjustments, if any, over the next 3 years to keep the parity value of the price of dairy products from falling far below the 70-percent level.

I basically support the provisions of S. 884 as reported by the Agriculture Committee, not only in this instance but also across the board.

Mr. President, one of the most important pieces of legislation which we will consider this year is the 1981 farm bill—the bill now pending before us today. I hope that every Senator will be mindful of the fact that during the next few days we will be adopting policies which will have a significant impact on the largest industry and biggest employer in this country, American agriculture. Any of our efforts to revive this Nation's economy will depend upon the future economic health of the agriculture economy. It is imperative that this Congress and this administration enact a sound and strong farm program.

While the bill reported by the committee is not perfect by any means, it does provide a framework which will allow our farmers to remain in business. As we heard yesterday from the distinguished chairman of the Agriculture Committee, Senator HELMS, the committee spent many hours fashioning a bipartisan farm bill package.

Serious and painstaking consideration was given to the concerns expressed by everyone interested in farm legislation. Compromises were made in order to minimize the cost of this bill, and at the same time provide some semblance of security for American agriculture. S. 884, as reported by the committee, is a balanced and carefully crafted compromise worked out in more than 25 4-hour markup sessions of the committee.

After reporting the bill, several of us on the committee joined Senator HELMS and Senator HUDDLESTON in pledging our support to the bill being considered today. At that time, we urged Members of the Senate to resist the temptation to offer any amendments which would undermine this legislation. It was pointed out then that the adoption of such amendments would endanger the whole concept of omnibus farm legislation and the structure of the Nation's farm commodity programs.

As late as August 24, a letter from the leadership of the committee was sent to 150 agribusiness and farm groups soliciting their support for S. 884. I, for one, do not take commitments lightly and I do not intend to be a part of any effort to turn our backs on the American farmer.

I have been somewhat surprised by changes that have been suggested in the committee bill. It is hard for me to understand why the bill, which was a fairly good one before we recessed, now needs to be overhauled.

Unfortunately, the administration's idea of modifying the bill is to make it weaker. It is ironic that the argument being used is that because the farmer is in even worse shape than was thought, we should cut the farm program more. As farm financial conditions deteriorate, some respond to the crisis by saying that we should do less to help the farmer.

The excuse seems to be that farm prices are low and are less favorable than was previously forecast and, therefore, we should help our farmers by taking away what little protection was provided by the original bill.

All of us have had experience with phantom budget numbers which thrive in this town. I have seen many cost estimates on this bill, and they all are different. For example, last week, within the space of 3 days, I received three different cost estimates for this bill. Which numbers should we believe? Your guess is as good as mine.

But, let me give some real numbers. Net farm income in 1980 fell to about $20 billion, down sharply from 1978 and 1979, but when this $20 billion is adjusted for inflation, farmers received less in income than they have at any time since 1934.

Wheat prices have declined sharply since November 1980, and they are now 16 percent lower than they were 9 months ago. USDA has estimated 1981 production costs at $5.32 per bushel, or 45 percent more than farmers are currently receiving for their wheat.

We not only have a problem with dairy; we have a problem across the board in terms of agricultural commodities. Cattlemen are going broke, suffering from 20 percent interest rates. In summation, it is basically the same old song, second verse, of farm costs continuing to go up and farm commodity prices continuing to go down.

The growing crisis in agriculture can be demonstrated by one statistic, and I hope my colleagues will think long and hard about what this statistic means. Thirty years ago, total farm debt and annual net farm income were about equal. We had at that time an unadjusted figure of approximately $13 billion annual net farm income and $12 billion total farm debt in this country—equality between annual farm income and total farm debt. That was 30 years ago.

Today, total farm debt exceeds annual net farm income by 10 times—roughly $20 billion of annual net farm income versus $200 billion of farm debt. In 30 years, we have gone from equality of annual farm income with total farm debt—equality of those two figures—to a tenfold relationship of debt being 10 times the size of annual farm income.

With commodity prices below the cost of production and interest rates at 20 percent, we are fast approaching the time at which the burden can no longer be managed. This could lead to a collapse of appreciated land values, which alone have allowed the farmer a bare return on a lifetime of labor.

If we allow this breaking point to be reached, the family farm structure of agriculture, with ownership by individuals instead of corporations, will be a thing of the past.

Now is not the time for any of us to back away from American agriculture. Instead, I suggest we bow our backs and stand side-by-side with the American farmer who provides the basic foundation of our economic and social well-being.

There are those who want to write a farm bill with absolutely no budgetary impact. It can be done. However, as the Senator from Kentucky pointed out recently in a discussion, there is only one drawback to such a bill: It will be of absolutely no help to the farmers. In the past few days, I have felt that there were those who were pushing the administration to write such a bill. To call it a "farm bill" would be to engage in false labeling. Such proposals would more honestly be titled, "The Farm Liquidation Act of 1981."

But I submit to you that American agriculture and our farmers deserve a better deal than they have been getting. I intend to do my best to fight off the expected attempts to weaken or completely ignore the work that was done by those of us on the Senate Agriculture Committee.

I urge all Members of the Senate to join me in supporting this bipartisan farm bill of 1981 and supporting efforts to return the provisions to the original form and in this case to support the efforts of the Senator from Minnesota to return the provisions of S. 884 as they apply to the dairy program.

Mr. DOLE Mr. President, the Senator from Minnesota is not in the Chamber, and I promised that I would protect his interests, so I plan to move to table the amendment of the distinguished Senator from Minnesota, and I want him to be here for the announcement.

So I will just say a few words while we are waiting for Senator BOSCHWITZ.

I certainly do not disagree with the Senator from Oklahoma, but again it is not enough to say that we have gone through this before because it is always difficult in farm legislation, particularly difficult for the first time that we have had some budget constraints to consider.

I spent some time in my State during the recess talking with a number of farmers. Some of them agree with what we are doing and some disagree. Some were more concerned honestly about inflation and interest rates than about what we might do for them, and I underscore "do for them," with farm legislation.

I think most farmers are probably saying, "The one thing we do not need is more credit, more inflation, higher

interest rates, more regulation, more Government," and they are suggesting this to us directly or indirectly. Some, of course, want higher loan rates and some want higher target prices, and some do not.

It seems to me our obligation is to provide some protection for the farmer.

We believe we have done this, at least I believe, in the target price concept. Some of my colleagues do not. We will have a vote on that later. But if the loan rates were higher, I would say maybe we do not need target prices. Unfortunately, in the wheat-producing States, Oklahoma, Kansas, and others, we are going to have some exposure to target prices this year because we are sort of reaping the rewards of the grain embargo of January 4, 1980, and that is just now coming home to roost as far as the wheat producer is concerned. It could cost up to a half billion dollars in payments.

My farmers for the most part do not want Federal payments. They want to make a profit in the marketplace whether they be a dairy farmer, a wheat farmer, a corn farmer, a soybean farmer, or whatever.

The distinguished Senator from Minnesota has now returned to the Chamber, and I indicated before he left that I would not make any motion in his absence. Unless there is someone who wishes to debate it further, if it is satisfactory to the Senator from Minnesota, I shall move to table his amendment unless he wishes to debate it further.

Mr. BOSCHWITZ. I do not know that debating it further really would achieve anything, so I will not debate at least this amendment further. Perhaps we will have an opportunity after the motion to table to discuss at some length the amendment of the Senator from Iowa.

Mr. DOLE. I thank the distinguished Senator from Minnesota.

I say, finally, this morning the Finance Committee had the dubious distinction of voting out an increase in the debt ceiling of $1.089 trillion. If Senators do not think we are in trouble in this country, I wish to see how everyone is going to vote on the debt ceiling when it is trotted out about next week when we keep adding more spending and creating more debt. It will be interesting to follow and interesting for me to follow also, for that matter, to see what happens.

I just tell Senators that we just exceeded the trillion-dollar mark. We made history today in the Finance Committee by a very close vote. In fact, it was so close we had to get the thing voted out before the absentees voted. That is how close it was.

I just suggest that there is one thing to vote for more spending, but it is another thing to vote today for the things we voted to spend.

On that basis I feel certain the Senator from Minnesota has made a great argument. The dairy producers in this country deserve all the support they can have, but what they really wish I think is less interest rates and less inflation, and we are not going to have that if we add $1 billion to the cost of this program which is what his amendment would do.

Going back to S. 884, we did write a good bill and a lot of people spent a lot of time, Democrats and Republicans, on S. 884. We could have passed it fairly easy, I asume, in the Chamber, except for one thing: It costs too much money, and so we have gone back in a bipartisan effort and I think for the most part succeeded in reducing the impact of that original provision by $1 billion or more.

This is not an attack or directed at the Senator from Minnesota or the American dairy farmer, but I do move to table the amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Minnesota.

On this question, the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Iowa (Mr. GRASSLEY) and the Senator from Vermont (Mr. STAFFORD) are necessarily absent.

I further announce that, if present and voting, the Senator from Vermont (Mr. STAFFORD) would vote "nay."

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from New Jersey (Mr. WILLIAMS), are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. ROBERT C. BYRD), would vote "nay."

The PRESIDING OFFICER. Is there any Senator in the Chamber who has not voted?

The result was announced—yeas 53, nays 41, as follows:

[Rollcall Vote No. 254 Leg.]

YEAS—53

| | | |
|---|---|---|
| Armstrong | Gorton | Murkowski |
| Baker | Hatch | Nickles |
| Biden | Hatfield | Packwood |
| Byrd, Harry F., Jr. | Hawkins | Pell |
| Cannon | Hayakawa | Percy |
| Chafee | Heflin | Quayle |
| Cochran | Helms | Roth |
| Cranston | Hollings | Rudman |
| DeConcini | Humphrey | Schmitt |
| Denton | Jepsen | Simpson |
| Dixon | Kassebaum | Stevens |
| Dole | Laxalt | Symms |
| Domenici | Long | Thurmond |
| East | Lugar | Tower |
| Garn | Mathias | Tsongas |
| Glenn | Mattingly | Wallop |
| Goldwater | McClure | Warner |
| | Mitchell | Weicker |

NAYS—41

| | | |
|---|---|---|
| Abdnor | Durenberger | Metzenbaum |
| Andrews | Eagleton | Moynihan |
| Baucus | Exon | Nunn |

| Burdick | Jackson | Sarbanes |
| Chiles | Johnston | Sasser |
| Cohen | Kasten | Specter |
| D'Amato | Leahy | Stennis |
| Danforth | Levin | Zorinsky |
| Dodd | Melcher | |

NOT VOTING—6

| | | |
|---|---|---|
| Byrd, Robert C. | Kennedy | Stafford |
| Grassley | Matsunaga | Williams |

So the motion to lay on the table UP amendment No. 358 was agreed to.

Mr. JEPSEN. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. The Senator from North Carolina is correct. May we please have order in the Senate? We shall not proceed until we have order in the Senate. We do not currently have order.

Mr. HELMS. Mr. President, I think Senators did not hear the distinguished occupant of the Chair.

The PRESIDING OFFICER. The Senate will not proceed until we have order. Will those Senators who are not conducting business please leave the well?

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, the distinguished chairman of the Ethics Committee (Mr. WALLOP) has a statement he wishes to present to the Senate which I think will be of interest and concern to every Member of the Senate. I yield to the distinguished Senator from Wyoming.

Mr. WALLOP. Mr. President, I thank the distinguished Senator from North Carolina.

The PRESIDING OFFICER. The Senator from Wyoming has the floor and he is entitled to be heard.

---

## SCHEDULE OF PRESENTATION OF TAPE RECORDING EVIDENCE CONCERNING SENATOR WILLIAMS

Mr. WALLOP. Mr. President, I would ask, if I may, to have the close attention of Senators for just a moment.

In conjunction with the remarks of the Senate leadership yesterday concerning the resolution to expel Senator WILLIAMS, the Senate Ethics Committee has prepared a schedule of presentations of the tape recording evidence received by the committee during the adjudicatory hearings held in July.

In order to assist all Members of the Senate in reaching a careful and informed decision on this matter, the Ethics Committee will replay the audio and video tapes in two different formats. First, on Monday, Wednesday, and Friday of next week (September 21, 23, and 25) there will be two identical presentations each day of tape recordings made while Senator WILLIAMS was present. Second, on Tuesday, September 29, and again on Thursday, October 1, we will make available a presentation of all of the tape recording evidence utilized in the committee hearings that was not played during the previous week's presentations. The times and locations for the presentations, and the list of tapes to be played, are set forth in a "Dear Colleague" letter sent to each Member today.

which I am also inserting hereafter in the RECORD.

I urge—and I cannot urge it strongly enough—each Member of the Senate to take advantage of the time available before Senate Resolution 204 comes to the floor in early November to become familiar with the extensive record in this case, and to attend any one of the taping presentations. Senator HEFLIN and I want to be of help to you in every possible way and either of us will be pleased to respond if you need further assistance in this very important matter.

I think, since I have the Senate gathered here, I will take the time additionally just to read the "Dear Colleague" letter so there is no doubt in Senators minds of what we are trying to do.

DEAR COLLEAGUE: The Senate Leadership announced on Monday of this week that the Senate will proceed to consideration of S. Res. 204 in early November. This will give each Member an ample opportunity to study the extensive record, to view and listen to the "Abscam" tape recordings presented at Committee hearings, and to reach a careful and informed decision. The Majority and Minority Leaders have each urged all Members to devote time and attention to this very important matter, in order to be prepared to address the issue at the appropriate time.

For your assistance in evaluating the evidence, the Ethics Committee will re-play the audio and video tapes which were received in evidence during the hearings held on July 14, 15 and 28, 1981. On Monday, Wednesday and Friday of next week (September 21, 23 and 25), there will be two identical presentations each day of those tape recordings made while Senator Williams was present. The first presentation each day will be from 9:15 a.m. to 12:45 p.m., and the second from 2:15 p.m. to 5:45 p.m. You may choose to attend at whatever time is most convenient for you. These tape recordings are listed on the enclosure to this letter in the order they will be shown.

On Tuesday, September 29, and again on Thursday, October 1, there will be available, on request, a presentation of all of the tape recording evidence utilized in the Committee hearings that was not played during the previous week's presentations. These sessions will be held each of the two days from 9:30 a.m. to 12:30 p.m., and from 2:30 p.m. to 5:30 p.m.

The presentations will all be in Room 457, Russell Senate Office Building. It is the wish of the leadership that only Senators be admitted. If questions arise during the presentation which require more than a brief factual response by Committee staff present, arrangements may be made for the Committee staff or Special Counsel to meet with you at a later time.

We want to encourage you to attend one of these sessions, and to take advantage of the time available to become familiar with the transcripts and other documentary material. The Committee Report, No. 97-187, was sent to your office last week, as well as the Committee hearings, exhibits, trial and due process hearing transcripts. We especially want to call your attention to Volume 6 of the trial transcripts, in which may be found the verbatim transcripts of the tape recordings which will be played for you.

If you have any questions on any of the materials the Committee has provided, the Committee staff and Special Counsel will be available to you, at your request. Please let us know if we can be of any further assistance to you in this matter.

TAPE RECORDINGS (AUDIO AND VIDEO) TO BE PRESENTED FOR ALL MEMBERS OF THE SENATE ON SEPT. 21, 23, AND 25, 1981

| Committee exhibit No. | Audio/video | Date | Location | Participants | Time (minutes) |

Source: Senate Select Committee on Ethics, Sept. 15, 1981.

Mr. President, again, I cannot urge strongly enough for Senators to become personally informed on the issues which are to be presented during the Senate's debate on that resolution. It is too critical a matter to rely upon staff. Staff can help you. They have all the material in the office. But each Senator should be wise enough to view this as critical enough for the reputation of the Senate, the reputation of Senator WILLIAMS, and all of us for the rest of this century to take a personal and profound interest in this matter.

Mr. President, I thank the distinguished chairman for permitting me to have this time. I yield the floor.

Mr. HELMS. I thank the Senator.

## AGRICULTURE AND FOOD ACT OF 1981

The Senate continued with the consideration of the bill.

Mr. D'AMATO. Mr. President, section 102 of S. 884 concerns the legal status of producer handlers. A number of my constituents are concerned that the current exemption for producer handlers from milk marketing orders not be adversely affected by the provisions of the dairy title. It seems clear to me that section 102 maintains this exemption. Is this correct?

Mr. HELMS. Yes. The committee wishes to make clear that it approves of keeping the producer-handler method of marketing open to dairy farmers. With their share of the market now reduced very substantially from previous times, the need for consideration of regulation is even less necessary now and it is more essential than ever that these small businessmen be exempted from the complex pricing requirements of milk marketing orders.

Mr. President, on the condition that I do not lose my right to the floor, I yield to the Senator from Iowa.

UP AMENDMENT NO. 356

Mr. JEPSEN. Mr. President, I wish to modify my amendment. It is a technical change. I wish to modify it to read as follows: On line 4, after the parenthesis, add the words "as amended by section 150 of the Omnibus Budget Reconciliation Act of 1981, is amended by".

The PRESIDING OFFICER. The Senator has the right to modify his amendment. The amendment is so modified.

The amendment, as modified, is as follows:

On page 134, beginning with line 13, strike out all through line 12 on page 135 and insert in lieu thereof the following:

"Sec. 103. Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) as amended by section 150 of the Omnibus Budget Reconciliation Act of 1981, is amended by—

"(a) deleting everything after the first sentence in subsection (c) and inserting in lieu thereof the following:

'Notwithstanding the foregoing, for the period beginning October 1, 1981, and ending September 30, 1985, the minimum level of price support for milk shall be 70 per centum of the parity price therefor: *Provided*, That whenever the Secretary estimates that the net cost of Government price support purchases of milk or the products of milk will exceed $750,000,000 if the support price for milk is established at the level required by the foregoing provisions of this subsection, such level of support may be adjusted to the extent the Secretary deems appropriate but not to a level less than the support level for the prior marketing year: *Provided further*, That the support price shall in no case be less than $13.10 per hundredweight of milk containing 3.67 per centum butterfat: *Provided further*, That the level of support for milk for the remainder of the 1981-82 marketing year may be adjusted in accordance with the foregoing although a level of support for such year has been established prior to the effective date hereof. Such price support shall be provided through the purchase of milk and the products of milk.'; and

"(b) repealing subsection (d)."

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, the Senator from North Carolina hopes that an accommodation may be in the process of being worked out on the pending amendment. For that reason, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 359

(Purpose: To restore the text of the dairy price support provisions contained in the bill as reported and to provide authority for the Secretary of Agriculture to waive, in whole or in part, the annual adjustment of the support price of milk if estimated net support purchases exceed $750,000,000 in any fiscal year and to make clear that the support price for milk for the year beginning October 1, 1981, will be not less than $13.10 per hundredweight)

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Minnesota (Mr. BOSCHWITZ) proposes an unprinted amendment numbered 359 in the nature of a substitute for unprinted amendment numbered 356.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after "Viz:" and insert in lieu thereof the following:

On page 134, beginning with line 13, strike out all down through line 12 on page 135 and insert in lieu thereof the following:

SEC. 103. (a) Section 201(c) of the Agricultural Act of 1949 (7 U.S.C. 1446(c)) is amended by striking out the second sentence and inserting in lieu thereof the following: "Notwithstanding the foregoing, effective for each of the fiscal years during the period beginning October 1, 1981, and ending September 30, 1985, whenever the Secretary estimates that the net cost of Government price support purchases of milk or the products of milk will exceed $500,000,000 or that net Government price support purchases of milk or the products of milk will exceed 3.52 billion pounds (milk equivalent) during any fiscal year, the price of milk beginning on October 1 of such fiscal year shall be supported at such level, as determined by the Secretary, not less than 70 per centum of the parity price therefor except that beginning on October 1, 1981, the price of milk shall be supported at not less than $13.10 per hundredweight for milk containing 3.67 per centum milk fat.".

(b) Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by adding thereto a new subsection (d) as follows:

"(d) Notwithstanding the provisions of subsection (c) of this section, effective for the period beginning on October 1, 1981, and ending September 30, 1985, the Secretary shall adjust the support price of milk to not less than 70 per centum of the parity price therefor on April 1 of each fiscal year, if on that date the support price of milk is below 70 per centum of the parity price therefor. Notwithstanding the foregoing sentence, if on March 1 of any fiscal year the Secretary estimates that the net cost of Federal price support purchases of milk and milk products during such fiscal year will exceed $750,000,000 if the support price for milk is established at the level required by the foregoing provisions of this subsection, the Secretary may waive, to the extent he deems necessary, the adjustment of the price support price for milk otherwise required to be made on April 1 of such year.".

Mr. BOSCHWITZ. Mr. President, we have just voted on a second-degree amendment to the amendment of the Senator from Iowa, the second-degree amendment having been presented by me, and it incorporated the language of S. 884, with the addition of a $13.10 minimum. The language of S. 884 called for a semiannual adjustment of parity.

Parity, as Senators know, is a system of relating the farmer's costs to what he receives for his goods. This administration has taken a very firm stand, and I have voted with them in most instances, against semiannual adjustments, whether it be in the field of pensions or any other area. I must say that I have a certain sympathy for that position and, as indicated, have voted that position on a number of occasions.

Therefore, this amendment changes S. 884. In the event that what my friend and colleague from Iowa says is true, that there will be large removals by the CCC in excess of $750 million, we will forego, under this amendment, the semiannual adjustment, and there will be an annual adjustment of 70 percent; and in the event that removals are projected—not happen, but are projected—by the Department of Agriculture to be in excess of $750 million for that year, then the semiannual adjustment will be vitiated.

That really is the difference between the amendment we offered earlier and the amendment we now offer—that the semiannual adjustment will be vitiated in the event that projections of dairy removals exceed $750 million.

All the arguments have been made in our last round of debate with respect to the preceding amendment, and I do not want to repeat them all and spend the time of the Senate. So, without losing my right to continue the debate and answer the questions of some of my colleagues, at this point I yield the floor. I will call for a rollcall vote on this matter.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. JEPSEN. Mr. President, will the distinguished Senator from Minnesota advise the Senate what the estimated cost of this amendment is above and beyond the proposed basic amendment?

Mr. BOSCHWITZ. Once again, as the Senator from Iowa knows, we have seen a series of figures. Apparently, the amendment I offered prior to this one was going to be $1.2 billion more over the course of 4 years, and this amendment is approximately half that.

Mr. JEPSEN. That sounds logical and reasonable, and it is probably as accurate as any figures we might get if we researched it for a couple of hours. So we will forgo that.

This would be approximately $600 million, or approximately one-half of what the other was, since it would be semiannually instead of annually.

Mr. President, here we go again. We are talking again about helping dairy producers work out the problem of excess supplies, and no matter what happens today or tomorrow or next year or 10 years or 20 years from now, if they continue on the basis they have been, everything is going to be the same. Instead of having 70 percent of parity, or $13.10, we will have excesses of milk and milk supplies that will bring it down considerably below that, and somebody is going to be hurt.

The fact of life is that we have to get this under control, and we have to keep in mind on a positive basis the twin objectives providing both adequate support, which my basic amendment does, and also at the same time reducing budget outlays in the total picture of what this administration, this Congress, and this Senate, and my distinguished colleague from Minnesota included, has been trying to do and bring about.

The facts of life are that if the dairy industry can assure itself of working out their excess production, as I indicated before, I would be up front helping them to increase consumption, thereby assuring that they would not exceed the $750 million which basically the Department of Agriculture and this Government is saying that they will subsidize. They will support to the amount of $750 million with a base of $13.10 per hundredweight even if it exceeds that. I just hasten to point out the dairy industry can assure itself of an increase by bringing its costs to the Treasury down below $750 million.

Whether it be the dairy industry, or I can assure the Senate any other department, whether it be HHS or HUD, or some of the spending programs we have anywhere else, my attitude and posture is going to be the same thing. It is a little more difficult, as I say, being probably one of the few Senators here who has a direct interest in the dairy business, but I say this, and I hope that we will come to an early vote on this and get voting on my amendment.

Mr. DIXON. Mr. President, will the Senator from Minnesota yield for a question regarding this amendment?

Mr. BOSCHWITZ. I yield.

Mr. DIXON. I advise the Senator that I voted for the motion to table on the prior amendment proposed by the distinguished Senator from Minnesota which I understood to be the amendment which incorporated the terminology in S. 884. That is correct, is it not?

Mr. BOSCHWITZ. That is correct.

Mr. DIXON. The amendment the Senator from Minnesota is now proposing, as I understand the case, is the amendment that was discussed extensively in the meetings of the Agriculture Committee last week concerning the attempt of the committee to reach some type of an honorable compromise between the position that the committee took in its deliberations which spans several months as reflected in S. 884 and the present position of the administration. Is that correct?

Mr. BOSCHWITZ. The Senator from Illinois characterizes this amendment quite correctly when he says it is an honorable compromise.

Mr. DIXON. As I look at the cost estimates on the farm bill, which were made available to us by the Congressional Budget Office during our committee deliberations, it is a fair statement, is it not, that in each of the years 1983 through the outyear 1986, there would be a substantial savings in this amendment compared to the prior amendment proposed by the Senator from Minnesota? Is that true?

Mr. BOSCHWITZ. That is indeed correct, and I will, after the Senator is through, correct some of the figures that

I discussed with the Senator from Iowa a minute ago.

Mr. DIXON. CBO's figures show that over $600 million would be saved over the period of those 4 years, the life of this bill, compared to the prior amendment which was rejected on a motion to table 53 to 41, by this second amendment now being proposed by the distinguished Senator from Minnesota; is that correct?

Mr. BOSCHWITZ. The Department of Agriculture has given us numbers that indicate that skipping the midyear adjustment would bring about a savings of $170 million so that the savings would be $680 million between this amendment and the preceding amendment. If I may continue for a moment, these last figures that we received from the administration were on September 9 and frankly the difference between my amendment now and the amendment of the Senator from Iowa is $26.8 million a year, not the $500 million or $600 million over the course of the 4-year farm bill, which would be $125 million or $150 million a year. I caution my friend from Illinois once again that we get a whole bunch of figures, but at least the last figures we have show that there is a rather nominal difference between this amendment and the administration's position.

Mr. DIXON. I thank the Senator from Minnesota and ask him further: Is it not true that with respect to every single commodity contained in this bill the committee in its earnest effort has made a compromise generally reflected in the amendment agreed to and proposed by the distinguished chairman of our committee, that is, on all the other commodities there has been a compromise, something that I would refer to as an honorable compromise reflecting a resolution of the differences of opinion as reflected in S. 884, the committee bill, and the administration's position? Is that not true?

Mr. BOSCHWITZ. That is indeed correct.

Mr. DIXON. The Senator is now proposing, as I understand it, in his second amendment, having had his first amendment tabled on a vote of 53 to 41, what he believes and what many of us in that committee believed was an honorable compromise between S. 884 and the position of the administration; is that not the case?

Mr. BOSCHWITZ. I certainly agree with the Senator.

Mr. DIXON. I just wish to tell the Senator from Minnesota that I did not support him on the prior amendment, but I think this is a good amendment in the spirit of compromise for the committee has reached a compromise on every other commodity. I thank the Senator for the information he has given me on this amendment.

Mr. JEPSEN. Mr. President, will the Senator from Illinois now yield?

Mr. DIXON. I yield.

Mr. JEPSEN. Did I understand the Senator to say that there was a big savings in this amendment over the last amendment?

Mr. DIXON. Relative to the last amendment, that is my understanding.

Mr. JEPSEN. How much of a savings was there?

Mr. DIXON. Over the total life of the bill CBO's figure is over a half billion dollars, although I think the Senator from Minnesota told me he thought it was $680 million.

Mr. JEPSEN. In any event, I point out that having been in sales management most of my life, I understand the play on words and the positive way of presenting something. Here we have an amendment that cost $1.2 billion which was just lost and now we are coming up with an amendment that only costs $600 million; therefore, we save $600 million. It is kind of like some of the spend-yourself-rich philosophy that has been taking place in the last 25 years in Washington. It is kind of like a drunk trying to drink himself sober; $600 million savings does not exist. It is $600 million additional expense above and beyond what has been reasonably added to this program by way of a support that is proposed in the basic amendment that I have.

The cost again of the basic amendment plus this one now is, as the Senator has indicated, $600 million more than would otherwise be so.

We cannot have it both ways. If we are going to keep our twin objective of providing adequate support on a permanent and a lasting basis for the dairy industry and reducing budget outlays, trying to get a handle on this runaway inflation and high interest rates and all the things we are trying to do here, we cannot do both. We cannot have it both ways.

Mr. DOLE. Mr. President, I appreciate the fact that we are going to save half of what we did not have in the first place. We are out of money. We are trying to find ways to squeeze a little more out of the food stamps and medicare, and those programs that affect low income America.

I do not suggest that the dairy farmers should not have a good program. They have a good program.

We have been on a 20-year spending binge in Congress and are starting to sober up around here.

We spent our generation's money, we spent the next generation's money, and we are now going on. What is $600 million? It is only $600 million. It is $600 million that we are going to have to find in some other place.

This Senator is willing, if there is any indication of somehow someone got better treated than the dairy farmer, which I doubt in any farm bill, we will go back and take a look at the wheat program. Maybe we can save more money in the wheat program, maybe we can save more money in the corn and feedgrain program, and maybe we can save more money in the rice program.

What this Senator wants is to get a farm bill passed. I thought we had sort of a loose coalition. It is very loose because some of those members of the coalition went the other way. We are having it both ways and as long as it is that loose it is all right.

We are talking about $600 million. That may not be much money in normal times, but these are not normal times. I still have to believe that the farmers in the State of Kansas and every State in this country want us to break the back of high interest rates and break the back of inflation.

They are willing to make a contribution. I know a lot of people out here who are talking to us in the lobby. They do not get paid for asking for lower prices. The lobbyists get paid for looking for higher prices, higher support, more tax money, and I appreciate that, and I have supported them a lot, probably should not have, but I did.

But now we find ourselves in the position of whether or not we are going to have a farm bill at all, which depends, I think, on the vote on this motion to table, and I am going to move to table the amendment in a minute.

So the choice is ours. Some people do not want a farm bill at all. One way, I guess, to assure that is to let this motion fail.

I want to commend the distinguished Senator from Minnesota. He has been diligent, he has been stubborn, in the right way, he has fought every inch of the way, and I think I admire that—I know I admire that—in anyone.

But I think, on the other hand, I do not believe this $600 million we are talking about is going to save the dairy industry of America over a 4-year period. What would save the wheat, dairy, feedgrain, and other industries is to get the interest rates down.

We are going to store up—we have butter we cannot sell, butter I guess we would not sell, and we have a lot of things piled up in the storage bins that cost a lot of money just to keep, and the farmers are not cutting back their herds. The milk producers are not cutting back their herds. Why? Because they are making a good profit. I just hope we will defeat this amendment, we will table this amendment, and then move on to what I think the distinguished chairman and Senator HUDDLESTON have worked out, sort of a bipartisan coalition on some of the other commodities.

This is one Senator, if the wheat thing is too high in the eyes of some people, and the rice thing is too high, who will go back and take some out of those programs?

What we need is a farm program, and we need it very quickly, and we can argue about whether it is $1 billion or $600 million or zero. This administration and the Secretary of Agriculture believe in agriculture. The Secretary is a farmer. He wants to make a profit.

He is not going to advocate a program that is not going to make a profit for the American dairy farmer, and he is not advocating that now. But there are certain restraints, and we know what those restraints are. That does not mean we cannot try to break those restraints. It does not mean we all have not participated in that in the past, and maybe some of us, all of us, will in the future. But I hope all those who are members—we do not have any membership cards in the coalition—but I think we have an obligation because we are going to have up next, I might say, maybe cotton is

going to be up, and then maybe sugar is going to be up, and then peanuts are going to be up, and somebody is going to think about tobacco, and that will be up.

I want to remind all of those people that if we do not solve the dairy problem there will not be any need to talk about peanuts or tobacco or sugar or anything else. If this amendment is not tabled, that is the end of the farm bill so far as this Senator knows, and I have not discussed it with the chairman.

So I think it is that serious. It is not criticism of anybody who offers this amendment. We have to eat a few now and then. We ate a few in the tax bill. Some we could swallow, some we got to conference with. But I do not want to shut anyone off before I move to table the amendment.

Mr. BOSCHWITZ. Mr. President, if I may just comment very briefly, do not spend the $600 million before it is out the door. The administration's estimates that we had were just in excess of $100 million over the 4 years.

I again repeat we have never been down as low in parity as we are going to go under this suggestion, and that indeed we should give that an opportunity to work and see if it will work.

As my colleague from Kentucky, Senator HUDDLESTON, pointed out, we are not casting this bill in concrete, and if it does not work and if, indeed, the population of cows goes up and we continue to have these large surplus this fall, I will find myself, together with you, Senator, and Senator JEPSON and others, seeking to adjust as we adjusted this past March the skipping of the semiannual adjustment, so we can indeed adjust it even after it is passed.

But I believe in the American farm system. I believe in what I am doing. I believe that probably it will not cost the $600 million referred to earlier. The farmer you spoke about, the low-income American will suffer. Most farmers are certainly in that group, and I hope my colleagues will support this amendment.

Mr. DOLE. Mr. President, I would just say that some of the other commodities would like to get up to 70 percent. I do not know of any other commodity—maybe peanuts and one other—but that is not the question here. Maybe parity is no longer a good measure, maybe it never was, but wheat is about less than 50 percent, corn is less than 50 percent. If we could get up to where dairy was, we would have a problem in this country.

I might also say to the Senator from Minnesota that we meet every year, and I have known it to happen before, and if, in fact, we think we have caused an adverse impact on dairy production, we can change the law. Congress is meeting, and I know we have done that in off years before where we raised parity for dairy because of an adverse impact. In fact, I joined Senator Humphrey not very many years ago in doing that.

So this is not an antidairy producer. It is an effort to get a farm bill passed and, therefore, I move to table the amendment.

Mr. BOSCHWITZ. Mr. President, if I may respond prior to the Senator's making that motion, I agree, as we have discussed before, Senator, that indeed your wheat farmers, due to their efficiency and due to their productivity——

Mr. DOLE. And due to the embargo.

Mr. BOSCHWITZ. Due to the embargo, about which we both feel the same way, that the price is not 70 percent of parity. But certainly their efficiency and productivity have risen and compensated to a large degree for it not being that percentage of parity.

I yield the floor.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. I move to table the amendment of the distinguished Senator from Minnesota.

The PRESIDING OFFICER. A motion has been made to table the amendment.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the motion to lay on the table the amendment of the Senator from Minnesota. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Iowa (Mr. GRASSLEY), the Senator from Oregon (Mr. HATFIELD), and the Senator from Vermont (Mr. STAFFORD) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from New York (Mr. MOYNIHAN), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. ROBERT C. BYRD) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 51, nays 42, as follows:

[Rollcall Vote No. 255 Leg.]

YEAS—51

| | | |
|---|---|---|
| Armstrong | Hawkins | Pell |
| Baker | Hayakawa | Percy |
| Biden | Heflin | Pryor |
| Bumpers | Helms | Quayle |
| Byrd, Harry F., Jr. | Hollings | Roth |

NOT VOTING—7

| | | |
|---|---|---|
| Byrd, Robert C. | Matsunaga | Williams |
| Grassley | Moynihan | |
| Hatfield | Stafford | |

So the motion to lay the amendment (UP No. 359) on the table was agreed to.

Mr. JEPSEN. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the amendment, as modified, of the Senator from Iowa.

The amendment (UP No. 356), as modified, was agreed to.

Mr. JEPSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Is there further amendment to be proposed?

UP AMENDMENT NO. 360

(Subsequently numbered amendment No. 544.)

(Purpose: To eliminate acreage allotments, marketing quotas, poundage quotas, marketing penalties, and other provisions applicable to the production of peanuts and authorize a new price support program for such commodity effective beginning with 1982 crop)

Mr. LUGAR. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Indiana (Mr. LUGAR) for himself, Mr. PELL, Mr. TSONGAS, Mr. COHEN, Mr. DANFORTH, Mr. DURENBERGER, Mr. HAYAKAWA, Mr. JEPSEN, Mr. PERCY, Mr. STAFFORD, Mr. HATFIELD, Mr. RIEGLE, Mr. LEVIN, Mr. HUMPHREY, Mr. BOSCHWITZ, Mr. GARN, Mr. GORTON, Mr. HATCH, Mr. HEINZ, Mr. QUAYLE, Mr. SPECTER, Mr. GRASSLEY, Mr. ROTH, and Mr. DODD proposes an unprinted amendment numbered 360.

Mr. BAKER. Mr. President, I ask unanimous consent, with the agreement of the distinguished sponsor of the amendment, that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 197, beginning with line 13, strike out all down through line 2 on page 212 and insert in lieu thereof the following:

"REPEAL OF EXISTING PROGRAM

"SEC. 701. (a) Effective beginning with the 1982 crop of peanuts, part VI of subtitle B of title III of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1357–1359), relating to peanuts, is repealed.

"(b) Effective beginning with the 1982 crop of peanuts, the Agricultural Act of 1949 is amended—

"(1) by striking out 'and peanuts' in section 101(b); and

"(2) by striking out 'peanuts,' in section 408(c).

"PRICE SUPPORT FOR PEANUTS

"SEC. 702. Effective beginning with the 1982 crop of peanuts, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended—

"(1) by inserting 'peanuts,' after 'honey,' in the language preceding subsection (b); and

"(2) by adding at the end thereof a new subsection (g) as follows:

"(g) The prices of the 1982 and subsequent crops of peanuts shall be supported at such level as the Secretary considers appropriate, taking into consideration the eight factors specified in section 401(b) of this Act, the cost of production, any change in the index of prices paid by farmers for production items, interest, taxes, and wage rates during the period beginning January 1 and ending December 31 of the calendar year immediately preceding the crop year for which the level of support is being determined, the demand for peanut oil and meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets."

ORDER OF BUSINESS

Mr. BAKER. Mr. President, if I may have the attention of the Senate for just a moment, I have consulted with the distinguished author of this amendment and with the managers of the bill. It is the intention of the leadership to go out about 6 or a little after tonight and to bring the Senate in fairly early tomorrow.

I am advised that Senator LUGAR will take more than a half-hour for him to make his presentation tonight, so there will be no further rollcall votes this evening.

Mr. LUGAR. Mr. President, I propose, on behalf of myself and 28 cosponsors, an amendment to title VII, the peanut price support section of S. 884. This amendment would delete the acreage allotment and poundage quota provisions contained in S. 884, and substitute a straightforward loan support program parallel to those for corn, wheat, soybeans, rice, and other crops.

The peanut program began many years ago when farmers in peanut producing areas were in difficult straits. Production was vastly greater than domestic demand, and effective overseas demand at that time was almost nonexistent.

Starting in the 1930's and continuing into the mid-1960's, many commodities had rigid production restrictions and some had marketing controls. We had acreage allotments for wheat, corn and many other crops until 1973, and the permanent agricultural price stabilization law still authorizes such restrictions for our "basic" crops. In fact, these regulations are now seen as outdated and we do not use them any longer. Today, peanuts are the last food crop for which these production controls are maintained.

The predicament we face is that 59,100 owners of land have allotments on which peanuts can legally be grown. Most of these persons do not farm at all; they rent their allotment to the farmers who actually produce the peanuts.

In 1979, these rents averaged $115 per acre, a pure monopoly cost added to the price of peanuts. In some areas, these rents are as high as $400 per acre. Roughly 20 percent of the cost of producing peanuts in the United States is strictly a monopoly rent paid to 59,100 fortunate individuals and corporations.

Further restrictions on production are imposed under current law by assigning each acre a poundage quota to limit overall supplies.

Only part of the peanuts grown on an allotment acre fall within this quota and are eligible for one level of price support; the balance are eligible for another, lower level of support. This two-tiered loan support system sets much higher loan rates for peanuts consumed domestically than it does for peanuts marketed for export or crushed for oil and meal.

Consumers are the real victims of this arrangement. According to USDA statistics, the peanut provisions contained in S. 884 would increase consumer costs by at least $175 million over the life of the bill.

In order to oversee all these restrictions and regulations, the Government has underwritten the development of area grower associations who market peanuts as agents for both the Commodity Credit Corporation and the growers. They are the clearinghouses for all peanut price support transactions. They insure that the artificial distinction between peanuts provided within quotas and "additional" peanuts is preserved so that only high-priced quota peanuts go to domestic markets.

In addition to the associations, there is a vast Federal/State inspection team involved with the quality of peanuts. The estimated annual cost to the Federal Government of administering this program is over $9 million involving nearly 500 employees, most of them non-Federal.

To assure consumers of an adequate supply of fresh, wholesome peanuts, a price support program is absolutely necessary. Without price supports, temporary seasonal gluts in production would cause very erratic prices for farmers and consumers.

However, the complex web of regulations and restrictions contained in current law and S. 884 is not justifiable. The perils of growing peanuts are very real, but they are not so drastically different from the risks attached to other crops that they warrant such extraordinary protection.

A simple loan support program similar to those in effect for other crops, would offer adequate protection to peanut producers, assure consumers of stable prices and a high quality product, and lower the administrative and financial burden to the Federal Government.

Mr. President, the current program is really so badly in error that we simply need to discard it and move to a system comparable to those in effect for most other crops. Consider one example.

In the early 1930's, when soybeans were a minor crop, American farmers harvested about the same number of acres of peanuts as soybeans. However, peanuts generated about twice as much income. By the late 1930's, the value from producing soybeans caught up with peanuts. But in 1941, marketing quotas and acreage allotments were established for peanuts.

Soybean producers, however, opted to be free from rigid controls and to compete with other commodities. The rest of the story is well known. World demand for soybeans exploded. We now plant annually about 70 million acres of soybeans compared with only 1.6 million acres of peanuts.

In 1979–80, U.S. soybean exports totaled nearly 24 million metric tons, while U.S. peanut exports amounted to less than one-half million tons. That same year, soybeans were the number one cash crop earner, returning $13.2 billion to U.S. farmers and accounting for a tenth of total U.S. farm cash receipts. This compares with $0.8 billion for the sale of peanuts in 1979.

Defenders of the current program assert that would-be reformers are trifling with a "fine tuned mechanism," and that any change would only bring chaos and hardship to peanut producers. Similar warnings were sounded in 1975 when an allotment system was ended for rice. When the House of Representatives debated ending the allotment system for rice, Representative Poage, former chairman of the House Agriculture Committee, stated:

> I am opposed to this bill, believing, as I did last year, that it means the destruction not only of a successful rice program but also the demise of several other agricultural programs and the forcing back into poverty of a number of our agricultural producers.

Contrary to the distinguished Congressman's predictions, eliminating the acreage allotments for rice did not destroy our domestic rice industry. Rice is now being grown in places where it had been illegal—in other words, on the land where it can be produced most efficiently and cheaply.

Prior to the 1975 reforms, the United States produced an average of 100.9 million hundredweights of rice for the 5 preceding years. During that same time period, total consumption averaged 95 million hundredweights per year. This meant an average yearly surplus of 5.9 million hundredweights.

For the 5 years following the reforms in the rice program, production increased to an average of 125 million hundredweights. However, for that same time period, consumption also increased to 125 million hundredweights, bringing supply and demand into perfect balance.

Rice producers are now responding to supply and demand signals instead of the phony price signals caused by Government restrictions and are prospering by doing so.

This current peanut program is a "fine tuned mechanism" only for the 59,100 allotment owners. To producers forced to rent allotment rights, and to consumers paying needlessly high prices for peanuts, this program looks more and more senseless.

My opponents argue that, because peanuts are perishable and cannot be stored for long periods of time, any change in the current peanut program would cause the entire marketing system for peanuts to collapse, leaving peanuts in the fields

to spoil. It is preposterous to assert that the market economy would allow a valuable resource such as peanuts simply to go to waste.

The perishability issue arises only because of today's static situation in which Government policy has obviated the possibility of futures markets or other market-ordering apparatus.

Shortly after I announced that I would offer my peanut amendment during the floor debate of the farm bill, I received a letter from the New Orleans Futures Exchange expressing an interest in setting up a futures market for peanuts if our reforms were adopted. As outlined in the letter, one of the criteria for establishing a futures market is no rigid governmental price controls.

Unless my amendment is adopted there will continue to be no futures market for peanuts, denying peanut farmers of the opportunity in a market economy to hedge, to employ delayed pricing, and to forward contracts.

President Reagan is making a strong effort to place our economic emphasis on supply-side economics and free market principles.

Unfortunately, none of these policies are reflected in the peanut provisions contained in S. 884. Until Congress can see its way toward eliminating restrictive programs whose advantages are confined to a select few, long-term economic recovery remains unlikely.

We have talked about attacking inflation on the supply side. Supply-side economics means creating those conditions in which people are most likely to allocate scarce resources successfully. In that sense, the amendment that my colleagues and I have offered is a supply-side economic bill.

It offers incentives for people to use their best judgment, with the freedom to grow or not to grow peanuts as they see fit. We aim to encourage peanut production on those farms on which peanuts can be produced most efficiently. Only this sort of system is consistent with the philosophy of the new administration, and with the agricultural heritage through which we have prospered.

(Mr. COHEN assumed the chair.)

Mr. LUGAR. During the course of the debate on the farm bill substitute language has been offered to S. 884, which I would want to acknowledge, by the distinguished chairman of the committee and at least nine other members of the committee.

The provisions of S. 884 have been modified in four significant ways: First of all, the majority of the committee have reduced the national poundage quota from 1.3 to 1.24 thousand tons.

Second, they have reduced the quota of loan rate to $596 per ton—and that is in contrast to the $631 listed initially in S. 884, a reduction of $35 per ton.

Third, they provide that there shall be no criminal penalties for violation of peanut marketing quotas; and, fourth, they have provided that no person may exercise allotment rights without sufficient tillable land to support the allotment. Any allotment/quota surrendered for lack of tillable land shall revert to a pool to be distributed to new growers.

I would say, Mr. President, that I acknowledged the contributions made by the authors of the new language and clearly they are a step forward. Without knowing precisely the cost figures, I accept the fact that most of the peanut program, as represented originally by S. 884, has been substantially limited. Some would argue, as may the authors of the new language, that the net cost estimates will come out at zero.

It seems to me important to acknowledge at the outset of this debate, Mr. President, that the total cost of the peanut program is not the major issue here. It is an important issue and, to the extent that participants in the debate have narrowed that focus so that it does not become an issue, so much the better for the American taxpayers and for the strength of the farm bill.

Very clearly, the changes made are an acknowledgement that many farmers in this country resent the fact that they cannot plant peanuts on their land. That remains a fundamental issue that has not been dissipated by changes made in the bill thus far. It is a key issue in my amendment. I suspect that it will be unique in my amendment, as opposed to secondary amendments or substitutes that may be offered.

I am saying, Mr. President, in essence, that the right to grow peanuts in this country ought not to be allotted to anyone by inheritance, by passing on from year to year, nor to involve monopoly rents.

Mr. President, representation has been made in the course of the committee markup of this legislation, and certainly many Members have heard arguments orally or written in the press, that the peanut system represents a way of life; that it is an ingrained part of the fabric of at least 10 States in which there are substantial numbers of peanut growers; and that one problem with my amendment, among others, is that it uproots that entire system in one fell swoop, that it takes what has been thoroughly ingrained over the course of over 40 years and not only uproots it but places peanuts in precisely the same situation as soybeans and corn and other commodities that we have been discussing.

Mr. President, the numbers involved in the peanut situation are relatively small. In the same way that I acknowledge that the cost of the total program is almost minuscule in comparison to the dairy debate we have just had or the target price support situation that we shall have, and those are very big figures, peanut figures are very small.

By the same token, it seems to me that those who are proposing the current system or minor modifications of it are hard pressed to point out how 59,100 plots scattered over 10 States so visibly affects the fabric or are of such fundamental political and economic importance. The numbers simply do not add up to that.

As a matter of fact, in the States that are involved, the numbers, at most, do not come out to more than 20,000-plus in the largest case and, as I recall, 15,000 in the second largest. These are important figures.

But to say that the entire fabric, the ethic, the sociological and political structure rests on those numbers is to stretch credibility.

The peanut project has always been very small. I would submit this is one reason it has escaped attention. It has been extremely complex, and the amount of money involved has often seemed hardly worth the attention, perhaps, of the committee or of Senators and, thus, a system which, on the face of it seems to me to be vastly unfair, as one compares different crops and how they are treated in this country, has escaped minor attention. As a matter of fact, many persons have simply thrown up their hands in trying to figure out what the whole peanut situation was about.

In my initial paragraph, I tried to describe it succinctly. But I want to do so in one other way.

The facts of peanuts are that some time ago an allotment system was set up, which means that the number of acres in the country planted with peanuts was limited. So there is the first limitation—$x$ number of acres in this country that can be planted; the same acres, as a matter of fact, owned by 59,100 people. A limitation of acres.

Now, in years past, that was sufficient. But in due course farmers became more efficient in producing peanuts. As a result, the number of peanuts that could be grown on $x$ numbers of acres grew by a multiple of almost three. As a result, to maintain a limited supply, a second restriction came into being—poundage quotas.

In short, Mr. President, the limitation first persists that you must plant peanuts on a specific one of 59,100 plots, but, having done that, only a certain number of pounds can be marketed at the first tier loan rate.

If you are an efficient peanut farmer and you, in fact, produce, as most efficient peanut farmers do, more pounds of peanuts than will be supported by the first tier loan rate, you would qualify for a second tier. Those peanuts could go into the export trade or they could be crushed for oil and they would be supported by a different and much lower loan rate.

Nowhere in this system, Mr. President, is there the possibility for a farmer in Indiana, for example, to plant peanuts, because there are no plots available. In the event that a farmer in Indiana should finally qualify for a plot due to new legislation or some change of the system, that farmer would then have to be very careful how many pounds he produced of peanuts, and a rigid system of segregating the sheep from the goats literally pertains, with a good number of people spending a lot of time making certain the two were not confused.

Under this type of an agricultural setup, as I have illustrated in my statement, peanuts have hardly flourished as a crop in this country. As a matter of fact, they have lost ground consistently. They are a battle crop. They represent all that occurs when something literally withers on the vine due to special interests and overprotection and minute attention to the detail that the laws be rigidly followed without deviation.

It is interesting, Mr. President, that

one of the substitute proposals made into this legislation yesterday addressed the thought that there would be no criminal penalties for violation of peanut marketing quotas.

It may come as a surprise to many Senators that we should be addressing the thought of obviating criminal penalties, that there could be anything that serious about planting peanuts in this country.

But, Mr. President, the people involved in peanuts have taken this issue very seriously, extraordinarily seriously.

The issue has been taken so seriously that what really, in fact, almost could be a point of humor is taken almost as a matter of honor. I simply must say, Mr. President, that I think we have an interesting debate here, but this is not a monumental national question.

It is an extraordinary event for someone offering an amendment to try to minimize the scope of the amendment, but I think it is simply important to put in perspective that bit by bit it will whittle down the cost of the program, and I congratulate those who have done that. They have certainly moved in the right direction. What they have also done is to minimize the crop. We have never had a vibrant peanut industry and we shall never have one under these conditions.

Those who are champions of peanuts, those involved in the dynamic aspects of the peanut industry, of course support legislation that will make it possible for them to plant.

What I am proposing, Mr. President, is simply that peanuts be planted in the most efficient places in this country; that the interests of consumers and the industry will flourish if, in fact, efficient producers are allowed to make this crop grow; that an efficient marketing futures industry be allowed to flourish; that the principles established when the rice situation changed abruptly in 1975 would pertain dramatically to peanuts in 1981.

It is an extraordinary point of view, perhaps, for some to encompass, Mr. President, but the points that I am making are pro peanut industry, pro peanut grower. The only persons who are in difficulty with this particular amendment are those among the 59,100 who do not grow peanuts, who have land which was basically inefficient for peanut growing to begin with, those who have been obtaining monopoly rents.

Now, Mr. President, the case has been made with regard to the latter that in this 59,100 group in our society scattered over 10 States there are many poor people. The suggestion has been made that granted the system is not efficient, granted it does not pertain to the market economy, granted it really has been disastrous for the growth, relatively, of peanuts in relation to soybeans, rice, or anything else going on in our economy, the whole thing ought to be perpetuated because there are many persons over the course of 40-some years of this system who now have grown old owning plots of land, who are old and poor, and who have small plots besides.

Mr. President, it is not long ago that we debated the so-called minimum payment in social security on this floor. The case was also made that that $122 payment might in some cases be denied to individuals in our society who were old and poor. The President of the United States and the leadership of both Houses have pledged to try to identify those persons and to try to make the system whole to help them. It is not a far-fetched parallel, Mr. President, in terms of arguing this situation.

A careful analysis of 59,100 would show that there are, among those plots, some held by persons who are old and poor. It would show that certain amounts of income, albeit rather small ones, have been counted upon by these elderly and poverty-stricken individuals.

The case might well be that the peanut program that is being maintained in its current status is an appropriate way to handle social security or income transfer for those individuals; that, in fact, it is not an agricultural program at all; that it ought not to be judged on the basis of having anything to do with agriculture in this country; that, as a matter of fact, it is a welfare program, a benign one in which good people are participating and receiving income from monopoly rents in this form; that to break all that up and to create an agricultural program out of this would do violence to the memories of those persons who have held on so long and so well.

Mr. President, that simply will not work. I appreciate the compassion in the statements made in behalf of persons who have in fact been receiving these payments. I have no doubt that we ought to take a look at their situations, and, as a compassionate Congress, try to deal with that in a transfer payment income maintenance program outside the agriculture bill.

But, Mr. President, the time has come to take a look at the last commodity that we can use for food, and a very good one, a product that is enjoyed and used by many Americans and would, in fact, be enjoyed by many more, if, in fact, we had a dynamic market, if we had marketing at all, as a matter of fact. Those who really champion the cause of peanuts will be for my amendment. They will be for it because it brings peanuts into the 1980's, into a dynamic supply-side situation in which peanuts are really marketed and in which we move on.

Mr. President, I appreciate one more set of arguments that has been offered with regard to this bill. I mention this situation simply because each one of us in our various constituencies have groups of people we have tried to serve well. I think anyone who sits around the table in the Agriculture Committee appreciates precisely the predicament of Senators who want to make certain that the arguments are well made for constituent groups in their States, whether they be agricultural, whether they be industrial, or whoever, as a matter of fact, that they may be arguing for.

I appreciate the fervor, the sincerity, with which the distinguished chairman of our committee and the distinguished Senator from Alabama (Mr. HEFLIN) and others, have argued this point during markup and subsequently, in very vigorous defense of a case that I think is very tough to make except on emotional grounds, compassionate grounds, welfare grounds, on historical grounds—it happened a long time ago and it is very hard to change at one time—on the ground that we have not really considered the details sufficiently in the course of time; that most Senators are unaware of the complexity of the program; that if, in fact, we knew how finely tuned all this was we would not disrupt it.

But, Mr. President, ultimately, peanuts and the peanut-growing constituency have to stand a test of rationality and fairness the same as any other group of people.

There is no objective reason why peanuts should be treated differently than soybeans, corn, wheat, the dairy farmers we have discussed throughout most of this day, or any other group in our society. There is no reason at all, Mr. President, why the peanut program must remain a special program beyond scrutiny, and prior to this year, any real attempt to understanding the program.

I think, Mr. President, that the majority of the Senate now understands the program and they are sympathetic, with those who are going to vote on the process of this program being changed.

Mr. President, I think the argument can be made in due course that, as opposed to such an abrupt change, a total change, we ought to have incremental change, we ought to feather this in year by year over a long period of time.

I appreciate that sort of an argument. It is one that I shall argue against.

The scope and size of this program can best be met by meeting it head on presently. This is the time when we focus on it, and the Senate shall not focus on this problem very often.

Mr. President, my case is one for the end of allotments, for the end of the poundage arrangements, the tiers 1 and 2. It is for a system like that which is enjoyed by those who produce other commodities comparable to peanuts. It involves loans and purchases of the Secretary of Agriculture, in his discretion.

It is a type of discretion that will make certain that the cost of the program is minimal because the Secretary will not offer loan rates that, in fact, cause outlays. I mention that because it came up during the course of our markup, an argument that, somehow or other, my proposal, with present market economics, would be extraordinarily costly. That is impossible, by definition. The Secretary is not going to set loan rates that cost the Treasury money, by definition. He will make certain that the net cost of this is zero. But he will have the discretion to do so, taking a look at marketing objective facts, year by year, and supplies that are available.

The Secretary will be in favor of seeing this crop of peanuts in our country grow, become a vital domestic and foreign market, in the same way that so many of our other great crops have literally taken

off after this type of complex situation was removed from them.

Mr. President, I ask for consideration of these arguments. I obviously await further debate from my colleagues. I am hopeful that they will find favor and, in due course, pass my amendment by a majority vote.

(Mrs. KASSEBAUM assumed the chair.)

Mr. HELMS. Madam President, I do not think the able Senator from Indiana has any doubt about my respect and affection for him. We have discussed the peanut program on a number of occasions. I have learned that, at least on this subject, I am absolutely without any persuasive power on him whatsoever, insofar as this issue is concerned. I respect him nonetheless. I am not going to make or even attempt to make, at this hour, a rebuttal of the arguments so ably presented by the distinguished Senator from Indiana. I will say that what he is proposing involves a number of aspects, none of which I consider to be particularly wise.

For example, he is proposing an annual outlay of up to $325,450,000 for the peanut program, the outlay being from the Commodity Credit Corporation. And that is per year, Madam President. That is not over the life of this bill; that is per year.

Contrast that, if you will, Madam President, to the fact which the Senator from Indiana acknowledges, that we—meaning the Agriculture Committee or the majority of the committee—propose that not 1 thin dime of cost be attributed to this program.

Mr. LUGAR. Will the distinguished Senator yield for a question on that?

Mr. HELMS. If the distinguished Senator will let me finish my point, I shall be delighted to yield to him.

The loss, Madam President, under the proposal by the distinguished Senator from Indiana, will be $196,075,000 a year. That is loss, the nonrecoverables, as the budget people say. The $325,450,000 figure I mentioned earlier would be the CCC's outlay. That is the dollar side of this argument. I think we clearly win it and I think the Senator from Indiana indicated that we would win that because our proposal contemplates zero loss.

Before I proceed, let me yield to my friend.

Mr. LUGAR. Madam President, I appreciate the distinguished Senator's yielding.

During the course of my remarks, does the Senator recall that I indicated that my proposal would have zero cost, simply by definition of the Secretary having offered a loan rate which would make the cost zero? Therefore, the total argument is a washout with regard to cost. Both systems, that proposed by the distinguished Senator from North Carolina and the one of my loan rates proposed by the Secretary would come, I gather, to zero.

Does the Senator recall that? Where, in my remarks, would there be any suggestion of a $320 million outlay in any particular year?

Mr. HELMS. I do not think the Secretary would agree with the Senator on those figures, but we shall get to that tomorrow in some detail when we discuss this fully. The simple truth is that we have to use a loan rate established at a reasonable percentage of parity. The Senator himself suggested 68 percent in his press conference the other day on this issue.

I do not say that in any hostility. I am not trying to paint the Senator into a corner, but he cannot have it both ways.

Mr. LUGAR. Will the Senator yield once again for a short question?

Mr. HELMS. With the understanding that I did not interfere with the Senator's discourse, I am glad to yield again.

Mr. LUGAR. Madam President, did the Senator, in the course of reading my press conference transcript, see any evidence of the figure of 68 percent? If so, I simply plead that that figure was not used. As I recall, the only time it might have been used was in a hypothetical argument that occurred during markup. My argument today did not say 68 percent, nor did I the other day. I simply inquire of the Senator whether he has any retrospect on that question?

Mr. HELMS. I stand corrected. The staff said it was earlier this year that the Senator did use 68 percent. The Senator is entirely correct about that.

Madam President, Senator LUGAR and I have discussed the peanut program. I tried my best to make the argument that the Senate floor—during a debate on a farm bill, which is fraught with complications aside from the peanut program—is not the place even to consider jerking the rug out from under countless thousands of people who, in good faith, have invested in the peanut program through the years.

I say readily to the Senator from Indiana that I do not know what my position would be if this peanut program or any other farm program, for that matter, were to be proposed for creation at this time. What I have said to the Senator, and I ask him to correct me if I am wrong, is that what we ought to do is reduce the cost of the peanut program to zero, and then have the Senator introduce a bill, as opposed to an amendment on the farm bill, to take a look at the peanut program and perhaps others. Then let us have the fairness to call in witnesses to ascertain for certain the damage that will be done to people who have invested in a Government program through the years and to make sure that we do not heap inequity upon them.

I have pledged to the Senator that if he will do that, as chairman of the Committee on Agriculture, I will immediately call hearings on such a piece of legislation. I do not know how to be fairer than that. I reiterate to the Senator that I will do precisely that.

But to come here at this time, in effect, to destroy the program, with how many Senators on the floor? One, two, three, four, five, six—seven, counting the able Senator from Kansas, who is presiding. No Senator is likely to be in his office listening to this debate on the loudspeaker at this hour.

This is not an emotional question; it is not a welfare question; it is a question of equity. It is a question of fairness. It is a question as to whether we really want to jerk the rug out from under people who, in good faith, have invested in a program enacted years ago by Congress, and to do so at an additional cost, in terms of potential loss, of $196,075,000 per year.

I say to my friend from Indiana that if the shoe were on the other foot and the Senator were a peanut State representative and this were proposed to affect adversely his constituents, I would be standing here and saying, "Senator LUGAR, you have an ally to insist on fairness to the people of Indiana."

Madam President, that is about all I am going to say this evening. I have comments which I will make tomorrow in explanation of the program.

I do hope the Senate will approach this matter in a spirit of fairness, considering the countless thousands of people who will be affected adversely; and, considering the offer I have made repeatedly, not only to the Senator from Indiana but also to others interested in this type of legislation, that we will have hearings and we will have hearings promptly. And, there will be no effort by the Senator from North Carolina, as chairman of the Committee on Agriculture, Nutrition, and Forestry to bottle up any bill.

I simply say that this is neither the time nor the place to take such drastic action as contemplated under the Senator's amendment.

I yield to the Senator from Georgia.

UP AMENDMENT NO. 361

(Subsequently numbered amendment No. 545.)

(Purpose: To provide a new program for peanuts for the 1982 through 1985 crops)

Mr. MATTINGLY. Madam President, I have an amendment at the desk, and I offer it as a substitute for the amendment by Senator LUGAR, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. MATTINGLY) proposes an unprinted amendment numbered 361 in the nature of a substitute for unprinted amendment numbered 360.

Mr. MATTINGLY. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted, insert the following:

TITLE VII—PEANUTS

SUSPENSION OF MARKETING QUOTAS AND ACREAGE ALLOTMENTS

SEC. 701. Effective only for the 1982 through 1985 crops of peanuts, sections 358, 358a, 359, and 371 and part 1 of subtitle C of title III of the Agricultural Adjustment Act of 1938 are amended as follows:

(1) Subsections (a) through (j) of section 358 shall not be applicable to the 1982 through 1985 crops of peanuts.

(2) Subsections (a) through (h) of section 358a shall not be applicable to the 1982 through 1985 crops of peanuts.

(3) Subsections (a), (b), (d), and (e) of section 359 shall not be applicable to the 1982 through 1985 crops of peanuts.

(5) Part I of subtitle C of title III shall not be applicable to the 1982 through 1985 crops of peanuts.

NATIONAL POUNDAGE QUOTA AND FARM POUNDAGE QUOTA

SEC. 702. Effective for the 1982 through 1985 crops of peanuts, section 358 of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof new subsections (k) through (q) as follows:

"(k) Not later than December 1 of each year, the Secretary shall announce a minimum national poundage quota for peanuts for the next marketing year. The minimum national poundage quota for each of the 1982 through 1985 crops of peanuts shall not be less than 1,100,000 tons reduced in each such crop year, as provided in subsection (m) of this section, by the amount of any forfeited poundage quotas.

"(l) The minimum national poundage quota established under subsection (k) of this section shall be apportioned among the States on the following basis: The poundage quota allocated to each State shall be equal to the percentage of the national poundage quota allocated to farms in the State for 1981, and such State poundage quota shall be allocated among the counties within such State in accordance with regulations established by the Secretary and in accordance with the provisions of subsection (o) of this section, taking into consideration each county's historical production of peanuts.

"(m) A farm base production poundage shall be established for each farm which had an acreage allotment for the 1981 crop year. The farm base production poundage for any such farm shall be the same as the farm base production poundage for such farm for the 1981 marketing year. Such farm base production poundage shall be the same for such farm for the 1982 through 1985 marketing years, except that if the farm base production poundage, or any part thereof, is permanently transferred in accordance with section 358a of this Act, the receiving farm shall be considered as possessing the farm base production poundage (or portion thereof) of the transferring farm for all subsequent marketing years. If any part of the farm base production poundage is allocated to a farm on which there is inadequate cropland available on the date of the enactment of the Agriculture and Food Act of 1981 to produce the amount of the farm base production poundage on such farm, the portion of such farm base production poundage that cannot be produced on such farm shall be forfeited, and, to the extent such farm base production poundage is comprised of quota poundage, such quota shall be subtracted from the national poundage quota for all subsequent years, except that in any case in which the farm base production poundage (or any portion thereof) was leased for production in 1980 or 1981, the farm base production poundage (or portion thereof) shall be allocated to the farm to which it was most recently leased.

"(n) For each farm for which a farm base production poundage was established for the the 1981 crop of peanuts, and when necessary for purposes of this Act, a farm yield of peanuts shall be determined for each farm. Such yield shall be equal to the average of the actual yield per acre on the farm for each of the three crop years in which yields were highest on the farm out of the five crop years 1973 through 1977. In the event that peanuts were not produced on the farm in at least 3 years during such five year period or there was a substantial change in the operation of the farm during such period (including, but not limited to, a change in operator, lessee who is an operator, or irrigation practices), the Secretary shall have a yield appraised for the farm. The appraised yield shall be that amount determined to be fair and reasonable on the basis of yields established for similar farms which are located in the area of the farm and on which peanuts were produced, taking into consideration land, labor, and equipment available for the production of peanuts, crop rotation practices, soil and water, and other relevant factors.

"(o)(1) A farm poundage quota shall be established by the Secretary for each marketing year for each farm for which a farm base production poundage was established for the 1981 crop of peanuts, and such farm poundage quota shall be equal to the farm base production poundage multiplied by the factor determined by dividing the State poundage quota established in subsection (1) of this section by the sum total of all farm base production poundages in effect in such State for the 1981 marketing year.

"(2) The poundage quota so determined shall be increased by the number of pounds by which marketings of quota peanuts from the farm during previous marketing years (excluding any marketing year before the marketing year for the 1980 crop) were less than the farm poundage quota.

"(3) For any crop of peanuts, a quantity of peanuts equal to the quantity of peanuts undermarketed during such previous years may be produced and marketed in subsequent years, and such quantity of peanuts (undermarketing carry forward) shall be considered quota peanuts, except that in order to qualify for such undermarketing carry forward in any year, a producer must have planted an acreage on the farm to peanuts in the previous year which, when multiplied by the farm yield of peanuts as determined in accordance with subsection (n) of this section would have yielded 75 per centum of the quota poundage for the farm for peanuts for such previous year.

"(4) Notwithstanding the foregoing provisions of this subsection, if the total of all increases under paragraph (2) of this subsection in individual farm poundage quotas exceeds 5 per centum of the national poundage quota for the marketing year, the Secretary shall adjust such increases so that the total of all such increases does not exceed 5 per centum of the national poundage quota.

"(p) Not later than December 15 of each calendar year the Secretary shall conduct a referendum of farmers engaged in the production of quota peanuts in the calendar year in which the referendum is held to determine whether such farmers are in favor of or opposed to poundage quotas with respect to the crops of peanuts produced in the four calendar years immediately following the year in which the referendum is held, except that, if as many as two-thirds of the farmers voting in any referendum vote in favor of poundage quotas, no referendum shall be held with respect to quotas for the second, third and fourth years of the period. The Secretary shall proclaim the results of the referendum within 30 days after the date on which it is held, and, if more than one-third of the farmers voting in the referendum vote against quotas, the Secretary also shall proclaim that poundage quotas will not be in effect with respect to the crop of peanuts produced in the calendar year immediately following the calendar year in which the referendum is held.

"(q) For the purposes of this part and title I of the Agricultural Act of 1949—

"(1) 'quota peanuts' means, for any marketing year, any peanuts produced on a farm having a farm base production poundage, as determined in subsection (m) of this section, which are eligible for domestic edible use as determined by the Secretary, which are marketed or considered marketed from a farm, and which do not exceed the farm poundage quota of such farm for such year;

"(2) 'additional peanuts' means, for any marketing year (A) any peanuts which are marketed from a farm for which a farm base production poundage has been established and which are in excess of the marketings of quota peanuts from such farm for such year, and (B) all peanuts marketed from a farm for which no farm base production poundage has been established in accordance with subsection (o) of this section;

"(3) 'crushing' means the processing of peanuts to extract oil for food uses and meal for feed uses, or the processing of peanuts by crushing or otherwise when authorized by the Secretary; and

"(4) 'domestic edible use' means use for milling to produce domestic food peanuts and use on a farm for purposes other than for seed.".

SALE, LEASE, OR TRANSFER OF FARM BASE PRODUCTION POUNDAGE

SEC. 703. Effective for the 1982 through 1985 crops of peanuts, section 358a of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof new subsections (i) and (j) as follows:

"(i) The owner or operator of any farm for which a farm base production poundage has been established under this Act may, subject to such terms, conditions, or limitations as the Secretary may prescribe, sell or lease any part of the right to all or any part of such farm base production poundage to any other owner or operator of a farm within the same State for transfer to such farm. The owner of a farm shall be permitted to transfer all or any part of such farm's farm base production poundage to any other farm owned or controlled by him.

"(j) Transfers (including transfer by sale or lease) of farm base production poundage under this section shall be subject to the following conditions (1) no transfer of farm base production poundage from a farm subject to a mortgage or other lien shall be permitted unless the transfer is agreed to by the lienholders; (2) no transfer of farm base production poundage shall be permitted if the county committee determines that the receiving farm does not have adequate cropland to produce the farm poundage quota; (3) no transfer of farm base production poundage shall be effective until a record thereof is filed with the country committee of the county to which such transfer is made and such committee determines that the transfer complies with the provisions of this section; and (4) such other terms and conditions which the Secretary may by regulations prescribe.".

MARKETING PENALTIES; DISPOSITION OF ADDITIONAL PEANUTS

SEC. 704. Effective only for the 1982 through 1985 crops of peanuts, section 359 of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof the following new subsections:

"(f)(1) The marketing of any peanuts for domestic edible use in excess of the farm poundage quota for the farm on which such peanuts are produced shall be subject to penalty at a rate equal to 140 per centum of the support price for quota peanuts for the marketing year (August 1 through July 31) in which such marketing occurs. The marketing of any additional peanuts from a farm shall be subject to the same penalty unless such peanuts, in accordance with regulations established by the Secretary, are either (A) placed under loan at the additional loan rate in effect for such peanuts under section 108 of the Agricultural Act of 1949 and not redeemed by the producers, (B) marketed through an area marketing association designated pursuant to section 108(c) of the Agricultural Act of 1949, or (C) marketed under contracts between handlers and pro-

ducers, pursuant to the provisions of subsection (j) of this section. Such penalty shall be paid by the person who buys or otherwise acquires the peanuts from the producer, or if the peanuts are marketed by the producer through an agent, the penalty shall be paid by such agent, and such person or agent may deduct an amount equivalent to the penalty from the price paid to the producer. If the person required to collect the penalty fails to collect such penalty, such person and all persons entitled to share in the peanuts marketed from the farm or the proceeds thereof shall be jointly and severally liable for the amount of the penalty. Peanuts produced in a calendar year in which farm poundage quotas are in effect for the marketing year beginning therein shall be subject to such quotas even though the peanuts are marketed prior to the date on which such marketing year begins. If any producer falsely identifies or fails to certify planted acres or fails to account for the disposition of any peanuts produced on such planted acres, an amount of peanuts equal to the farm's average yield, as determined under section 358 (n) of this Act, times the planted acres, shall be deemed to have been marketed in violation of permissible uses of quota and additional peanuts and the penalty in respect thereof shall be paid and remitted by the producer.

"(2) The Secretary shall authorize, under such regulations as he shall prescribe, the county committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or reduce marketing penalties provided for under this subsection in cases in which such committees determine that the violations which were the basis of the penalties were unintentional or without knowledge on the part of the parties concerned. Errors in weight which do not exceed one-tenth of 1 per centum in the case of any one marketing document shall not be considered marketing violations except in cases of fraud or conspiracy.

"(3) The person liable for payment or collection of any penalty provided for in this section shall be liable also for interest thereon at a rate per annum equal to the rate of interest which was charged the Commodity Credit Corporation by the Treasury of the United States on the date such penalty became due.

"(4) The provisions of this section shall not apply to peanuts produced on any farm on which the acreage harvested for nuts is one acre or less if the producers who share in the peanuts produced on such farm do not share in the peanuts produced on any other farm.

"(5) Until the amount of the penalty provided by this section is paid, a lien on the crop of peanuts with respect to which such penalty is incurred, and on any subsequent crop of peanuts subject to marketing quotas in which the person liable for payment of the penalty has an interest shall be in effect in favor of the United States.

"(6) Notwithstanding any other provision of law, the liability for and the amount of any penalty assessed under this section shall be determined in accordance with such procedures as the Secretary by regulations may prescribe. The facts constituting the basis for determining the liability for or amount of any penalty assessed under this section, when officially determined in conformity with the applicable regulations prescribed by the Secretary, shall be final and conclusive and shall not be reviewable by any other office or agency of the Government or any court of law. Nothing in this section shall be construed as prohibiting any court of competent jurisdiction from reviewing any determination made by the Secretary with respect to whether such determination was made in conformity with the applicable law and regulations. All penalties imposed under this section shall for all purposes be considered civil penalties.

"(g) Additional peanuts shall not be retained for use on a farm except for use as seed and shall not be marketed for domestic edible use.

"(h) Upon a finding by the Secretary that the peanuts marketed from any crop for domestic edible use by a handler are larger in quantity or higher in grade or quality than the peanuts that could reasonably be produced from the quantity of peanuts having the grade, kernel content, and quality of the quota peanuts acquired by such handler from such crop for such marketing, such handler shall be subject to a penalty equal to 120 per centum of the loan level for quota peanuts on the quantity of peanuts which the Secretary determines are in excess of the quantity, grade, or quality of the peanuts that could reasonably have been produced from the peanuts so acquired.

"(i) The Secretary shall require that the handling and disposal of additional peanuts be supervised by agents of the Secretary or by area marketing associations designated pursuant to section 108(c) of the Agricultural Act of 1949. Quota and additional peanuts of like type and segregation or quality may, under regulations prescribed by the Secretary, be commingled and exchanged on a dollar value basis to facilitate warehousing, handling, and marketing.

"(j) Handlers may, under regulations prescribed by the Secretary, contract with producers for the purchase of additional peanuts for crushing, export, or both. All such contracts shall be completed and submitted to the Secretary (or if designated by the Secretary, the area marketing association) for approval prior to April 15 of the year in which the crop is produced, except that if any handler contracts with a producer for additional peanuts produced on a farm for which a farm base production poundage has been established at a price equal to or more than 105 per centum of the loan level for quota peanuts not in excess of the farm base production poundage, such peanuts may be utilized as quota peanuts if (1) such contract is approved before April 15 of the year in which the crop is produced, and (2) all of the producer's quota peanuts have been contracted for before or at the same time that the producer's additional peanuts are contracted for.

"(k) Subject to the provisions of section 407 of the Agricultural Act of 1949, any peanuts owned or controlled by the Commodity Credit Corporation may be made available for domestic edible use in accordance with regulations established by the Secretary. Additional peanuts received under loan shall be offered for sale for domestic edible use at prices not less than those required to cover all costs incurred with respect to such peanuts for such items as inspection, warehousing, shrinkage, and other expenses, plus (1) 100 per centum of the loan value of quota peanuts if the additional peanuts are sold and paid for during the harvest season upon delivery by and with the written consent of the producer, (2) not less than 105 per centum of the loan value of quota peanuts if the additional peanuts are sold after delivery by the producer by not later than December 31 of the marketing year, or (3) not less than 107 per centum of the loan value of quota peanuts if the additional peanuts are sold later than December 31 of the marketing year. For the period from the date additional peanuts are delivered for loan to April 30 of the calendar year following the year in which such additional peanuts were harvested, the area marketing association designated pursuant to section 108(c) of the Agricultural Act of 1949 shall have sole authority to accept or reject lot list bids when the sales price as determined under this section equals or exceeds the minimum price at which the Commodity Credit Corporation may sell its stocks of additional peanuts, except that the area marketing association and the Commodity Credit Corporation may agree to modify the authority granted by this sentence in order to facilitate the orderly marketing of additional peanuts.".

PRICE SUPPORT PROGRAM

SEC. 705. Effective only for the 1982 through 1985 crop of peanuts, title I of the Agricultural Act of 1949 is amended by adding after section 107 a new section 108 as follows:

"PRICE SUPPORT FOR 1982 THROUGH 1985 CROPS OF PEANUTS

"SEC. 108. Notwithstanding any other provision of law—

"(1) The Secretary shall make price support available to producers through loans, purchases, or other operations on quota peanuts and on additional peanuts which are produced on a farm for which a farm base production poundage has been determined in accordance with section 358(m) of the Agricultural Adjustment Act of 1938, and which are not in excess of the farm base production poundage, at such levels as the Secretary finds appropriate, taking into consideration the eight factors specified in section 401(b) of this Act and any change in the index of prices paid by farmers for production items, interest, taxes, and wage rates during the period beginning January 1 and ending December 31 of the calendar year immediately preceding the marketing year for which the level of support is being determined, except that (A) the base level price support for the 1982 through 1985 crops shall be not less than $480 per ton; (B) quota peanuts shall be supported at a level not less than 124 per centum of such base level of price support; and (C) additional peanuts referred to above in this paragraph shall be supported at such percentage of the base level price support as the Secretary estimates will result in no loss to the Commodity Credit Corporation for the marketing year concerned. The levels of price support so announced may not be reduced by any deductions for inspection, handling, or storage, but the Secretary may make adjustments for location of peanuts and other adjustments authorized by section 403 of this Act.

"(2) The Secretary may make price support available to producers through loans, purchases, or other operations on additional peanuts which are in excess of a farm's base production poundage, or which are produced on a farm with no farm base production poundage. In determining the support level for such additional peanuts, the Secretary shall take into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets, but in no case may the level of price support for such additional peanuts be set at a level which the Secretary estimates would result in the Commodity Credit Corporation incurring a loss on the price support program for such additional peanuts for the marketing year concerned. The Secretary shall announce the level of price support, if any, for such additional peanuts of each crop not later than February 15 preceding the marketing year for which the level of price support, so announced, is to be in effect.

"(3)(A) In carrying out paragraphs (1) and (2) of this section, the Secretary shall make warehouse storage loans available in each of the three producing areas (described in 7 CFR 1446.10 (1980)) to a designated area marketing association of peanut producers which is selected and approved by the Secretary and which is operated primarily for the purpose of conducting such loan activities. The Secretary may not make warehouse storage loans available to any cooperative which is engaged in operations or activities concerning peanuts other than those operations and activities specified in this section

and in section 359 of the Agricultural Adjustment Act of 1938. Such area marketing associations shall be used in administrative and supervisory activities relating to price support and marketing activities under this section and section 359 of the Agricultural Adjustment Act of 1938. Loans made under this subparagraph shall include, in addition to the price support value of the peanuts, such costs as the area marketing association reasonably may incur in carrying out its responsibilities, operations, and activities under this section and section 359 of the Agricultural Adjustment Act of 1938.

"(B) The Secretary shall require that each area marketing association establish pools and maintain complete and accurate records by type for quota peanuts handled under loans for additional peanuts placed under loans and for additional peanuts produced without a contract between handler and producer described in section 359(j) of the Agricultural Adjustment Act of 1938. Net gains on peanuts in each pool, unless otherwise approved by the Secretary, shall be distributed in proportion to the value of the peanuts placed in the pool by each grower. Notwithstanding any other provision of this section, and distribution of net gains on additional peanuts of any type to any producer shall be reduced to the extent of any loss by the Commodity Credit Corporation on quota peanuts of a different type placed under loan by such grower.

"(4) Notwithstanding the foregoing provisions of this section or any other provision of law, no price support shall be made available by the Secretary for any crop of peanuts with respect to which poundage quotas have been disapproved by producers, as provided for in section 358(p) of the Agricultural Adjustment Act of 1938.".

REPORTS AND RECORDS

SEC. 106. Section 805 of the Food and Agriculture Act of 1977 (91 Stat. 947) is amended by striking out "1981" and inserting in lieu thereof "1985".

SUSPENSION OF CERTAIN PRICE SUPPORT PROVISIONS

SEC. 707. Section 101 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of peanuts.

Mr. EXON. Madam President, I have been listening with great interest to the debate on the amendment offered by the Senator from Indiana and the explanation of the position of the chairman of the Agriculture Committee. I am trying to inform myself on this matter, because I believe it is critically important.

At this juncture, I am not sure whether I am in a position to support the amendment offered by the Senator from Indiana. I say, in all candor, that a week ago I certainly would have been against the amendment being offered by the Senator from Indiana, because I was one of those who felt somewhat informed on agricultural issues. I was fully aware of the fact that the agriculture bill reported by the Agriculture Committee was "a weak bill," from any traditional measure.

I said yesterday, on the floor, that everyone is concerned about the cost of agricultural programs, and I cited facts and figures that clearly showed that the costs of agricultural programs as a percentage of the Federal budget are going dramatically down rather than up. I objected to the fact that the American farmer, in all lines of production, by and large, was being unfairly taken advantage of by the farm bill reported by the Senate Agriculture Committee.

However, I assured the Chair that I was prepared, reluctantly, to accept the bill that came from the Agriculture Committee because I felt that perhaps that was the best we could do under the circumstances; and I felt that the farmers of this Nation were indeed ready to make the fair and equitable sacrifices, to use the words of the chairman of the Agriculture Committee, with regard to an agriculture bill.

However, when we talk about fairness and when we talk about equity for peanut growers or tobacco growers or anybody else, we have to discuss that in the context of what is fair not only for peanut growers and tobacco growers but also for the producers of other crops that are generally considered in the agriculture area.

That is why I stood on the floor yesterday and stand on the floor again today in opposition to the "compromise" that was rather hastily put together by a bare majority of the Agriculture Committee on Wednesday, Thursday, and Friday last.

When we talk about fairness and equity, we should also realize and recognize that when we talk about such programs as tobacco and peanuts, we are talking about a crop we do not grow in Nebraska. We do not grow those crops in most States of the United States for several reasons, but mainly we do not grow them because it is a carefully protected program, a carefully targeted program, which goes way back into history.

While the farmers of any State in the Union can raise all the corn and wheat they want, in any place in the United States, that is not so with regard to certain crops such as peanuts and tobacco.

I thank my colleague from Indiana for bringing this up on the floor of the Senate, because I believe it is about time we discussed these things. I say to my friend from Indiana that 10 days ago or a week ago or perhaps even the day before yesterday, I would have voted against his amendment, because there was more or less an understanding by those of us primarily concerned about agriculture, who knew that whatever bill came out of the U.S. Senate or the House of Representatives this year was not going to be a good bill by any past measurement at all, and we were ready to take our sacrifices. We were supposedly going to hold together, and it has been known for a long time that the amendment was going to be offered by the Senator from Indiana. So I say to my friend from Indiana that he may well be picking up some support that he did not think he had.

Obviously, all kinds of deals were being made which are being reflected in the final works of the agriculture bill that finally has come before us, with a surprise amendment adopted by the committee after the bill was reported.

I thought it was rather interesting, talking about fairness and equity, to read a story that came on the wire services sometime this afternoon, by the Associated Press. The caption is "Farm Bill, By Bob Fick." It states:

> The Senate, responding to Reagan administration objections about costs, is trying to pare even more from the "cost-conscious" farm price support program drafted by its Agriculture Committee.

Then it goes on and on.

The last paragraph is rather revealing, and it reads as follows:

> Block (referring to the Secretary of Agriculture) has abandoned his fight for other major changes in farm price support programs in the new farm bill to concentrate efforts on reducing target levels and slashing the cost of the dairy price supports.

Madam President, I think that says something for what is going on. We all know and let us lay it out on the line that the shape of the present farm bill that is before this body was shaped after the deals that the President made with certain people from the Sunbelt States to insure the passage of the famed budget and tax cut bills.

I will have more to say about this in the days to come before we finally vote on this bill, I hope.

But I say in all candor and I think it should be laid right out on the line that all kinds of deals were made by representatives in Congress and with the help of the President, in fact his engineering, to get their votes for the budget and the tax cut bill. He made deals with them that are now showing up in the final product of the bill that is before the Senate today which is called the ag bill.

The President did not have to make deals with the Northern State Senators. He did not have to make deals with the Congressmen from the North because most of them are Republicans anyway and they were locked in. Not so with the boll weevil Democrats from the South.

I think that this bill is a bad bill. I hope that we will come to our senses sometimes and recognize that a farm bill should be written separate and apart from the President's wishes on either the budget bill or the tax cut bill.

I hope that we will know that when we are dealing with something as important as agriculture we should not have to rely on present understandings and pressures from 1600 Pennsylvania Avenue on what the makeup of this farm bill should be.

So I am to be watching the deliberations and the negotiations that go forward on this bill.

I will simply say to my friend from Indiana that while I am not in basic sympathy with what he is trying to do, I recognize that there is some validity to the points that have been made by the distinguished chairman of the Agriculture Committee with regard to fairness and equity to those who have invested in the peanut program around the United States.

But when we talk about fairness and when we talk about equity, we should realize and recognize that there are other food producers who likewise have made investments in their plant, who I think basically are being abandoned by this proposed farm bill that is the product of the Reagan administration.

Madam President, I yield the floor.

Mr. BAKER. Madam President, if the managers of the bill will permit me before we proceed any further, it is now

6:25, and I hope we might conclude the business of the Senate at a fairly early hour this evening.

I inquire of the managers if they are willing to lay aside this measure until tomorrow at 10 a.m.?

Mr. HUDDLESTON. I am willing.

Mr. HELMS. Yes.

Mr. BAKER. I find a general and even an enthusiastic affirmative response.

Mr. PERCY. Madam President, will the Senator yield? I wish to make a statement supporting the Lugar amendment.

Mr. HELMS. Will the Senator mind standing on the other side of the Chamber when he says that?

Mr. BAKER. Madam President, I am most gratified with the variety of Senators' remarks and yield to the Senator from Illinois.

Mr. PERCY. Madam President, I rise in support of the amendment offered by Senator LUGAR to terminate the very unsound, unreasonable, and unfair provisions of the current peanut agricultural program and to authorize a program for peanuts comparable to that in effect now for other agricultural commodities.

It is hard to imagine a more compelling set of facts in support of abandonment of major features of the current program. Essentially those facts are as follows:

First, in the United States, any person in any State may plant and market any edible agricultural item he wishes, except peanuts. He needs special governmental authority to grow peanuts, and he cannot get it without either buying land which historically has had a peanut acreage allotment and thereby paying his respects to this feudalistic land system, or by asking someone who has an allotment to please accept his money to rent that allotment so that he may legally grow peanuts on his own land. These rental payments, both to those who own the allotments and from those who do not, run into the thousands of dollars in many individual instances.

Second, 70 percent of the peanuts, according to the Department of Agriculture, are produced on these rented allotments; and, therefore, while most agricultural programs do help those doing the actual farming, such is not the case with the 70 percent of the peanuts produced on rented allotments. A higher support price usually just means that the actual farmer who is renting an allotment must pay more to rent this Government-anointed franchise.

Third, not only may anyone not grow peanuts without special governmental authority, he also is prevented from importing peanuts except for a microscopic peanut import quota which has been effect almost continuously for over 30 years. This virtual peanut import embargo is in effect for the purpose of preventing imports from interfering with this ridiculous acreage allotment and production control program. Thus, most folks are prevented from growing and marketing peanuts, and practically everyone is prevented from importing them.

Fourth, this program works contrary to the interest of the actual peanut farmers, against the interest of manufacturers in my State and in other States who use these peanuts, contrary to the interest of the employees of these manufacturers, and lastly, and in my opinion of equal importance, contrary to the interest of the millions of American consumers of peanut butter, salted peanuts, and peanut candy.

Fifth, the situation this past year has been unusually bad. We have been told that the major shortage and the high peanut prices occurred because of the drought and indeed the drought was responsible. However, if Federal law did not require that 94 percent of the peanuts be produced in only a few counties in just six States, then the danger from adverse weather would be spread throughout a much broader geographical area and considerably lessened. In my State, thousands of workers were temporarily unemployed during the past year because of inadequate peanut supplies.

In closing, Madam President, while there are so many elements of this peanut program that surprise and astonish me, none exceeds my amazement more than the fact that it has the support of some who are otherwise recognized as strong believers in free enterprise, opposed to unnecessary Government controls, regulations, and planned economy. The peanut program is the antithesis of all these elements.

I am pleased to join with Senator LUGAR and be among the 26 Senators joining in support of this worthwhile amendment.

Madam President, I ask unanimous consent that an article I authored for distribution to newspapers in Illinois, "Cracking the Peanut Cartel" be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CRACKING THE PEANUT CARTEL

(By Senator CHARLES H. PERCY)

In the spring of 1915, Southern farmers faced what seemed like certain disaster. The boll weevil, invading from south of the border, was devastating the region's principle cash crop, king cotton.

To avert economic ruin, a black agriculturist named George Washington Carver urged a simple solution—plant peanuts.

Soon farmers were harvesting tons of peanuts, and Carver, intent upon assuring a market for the new crop, quickly developed more than 300 products from the humble peanut.

Thus, out of one man's genius, combined with the faith and enterprise of countless others, a booming industry was born.

Today, however, Carver's advice to "plant peanuts," once a clarion call of free enterprise, has become an invitation to federal prosecution.

Peanut farming in the United States is now the privileged monopoly of just 59,100 individuals and corporations. These individuals and corporations have the exclusive right—by federal law—to grow peanuts for sale in the U.S. And 70 percent of those holding the special government allotments do not farm themselves, but rent out the right to others.

Independent farmers who attempt to grow and sell peanuts without government permission are subject to stiff fines or imprisonment.

But even the possession of a government license is not an unmixed blessing in the peanut business. Those who rent out their allotments must pay between $115 and $200 per acre, depending on the state, before the crop is planted. This initial licensing fee amounts to some 20 percent of the total production cost.

And who bears that extra cost? Ultimately, the consumer. In fact consumers pay for Uncle Sam's peanut trust in two ways. They absorb the licensing cost, and are then forced to pay higher prices for the artificially small supply of peanuts.

The peanut "allotment lords" have driven up the cost of a number of consumer goods, especially peanut butter and candy—the confection industry being the largest user of peanuts.

Senator Richard Lugar (R-IN) has introduced an amendment to S. 884, the farm bill, which will take us off the peanut monopoly merry-go-round. The amendment, now with twenty-seven Senate co-sponsors including myself, would repeal the antiquated allotment system and substitute a simple loan support program, comparable to those now in force for other food crops.

It would end the forty-year government-controlled peanut cartel. And it would open America and the developing world—a world where protein-rich peanuts are desperately needed—to a reemerging and expanded peanut industry.

In 1921, in its trade magazine, The Peanut World, the fledgling peanut industry said of George Washington Carver: "His contribution to the common fund of human knowledge in the field which he has devoted his life is simply immeasurable. He has been virtually a miracle worker, and we believe The Peanut World would be remiss in its duty did it not pay him this tribute, small in comparison to what he has done for us all."

Sixty years later, it's time for an even more fitting tribute to Carver and the spirit of enterprise he represents. It's time to make the peanut world the boundless land of the industrious many rather than the private domain of the privileged few.

Mr. PERCY. I thank the distinguished majority leader.

Mr. BAKER. Madam President, I thank the Senator from Illinois.

Madam President, I ask unanimous consent that the pending measure be temporarily laid aside until 10 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ROUTINE MORNING BUSINESS

Mr. BAKER. Madam President, I ask unanimous consent that there be a brief period for the transaction of routine morning business to extend not longer than 20 minutes in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The following routine morning business was transacted during the day and is printed at this point in the RECORD.)

## SALE OF AWACS TO SAUDI ARABIA

Mr. THURMOND. Madam President, a significant statement of support for the sale of the defense enhancement package to Saudi Arabia was released yesterday by the Reserve Officers Association of the United States.

The 12,000-member association announced its support for the sale in a press

release issued from the national headquarters here in Washington.

Madam President, I ask unanimous consent that this press release be printed in the RECORD.

There being no objection, the news release was ordered to be printed in the RECORD, as follows:

ROA BACKS ADMINISTRATION ON AWACS SALE

WASHINGTON, D.C., Sept. 14.—Major General Ewan L. Hultman, President of the Reserve Officers Association of the United States (ROA), announced today that the 128,000 member organization backs President Reagan's plan to sell the Defense Enhancement Package to Saudi Arabia. The most important item in this strategic package is the E-3A Airborne Warning and Control System (AWACS).

He said the decision to go on record in support of the Administration on this issue was made by the ROA Executive Committee after full discussion and deliberation. He explained that officials of ROA, which was chartered by Congress to advise on matters of national security, consider the sale in the national interest of the United States.

ROA is a long-time advocate of a strong national defense and has worked with present and previous administrations and Congress toward that objective.

## BUSINESS WITH CHINA

Mr. HAYAKAWA. Madam President, with the normalization of relations with the People's Republic of China (PRC), there has been a great deal of discussion about the "bright" prospects for trade between our two countries. As we all know the lure of a potential market of a billion customers has always loomed large for American businessmen. On the other hand, we have recently heard reports about the abrupt cancellation by the Chinese of large contracts with foreign contractors, particularly the Japanese. Apparently, the PRC became financially overextended in pursuit of its ambitious modernization program, or perhaps foreign businesses erred in making major commitments too soon—or both.

I have just had occasion to read a most enlightening article on this subject by the noted China scholar, A. Doak Barnett. It is entitled "Business With China," and appeared in the July issue of the Asia Mail. Barnett points out that there is indeed tremendous potential in the China market, but that to be successful, American businessmen will have to "show more than ordinary flexibility and adaptability." He outlines the various modifications which he feels are necessary in American concepts of management, marketing, financing, training, timing and legal practices. He also makes a strong plea for U.S. corporations to:

Develop American personnel with real knowledge and expertise, not only about effective ways of negotiating with the Chinese and the technical problems of carrying out specific projects, but also about China's broad modernization plans and the social and cultural factors that will affect their success.

Mr. Barnett contends that interactions between American businesses and the individuals and institutions with which they deal in China will have a major impact on overall United States-China relations. I agree with this assessment, and am keenly aware of the importance of trade with China to California and the Nation as a whole. Madam President. I ask unanimous consent that this most insightful article be placed in the RECORD.

There being no objection. the article was ordered to be printed in the RECORD, as follows:

BUSINESS WITH CHINA

(By A. Doak Barnett)

Despite the long history of U.S.-China contacts before the Communist takeover, as latecomers in post-1949 China American businessman have less experience in dealing with the Chinese than others. Japanese and European businessmen started trading with the People's Republic in the 1950s, but there were no similar American contacts before 1972, and they have become extensive only since 1977. The Americans, therefore, are "playing catch up," a fact which creates special problems and dilemmas. To try to compete with Japanese and Europeans, some feel, understandably, that they must think big and act fast. However, excessive haste and overly ambitious undertakings could lead to serious problems and increase the risk of failure. American businessmen, as well as others, need to take a long view. To build lasting relationships with the Chinese, patience is required to create a basis for mutual confidence gradually. While this is true of most international economic relationships, it is particularly so in dealing with the Chinese.

In major development projects, foreign businessmen will have to show more than ordinary flexibility and adaptability. They will need to consider how advanced technology and foreign management methods can be modified to work in a "socialist" Chinese setting. The natural tendency of many businessmen is simply to transplant what they know, intact, into a new setting. In the first burst of activity in China's modernization program, some Chinese technocrats appeared similarly simplistic and unrealistic, hoping that advanced technology and foreign methods of operation could rapidly be grafted onto the Chinese economy. What will be required, however, are complicated mixtures of modern and traditional methods, of high and low technology, of labor-intensive and capital-intensive approaches, and of "socialist" and "capitalist" modes of operation. Foreign businessmen, like China's own planners, administrators, and technical experts, will have to experiment to find viable mixtures.

American businessmen involved in cooperative arrangements, joint ventures, and direct investment in China will need to be particularly knowledgeable about and sensitive to Chinese economic, social, and political realities in order to succeed, especially if they participate in the management of enterprises. They will have to understand the nature of Chinese bureaucratic institutions; the relationships between Party authorities, government officials, and enterprise personnel; and the interactions of management and labor. Despite the strong commitment of China's present leaders to improve management methods and raise labor productivity, efforts to change old practices will encounter serious obstacles—from bureaucrats resistant to any changes, from Party cadres who fear a loss of influence, and from elements in the workforce whose interests will be adversely affected. Foreign businessmen will be compelled along with Chinese favoring change, to cope with such obstacles. They will also have to learn the special importance of personal relationships in China.

The new investment law and other economic regulations now emerging from the top levels of the Peking regime are essential to help create the minimal legal framework for economic cooperation between foreigners and Chinese as well as for more regularized operational procedures throughout the Chinese economy, but they will not suddenly transform old patterns of behavior based on tacit codes and values and on personal relationships rather than on legal norms. Foreign businessmen will have to acquire knowledge of these patterns and of existing webs of personal relationships to function successfully.

Another area in which Americans as well as other foreign businessmen will be called upon to show unusual flexibility is in devising ways to finance projects. While the Chinese intend to import sizable amounts of foreign technology, it has become increasingly clear since the "readjustment" of 1979 that they intend, to the extent possible, to solve their payments problems by arranging compensation, barter, and comparable arrangements under which the foreign costs of projects can be repaid in the goods they produce. To compete effectively in the Chinese markets, American businesses will have to be prepared to consider varied types of repayment schemes.

They will also have to give adequate attention to developing effective training programs. China's present leaders are not interested in relationships that create a permanent dependency on foreign personnel or nations. While determined to upgrade their economy with foreign knowhow, their aim is to acquire an independent capacity to deal with their problems. Business organizations planning significant involvement in China must therefore think in terms of finite rather than open-ended periods of involvement and build into their proposals programs designed to train Chinese personnel on the job, in the United States or in Chinese institutions. They also will need to consider means to help the Chinese improve their research capabilities. Relationships between foreign businesses and the Chinese need not be brief, but foreign businesses must be prepared to adapt their roles as the Chinese absorb new skills and improve their capabilities.

Foreign businessmen will need to recognize the desirability of careful phasing in the way they get involved as well as the way they eventually reduce their involvement. Starting with large-scale, long-term, irrevocable commitments is unwise in most cases, from the point of view of the foreign businessmen as well as the Chinese. After reaching general understandings on long-term objectives, generally the most prudent approach will be to plan projects in stages, set limited and attainable goals for each stage, and agree that at the completion of each stage both sides will evaluate the results, problems, and prospects before setting further goals.

Matters of style also will affect the extent to which American businessmen operate effectively in China. To succeed, Americans will have to be activists in some respects, pressing for actions essential for the success of projects undertaken; but at the same time they will have to avoid arrogance and be sensitive to Chinese cultural predispositions and personal relationships. In general, they will probably have greater chances of long-term success if they maintain a relatively "low posture."

The prospects for lasting American business relations the Chinese will also depend in part on whether or not U.S. corporations develop American personnel with real knowledge and expertise not only about effective ways of negotiating with the Chinese and the technical problems of implementing specific projects, but also about China's broad modernization plans and the social and cultural factors that will affect their success. Long ago most large Japanese cor-

porations seriously interested in major operations in China recognized the need to have on their payrolls persons with broad expertise on China, including knowledge of the Chinese language. Few American corporations have yet done this. Some, wisely, have drawn upon the knowledge of qualified Americans of Chinese origin; these Chinese-Americans can play a special role in further U.S. business relations with China. However, American businesses seriously interested in long-term involvement in China will need to develop a broader basis for interpreting, analyzing, and dealing with China. They will need to ensure that some persons in the mainstream of their company operations acquire in-depth knowledge of China. They will also have to learn how to draw more effectively on the knowledge about China that exists in U.S. government agencies and academic institutions (which, on their part, will have to make a greater effort than in the past to communicate their knowledge effectively to businessmen and also learn from them).

Whether or not U.S. businessmen learn to deal successfully with the Chinese will affect more than the balance sheets of the corporations involved; the prospects for forging lasting economic links between the United States and China will be greatly influenced by the interactions between American businesses and the individuals and institutions with which they deal in China, and success or failure in broadening economic ties will have a major impact on overall U.S.-China relations.

Peking's new foreign economic policies, which have opened the door to greater trade and broader Chinese participation in the international economy, have significant political as well as economic international implications that U.S. policy should fully consider. U.S.-China economic ties are still in an early stage of development, but under favorable circumstances they could become increasingly important in the period ahead. The United States should now pursue policies that maximize the prospects for growing and lasting economic links with China, the benefits of which could be substantial.

The most apparent, though not necessarily the most important, benefits will be those resulting from any increase in U.S. sales abroad, which not only assist American agriculture and industry, but also help the U.S. balance of payments. The potential of trade with China should not, of course, be exaggerated. However, with serious effort on both sides, the present volume of close to $4.5 billion a year would be doubled, tripled, and conceivably quadrupled in the years ahead. Even though this would still amount to no more than 1 to 2 percent of total U.S. foreign trade, it would not be unimportant. Apart from trade with Western Europe, Canada, and Japan, most American trade is widely distributed, and few countries account for very large percentages. For example, even though U.S. exports to China, amounting to somewhat over $1 billion in 1979, appear very small compared with sales to the advanced industrial nations (in 1978 U.S. exports to the EEC, Canada, and Japan were $32.1 billion, $28.4 billion, and $12.9 billion, respectively), they look more significant, even today, if compared with exports to other developing nations. In 1978 U.S. sales to all non-Communist developing nations in the Far East totaled $11.0 billion and those to all the rest of Asia and Africa except for the Middle East amounted to only $4.8 billion.

In several commodities, moreover, China trade is likely to be considerably more important than the overall figures suggest. This is true, for example, of trade in grain, of which the United States is the world's largest exporter; in oil, of which it is the world's largest importer; and in high technology items, which are of special importance in U.S. trade. Already China is the largest buyer of grain among the developing countries, and it clearly is in the American interest to provide a large share of its needs. If by the late 1980s China can become a middle-rank oil exporter, which American assistance in offshore oil development could help to make possible, this too could be important from the U.S. point of view. And if China continues to be one of the largest markets for high technology in the developing world, the United States will clearly benefit from increased sales of such technology to the Chinese.

The potential political benefits of increased U.S.-China trade and economic cooperation could be as great as or greater than the economic ones. Expanding economic relations should help strengthen political ties with China in the period ahead. Even though closer economic links cannot guarantee friendly political relations, on balance they will enhance the prospects for good overall relations. To the extent that U.S. cooperation, both private and governmental, helps Peking achieve its developmental goals, this should contribute to political stability in China, increase the chance that Peking will continue to pursue pragmatic, growth-oriented policies at home, and reinforce the trend toward more moderate, cooperative Chinese foreign policies.

In addition, it could encourage Peking to cooperate more than in the past with the United States and others in dealing with global economic problems. From the U.S. perspective, this would be of special importance in relation to food and energy problems, but it might also help to induce Peking to adopt more cooperative approaches to other international problems. This would certainly be in the U.S. national interest. In the long run, increased Chinese involvement in responsible roles in the increasingly interdependent global community could prove to be the most important result of current trends in Chinese policies, and Washington should view its economic cooperation with China as a means to work toward this end.

For all of these reasons it is highly desirable that the United States pursue a very active policy aimed at increasing trade and expanding other forms of economic cooperation with China. In light of the difficulties the Chinese face and the competition Americans will encounter in the Chinese market, this will not happen automatically. To realize the potential for strong economic ties between the two countries that now exists, the U.S. Government and American businessmen, scientists, technicians, scholars, and others will have to give adequate attention to certain prerequisites for success.

First, it will be essential to complete the process of establishing a sound legal and institutional basis for long-term economic relations. Notable progress has been made in this respect, but more needs to be done. Second, both U.S. Government agencies and private American banks should give more attention to financing than they have so far to make the United States more competitive. Without adequate U.S. credit the Chinese may feel compelled to rely primarily on others.

Third, the United States will need to increase imports from China. In the near future this will mean permitting more labor-intensive, low-cost, Chinese manufactured goods to enter the United States. This will not be easy, but it is necessary if there is to be a significant growth in two-way trade. As an alternative to protectionism, Washington should be prepared to give more effective aid through means other than tariffs and quotas to domestic industries adversely affected by low-cost, labor-intensive imports. In time, U.S. imports of natural resources from China should grow, and every effort should be made to encourage this.

Fourth, the United States should make a major effort to sell technology, plants, equipment, and know-how to the Chinese. To help promote such exports, U.S. policy on the sale of high technology to China must be flexible in permitting the sale of dual-use items desired primarily for civilian development, even though for strategic reasons it should restrict items primarily of military value. Defining broad technology transfer policy and making specific decisions on licensing particular items will pose difficult problems. The aim, however, must be to encourage increased exports of technology to China while restricting sales that imply closer U.S.-China military ties than actually exist—or than either Washington or Peking currently desires—and avoiding unnecessary provocation of Moscow.

Finally, the American business community, with U.S. government support, must take seriously the potential of the China market and develop the knowledge and expertise necessary to deal effectively with the Chinese and compete successfully in the China market. Failing this, Americans will probably lose out in the long run to the Japanese and West Europeans. This might not be disastrous in terms of American national interests, but if it occurs the United States would forgo important benefits. It certainly would not contribute in any positive way to broad U.S. political and economic objectives.

Even assuming that the above prerequisites for success are fulfilled, developing broader U.S.-China economic ties will involve unavoidable risks. Success will depend on many political and economic variables. Any of a number of events or trends could have adverse effects on the process, and, at worst, some could derail it.

One variable will be the success of the Chinese in maintaining reasonable political stability at home, implementing their modernization policies, and creating conditions that attract greater foreign involvement. Peking as well as Washington will have to take further steps to improve the legal and institutional framework for cooperative relations, including passage of new laws and regulations relating to foreign investment, taxes, labor practices, and other matters of concern to foreign business.

The process of developing U.S.-China economic ties also will inevitably be affected by the general political climate in the region. Outbreaks of conflict in the Taiwan Strait or other disputed offshore areas, in Korea or Vietnam, or in Sino-Soviet border areas could shake the confidence of foreign governments and businessmen, reducing their willingness to support China's economic development and commit resources to cooperative ventures.

While dangers of this sort are real, they are probably no greater—and may well be less—than dangers in other critical areas such as the Middle East, where governments and businessmen of the major industrial powers already are deeply involved, economically as well as politically and strategically. The potenital benefits of economic ties with China make the risks tolerable so long as these ties can be developed in the context of friendly bilateral relations and a regional climate that discourages major conflict.

The strengthening of U.S.-China economic ties should help to cement political ties and also contribute gradually to the development of "a secure and strong China," which, as U.S. leaders recently have stressed, would support broad U.S. aims both in East Asia and globally. If such ties help to draw China gradually into more extensive and constructive involvement in the international community, they will serve a historic purpose, bringing to a new stage the long search, begun in the nineteenth century, for a basis for

long-term, friendly, and mutually beneficial relations between China and the West.

## ADDRESS BY HUD SECRETARY PIERCE TO SOUTH CAROLINA MUNICIPAL ASSOCIATION

Mr. THURMOND. Madam President, on August 29, 1981, I had the pleasure and privilege of introducing the Secretary of Housing and Urban Development, Mr. Samuel R. Pierce, Jr., to the 41st annual meeting of the Municipal Association of South Carolina at Hilton Head, S.C.

The remarks made by Secretary Pierce on that occasion concerned President Reagan's policy of new federalism, which he described as enhancing authority at the State and local levels. Under the programs of this administration, this enhanced authority at the State and local levels will be characterized by a constructive partnership approach to the delivery of services and problem solving among the Federal, State, and local governments.

Madam President, this address by Secretary Pierce was an excellent one and was well received. The tone and substance of his remarks indicate the enthusiasm within the Department of Housing and Urban Development for the goal of sharing new initiatives and innovations with governments at the State and local level. I ask unanimous consent that the speech by Secretary Pierce be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY SAMUEL R. PIERCE, JR.

Thank you for that kind introduction, Senator Thurmond. And thank you, too, for adding your invitation to the one I received from the Municipal Association of South Carolina. The State is indeed fortunate to be represented by you as its distinguished senior Senator. In and out of Washington, I count on you as a valued friend.

It is a great personal pleasure to be here in Hilton Head the Palmetto State's beautiful, world-renowned resort area. The many kindnesses you have shown me here, I assure you, will draw me back again.

I also want to assure you that I attach considerable significance, to this meeting. The work of your Association, through its efforts to strengthen State and local relations, is of fundamental importance to President Reagan's New Federalism. The advising, information-sharing, planning, State legislative, and other lobbying functions, which characterize your Association, figure prominently in making government more responsive to the needs and rights of citizens. In so doing, it makes the system more efficient and less costly.

I want to share with you my perspective of the policy and purpose of the Reagan Administration in correcting our country's weak economy. We have been brought into this sad state of economic disrepair by undisciplined Federal spending, misguided fiscal practices, and stifling tax policies. What we in this Administration are pursuing is no less than a fundamental change in the way the government of America carries out its responsibilities.

We are committed to a budget which reduces our activities to absolute priorities and requirements, a budget that will, at the same time, assist where possible those least able to meet their basic necessities of life. We are committed to a system of government that will be founded on economic stability, and that will recognize economic stability as a key ingredient to national security. We are committed to a system in which the appropriate level of government is called upon to do not just what it can do, but what it properly should do.

We do not believe that government should try to be all things to all people. This country has been led down that path before, and the result was not a happy one. To continue the reckless spending practices of the past would be irresponsible. The government spent more money in 1979 and 1980 than ever before, and look what it got us. Just last week, the Census reported that American families saw their "real" income fall more than 5 percent in 1980. That sharp drop in "real" median family income was the biggest decline in that category since the government started compiling such statistics in 1947.

With all that spending, the number of Americans below the federal "poverty level" grew from 11.7 percent in 1979 to 13 percent of the population last year. There can be no doubt that we must improve the health of our economy, and that we must change its downward direction. President Reagan has begun to effect that change. In just a little more than half a year, his Administration has taken the steps necessary to face head-on the host of economic problems that have been eroding the productivity and the confidence of our country.

There are the beginnings of some encouraging signs. With bipartisan support, the Congress has passed the President's entire Economic Recovery Program. I believe we have reached a critical stage, perhaps a turning point, in our country's history. We are today embarked on a carefully constructed course to return America to fiscal integrity.

The four points of President Reagan's plan which sets that course are, first, to reduce the rate of growth of Federal spending. This is not a cut in current spending levels, but a cut in the proposed increases. The spending increases of recent years made this budgetary restraint absolutely imperative.

The second point is a tax cut across-the-board for everyone who pays taxes. Just last month the Congress and President Reagan gave the American people an important victory, with a 25 percent tax cut over 33 months.

The third point is the prudent elimination of excessive regulation. Regulations add an estimated $100 billion to the price of things we buy. Unnecessary regulations must be eliminated. Others must be streamlined.

The fourth point is development of a sound monetary policy which is consistent with the economic recovery program and which is geared to stabilize the money supply and revitalize the economy.

I and all of my colleagues in the Cabinet have great confidence in this program. We expect to see it effectively implemented and applied to combat our Nation's economic ills. If we continue to receive bipartisan support and the willing help of the American people, we'll carry out the President's program. As this happens, I'm convinced that we'll begin to see a substantial drop in both inflation and interest rates. I'm not talking about an immediate turn-around. It's taken us since the New Deal to get into this sorry economic condition, so we'll need at least some time to get out. In the meantime, while we're following budgetary and fiscal practices that will help us to escape from prohibitive inflation and interest rates, we're working intensely to do more with less money.

At HUD this means working to get more housing and development assistance at the least cost to the taxpayer. My first months at the Department were devoted almost exclusively to a total budgetary and management efficiency review of how my agency administers the public's money. I'm not willing to recommend continuing or discontinuing programs until I have a pretty fair grasp of what they deliver, who benefits from them, how effective they are, and at what cost. So, initially, I devoted myself to an exhaustive analysis of the Department's functioning. As we all know, the sacrament of baptism varies by religion. Let me assure you, my baptism at HUD was total immersion.

As a result of this intensive review, I made some decisions and recommended to the Congress the direction in which I propose to lead HUD. We will be moving toward more efficient, less costly, and less cumbersome delivery of housing and development assistance to the persons and places most seriously in need of such assistance. We will be moving in this direction with a more rational distribution of responsibility and decision-making. To me, this means increased control at the levels of government closer to the people. That is what the President's "New Federalism" is all about . . . enhanced local and State authority, reinforced with a constructive partnership approach to the delivery of services and problem-solving among the Federal, State and local governments.

I know we need to build better communication between State and local officials and my Department. I've met with and I've been listening to officials such as you all over the country. I'm going to continue listening and gathering all the information and insights from you I can. To further that effort, I reorganized the Department to include a Deputy Under Secretary for Intergovernmental Relations. Dr. June Koch heads that office, and I urge you to work with Dr. Koch and her staff to make certain that we at HUD are addressing your needs and concerns.

In my review of the Department's operation, meetings with local officials were most useful in helping me to determine the relative merits of some programs. For example, I heard virtually unanimous support for Urban Development Action Grants. It was generally well known that private sector funds were leveraged at an average 6-to-1 ratio compared to UDAG funds expended. I wasn't surprised by the level of support for the program, but I was favorably impressed by the substantive data: jobs saved, jobs created and construction jobs involved, for instance. This prompted me to take a more careful look at the UDAG program.

Consultation with local leaders, developers and others convinced me that the program was worth continuing, at least for the short term. With the knowledge gained from that consultation and with solid support from the advocates of UDAG, I was successful in urging its retention. I was pleased to help save UDAG for 1982, and I decided to make a study of the program to have a real base of knowledge in determining how effective these grants have been. That report should be ready shortly and will help plan the future of action grants for 1983 and beyond.

I know you're familiar with this program. Many of you have made extensive use of it to strengthen the economy of your communities. The city of York used a $525,000 UDAG award to leverage well over $12 million in private investment. It also brought in excess of 50 new permanent jobs when the grant award helped Edgewater Steel to locate a plant in York, which should reach 85 jobs when the plant becomes fully operational.

With a $980,000 award. Lake City attracted nearly $4 million in private investment by Yarn Industries. That has meant over 80 new permanent jobs to Lake City, which will grow to an estimated 150 jobs created when this industry is fully operational.

And, in Greeneville, a $5.5 million UDAG award will leverage an estimated $24 million in private funds. The Greeneville Commons project will see construction of a parking garage, office building and hotel/convention

center which, under current estimates, will translate into 450 new permanent jobs.

In Charleston a recent $1.3 million grant will help the city to build a parking facility which will enable rehabilitation of the historic Lodge Ally site. This rehab will include condominiums, a small hotel, and rental space for a restaurant and shops. This UDAG award will leverage over $6.7 million in private investment.

Action Grants demonstrate the important role which the private sector must play for the New Federalism to be most effective. To gain greater business and industrial involvement in urban revitalization, we're also exploring Enterprise Zones. HUD has the lead role in an interdepartmental task force that is reviewing the concept, which is of great interest to the Reagan Administration. I expect we'll arrive at some key decisions on Enterprise Zones in the very near future. I believe there should be some incentives from the State and local level, to complement Federal tax and regulatory relief, if we are to encourage business to start new operations in distressed areas. Some States already have moved ahead to offer tax relief incentives for investment in Enterprise Zones.

In addition to exploring opportunities offered by the Enterprise Zone concept, we have another initiative underway that I want to mention. At my request, President Reagan created a Commission to help solve our country's housing problems. The President's Housing Commission is reviewing all existing Federal housing policies and programs and will suggest various options to the President and me. These options will give us guidance on how to deliver decent federally-subsidized housing at less cost. They also will strengthen the ability of the private sector to increase home ownership opportunities and to provide adequate shelter for all Americans.

As I lead HUD in a new direction, some of my priorities address more responsible conduct of our management functions. For instance, in the past, debt collection by HUD has been less than vigorous. Those days are over. If a borrower becomes delinquent on a loan, we'll sue for non-payment, if necessary. When people incur a debt to HUD, I expect them to repay it. The money we've been entrusted with comes from you and your neighbors. As taxpayers, you have a right to expect a responsible accounting for that money, and I intend to see that you get it

We're also cutting back on regulatory burdens. Our objectives are to lessen Federal control of private housing and development activities, as well as the related activities of State and local governments. We're placing strict standards on the development of new regulations, and a "sunset" review of all existing ones.

The actions we've taken on Community Development Block Grants demonstrate our commitment to deregulation. We've eliminated the burdensome targeting requirement. We've eliminated the unnecessary and duplicative displacement strategies, and we've withdrawn the detailed and altogether unnecessary program application requirements. In place of these requirements, communities need submit only a simple statement outlining their community development objectives and the projected use of the funds. We're finding that we can streamline our operation and simplify the way you do business with HUD. I urge a similar course on State and local governments. Let me tell you why.

HUD was involved in a recent demonstration program which showed that significant housing cost reductions could be achieved by streamlining and up-dating local regulations. Carried out with no Federal funds, the demonstration tested whether single family housing costs could be reduced by using local government regulations as the only variable. The demonstration was concerned only with the effect of zoning ordinances, subdivision regulations and building codes of housing. Local governments permitted minor deviations from their existing regulations without enacting new ordinances. They permitted innovations proposed by the builders, and they expedited processing and review so that construction could start as rapidly as possible. The housing cost reductions realized in this test ranged from $13,000 to $32,500. That's tremendously encouraging. Think of all the families who could find affordable housing with that kind of reduction in housing costs. It just reinforces my conviction that we can reduce the cost of doing business and delivering services at the local level as well as at the Federal level.

The positive results of this demonstration to reduce housing costs brings home an elemental point. The answers to our Nation's problems—whether those problems are economic, housing, urban, rural, whatever—the answers to them are as readily found at the local and State levels, and through the private sector, as they are by the Federal Government. That's one of the driving forces behind President Reagan's New Federalism. We're calling for a sharing or initiative and innovation, as well as a sharing of administration and governance.

We need your support. With your encouragement and insights, we can get our country back on the right economic track.

I'm excited by the opportunity to help make our government and country work better and to regain its leadership role. I am confident that this Administration is embarked on the proper course to achieve those goals.

Thank you.

## THE LEFTWARD DRIFT OF GREECE

Mr. THURMOND. Madam President, I rise today because of great concern about recent political developments on the southern flank of NATO.

Greece is drifting dangerously toward the left, Madam President, and exhibits increasingly ominous tendencies toward political instability. If current trends continue, we cannot exclude the possibility that next month Greek elections may very well produce a Socialist or even Marxist dominated government.

The leading challenger to the government of incumbent Prime Minister George Rallis is the Panhellenic Socialist Movement (PASCK), led by Andreas Papandreou, the Communist Party, and an assorted group of centrists and liberals. Mr. Papandreou has publicly stated that if he wins, he will ask for the removal of American bases from Greece and the most rapid and direct exit of Greece from NATO, actions that would certainly compound the difficulties of NATO in that part of the world.

America would not presume to dictate to the Greeks which government they should elect. In my opinion, however, the drift of our crucial NATO ally into the Socialist camp, largely ignored by the Carter administration, is neither in our interest nor theirs. I hope the Greek people will see more clearly where their best interests lie. They lie in the West, with a strong NATO alliance, and in close ties with the United States.

Madam President, I ask unanimous consent that two items elaborating these concerns be printed in the RECORD following my remarks. The first is an article entitled "Greek Storm Brewing" by Roy C. Macridis, which appeared in the New York Times of August 19, 1981. The second is an article entitled "Will Greece Go Leftward Next?" by David S. Broder, from the Washington Post of July 26, 1981. I urge my colleagues in both Houses to give these items their most thoughtful consideration.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 19, 1981]

GREEK STORM BREWING

CAMBRIDGE, MASS.—Ever since the fall of the military junta in Greece in August 1974 the country has had an unparalleled, almost uncharacteristic, political calm. Elections in 1974 and 1977 brought the same center-right majority to office. The strongman of Greek politics, Constantine Caramanlis, moved to the presidency after serving as Prime Minister for six years and was replaced by one of his lieutenants, George Rallis. This Jan. 1, Greece formally became a member of the European Economic Community and, despite the lack of an agreement on American bases, joined the integrated NATO command.

Of all the Mediterranean countries that moved from the straitjacket of military dictatorship and authoritarianism into the uncertain hallways of political democracy, Greece's record is the best. No military coups, no acts of violence, no terrorism and, despite inflation, no unemployment and until recently a rising standard of living.

But elections are to be held no later than Nov. 15, and the calm is bound to be shattered if there is a victory for the opposition parties—the Panhellenic Socialist Movement, led by Andreas Papandreou, the Communist Party and an assorted group of centrists and liberals. It is even possible that the Panhellenic Socialist Movement will win a majority and that Mr. Papandreou will be Prime Minister.

In 1967 he argued for Greece's withdrawal from the North Atlantic Treaty Organization—something that may have accounted for the military takeover then. Much has happened since then to harden his positions and raise the virulence, if not the level, of his language. As a Marxist, he continues to view the world as a struggle between the forces of socialism, which he represents in Greece, and American imperialism. He sees NATO as "the lance" of American imperialism and does not want Greece sacrificed to its imperatives. Mr. Papandreou has, in addition to the United States and the Atlantic alliance, two other enemies—the Common Market and, of course, Turkey.

Marxism for him is linked, as it has been in many developing countries, to a strong nationalist fervor, to the invocation of simple and Christian virtues, strong anti-Western slogans, a broad populist appeal and a rejection of the Establishment. It has strong egalitarian and radical overtones: to overhaul the economy, establish community control and popular participation, change education, the civil service and the local administration.

If Mr. Papandreou wins, he will ask for the removal of the American bases and insist on the most rapid and direct exit from NATO while stressing the Turkish danger against which he says NATO is useless. He has promised to hold a referendum on Greece's membership in the Common Market, urging, here too, a quick exit.

Mr. Papandreou's chances of winning and doing exactly what he says must be taken seriously because he has several things working for him. The Turks continue to occupy 40-percent of Cyprus and there are no signs that they intend to relinquish any of

it, which keeps fanning the flames of nationalism.

Since 1974, mortified by its inability to do anything about Cyprus and feeling betrayed by the United States for allowing the invasion, the Greek Army has become wary of NATO and far more receptive to Mr. Papandreou's nationalist appeal. The anti-Turkish sentiment is easily translated into anti-Americanism and even anti-Europeanism, especially in view of West Germany's efforts to salvage the Turkish economy.

Many domestic issues are also working for Mr. Papandreou. Entry into the Common Market, touted as a panacea by the Government, has not yielded the benefits many expected. After steady economic gains, the Greeks are beginning to feel the pinch, as everybody else is. Unfulfilled expectations cause resentment and swell the protest that Mr. Papandreou knows how to exploit. A huge bureaucracy produces endless paper work and widespread irritation and hostility.

Few newspapers have reported on this cloudy political horizon that may bring instability, internal conflict and, more important, serious international frictions that will compound NATO's difficulties in that part of the world.

American efforts to settle Greek-Turkish disputes have been conspicuously complacent and inept, and Greeks have been allowed to view the much-needed American support for Turkey as a threat to their country. No convincing answer has been given to Mr. Papandreou's strident assertions that NATO offers no protection to Greece against Turkish ambitions, real or imaginary, in the Aegean.

---

[From the Washington Post, July 26, 1981]

WILL GREECE GO LEFTWARD NEXT?

ATHENS.—Andreas Papandeou, the stormy petrel of Greek politics, is back at the center of the action again, stirring memories and emotions that many here and in Washington would like to have left undisturbed. The onetime Berkeley economics professor, who has acquired a remarkable number of friends and enemies at the top levels of American politics, is the leading challenger to Prime Minister George Rallis in the election to be held here this fall. A frequent critic of the North Atlantic Treaty Organization and American foreign policy, Papandreou is a dramatic figure whose election could mean a sharp change of direction in this land that grips both the imagination and the strategic interest of the United States.

For all these reasons, talking with and about "Andreas," as he is universally called in Athens' tight-knit political community, was the main diversion from archeology and beaches during a recent visit to this country.

Greece is the troubled partner in the NATO alliance, the only one more preoccupied with the perceived threat from an "ally," Turkey, than with the danger from Russia and its satellites.

Over the past two decades, its relations with the United States have ranged from tenuous to traumatic. Papandreou, now 62, has been a symbol of that tension. His candidacy revives memories of the 1967 colonels' coup that aborted the election that might have returned his father, George, to power. It revives the unproven allegations that the Central Intelligence Agency had a hand in that coup. By indirection, it heightens the whole question of American influence in Greece.

That question would be here, even if Papandreou were not. In the shorthand of politics, Rallis, 63, will probably be dubbed the "pro-American" candidate in the autumn election, but a visit with him in his sunny office in the Parliament building suggests that designation may not be one he covets—or deserves.

The son of a former prime minister himself, Rallies won a hard-fought one-vote victory for the leadership of the New Democracy Party when longtime Prime Minister Constantine Karamanlis moved up to the position of president in May 1980. An organizer and workhorse, Rallis has labored in Karamanlis' shadow, but he has traveled throughout the country trying to build his personal following to withstand Papandreou's challenge. He has worked hard at the job, but with inflation soaring to a 30 percent rate early this year and controversy still surrounding the government's decision to bring Greece into the Common Market, he has not had an easy time.

With polls in the Athens area showing Papandreou's party ahead, Rallis last month broke off the lengthy negotiations for renewal of the agreement with the U.S. for the Sixth Fleet base in Crete's Souda Bay and other U.S. installations on the mainland. Papandreou said the talks broke down because "even this right-wing government was unable to accept the unbearable conditions set by the U.S. side." But Rallis insisted that time had simply run out on concluding the discussions in time to submit a new agreement to parliament before the elections.

The prime minister is sometimes vexed by his dealings with the Americans. After offering a springtime visitor a glass of cold, tart juice from the orange tree outside his window, he says, in the least rancorous tone possible, "You have followed so stupid a policy toward Greece since 1967 that there is an anti-American sentiment here. It has lessened in the last four or five years, but you created the impression you were backing the dictatorship [from 1967 to 1974] even though you were not. And that is not forgotten."

It is certainly not forgotten by Papandreou, who forged his political identity as a victim and foe of the colonels—and who carries in his political memory the suspicions of American policy in that period, when the United States gave military aid to the junta and conferred prestige on the unsavory regime of George Papadopoulos by the visits of Vice President Agnew and other high Nixon administration officials.

When I lunched with Papandreou and his Illinois-born, University of Minnesota-educated wife, Margaret, at a country restaurant north of Athens, it was that history of which he spoke.

He came to the United States in 1939, after being arrested for "leftist" activities by the right-wing government, studied at Harvard, Minnesota and Stanford and then taught economics at Minnesota and the University of California at Berkeley. During that time, Papandreou became active in Democratic Party affairs and developed a close friendship with such men as Hubert H. Humphrey, Walter Heller and John Kenneth Galbraith. It was not until 1959 that Papandreou returned to his homeland, accepting an invitation from Karamanlis to create the first institute of advanced economic studies in this country.

He plunged into politics here, joining his father's efforts to bring the opposition Center Union Party into power. Despite Andreas Papandreou's close ties to leading Kennedy administration figures, his political efforts brought him into conflict with the American embassy here, which was clearly in the Karamanlis corner.

As the late Laurence Stern of The Washington Post recounted in his book, "The Wrong Horse," that conflict deepened when George Papandreou won first a plurality victory and then a majority in Parliament in the elections of 1963 and 1964. "Andreas Papandreou became an overpowering obsession of American foreign policy managers in Athens and Washington," Stern wrote. "The popular conception of Papandreou in the upper levels of the State Department was as a Svengali manipulating his aging and feeble father during the final years of the old man's otherwise distinguished political career."

King Constantine dismissed the Papandreou government in 1965, but in 1967, when the new elections were scheduled, the betting was that the Papandreous would be returned to power. Stern quoted a memo from "a senior intelligence official" in the U.S. embassy who said, "We were concerned that if Papandreou won, Andreas would be in the driver's seat for all practical purposes. He would withdraw Greece from NATO, evacuate the United States bases . . ."

Stern reported that a recommendation from the embassy that $100,000 be given to anti-Papandreau candidates in swing districts was turned down in Washington. But on April 21, 1967, the colonels' coup aborted the elections scheduled for the following month. Neither Stern's book nor other sources found evidence of CIA or embassy complicity in that coup; on the contrary, the circumstantial evidence strongly suggests that, despite some warnings from intelligence officials, the timing and source of the coup caught the American officials by surprise.

But the coup also led to Andreas Papandreou's imprisonment. After six months in jail, he was released—thanks in part to pressure from the Johnson administration and such old friends as Heller. He came to the United States, then settled in Canada to organize international opposition to the colonels' regime.

When Papandreou came back to Greece after the collapse of the junta in 1974, he formed PASEK, a new political party of the Left, with a base among the young people, civil servants and white-collar workers. His critics say that for years Papandreou tailored his rhetoric, particularly on foreign policy, to the most activist and leftist of his supporters. But as the election approached and his chances of winning grew, the critics say that Papandreou has trimmed his sails, seeking to gain support from small businessmen and farmers opposed to radical change.

It was evident that Papandreou was choosing his words carefully in his discussion with the Washington Post. But equally it was clear that his views were shaped by the embittering experiences of his past.

"We are the only European country that has had a negative experience with NATO and the U.S.," he said. "The only one. NATO for us is the U.S. embassy, and it played a decisive role in our politics in the '50s." He recounted the history of his own relations with the embassy, culminating with the statement that "the 1967 coup was based on a NATO plan called Prometheus and was carried out by men who were the go-between from the CIA to the Greek government."

"In the present situation," he said, "we see the United States has chosen the spoiled child, Turkey, and has given Greece second place. Today, the basic question for a Greek is the reality of the Turkish threat. The military and the people and I are convinced that we are in for a generation of conflict with the Turks. The Turks are committed to the view that the Aegean is not a Greek sea but must be shared by Greece with Turkey.

"We see the United States and NATO sharing the Turkish view, because Turkey is so strategically important. This puts a heavy burden of defense costs on us, and our party has steadfastly backed all the budget proposals for the enhancement of Greek military might."

Prime Minister Rallis was almost as critical in our interview. "Sometimes," he said in a voice of great patience, "I cannot understand your policy. Six years ago, we asked the Ford administration to guarantee a 10–7 balance in the arms aid to Turkey and Greece. There was an oral understanding that for six years was observed. Then, in 1980, the Carter ad-

ministration came up $20 million short—$400 million for Turkey and $260 million, not $280 million, for Greece.

"Now, $20 million makes no great difference in the Greek budget, let alone the U.S. budget, but it created an atmosphere of fear. Congress is restoring the extra $20 million, but now the Turks are complaining. It is an unnecessary discussion; it is useless; it is dangerous. I'm not a fanatic and I don't play on the public emotions. But there is a fear all Greeks have of the Turkish ambitions toward the Aegean islands that are the cradle of Greek civilization. And you are inadvertently heightening that fear."

Papandreous said his tacit alliance with the military also shaped his political strategy. While expressing confidence PASEK would finish first in the coming elections, he flatly excluded a coalition with the Communists if he failed to win a majority in Parliament. "While PASEK is acceptable to the army," he said, "the collaboration of PASEK with the Communists would undoubtedly lead to intervention."

"Besides," he said, "I could not accept collaboration with the Communists because every day, they would be pressing for immediate fulfillment of the plan of PASEK, which cannot be done for 10 or 15 years."

His long-term design calls for socializing key sectors of the Greek economy and achieving redistribution of income. In foreign policy, he said, one also must distinguish between "those of our policies that must be seen as goals and visions, on one hand, and the objectives we would seek in the next four to eight years, on the other hand."

"Our long-term vision is a Europe, East and West, outside the blocs. I have said we must end, at some time, the Yalta and Potsdam agreements, and that means no Warsaw Pact, no NATO. The climate of PASEK is the climate of nonalignment.

"In respect to the bases," he said, "we recognize they cannot be removed now from Greece, in view of the overall global and European confrontation. But we would expect an annual review of the status of the bases—a negotiation every year. We want no nuclear weapons in Greece. What are here are of very limited range, but the Soviets have told us they will attack us directly with nuclear weapons if they remain, and we see no reason to take that risk.

"And while the bases remain," he said, "we would insist on being able to obtain the military equipment we need to defend the Aegean islands from invasion from the East."

"NATO," Papandreou said, "does not guarantee our Aegean frontiers any more than it protected us against the Turkish invasion of Cyprus. My policy toward NATO would turn on very practical questions. I doubt that our NATO obligations leave us with enough strength to meet the Turkish threat. So I would ask the generals what is needed to meet that Turkish threat, and I would meet their requirements before I turned to our NATO-assigned-and-earmarked commitments."

Those statements were more moderate in tone—and, in some ways, in substance—than others Papandreou had made here at home. Indeed, in an interview with the opposition newspaper, To Vima, a few days after our lunch, Papandreou was quoted as saying, "PASEK is radically opposed to Greece's participation in Cold War blocs and is therefore radically opposed to the presence of foreign bases on our soil . . . that means, in essence . . . the preparation of a timetable for their removal. . . ."

When I saw Rallis, he had made a point about Papandreou which seemed pertinent. "I don't know if Andreas means what he says, or not, when he talks about abandoning NATO and developing closer relations with the nonaligned bloc. But even if he does not believe himself, he would have to follow it—because many in his party do believe it. And they would hold him to it."

## ASEAN 14TH ANNIVERSARY

Mr. HAYAKAWA. Madam President, on August 8, the Association of Southeast Asian Nations (ASEAN) commemorated its 14th anniversary. August 8 has now been designated ASEAN Day. On this occasion, the Minister for Foreign Affairs of Singapore, Mr. S. Dhanabalan, prepared a special message which appeared in the Mirror, a Singapore current affairs journal, on August 1.

The message briefly traces the history of ASEAN, its objectives, its impressive economic growth, its internal and external relations, and its current problems—including Vietnamese occupation of Kampuchea.

The Subcommittee on Asian and Pacific Affairs of the Senate Foreign Relations Committee recently concluded hearings on U.S. relations with Southeast Asia, with special attention to ASEAN. Witnesses repeatedly stressed the political and economic acomplishments of ASEAN and the growth potential of the region. From my recent visit to each of the ASEAN nations, I can enthusiastially support this appraisal. There is no question in my mind that these nations are destined to play an increasingly important role in the diplomatic and economic relations of the United States.

As I believe it is important for Congress and the American people to learn more about ASEAN, I ask unanimous consent that Foreign Minister Dhanabalan's statement be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MESSAGE FROM MR. S. DHANABALAN, MINISTER FOR FOREIGN AFFAIRS AND CULTURE

On August 8, the Association of Southeast Asian Nations (ASEAN) commemorates its 14th anniversary. When ASEAN was formed in 1967, the ASEAN countries could not have visualized the extent of ASEAN's success in creating a regional environment conducive to the strengthening of bilateral ties and the enhancement of confidence in the ASEAN region.

Initially, ASEAN aimed at achieving more harmonious relations among its member states while seeking expanded economic cooperation within the region. Over the years, ASEAN has become a cohesive regional grouping, the most successful of its kind in the Third World. The unity and solidarity achieved by ASEAN has arisen largely because we share the common aim of pursuing the economic betterment of our people and emphasize good neighbourliness and cooperation between members.

The objectives which prompted the ASEAN states to establish ASEAN are as valid today as they were in 1967:—

The wish to live in peace with each other and with our neighbours, even if they are communists;

The desire for regional peace and stability so that each state can concentrate on economic development and the creation of a more just and equitable society.

ASEAN is now one of the world's fastest growing regions. Between 1972–78, the ASEAN states achieved an average growth rate of 7.3 per cent per annum, despite the world recession following the quadrupling of oil prices after the crisis of 1973. Recent studies have predicted that ASEAN will grow at more than 8 per cent per annum between 1981–85, the fastest area of growth in the western Pacific region. The close relations resulting from their participation in ASEAN are an important factor in creating this positive outlook.

ASEAN has demonstrated that five noncommunist states can co-operate to further their own interests. It is not an unquestioning ally of any side in this multi-polar world. However, because ASEAN's commitment to the maintenance of open societies and market economies, ASEAN has enjoyed closer relations with the West. The more difficult problem, one that we will have to deal with over the next decade, is to avoid being entangled in the conflicts between China and the Soviet Union, or between Vietnam and China.

The immediate focus of ASEAN's concern is the Vietnamese invasion and occupation of Kampuchea. This deliberate move by Vietnam directly threatens the security of Thailand and the other ASEAN states. It has resulted in Indochina emerging as the cockpit of the Sino/Soviet conflict. ASEAN therefore seeks the withdrawal of Vietnamese forces from Kampuchea, so that the Kampuchean people can freely elect their own government without external interference.

ASEAN's basic objective is to achieve a peaceful and stable regional environment in Southeast Asia which is essential to economic growth. A Vietnam committed to living in peace with its neighbors can share in the rapid growth which is expected of the ASEAN region.

In the 1980s, the focus of ASEAN will be on expanding ASEAN's dialogues with its friends outside the region. The results of such dialogues have been a significant area of economic co-operation for ASEAN. We have demonstrated the effectiveness of ASEAN solidarity during the negotiations on ICAP, in ASEAN's co-ordinated approaches to the US seeking the removal of the ban on GSP preferences for Indonesia, and in consultations with the European Community on textiles and other labour-intensive manufactured products.

One desirable area for increased co-operation is intra-ASEAN trade. This trade is small compared with ASEAN's trade with countries outside the ASEAN region. Moreover, intra-ASEAN trade is limited mainly to foodstuffs and commodities. There are opportunities to increase not only the volume of intra-regional trade, but also to diversify the type of goods being traded.

To facilitate such intra-regional trade, it is essential to utilize the ASEAN Preferential Trading Arrangements more effectively to ensure that tariff barriers among the ASEAN countries are reduced. So far, we have made only modest progress in this direction. But the path has been set and the pace quickened.

It is this combination of political and economic will that has made ASEAN a success. We are convinced that through mutual understanding and constant consultations based on the principle of consensus, the spirit and practice of ASEAN unity will be further strengthened.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## QUARTERLY REPORT ON EAST-WEST TRADE—MESSAGE FROM THE PRESIDENT—PM 77

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred to the Committee on Finance:

*To the Congress of the United States:*

In accordance with Section 411(c) of the Trade Act of 1974, as amended (19 U.S.C. 2441), I herewith transmit the quarterly report on East-West Trade covering the first quarter of 1981.

The report discusses United States trade relations with the Soviet Union, the People's Republic of China and the Eastern European countries.

RONALD REAGAN.

THE WHITE HOUSE, *September 15, 1981.*

## MESSAGE FROM THE HOUSE

At 3:14 p.m., a message from the House of Representatives delivered by Mr. Gregory, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to H.R. 4034, making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes; that the House recedes from its disagreement to the amendments of the Senate numbered 22, 28, and 35 to the bill, and concurs therein; and that the House recedes from its disagreement to the amendments of the Senate numbered 4, 5, 13, and 23 to the bill, and concurs therein with amendments in which it requests the concurrence of the Senate.

## ORDER FOR STAR PRINT

Mr. BAKER. Mr. President, I ask unanimous consent that Senate Resolution 204 be star printed to reflect the constitutional requirement for a two-thirds vote of the Senate for adoption of the resolution, and I send the correction to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOLE, from the Committee on Finance, without amendment:

H.J. Res. 265. A joint resolution to provide for a temporary increase in the public debt limit.

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 195. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1533.

S. Res. 196. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1549.

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment, and an amendment to the title:

S.J. Res. 4. A joint resolution to authorize the President to issue annually a proclamation designating that week in November which includes Thanksgiving Day as "National Family Week."

By Mr. THURMOND, from the Committee on the Judiciary, without amendment, and with a preamble:

S.J. Res. 101. A joint resolution designating "National High School Activities Week."

S.J. Res. 103. A joint resolution to authorize and request the President of the United States to issue a proclamation designating the 7 calendar days beginning October 4, 1981, as "National Port Week."

S.J. Res. 105. A joint resolution to designate October 1981 as "National PTA Membership Month."

S. Res. 155. A resolution saluting the 50th anniversary of Radio City Music Hall.

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary:

Sandra Day O'Connor, of Arizona, to be an Associate Justice of the Supreme Court of the United States.

Robert F. Chapman, of South Carolina, to be a U.S. circuit judge for the fourth circuit.

Joseph E. Stevens, Jr., of Missouri, to be U.S. district judge for the eastern and western districts of Missouri.

John R. Gibson, of Missouri, to be U.S. district judge for the western district of Missouri.

D. Brook Bartlett, of Missouri, to be U.S. district judge for the western district of Missouri.

Frank W. Donaldson, of Alabama, to be U.S. attorney for the northern district of Alabama.

J. Frederick Motz, of Maryland, to be U.S. attorney for the district of Maryland.

W. Stephen Thayer III, of New Hampshire, to be U.S. attorney for the district of New Hampshire.

By Mr. DOLE, from the Committee on Finance:

Alfred E. Eckes, Jr., of Virginia, to be a member of the U.S. International Trade Commission.

By Mr. PERCY, from the Committee on Foreign Relations:

Jose Manuel Casanova, of Florida, to be Executive Director of the Inter-American Development Bank.

Dominick L. DiCarlo, of New York, to be Assistant Secretary of State for International Narcotics Matters.

Langhorne A. Motley, of Alaska, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Brazil.

CONTRIBUTIONS

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Langhorne A. Motley.

Post Brazil. Nominated February 10, 1977.

*Contributions, amount, date, and Donee*

1. Self: $50, February 10, 1977, Republican Party, Alaska; $100, September 19, 1977, Phil Ruppe for Congress; $100, October 11, 1977, Don Young for Congress; $50, June 5, 1978, Ted Stevens for Senate; $100, September 7, 1978, Walter Vogel—Congress; $250, April 1, 1979, Don Young for Congress; $100, April 8, 1979, Jim Santini for Congress; $250, July 8, 1979, Jerry Huckaby—Congress; $250, July 8, 1979, John Breaux for Congress; $100, July 8, 1979, Bill Bradley for Senate; $100, August 9, 1979, A. J. Murphy for Congress; $200, May 28, 1980, Jerry Huckaby—Congress; $1,000, June 20, 1980, Frank Murkowski—Senate; $1,000, September 16, 1980, Frank Murkowski—Senate; $250, May 6, 1981, Don Young for Congress.

2. Spouse: $1,000, July 7, 1980, Frank Murkowski—Senate; $1,000, October 20, 1980, Frank Murkowski—Senate.

3. Children and spouses, Valerie and Allison: None.

4. Parents, Ralph (deceased) and Faith Motley: None.

5. Grandparents, deceased: None.

6. Brothers and spouses: None.

7. Sisters and spouses, Diana Hammond (divorced): None.

---

William Courtney Sherman, of Virginia, a Foreign Service officer of class 1, to be Deputy Representative of the United States of America in the Security Council of the United Nations, with the rank of Ambassador.

CONTRIBUTIONS

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: William Courtney Sherman.

Post: Deputy Representative to the United Nations.

*Contributions, amount, date, and donee*

1. Self: None.

2. Spouse: None.

3. Children and spouses Mr. and Mrs. Peter N. Simon, John Justin Sherman, Roger Woodsen Sherman: None.

4. Parents, deceased: None.

5. Grandparents, deceased: None.

6. Brothers and spouses: None.

7. Sisters and spouses, Mr. and Mrs. Frank W. Moorhead: None.

Ben J. Wattenberg, of the District of Columbia, to be a Member of the Board for International Broadcasting.

(The above nominations from the Committee on Foreign Relations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. WEICKER:

S. 1620. A bill to amend section 8(a)(1) of the Small Business Act; to the Committee on Small Business.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 1621. A bill to authorize the replacement of existing pump casings in Southern Nevada Water Project Pumping Plants 1A and 2A, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. SCHMITT:

S. 1622. A bill to extend the reporting date for the commission studying the role of gold in monetary systems; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. JOHNSTON:

S. 1623. A bill to name the lock authorized as a replacement for Vermilion Lock, Louisiana, as "Leland Bowman Lock"; to the Committee on Environment and Public Works.

By Mr. LUGAR:

S. 1624. A bill to designate the Veterans' Administration medical center in Indianapolis, Indiana, as the "Richard L. Roudebush Veterans' Medical Center"; to the Committee on Veterans Affairs.

By Mr. MOYNIHAN:

S. 1625. A bill to authorize the President of the United States to present on behalf of Congress a specially struck gold medal to the widow of Roy Wilkins; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. NICKLES (for himself, Mr. WALLOP, and Mr. MURKOWSKI):

S. 1626. A bill to amend the Department of Energy Organization Act to clarify the jurisdiction of the Federal Energy Regulatory Commission, to reform and improve the regulation of oil pipelines, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. MOYNIHAN:

S.J. Res. 108. Joint resolution to provide that commemorative medals to be struck by the Netherlands-American Amity Trust in honor of the bicentennial anniversary of Netherlands-American diplomatic relations shall be national commemorative medals; to the Committee on Banking, Housing, and Urban Affairs.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WEICKER:

S. 1620. A bill to amend section 8(a)(1) of the Small Business Act; to the Committee on Small Business.

SECTION 8(a) PILOT PROCUREMENT PROGRAM

● Mr. WEICKER. Mr. President, I am sending to the desk a bill to extend for an adidtional period of time the Small Business Administration's section 8(a) pilot procurement program. The legislative authority for this program will expire at the end of this fiscal year unless Congress extends it.

The legislation that I offer today does two things. First, it extends the program until March 31, 1983; and second, it requires the President to designate another agency not in the Department of Defense, as the pilot agency.

Under the regular section 8(a) procurement program, the Federal agencies and departments voluntarily offer to SBA procurement requirements for which SBA is authorized to subcontract the work to small businesses owned by socially and economically disadvantaged persons. Under the pilot procurement program, extended by this legislation, SBA has the authority to identify and to select from the procurement needs of the agency designated by the President, suitable procurements for inclusion in the 8(a) program.

The concept of the pilot authority evolved out of a recognition that most of the Federal contracts awarded under the 8(a) program have traditionally been for work in general construction or general services, such as food services or janitorial services. In a 1978 report to the Senate Small Business Committee, the General Accounting Office noted that SBA's ability to develop firms in the 8(a) program was limited by the types of contracts offered by Federal agencies. Hence, Congress in 1978 authorized the pilot program to give SBA the authority to select contracts in nontraditional, high technology areas to develop minority firms in areas with a high potential for economic growth. The concept of the pilot program is still valid; the need for the authority is as pressing today as it was in 1978.

Although the pilot program became effective on October 24, 1978, with the signing of Public Law 95–507, the President did not designate the Army as the pilot agency until January 10, 1979. Furthermore, it was not until May 24, 1979, 7 months after the authority took effect, that the interagency agreement was agreed to between SBA and Army. The first contract was not awarded under the program until September 27, 1979, nearly 1 year after enactment of the pilot authority. Because the authority had not been fully tested, Congress, with the enactment of Public Law 96–481, extended the program until September 30, 1981.

While it must be recognized that SBA's exercise of this authority has left much to be desired, we should not let SBA's past shortcomings be the basis for allowing this program with great potential benefits to minority businesses to die. With a new administration to set a new direction, this program can have a new beginning.

This past January, the GAO issued a report reviewing the implementation of the pilot program. Their recommendation to the Congress, despite the problems in the program, was that the pilot program be placed in another agency other than the Department of Army in order to fully test Congress legislative objective. Accordingly, the bill that I offer would require the President to designate a nondefense agency to participate in the program.

As I mentioned, one of Congress concerns last October was with SBA's slow implementation of the program. I certainly hope that a delayed implementation will not occur this time should Congress extend the program. It should also be noted that since this legislation requires the designation of a new pilot agency, it will undoubtedly take time for the President to select the appropriate agency, and for the two agencies, SBA and the pilot designee, to work out an agreement and establish the necessary procedures.

Accordingly, I have proposed an extention of the program until March 31, 1983. This will give the new leadership a full year to develop a track record so that Congress can make a final determination as to whether the pilot authority is a workable vehicle to help achieve the goal of minority business development.●

By Mr. CANNON (for himself and Mr. LAXALT):

S. 1621. A bill to authorize the replacement of existing pump casings in southern Nevada water project pumping plants 1A and 2A, and for other purposes; to the Committee on Energy and Natural Resources.

SOUTHERN NEVADA WATER PUMPING PLANTS

Mr. CANNON. Mr. President, I introduce for myself and my distinguished colleague, (Mr. LAXALT), a bill to provide for the replacement of defective pumps of the southern Nevada water project, first stage. Replacement would cost $1.5 million and those costs would be nonreimbursable.

Within months after the installation of the present pumps but after expiration of the warranty period, serious defects were detected in all of the pumps. The operation of the pumps and motors has been continually unsatisfactory, since then. Maintenance costs have been extraordinary and the expected lifespan will be significantly shortened, without corrective measures. Remedial measures, to date, approach $1.5 million and far exceed the original bid of $920,000 for the pumps and their installation. Hitachi American, Ltd. furnished the original pumps, motors, and appurtenant equipment. The company has expended over $1 million in an effort to repair and maintain the pumps and has agreed to their replacement at cost.

Several alternatives were considered to resolve this difficulty. An acceptable solution and the least costly alternative is to replace the present casings with stainless steel casings. This is expected to halt the deterioration experienced in the past.

Mr. President, I believe this alternative, which has been approved by the Bureau of Reclamation and the other parties of interest, will resolve this matter and I urge early attention to this bill in the Senate. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1621

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Interior is authorized to procure, and provide for the installation of, 12 new stainless steel casings and minor appurtenant parts to replace 12 existing cast steel pump casings in Pumping Plants 1A and 2A of the Southern Nevada Water Project, First Stage.

SEC. 2. The Secretary is hereby authorized to negotiate with the original manufacturer for the procurement of the new stainless steel replacement casings.

SEC. 3. Costs incurred in the procurement of the 12 pump casings and minor appurtenant parts shall be borne by the United States and shall be nonreimbursable and nonreturnable. The State of Nevada shall install the 12 stainless steel casings and minor appurtenant parts at its cost in a manner satisfactory to the Secretary.

SEC. 4. There is hereby authorized to be appropriated for procurement of 12 stainless steel pump casings and minor appurtenant parts for Southern Nevada Water Project Pumping Plants 1A and 2A the sum of $1.5 million (July 1980 price levels), plus or minus such amounts, if any, as may be justified by reason of changes in procurement costs as indicated by engineering cost indexes applicable to the type of procurement involved. *Provided,* That except as otherwise may be required by existing contracts, the United States shall incur no further liability with respect to the 12 pumps in

Pumping Plants 1A and 2A of Southern Nevada Water Projects, First Stage and no further expenditures or actions by the United States with respect to those pumps are either expressly or impliedly authorized by this Act.

---

By Mr. SCHMITT:

S. 1622. A bill to extend the reporting date for the Commission studying the role of gold in monetary systems; to the Committee on Banking, Housing, and Urban Affairs.

GOLD COMMISSION EXTENSION

● Mr. SCHMITT. Mr. President, on June 16, 1980, the Senate agreed to an amendment to S. 2271, the Brenton Woods Agreements Act, which established a Gold Commission to—

Conduct a study to assess and make recommendations with regard to the policy of the United States Government concerning the role of gold in domestic and international monetary systems.

The Commission was directed to transmit its report to the Congress no later than 1 year after the date of enactment, October 7, 1981.

Due to the change in the administration, members of the Commission were not appointed until late spring, and the first meeting did not occur until July 16, 1981. The second meeting is scheduled for September 18, only 3 weeks before the deadline for the Commission's report to Congress.

It seems clear that an issue as complex as the role of gold in the domestic and international economy cannot be carefully studied in only two meetings, under the pressure of a fast approaching deadline. The report resulting from such a procedure cannot do justice to the subject and cannot provide clear guidance to the Congress on a controversial issue. For this reason I am introducing legislation to extend the life of the Commission until December 20, 1982. This will provide time for a full examination and public discussion of the role of gold in our economy.

If we fail to extend the time limit, the report that results from the Commission will fail to provide the definitive statement I think the Congress would like to see.

I realize that there are members who feel strongly that the United States should return to a gold standard at the earliest possible date. Others think that such a step would lead to economic chaos. I for one have not made up my mind on this matter, and as a member of the Commission, I feel certain that much study remains to be done before clear conclusions can be reached. But whether one favors or opposes a return to a gold standard, I think we can all agree that it would be preferable to have the issue resolved with this Commission, than to have the matter perpetuated with an incomplete and inconclusive report.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1622

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 10(b) of Public Law 96-389 (31 U.S.C. 822a note) is amended by striking out "one year after the date of enactment of this Act" and inserting in lieu thereof "December 20, 1982".●

---

By Mr. JOHNSTON:

S. 1623. A bill to name the lock authorized as a replacement for Vermilion Lock, La., as "Leland Bowman Lock"; to the Committee on Environment and Public Works.

LELAND BOWMAN LOCK

● Mr. JOHNSTON. Mr. President, I have sent to the desk a bill to rename the Vermilion Lock, La., the Leland Bowman Lock in honor of the late Capt. Leland Bowman, one of Louisiana's leaders in water resource development and in a great measure responsible for this important lock on the Gulf Intracoastal Waterway in Vermilion Parish, La.

Only a few days before Captain Bowman's death on May 21, 1981, the final hurdle of acquisition of all the rights-of-way was completed thus clearing the way for initiation of construction of a new, modern lock to replace the antiquated Vermilion Lock on the Gulf Intracoastal Waterway. He doggedly pursued the authorization of a 110-foot-wide lock, which will not only reduce navigation costs but improve immensely the control of salt water intrusion into the Mermentau Basin and facilitate discharge of floodwaters.

Captain Bowman gave unselfishly of his time and energy in the service of his Nation, his State, and his community. He served in many capacities including president of the Louisiana Intracoastal Seaway Association; chairman of the Gulf Intracoastal Canal Association; vice chairman of the Louisiana Coastal Commission; and vice president of the American Waterway Operators, Inc. He was instrumental in securing authorization and funding for important water projects including the Gulf Intracoastal Waterway, the Mermentau Basin project, the Teche-Vermilion Division project.

It is indeed appropriate and fitting that we honor Capt. Leland Bowman in this manner and I trust my Senate colleagues will agree with me and quickly approve this bill.●

---

By Mr. LUGAR (for himself and Mr. QUAYLE):

S. 1624. A bill to designate the Veterans' Administration medical center in Indianapolis, Ind., as the "Richard L. Roudebush Veterans' Medical Center"; to the Committee on Veterans' Affairs.

RICHARD L. ROUDEBUSH VETERANS' MEDICAL CENTER

● Mr. LUGAR. Mr. President, today, on behalf of myself and my colleague from Indiana, Senator DAN QUAYLE, I introduce legislation acknowledging the achievements of our distinguished former congressional colleague and fellow Hoosier, Richard L. Roudebush.

In recognition of his outstanding contribution to the welfare of all Americans, and particularly for his work on behalf of our Nation's veterans community, this legislation designates a medical facility in Indianapolis, Ind., as the "Richard L. Roudebush Veterans' Medical Center."

Mr. President, it is indeed fitting that a VA medical center bear "Roudy's" name for he has given many years of dedicated service to this Nation's 35 million war veterans.

Dick started his long association with the military at the age of 23, after having completed a degree in business administration from Butler University in June of 1941. He enlisted in the Army shortly after graduation, responding to America's increased involvement in World War II. Trained as a demolitions expert, he served with elite British forces during five North African campaigns. He later participated in the allied invasion of Italy where he applied his skills to clear explosives from captured enemy airfields.

Though Dick's service in the field was cut short by combat wounds, his fine accomplishments did not go unnoticed. During the 2½ years which preceded his medical discharge, Dick earned five battle stars.

The year 1944 marked the end of Dick's service on the battlefield and the start of a lifelong career in public service. He spent 8 years as a member of the Indiana Veterans Commission, serving as its chairman for most of this time.

Mr. Roudebush was named commander of his local VFW post in 1948, the first World War II veteran to be accorded that honor. He was named to many important VA positions during the next several years, culminating in a nomination to the position of national VFW commander in chief in 1957. At the end of his 1-year term, he returned to his native Noblesville, Ind., to tend to his farm and family business until 1960, when friends and associates persuaded him to run for Congress. His victory that year marked the first of 10 years of service on Capitol Hill.

While in Congress, Dick advanced an already strong reputation for work on behalf of the veterans' community. Additionally, as the ranking member of the House Committee on Science and Astronautics, he was praised for his efforts in helping to launch America's then fledgling space program.

After being denied a U.S. Senate seat in Indiana's closest election ever, Dick retired from active politics. He maintained his keen interest and active participation in veterans affairs however, and in 1971, returned to Washington as Director of the Veterans' Administration's Congressional Relations Office. He later served as the agency's Deputy Administrator and, in October 1974, was named by President Ford to the office of VA Administrator.

Under his able leadership, the Veterans' Administration's financial position improved, and its focus expanded. The agency made particularly strong gains in the areas of educational loans and disability compensation. As VA commander he helped improve the Adminis-

tration's health coverage capabilities by overseeing the expansion of numerous medical centers throughout the country.

Mr. President, I offer this bill knowing that the dedication of this medical facility cannot recognize Dick Roudebush to the full extent of his contribution. I think it is fitting, however, for this body to at least acknowledge the achievements of an outstanding individual by according him this honor. I urge my colleagues to join me in this effort through their support of S. 1624.●

By Mr. MOYNIHAN:

S. 1625. A bill to authorize the President of the United States to present on behalf of Congress a specially struck gold medal to the widow of Roy Wilkins; to the Committee on Banking, Housing, and Urban Affairs.

ROY WILKINS

● Mr. MOYNIHAN. Mr. President, with the death of Roy Wilkins on September 8, this Nation suffered an incomparable loss. Though born in St. Louis in 1901 and living for a time in Minnesota, Roy Wilkins spent the bulk of his life as a New Yorker, where in his over 45 years with the NAACP he worked for the civil rights of all Americans.

The landmark Supreme Court decision Brown against Board of Education, the March on Washington in 1963, and perhaps most importantly, passage of the Civil Rights Act of 1964, were due in no small measure to his efforts. He affected this Nation profoundly. And for the good. For it was Roy Wilkins, perhaps more than any American, who taught us that a country's greatness is directly related to the freedom and opportunities it affords its people. I am proud to have been his friend and colleague for the past 25 years. We shall all miss him.

Mr. President, I am today introducing legislation authorizing the President to present, on behalf of the Congress, a gold medal of appropriate design to Aminda Badeau Wilkins, the widow of Roy Wilkins. I feel this to be an altogether appropriate way to express the appreciation of all Americans for the contributions of Roy Wilkins to the cause of civil rights and equality.●

By Mr. NICKLES (for himself, Mr. WALLOP, and Mr. MURKOWSKI):

S. 1626. A bill to amend the Department of Energy Organization Act to clarify the jurisdiction of the Federal Energy Regulatory Commission, to reform and improve the regulation of oil pipelines, and for other purposes; to the Committee on Commerce, Science, and Transportation.

PETROLEUM PIPELINE REGULATORY REFORM

● Mr. NICKLES. Mr. President, on July 29, 1981, I announced my intention to introduce petroleum pipeline regulatory reform legislation to remove the requirement for unnecessary Government regulation of petroleum and petroleum products pipeline transportation rates.

Over the past few weeks, I have had the opportunity to work with several of my colleagues to arrive at a consensus on legislative language to effect reform of an industry which already is regulated by competition.

Today I am introducing this legislation. The bill allows the competitive market system to set petroleum pipeline rates, while maintaining the safeguards to protect the industry and consumers against unlawful discrimination. I ask unanimous consent that a section-by-section analysis be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS—S. 1626

Section 1. Title of the Act. This Act may be cited as the Department of Energy Organization Act Amendments of 1981.

Section 2. Statement of purpose: to foster a competitive oil pipeline industry, induce investment in new oil pipelines, and eliminate unnecessary regulations.

Section 3(a). Repeals Section 306 of the Department of Energy Organization Act of 1977 which transferred from ICC to the Secretary of Energy those functions which relate to the transportation of oil by pipeline.

Section 3(b). Repeals Section 402(b) of the Department of Energy Organization Act of 1977 which transferred to FERC the functions and authority of ICC to establish rates and charges for the transportation of oil by pipeline.

Section 3(c). Amends Section 402 of the Department of Energy Organization Act of 1977 by adding a new Subsection to transfer to FERC all functions related to the transportation of oil by pipeline (formerly transferred to the Secretary of Energy and FERC under Sections 306 and 402(b) of the Department of Energy Organization Act of 1977 as originally enacted), subject to the provisions of Section 4 of this bill.

Section 4(a). Repeals those laws which vest jurisdiction and authority to suspend or determine or prescribe rates, fares or charges for the transportation of oil by pipeline, except as provided by Section 4(b).

Section 4(b). Provides that the repeal in Subsection 4(a) does not apply to the FERC's authority with respect to rates, fares or charges for the transportation of oil by the trans-Alaska pipeline system.●

## ADDITIONAL COSPONSORS

S. 611

At the request of Mr. THURMOND, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 611, a bill to amend section 5 of the Uniformed Survivors Benefits Amendments of 1980 to provide the same annuity benefits to the surviving spouses of certain former members of the uniformed services who died before September 21, 1972, but after their discharge or release from active duty, as are provided under such section to the surviving spouses of certain former members who died before such date while serving on active duty.

S. 941

At the request of Mr. THURMOND, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 941, a bill to authorize the construction and maintenance of the Gen. Draza Mihailovich Monument in Washington, District of Columbia, in recognition of the role he played in saving the lives of approximately 500 U.S. airmen in Yugoslavia during World War II.

S. 1230

At the request of Mr. CRANSTON, the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 1230, a bill to provide for the minting of commemorative coins to support the 1984 Los Angeles Olympic games.

S. 1249

At the request of Mr. PERCY, the Senator from Maine (Mr. MITCHELL) was added as a cosponsor of S. 1249, a bill to increase the efficiency of Government-wide efforts to collect debts owed the United States, to require the Office of Management and Budget to establish regulations for reporting on debts owed the United States, and to provide additional procedures for the collection of debts owed the United States.

S. 1272

At the request of Mr. CANNON, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 1272, a bill to modify certain airport and airway user taxes to provide appropriate funding for the Airport and Airway Trust Fund, and for other purposes.

S. 1450

At the request of Mr. CANNON, the Senator from Hawaii (Mr. INOUYE), and the Senator from South Dakota (Mr. PRESSLER) were added as cosponsors of S. 1450, a bill to provide for the continued deregulation of the Nation's airlines, and for other purposes.

S. 1528

At the request of Mr. PROXMIRE, the Senator from Nevada (Mr. CANNON) was added as a cosponsor of S. 1528, a bill to amend the Social Security Act to provide for improved management of the social security trust funds and increase the return on investments to those funds.

S. 1593

At the request of Mr. PACKWOOD, his name was added as a cosponsor of S. 1593, a bill to revise regulation of international liner shipping operating in the U.S. foreign commerce.

S. 1607

At the request of Mr. D'AMATO, the Senator from Michigan (Mr. LEVIN), the Senator from Montana (Mr. MELCHER), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of S. 1607, a bill to amend the Internal Revenue Code of 1954 to provide a minimum interest and dividend exclusion of $200 for each individual.

SENATE JOINT RESOLUTION 4

At the request of Mr. THURMOND, his name was added as a cosponsor of Senate Joint Resolution 4, a joint resolution to authorize the President to issue annually a proclamation designating that week in November which includes Thanksgiving Day as "National Family Week."

SENATE JOINT RESOLUTION 103

At the request of Mr. THURMOND, the Senator from Maryland (Mr. MATHIAS), the Senator from Virginia (Mr. WARNER), the Senator from Kansas (Mr. DOLE), the Senator from Oregon (Mr. PACKWOOD), the Senator from North Carolina (Mr. HELMS), the Senator from Alaska

(Mr. MURKOWSKI), and the Senator from Alaska (Mr. STEVENS) were added as cosponsors of Senate Joint Resolution 103, a joint resolution to authorize and request the President of the United States to issue a proclamation designating the 7 calendar days beginning October 4, 1981, as "National Port Week."

SENATE RESOLUTION 175

At the request of Mr. BOREN, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of Senate Resolution 175, a resolution to congratulate the State of Oklahoma on the celebration of its Diamond Jubilee.

## SENATE CONCURRENT RESOLUTION 33—SUBMISSION OF A CONCURRENT RESOLUTION TO DISAPPROVE CERTAIN FTC REGULATIONS RELATING TO THE SALE OF USED MOTOR VEHICLES

Mr. PRESSLER submitted the following concurrent resolution, which was referred to the Committee on Commerce, Science, and Transportation:

S. CON. RES. 33

*Resolved by the Senate (the House of Representatives concurring)*, That the Congress disapproves the final rule promulgated by The Federal Trade Commission dealing with the matter of the trade regulation rule relating to the sale of used motor vehicles, which final rule was submitted to the Congress on September 10, 1981.

● Mr. PRESSLER. Mr. President, on September 25, 1980, I joined 51 of my colleagues in a letter to the Chairman of the Federal Trade Commission expressing opposition to the used car regulation. I regret that I must again stand to oppose the adoption of this inspection rule and rise today to submit a resolution disapproving the Federal Trade Commission trade regulation relating to the sale of used motor vehicles.

As current high interest rates continue to plague our small businesses throughout the country, it is totally inappropriate to place additional burdens on this beleaguered segment of the economy. In South Dakota, 26 of the 260 franchised automobile dealers have been forced out of business in the last year and a half. Americans saw hope of regulatory relief with last year's election only to find themselves faced with this proposed regulation which, for the last 8 years, has been discussed and found impractical and inoperable.

As a member of the Senate Commerce, Science, and Transportation Committee, I am certainly familiar with the history of this regulation. Although the pending regulation has been modified by the FTC, I find several major questions which still need to be addressed.

Although the Commission does include in its rule a warranty disclosure provision which does comply with the clearly expressed congressional intent, it also requires dealers to disclose known defective components through a sticker on the window of the vehicle. Neither the Magnuson-Moss Act nor the legislative history authorizes the Commission to promulgate any known defect disclosure rule for dealer sales of used motor vehicles.

The rule also states that a dealer has knowledge of a defect if they have "obtained facts or information about the condition of a vehicle which would lead a reasonable person in similar circumstances to believe that the car contained one or more defects as defined in section 455.6 of the rule." An inspection is indirectly required in order to discover the specific defect. "Defect" is a totally unworkable term.

Mr. President, I have been contacted by used car dealers who are primarily small businessmen. They view this regulation as another of bureaucratic strangling of their businesses. I believe it is imperative that we carefully conduct a cost-benefit analysis on this regulation. Such regulation only increases the cost to the consumer and discourages the sale of used cars.

I urge my colleagues to join me in opposing the adoption of the Federal Trade Commission's used car rule.●

## SENATE RESOLUTION 211—SUBMISSION OF A RESOLUTION CALLING ON THE FEDERAL RESERVE TO ENCOURAGE BANKS TO MAKE LOANS FOR PRODUCTIVE USES

Mr. BENTSEN submitted the following resolution, which was referred to the Committee on Banking, Housing, and Urban Affairs:

S. RES. 211

Whereas, the United States confronts an interest rate crises of major magnitude with interest rates at record high levels and little prospect for their reduction in the near term;

Whereas, these excessive interest rates are well above the rate of inflation and the levels which are necessary to protect lenders from erosion of principal through inflation;

Whereas, these excessive interest rates are creating a major depression in the housing and auto industries, forcing many families into a position where they cannot afford to buy homes, large consumer durables or safe and reliable transportation, and forcing thrift institutions, home builders, building material suppliers, realtors and auto dealers into bankruptcy;

Whereas, these excessive interest rates have driven up the cost of doing business for all small businesses and farmers and have raised their costs even while sales revenues are dropping and threatening them with bankruptcy;

Whereas, these excessive interest rates are threatening to create a recession which would increase unemployment and welfare lines, reduce tax receipts and increase the Federal deficit which may increase interest rates further;

Whereas, one major factor responsible for the excessive level of interest rates is credit demand created by the use of scarce bank loans for unproductive purposes, such as precious metal speculation or mergers by giant business concerns which do not increase productivity, output or economic efficiency; and,

Whereas, the Board of Governors of the Federal Reserve System in the past has discouraged the use of bank funds in unproductive ways when such funds were scarce or expensive: Now, therefore, be it

*Resolved*, That the Board of Governors of the Federal Reserve System undertake an aggressive campaign designed to encourage banks to:

(1) cease providing loans or lines of credit for unproductive and speculative purposes, while increasing the supply of credit available for productive uses; and,

(2) ensure that thrift institutions, the housing industry, auto dealers, small business, farmers and home buyers have access to the cheapest possible credit in order to avoid a recession.

(The remarks of Mr. BENTSEN when he submitted the resolution appear earlier in today's RECORD.)

## AMENDMENTS SUBMITTED FOR PRINTING

### GOLD MEDALLION ACT AMENDMENTS—S. 1230

AMENDMENT NO. 540

(Ordered to be printed and referred to the Committee on Banking, Housing, and Urban Affairs.)

Mr. SCHMITT submitted an amendment intended to be proposed by him to the bill (S. 1230) to provide for the minting of commemorative coins to support the 1984 Los Angeles Olympic games.

● Mr. SCHMITT. Mr. President, in 1978 the Congress passed the Gold Medallion Act. This act was intended to provide for Treasury sales to the public of gold medallions commemorating noted American artists.

Unfortunately, the program has not worked. The marketing plan devised by the Treasury Department seems to have been intentionally devised to discourage sales. It is flawed in several ways. First, the medallions can only be purchased through a post office where, of course, medallions are not displayed. The prospective customer is not able to look at and examine the product being purchased.

Second, the purchaser must mail a cashiers check or money order to pay for the medallions. Checks are not permitted thus adding to the inconvenience.

Third, the order is mailed to the Treasury Department and delivery of the actual medallion by mail occurs 6 weeks or more later. I fail to see why it should be necessary for an individual to wait 6 weeks to buy a gold medallion from the U.S. Government when the gold coins of South Africa, Canada, or Mexico can be obtained in 10 minutes from any number of dealers around the country.

Fourth, the Treasury prohibits sales of more than 125 medallions to any one individual, thus insuring that others will not develop an efficient and convenient market in medallions where the Treasury has failed.

The combined effect of this system of marketing is to discourage sales. As a result the gold medallion program has never really gotten off of the ground.

The legislation I am submitting would change this in a very simple and effective manner by providing for the Treasury to make bulk sales of the medallions to the general public and to dealers.

I am informed that the marketing plan in this bill has been considered by the Treasury Department. The Department indicated that they were willing to consider implementing such a plan without legislation. However, in light of past per-

formance I am convinced that without congressional action on this matter there will simply be more foot dragging in the future.

If we are to have a gold medallion program, and the Congress voted overwhelmingly that we are, let us have one that works by allowing the public to participate in a convenient manner.

Mr. President, I ask unanimous consent that the text of the amendment be printed in full at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

At the end of the bill add the following:

GOLD MEDALLION ACT AMENDMENTS

SEC. 11. (a) Section 406 of the American Arts Gold Medallion Act is amended by adding at the end thereof the following:

"(d) Not later than 60 days after the date of enactment of this subsection, the Secretary of the Treasury shall provide for bulk sales of gold medallions struck under the authority of this title to be made to the general public and to dealers through the Treasury Department and, if appropriate, the facilities of the Federal Reserve System and the commercial banking system.".●

## TELECOMMUNICATIONS COMPETITION AND DEREGULATION ACT OF 1981—S. 898

AMENDMENT NO. 541

(Ordered to be printed and to lie on the table.)

Mr. GOLDWATER submitted an amendment intended to be proposed by him to the bill (S. 898) to amend the Communications Act of 1934 to provide for improved domestic telecommunications, and for other purposes.

CABLE TV PROVISIONS OF S. 898

● Mr. GOLDWATER. Mr. President, within the next week or so, the Senate will discuss, and I hope pass, S. 898, which amends the Communications Act of 1934. For reasons which are difficult to understand, this bill includes three provisions relating to cable television that were added late during the committee deliberations on the bill. A fourth cable TV amendment, relating to cross-ownership, was included much earlier and I am not addressing it at this time.

One amendment would remove some limited, but not all, of the jurisdiction of the mayors of our American communities to regulate basic cable subscriber rates if "alternative electronic media services are reasonably available." This is found in section 202(h) of the 1934 Act, as proposed to be amended by S. 898.

Another amendment instructs the Federal Communications Commission to establish "reasonable ceilings" for fees to be paid to States or cities by cable companies receiving franchises from those governments. This provision is section 202(i) of the 1934 act, as amended by S. 898.

The third amendment provides that utilities "shall afford reasonable access for pole attachments to any person providing cable services." This is contained in section 224 of the bill.

Now, I had assured the mayors earlier this year that there would be no such substantial cable changes relating to the interests of local governments until new and adequate hearings were held. Such hearings have not been held during this session of Congress.

Therefore, I announce my intent to submit amendments at the appropriate time striking these particular cable provisions of the bill. This is not to say that I would or would not support any or all of these amendments later on, but many persons feel the local officials and utilities should have their "day in court" timely with Senate action on the subject, whether or not any related hearings were held a year or two ago.

Mr. President, my amendment would allow the Senate to decide whether it wishes to hold separate, new hearings on these items. I ask unanimous consent that the text of my proposed amendment be printed in the RECORD.

There being no objection, the amendment ordered to be printed in the RECORD, as follows:

Beginning on line 20, page 106, strike out through line 23, page 107.

On page 107, line 24, strike "(j)" and substitute "(h)".

On page 140, strike lines 2 through 12.●

## AGRICULTURE AND FOOD ACT OF 1981—S. 884

AMENDMENTS NOS. 542 AND 543

(Ordered to be printed and to lie on the table.)

Mr. ARMSTRONG submitted two amendments intended to be proposed by him to the bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purpose.

AMENDMENT NO. 544

(Ordered to be printed.)

Mr. LUGAR (for himself, Mr. PELL, Mr. TSONGAS, Mr. COHEN, Mr. DANFORTH, Mr. DURENBERGER, Mr. HAYAKAWA, Mr. JEPSEN, Mr. PERCY, Mr. STAFFORD, Mr. HATFIELD, Mr. RIEGLE, Mr. LEVIN, Mr. HUMPHREY, Mr. BOSCHWITZ, Mr. GARN, Mr. GORTON, Mr. HATCH, Mr. HEINZ, Mr. QUAYLE, Mr. SPECTER, Mr. GRASSLEY, Mr. ROTH, and Mr. DODD) proposed an amendment to S. 884, supra.

AMENDMENT NO. 545

(Ordered to be printed.)

Mr. MATTINGLY proposed an amendment to S. 884, supra.

## NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public that the Small Business Committee will hold a hearing on S. 1620 legislation to extend the Small Business Administration's section 8(a) pilot procurement program to March 31, 1983.

The hearing will be held on September 21, 1981, at 9:30 a.m., in room 424, Russell Senate Office Building. Senator WEICKER will chair.

For additional information please contact Bob Wilson of the committee staff at 224–5175.

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public that the Small Business Committee will hold a full committtee meeting to mark up S. 881, "The Small Business Innovation Research Act of 1981" and S. 1620, legislation to extend the Small Business Administration's section 8(a) pilot procurement program to March 31, 1983.

The meeting will convene at 9:30 a.m. on Tuesday, September 22, 1981, in room 424, Russell Senate Office Building.

For additional information please contact Anne Sullivan or Bob Wilson of the committee staff at 224–5175.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, the Committee on Governmental Affairs will hold a hearing on the nomination of Charles A. Bowsher of Washington, D.C., to be Comptroller General of the United States for a term of 15 years. The hearing will be on Thusrday, September 17, 1981, at 1:30 p.m. in room 3302 of the Dirksen Senate Office Building. For further information, please contact Margaret Hecht at 224–4751.

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. LUGAR. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be permitted to meet during the session of the Senate at 9:30 on Tuesday, September 15, 1981, to discuss S. 1080, the regulatory reform bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. LUGAR. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be permitted to meet during the session of the Senate on Wednesday, September 16, at 2 p.m., to discuss the regulatory reform bill, S. 1080.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I note that both requests have been cleared on this side of the aisle.

SUBCOMMITTEE ON THE CONSTITUTION

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on the Constitution of the Committee on the Judiciary be authorized to meet during the session of the Senate on Thursday, September 17, at 2 p.m., to discuss bail reform legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON FEDERAL EXPENDITURES, RESEARCH AND RULES

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Federal Expenditures, Research, and Rules of the Committee of Governmental Affairs be permitted to meet during the session of the Senate on Friday, September 18, at 9:30 in the morning, to consider S. 719, the Consultant Reform and Disclosure Act of 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, September 16, at 9 a.m. to receive a briefing on current intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

## PRELIMINARY NOTIFICATION OF PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of proposed arms sales under that act in excess of $25 million, or in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that 11 such notifications were received during the recess. As my colleagues know, four of these advance notifications are for AWACS and F–15 enhancement equipment for Saudi Arabia. Since they were transmitted in unclassified form, I ask that the entire context of those four notifications be placed in the RECORD.

Interested Senators may inquire as to the details of the classified preliminary notifications at the office of the Committee on Foreign Relations, room 4229 Dirksen Building.

The notifications follow:

DEFENSE SECURITY
ASSISTANCE AGENCY,
*Washington, D.C., September 1, 1981.*

Dr. HANS BINNENDIJK,
*Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to an American Republic for major defense equipment tentatively estimated to cost in excess of $7 million.

Sincerely,
ERICH F. VON MARBOD,
*Director.*

DEFENSE SECURITY
ASSISTANCE AGENCY,
*Washington, D.C., August 24, 1981.*

Dr. HANS BINNENDIJK,
*Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR DR. BINNENDIJK: By letter dated February 18, 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information on Foreign Military Sales, as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification of the Administration's intention to sell to Saudi Arabia Airborne Warning and Control System (AWACS) aircraft, aerial refueling aircraft, AIM–9L missiles, and conformal fuel tanks for Saudi F–15 aircraft.

When these proposed sales were first announced earlier this year, a number of legislators offered suggestions concerning them. As subsequent briefings and testimony will indicate, the Administration has carefully considered these suggestions in developing the sales proposals.

Further, because of the importance attached to these sales by the Administration and the Congress, we have modified our advance notification procedures in this case in two respects. First, we are providing this advance notification now, even though the 20-day notification period will not begin to run until September 9, to allow the Congress and its staff additional time to assess these important sales. Second, we are transmitting the notification in unclassified form, to permit the fullest possible consideration of the details of the sales.

Please advise me if there is additional in-

formation that we might provide to aid in your review of these sales.

Sincerely,

ERICH F. VON MABBOD,
*Director.*

---

[Transmittal No. 81-CU]

ADVANCE NOTIFICATION OF POSSIBLE SECTION 36(b) STATEMENTS FOREIGN MILITARY SALES

a. Prospective purchaser: Saudi Arabia.

b. Description and quantity or quantities of articles or services under consideration for purchase: Five E-3A aircraft; associated spares and support equipment for three years; three years of contractor provided logistics, maintenance, and training support in Saudi Arabia; USAF and/or contractor provided CONUS training and technical support; a facility site survey; and provision for the design, construction, and supply of required AWACS related ground based Command, Control, and Communications ($C^3$) facilities and equipment, including an appropriate number of ground radars.

c. Estimated value(s) of this case: $5.8 billion.

d. Description of total program of which this case is a part: Same as b above.

e. Estimated value of total program of which this case is a part: $5.8 billion.

f. Prior related cases, if any: None.

g. Military department: Air Force (SJA).

h. Estimated date letter of offer/acceptance (LOA) ready for formal notification to Congress: September 1981.

i. Date advance notification delivered to Congress: August 24, 1981.

---

POLICY JUSTIFICATION

Saudi Arabia—E-3A aircraft:

The Government of Saudi Arabia has requested the purchase of five E-3A aircraft; associated spares and support equipment for three years; three years of contractor provided logistics, maintenance, and training support in Saudi Arabia; USAF and/or contractor provided CONUS training and technical support; a facility site survey; and provision for the design, construction, and supply of required AWACS related ground based Command, Control, and Communications ($C^3$) facilities and equipment, including an appropriate number of ground radars, at an estimated aggregate cost of $5.8 billion. (An additional sale may be requested for design and construction services to provide ground facilities to support the aircraft. This request, if received, will be notified separately.)

This sale will contribute significantly to U.S. foreign policy and national security objectives by helping to increase the security of a friendly country of vital interest to the United States. By enhancing Saudi Arabia's ability to intercept hostile aircraft, the sale will reduce the probability of major power confrontation in the region. In addition to enhancing the overall Western security posture in the Persian Gulf region, the sale will increase regional stability by improving Saudi Arabia's air defense capabilities. In these ways, it will help ensure continued Western access to vital Persian Gulf oil.

This sale will not have an adverse impact on the regional military balance. The E-2C, an airborne surveillance platform similar to the E-3A, is currently in the inventory of Israel. Ground radar systems are presently in the inventory of most of Saudi Arabia's neighbors.

Saudi Arabia currently lacks the early warning required for an effective air defense network. The E-3A aircraft and related ground based $C^3$ equipment, combined with a small number of ground radars, are the most effective means of providing the early warning required for effective air defense. Five E-3A aircraft will allow the Royal Saudi Air Force (RSAF) to maintain one 24-hour per day orbit during short periods of heightened tension or hostilities.

Configuration of the RSAF AWACs will be identical to the standard USAF E-3A aircraft except that the Joint Tactical Information Distribution System (JTIDS), Electronic Counter Counter Measures (ECCM) enhancement and sensitive intelligence information, have quick UHF communication modifications, and three additional display consoles included in the latest USAF version will not be included nor will commercial substitutes be provided for these systems. However, commercially available substitutes will be provided for the U.S. Government Mode IV Identification Friend or Foe (IFF) and U.S. Government encryption systems.

The Boeing Aerospace Company of Seattle, Washington, is the prime contractor for this proposed sale.

Initially, approximately 480 U.S. contractor personnel will be required in Saudi Arabia in support of this proposed sale to provide logistics support and maintenance training. Approximately 30 U.S. Government personnel will also be required to provide contract oversight and operator training. Although it is expected that the number of contractor personnel will decrease as the RSAF becomes trained to perform maintenance, some U.S. contractor maintenance will be required in-country for the life of the system.

This proposed sale has no impact on U.S. defense readiness as the E-3A will come from new production.

---

[Transmittal No. 81-CQ]

ADVANCE NOTIFICATION OF POSSIBLE SECTION 36(b) STATEMENTS—FOREIGN MILITARY SALES

a. Prospective purchaser: Saudi Arabia.

b. Description and quantity or quantities of articles or services under consideration for purchase: One hundred and one ship sets (202 tanks) of conformal fuel tanks (CFTs) for the Royal Saudi Arabia Air Force (RSAF) F-15 aircraft. The CFTs are streamlined fuel tanks, two per aircraft, which affix to the sides of the F-15 fuselage. The sale would include spare parts, support equipment, training equipment, publications, and other related support for the CFTs.

c. Estimated value(s) of this case: $110 million.

d. Description of total program of which this case is a part: CFTs provide an additional equipment capability to the RSAF F-15 (Peace Sun) program. Included in the Peace Sun program are the purchase of 62 F-15 aircraft, spares, support equipment, flight simulators, basic munitions (AIM-9P-3 and AIM-7F air-to-air missiles), technical data, U.S. technical and pilot training, and construction of technical facilities. Also included are 42 months of in-country contractor maintenance, training, and logistics support. An additional sale of AIM-9L Sidewinder air-to-air missiles is also being proposed under the Peace Sun program.

e. Estimated value of total program of which this case is a part: $5 billion.

f. Prior related cases, if any: (1) FMS Case SFA (Peace Sun I): 60 F-15 aircraft, spares, support equipment, training devices, and air-to-air munitions. Case value $1.6 billion, accepted by Saudi Arabian Government (SAG) 13 July 1978.

(a) SFA Amendment 1: Additional logistics support. Case value $426 million, accepted by SAG 14 September 1979.

(b) SFA Amendment 2: Additional logistics support. Case value $534 million, accepted by SAG 24 February 1981.

(c) SFA Amendment 3: Additional engines. Cash value $70 million; incorporated into Amendment 2.

(2) YBM (Peace Sun II): In-country construction for F-15 facilities. Case value $879 million, accepted by SAG 10 February 1980.

(3) YBA (Peace Sun III): Contractor technical support services and training for in-country support of the RSAF F-15s. Case value $964 million, accepted by SAG 7 June 1980.

(4) TDA (Peace Sun IV): Conus F-15 training for RSAF pilots and maintenance personnel. Case value $15.4 million, accepted by SAG 15 February 1980.

(5) SGK (Peace Sun V): Two replacement F-15C aircraft to be stored in CONUS as replacements for any of the original 60 RSAF F-15s that may be lost. Case value $48.5 million, accepted by SAG 25 November 1980.

g. Military department: Air Force (SFA, Amendment No. 4).

h. Estimated date letter of offer/acceptance (LOA) ready for formal notification to Congress: September 1981.

i. Date advance notification delivered to Congress: August 24, 1981.

---

POLICY JUSTIFICATION

Saudi Arabia—Conformal fuel tanks for F-15 aircraft:

The Government of Saudi Arabia has requested the amendment of FMS case SFA, under which 60 F-15 aircraft are being provided to the Royal Saudi Air Force (RSAF). This amendment will include 101 ship sets (202 tanks) of conformal fuel tanks (CFTs) and related spare parts, support equipment, training equipment, publications, and other support at an estimated cost of $110 million.

This sale will contribute significantly to U.S. foreign policy and national security objectives by helping to increase the security of a friendly country of vital interest to the United States. By enhancing Saudi Arabia's ability to intercept hostile aircraft, the sale will reduce the probability of major power confrontation in the region. In addition to enhancing the overall Western security posture in the Persian Gulf region, the sale will increase regional stability by improving Saudi Arabia's air defense capabilities. In these ways, it will help ensure continued Western access to vital Persian Gulf oil.

Recent military developments (the Iraq-Iran War and the Soviet invasion of Afghanistan) have created a new situation in the region which requires the enhancement of the RSAF F-15 capabilities, particularly in providing the aircraft with more endurance to improve the Saudi air defense capability. The Kingdom is a relatively large geographical area, and CFTs would enable the Saudis to fly sorties from bases other than those directly under attack. The CFTs will increase the time aloft of each F-15 flight, and given the relatively small number of aircraft, this is an important factor in defending the Kingdom.

The introduction of CFTs in Saudi Arabia will not affect the regional military balance. Israel has equipped its F-15s with CFTs.

The prime contractor will be the McDonnell Douglas Corporation of St. Louis, Missouri, which is the aircraft manufacturer for F-15s.

No additional U.S. Government or contractor personnel will be required in Saudi Arabia to implement this sale. Sufficient fuel specialists will be in-country under existing contracts to provide support for the CFTs.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale. The production rate for the USAF is low enough to allow phase-in of another customer to procure CFTs concurrently.

---

[Transmittal No. 81-CT]

ADVANCE NOTIFICATION OF POSSIBLE SECTION 36(b) STATEMENTS FOREIGN MILITARY SALES

a. Prospective purchaser: Saudi Arabia.

b. Description and quantity or quantities of articles or services under consideration for purchase: A quantity of 1,177 AIM-9L SIDEWINDER air-to-air missiles with related spare parts and special test and support equipment.

c. Estimated value(s) of this case: $200 million.

d. Description of total program of which this case is a part: This sale will become a part of the overall PEACE SUN program which was for the sale to Saudi Arabia of 62 F–15 aircraft with spares, support equipment, flight simulators, air-to-air missiles (AIM–9P–3 and AIM–7F), technical data, training in the CONUS of Saudi maintenance technicians and aircrews, and the construction of technical support facilities. Also included in the overall program are 42 months of contractor maintenance, training, and logistics support in Saudi Arabia.

e. Estimated value of total program of which this case is a part: $5 billion.

f. Prior related cases, if any: (1) FMS Case SFA (Peace Sun I): 60 F–15 aircraft, spares, support equipment, training devices, and air-to-air missiles. Case value $1.6 billion, accepted by Saudi Arabian Government (SAG) 13 July 1978.

(a) SFA, Amendment 1: Additional logistics support to the Royal Saudi Air Force (RSAF) F–15 program. Amendment value: $426 million; accepted by SAG 14 September 1979.

(b) SFA, Amendment 2: Additional logistics support to the RSAF F–15 program, including funding for the retrofit of RSAF AIM–7F missiles to include Product Optimization Program (POP) improvements. Amendment value: $534 million; accepted by SAG 24 February 1981.

(c) SFA, Amendment 3: Spare engines for RSAF F–15s. Amendment value: $70 million; cancelled as it was incorporated into Amendment 2.

(2) YBM (Peace Sun II): Construction of F–15 support facilities in Saudi Arabia. Case value: $879 million; accepted by SAG 10 February 1980.

(3) YBA (Peace Sun III): Contractor technical support services and training for in-country support of the RSAF F–15s. Case value: $964 million; accepted by SAG 7 June 1980.

(4) TDA (Peace Sun IV): Training of RSAF F–15 aircrews and maintenance personnel in the CONUS. Case value: $15.4 million; accepted by SAG 15 February 1980.

(5) SGK (Peace Sun V): Two additional F–15C aircraft to be stored in CONUS as replacements for any of the original 60 RSAF F–15s that may be lost. Case value: $48.5 million; accepted by SAG 25 November 1980.

g. Military department: Air Force (SFA, Amendment No. 5).

h. Estimated date letter of offer/acceptance (LOA) ready for formal notification to Congress: September 1981.

i. Date advance notification delivered to Congress: August 24, 1981.

POLICY JUSTIFICATION

Saudi Arabia—AIM–9L Sidewinder Missiles:

The Government of Saudi Arabia has requested the purchase of 1,177 AIM–9L Sidewinder air-to-air missiles for use on Royal Saudi Air Force (RSAF) F–15 aircraft together with related spare parts and special test and support equipment at an estimated cost of $200 million.

This sale will contribute significantly to U.S. foreign policy and national security objectives by helping to increase the security of a friendly country of vital interest to the United States. By enhancing Saudi Arabia's ability to intercept hostile aircraft, the sale will reduce the probability of major power confrontation in the region. In addition to enhancing the overall Western security posture in the Persian Gulf region, the sale will increase regional stability by improving Saudi Arabia's air defense capabilities. In these ways, it will help ensure continued Western access to vital Persian Gulf oil.

Recent military developments in the Middle East (the Iran-Iraq war and the Soviet invasion of Afghanistan) have increased the potential for hostile action against Saudi Arabia. This changed situation requires enhancement of RSAF F–15 capabilities, including its capabilities for short range air-to-air defense. The acquisition of AIM–9L by Saudi Arabia will not upset the regional balance. Israel has also purchased the AIM–9L missile.

Saudi Arabia needs the AIM–9L missile because of a legitimate requirement for RSAF F–15s to be able to intercept high speed hostile aircraft which could threaten the oil fields with minimum warning. The missile has the capability of a head-on attack against hostile aircraft, which obviates the need for Saudi interceptors to lose vital time in maneuvering into a rear attack position as required by the AIM–9P missiles currently in the RSAF inventory. Therefore, the AIM–9L significantly enhances the capability of the RSAF to intercept and destroy attacking aircraft before they can damage vital resources. RSAF personnel will be able to absorb this missile into the inventory both from the operational and maintenance perspectives, as they have already demonstrated capabilities to operate and maintain earlier AIM–9 series missiles.

The AIM–9L proposed for sale will come from U.S. inventory on a one-for-one exchange basis as the new version AIM–9M missiles are delivered from new production. The prime contractor for the AIM–9M missile is Raytheon Company of Lowell, Massachusetts.

It is estimated that approximately nine additional munitions support U.S. contractor personnel will be required for a period of about three years, due to the increased size of the overall RSAF air-to-air missile inventory.

As noted, the AIM–9L missiles will be provided from U.S. inventory, and an equal number of AIM–9M missiles will be produced using funds from this FMS case to replace them. Under these circumstances, no adverse impact is anticipated on U.S. readiness.

[Transmittal No. 81–CV]

ADVANCE NOTIFICATION OF POSSIBLE SECTION 36(b) STATEMENTS FOREIGN MILITARY SALES

a. Prospective purchaser: Saudi Arabia.

b. Description and quantity or quantities of articles or services under consideration for purchase: Eight Boeing 707 aerial refueling aircraft, including an initial purchase of six aircraft and an option to purchase two additional aircraft; three years supply of spares and support equipment; three years of contractor maintenance, training, and logistics support in Saudi Arabia; and CONUS training provided by USAF and/or the contractor.

c. Estimated value(s) of this case: $2.4 billion.

d. Description of total program of which this case is a part: Same as b above.

e. Estimated value of total program of which this case is a part: Same as c above.

f. Prior related cases, if any: None.

g. Military department: Air Force (SKA).

h. Estimated date letter of offer/acceptance (LOA) ready for formal notification to Congress: September 1981.

i. Date advance notification delivered to Congress: August 24, 1981.

POLICY JUSTIFICATION

Saudi Arabia—Aerial refueling aircraft:

The Government of Saudi Arabia has requested the purchase of up to eight Boeing 707 aerial refueling aircraft, including an initial purchase of six aircraft and an option to purchase two additional aircraft; three years supply of spares and support equipment; three years of contractor maintenance, training and logistics support in Saudi Arabia; and CONUS training provided by USAF and/or the contractor at an estimated cost of $2.4 billion.

This sale will contribute significantly to U.S. foreign policy and national security objectives by helping to increase the security of a friendly country of vital interest to the United States. By enhancing Saudi Arabia's ability to intercept hostile aircraft, the sale will reduce the probability of major power confrontation in the region. In addition to enhancing the overall Western security posture in the Persian Gulf region, the sale will increase regional stability by improving Saudi Arabia's air defense capabilities. In these ways, it will help ensure continued Western access to vital Persian Gulf oil.

The purchase of the aerial refueling aircraft will enhance the Saudi air defense capability by increasing the range and time aloft of the Saudi F–15 aircraft. In view of the size of the country, the few bases at which the F–15 aircraft will be located, and the increased regional threat, the capability to prolong the endurance of interceptor aircraft is essential to the defense of the Kingdom. These same aerial tankers can be used to refuel the E–3A aircraft also requested by Saudi Arabia and the F–5 aircraft already in their inventory, likewise extending their time aloft.

The sale of this equipment and support will not affect the basic military balance in the region. Saudi Arabia already has KC–130 aircraft for refueling its F–5s. Both Israel and Iran have aerial refueling capabilities.

Approximately 320 contractor personnel will be required to provide initial in-country support. The contract will be for support for three years. Follow-on contractor support beyond the initial contract period is expected to be needed for an extended period but the number of U.S. contractors should decrease as the Royal Saudi Air Force becomes trained to perform maintenance.

The prime contractor will be the Boeing Aerospace Company of Seattle, Washington.

There will be no adverse impact on U.S. defense readiness as a result of this sale. Procurement will be from new production.

## PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. The classified annexes referred to in several of the covering letters are available to Senators in the office of the Foreign Relations Committee, room 4229, Dirksen Building.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
*Washington, D.C., August 21, 1981.*

Hon. CHARLES H. PERCY,
*Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding

herewith Transmittal No. 81-82 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Norway for defense articles and services estimated to cost $550 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

ERICH F. VON MARBOD,
*Director.*

POLICY JUSTIFICATION

NORWAY—ROLAND II FIRE UNITS

The Government of Norway has requested the purchase of 32 ROLAND II fire units, 782 ROLAND guided missiles, 5 M88A1 ROLAND II recovery vehicles, and 32 XM975 carriers at an estimated cost of $550 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Norway; furthering NATO rationalization, standardization, and interoperability; and enhancing the defenses of the Western Alliance.

The Government of Norway has a requirement for this weapon system in order to provide for point defense of high value targets and to enhance its capability to defend its air space. Norway will have no difficulty in absorbing this weapon system.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractors will be the Hughes Aircraft Company of Canoga Park, California, and Boeing Aerospace Company of Seattle, Washington.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Norway.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

POLICY JUSTIFICATION

AUSTRALIA—COOPERATIVE LOGISTICS SUPPLY SUPPORT

The Government of Australia has requested the purchase of cooperative logistics supply support for spare parts in support of major items of equipment of U.S. origin already delivered to and being operated by the Royal Australian Air Force at an estimated cost of $34 million.

As an ally under the ANZUS treaty, Australia plays a major role in assuring the stability of Sotuheast Asia and the South Pacific and is strategically located with respect to the Indian Ocean as well as the South Pacific. Therefore, the United States has cooperated in improving Australia's military capability through foreign military sales, logistics agreements, and combined exercises.

Spares and repair parts which will be furnished under this case will support F-111C, C-130, and C-7 aircraft and other systems of U.S. origin under the cognizance of the U.S. Air Force. Such support will assure the continued mission readiness of Australian forces.

The sale of this equipment and support will not affect the basic military balance in the region.

Procurement of these items and services will be from the many contractors providing similar items and services to the U.S. forces.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Australia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

POLICY JUSTIFICATION

FEDERAL REPUBLIC OF GERMANY—COOPERATIVE LOGISTICS SUPPLY SUPPORT ARRANGEMENTS

The Government of the Federal Republic of Germany (FRG) has requested the purchase of a cooperative logistics supply support arrangement, requisition case (FMSO II), for follow-on spares and supplies to support aircraft and other systems and subsystems of U.S. origin at an estimated value of $32 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of the FRG; furthering NATO rationalization, standardization, and interoperability; and enhancing the defenses of the Western Alliance.

This cooperative logistics support arrangement is necessary to ensure an uninterrupted flow of spare parts to support 250 F-4 aircraft and other systems and subsystems of U.S. origin. The German Air Force will have no difficulty in absorbing the articles.

The sale of this equipment and support will not affect the basic military balance in the region.

Procurement of these items and services will be from the many contractors providing similar items and services to the U.S. forces.

This proposed sale will not require the assignment of any additional U.S. Government or contractor personnel to the FRG to carry out this sale.

There will be no adverse impact of U.S. defense readiness as a result of this sale.

POLICY JUSTIFICATION

FRANCE—MK-46 MOD 2 TORPEDOES

The Government of France has requested the purchase of 93 MK-46 Mod 2 torpedoes, two years of spare parts support, and helicopter launch accessories at an estimated cost of $12 million.

This sale will contribute to the foreign policy and security objectives of the United States by improving the defensive capabilities of an ally. Although French forces are not now committed to NATO command, France nevertheless bases its defense on cooperation and interoperability with NATO. The French Navy operates frequently with the U.S. Navy and has much equipment of U.S. origin.

The MK-46 Mod 2 torpedoes presently in the French inventory are aging. This purchase would allow them to increase the number of torpedoes they have on hand and give them greater flexibility in the time schedule to refurbish their older ones. Additionally, the Government of France is anticipating the purchase of modification kits to upgrade their torpedoes to the Mod 5 configuration. This purchase would allow them to upgrade newer torpedoes should they desire.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be Honeywell Incorporated of Minneapolis, Minnesota.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to France.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

(viii) Date Report Delivered to Congress: Sept. 1, 1981.

---

POLICY JUSTIFICATION

NATO SEASPARROW CONSORTUM—RIM-7M MISSILES

The NATO Seasparrow Consortium for Belgium, Denmark, Germany, Norway, and the Netherlands has requested the purchase of 1,000 RIM-7M SEASPARROW Missiles and associated support at an estimated cost of $240 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of NATO; furthering NATO rationalization, standardization, and interoperability; and enhancing the defenses of the Western Alliance.

These missiles are being purchased to improve existing short range, sea-based surface-to-air missile capabilities. NATO members of the Seasparrow Consortium already have similar missiles in their inventories, and the training and maintenance facilities to support these missiles.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Raytheon Company of Lowell, Massachusetts.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to the NATO countries.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

(i) Prospective Purchaser: Jordan.

(ii) Total Estimated Value:

| | Millions |
|---|---|
| Major defense equipment*---------- | $63 |
| Other ---------- | 42 |
| Total ---------- | 105 |

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Fifty thousand hand grenades, 58,000 rounds of 155mm and 8-inch howitzer ammunition, 20,000 rounds of 105mm main gun tank ammunition, and 7,500,000 rounds of 20mm, 7.62mm, and .50 caliber ammunition.

(iv) Military Department: Army (VDC).

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: September 10, 1981.

---

POLICY JUSTIFICATION

JORDAN—AMMUNITION

The Government of Jordan (GOJ) has requested the purchase of 50,000 hand grenades, 58,000 rounds of 155mm and 8-inch howitzer ammunition, 20,000 rounds of 105mm main gun tank ammunition, and 7,500,000 rounds of 20mm, 7.62mm, and .50 caliber ammunition at an estimated cost of $105 million.

The sale will further U.S. foreign policy objectives by assisting a friendly country to deter hostilities and defend itself in a region where it is vital to U.S. interests to reduce the probability of open conflict and to promote peace and stability. The sale will assist the GOJ in meeting its legitimate defense requirements and reaffirm to the Jordanian military and political leadership that the United States is responsive to the priority modernization objectives of the Jordanian Armed Forces. This modernization effort is consistent with U.S. views on Jordanian security needs, the regional military balance, and long-range peace and stability in the region.

This ammunition is compatible with U.S. weapons already provided to Jordan and, as such, does not introduce a new weapons capability into the region. This request for ammunition will enable Jordan to replace ammunition expended during training, as well as fill basic load and war reserve stockages.

This sale will not affect the basic military balance in the region.

The several types of ammunition will be procured from various contractors and government owned-contractor operated plants throughout the United States.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Jordan.

There will be no adverse impact on U.S. defense readiness as a result of the sale of the hand grenades, 20mm, 7.62mm, or .50 caliber ammunition. As concerns the 8-inch, 155mm, and 105mm ammunition, the Department of the Army has no current procurement approval and thus there is no impact. Should the Department of the Army receive procurement authority for the 8-inch, 155mm, and 105mm ammunition it could result in delays of two months to one year in deliveries that would otherwise become available at that time.

POLICY JUSTIFICATION

TURKEY—M48A5 CONVERSION KITS

The Government of Turkey has requested the purchase of 348 conversion kits to convert M48A1 tanks to the M48A5 configuration at an estimated cost of $131 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Turkey in fulfillment of its NATO obligations; furthering NATO rationalization, standardization, and interoperability; and enhancing the defense of the Western Alliance.

The Government of Turkey needs these conversion kits to continue to upgrade its Korean War vintage M48 series tanks. Turkey will have no difficulty in absorbing and maintaining the converted tanks as the tanks, parts, tools, and test equipment are already in the inventory and trained personnel are available. This sale will enable the Turkish Army to increase its military capability. The tank conversion kits will be provided in accordance with and subject to the limitation on use and transfer provided for under the Arms Export Control Act, as embodied in the terms of sale. This sale will not adversely affect either the military balance in the region or U.S. efforts to encourage a negotiated settlement of the Cyprus question.

The prime contractor will be the Chrysler Defense Corporation of Warren, Michigan.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Turkey.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

---

POLICY JUSTIFICATION

EGYPT—IMPROVED TOW MISSILES

The Government of Egypt has requested the purchase of 2010 I-TOW surface attack guided missiles and support equipment at an estimated cost of $20 million.

This proposed sale will contribute to the foreign policy objectives of the United States by enabling Egypt to provide for its own security and self-defense, thereby contributing to the peace process in the region.

The Government of Egypt will use the I-TOW to replace aging equipment rapidly becoming unserviceable due to the nonavailability of spare parts. Previously, the bulk of the Egyptian armament was provided by the Soviet Union, but Egypt has turned to the West for defense articles and services.

Because these I-TOW missiles will replace obsolescent or unserviceable equipment already in the Egyptian inventory, the sale will not affect the military balance in the region.

The prime contractor will be the Hughes Aircraft Company of Canoga Park, California.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Egypt.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

POLICY JUSTIFICATION

UNITED ARAB EMIRATES—TOW LAUNCHERS AND MISSILES

The Government of the United Arab Emirates (UAE) has requested the purchase of 54 jeep-mounted TOW launchers, 1085 Improved-TOW (HEAT) missiles, 101 practice missiles, supporting equipment, associated spares, repair parts, field engineering services, and training at an estimated cost of $28 million.

This sale will contribute to the foreign policy and national security objectives of the United States by enhancing the ability of the UAE to provide for its own defense. A strong and independent UAE, that is able to defend itself, contributes to the stability of the Middle East.

The addition of the TOW anti-armor missile system will enhance the UAE's ability to respond to armor threats with organic ground defense forces.

This sale will not have an adverse impact on the regional military balance. The TOW or similar anti-tank missile systems are currently fielded in the majority of the countries in the region.

The prime contractors are Hughes Aircraft Company of Canoga Park, California, and Emerson Electric Company of St. Louis, Missouri.

This sale will require approximately eight U.S. Government personnel in-country for about two months upon delivery of the weapon system.

There will be no adverse impact on U.S. defense readiness as a result of this sale as the system will come from new production.

POLICY JUSTIFICATION

INDONESIA—105MM HOWITZERS

The Government of Indonesia has requested the purchase of 133 M101A1 105mm howitzers with related training and support items at an estimated cost of $16 million.

This sale will contribute to the foreign policy objectives of the United States by helping to improve the security of a friendly and strategically important country in Southeast Asia.

The Government of Indonesia is upgrading its artillery forces. These howitzers will be used to equip 10 operational and one training battalion as the primary field artillery of the Indonesian Army. They will replace obsolete Soviet bloc 76mm howitzers.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the U.S. Army.

Implementation of this sale will require the assignment of a U.S. Army site survey team to Indonesia for a few weeks to identify training and support requirements.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

POLICY JUSTIFICATION

SAUDI ARABIA—COMMAND, CONTROL, AND COMMUNICATIONS SYSTEM

The Government of Saudi Arabia has requested amendment of an existing Foreign Military Sales agreement for the purchase of the services and materials required to complete the development, installation, and check-out of the Royal Saudi Naval Forces (RSNF) Command, Control, and Communications ($C^3$) system; installation of a microwave interconnect system between the RSNF communications stations at Jidda and Jubail; spare parts, support equipment, training, and contractor maintenance services for the $C^3$ system and the microwave interconnect system; and the completion of the RSNF communications stations at Jidda, Jubail, and Riyadh at an estimated cost of $180 million.

This sale is consistent with the stated U.S. policy of assisting friendly nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to improve the security of the country through modernization of Saudi naval forces. In a regional context, enhancement of the defensive capabilities of Saudi Arabia will also contribute to overall Middle East security.

Saudi Arabia is in the process of enlarging and improving its naval assets through the Saudi Naval Expansion Program (SNEP) with the United States. The SNEP includes the purchase of 29 ships and craft, shore facilities, equipment, logistical support, and training. This sale will provide for completion of the shore-based communications system and the U.S. designed $C^3$ system which are essential for the effective operation and control of Saudi naval forces. This sale will not introduce a new military capability into the region since neighboring countries have $C^3$ systems with similar capabilities.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractors will be Science Applications, Incorporated of McLean, Virginia, and Page Communications Engineers, Incorporated of Vienna, Virginia.

Implementation of this sale will require the assignment of 30 to 50 additional U.S. Government or contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

---

DEFENSE SECURITY
ASSISTANCE AGENCY,
*Washington, D.C., September 10, 1981.*

Hon. CHARLES H. PERCY,
*Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81-90, concerning the Department of the Navy's proposed Letter of Offer to Saudi Arabia for defense articles and services estimated to cost $1.3 billion. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERICH F. VON MARBOD,
*Director.*

POLICY JUSTIFICATION

SAUDI ARABIA—CONTINUATION OF SUPPORT SERVICES FOR THE SAUDI NAVAL EXPANSION PROGRAM

The Government of Saudi Arabia has requested amendment of an existing foreign Military Sales (FMS) agreement for the purchase of two additional years of contractor and U.S. Navy provided services in the United States for post delivery support of four Patrol Chaser Missile (PCG) ships and nine missile equipped Patrol Gunboats (PGG) purchased by the Royal Saudi Naval Forces (RSNF) under previous FMS agreements, two additional years of contractor provided operations and maintenance support of RSNF shore facilities in Saudi Arabia, and associated U.S. Navy management support at an estimated cost of $1.3 billion.

This sale is consistent with the stated U.S. policy of assisting friendly nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to improve the security of the country through modernization of Saudi naval forces. In a regional context, enhancement of the defensive capabilities of Saudi Arabia will also contribute to overall Middle East security.

The United States is assisting the RSNF to enlarge and modernize its forces through the Saudi Naval Expansion Program (SNEP). The SNEP includes the procurement of 29 ships and craft, shore facilities, equipment, logistical support, and training. The services to be provided under this sale will not introduce a new military capability into the region.

The sale of this support will not affect the basic military balance in the region.

The prime contractor will be the HBH Company (a joint venture of Hughes Aircraft Company, the Bendix Corporation, and Holmes and Narver, Incorporated) of Arlington, Virginia.

Implementation of this sale will require the assignment of an additional 600 contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
*Washington, D.C., September 10, 1981.*

HON. CHARLES H. PERCY,

POLICY JUSTIFICATION

SAUDI ARABIA—NAVAL FACILITIES CONSTRUCTION

The Government of Saudi Arabia has requested amendment of an existing Foreign Military Sales agreement for the purchase of design and construction services for additional facilities required by the Royal Saudi Naval Forces (RSNF) at the Jidda and Jubail bases and the Riyadh headquarters complex at an estimated cost of $1.7 billion.

This effort is one of several construction projects being supervised by the U.S. Army Corps of Engineers which, when completed, will provide operational, training, and support facilities for the Saudi Arabian armed forces. The development of defense infrastructure is important in assisting nations to provide for their own security. Further, the values of construction efforts such as these extend far beyond the facilities themselves to the training and economic benefits derived by the labor force.

This particular construction effort is in support of the Saudi Naval Expansion Program (SNEP), which will provide major facilities for the Royal Saudi Navy to include deep-water ports on both the Red Sea and the Persian Gulf, ship repair facilities, training facilities, a naval headquarters, and a naval academy. This sale includes additional housing, personnel support facilities, training and maintenance facilities, expanded utilities systems, and a fleet headquarters building at the RSNF bases at Jidda and Jubail; a data library system for the RSNF headquarters in Riyadh; and alignment and calibration ranges for RSNF ships. This sale does not introduce a new military capability into the region.

The sale of these services will not affect the basic military balance in the region.

The prime contractor has not been determined at this time.

Implementation of this sale will require the assignment of an additional 160 U.S. Government personnel to Saudi Arabia. The total contractor work force should approximate 5,000 persons, primarily third country nationals.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

---

POLICY JUSTIFICATION

OMAN—C-130H AIRCRAFT

The Government of Oman has requested the purchase of two C-130H cargo aircraft with support for two years and training at an estimated cost of $45 million.

This sale is consistent with the stated U.S. policy of assisting other nations to provide for their own security and self-defense by allowing the transfer of reasonable amounts of defense articles and services. Oman's strategic location at the entrance to the Persian Gulf closely links the national interests of Oman and the U.S. Along with the formal Access Agreement signed by the Governments of Oman and the United States in June 1980, this sale of two C-130H aircraft will enhance our country-to-country relationship.

This sale is designed to assist the Omani Air Force in modernizing and increasing its transport aircraft capability for the rapid movement of troops and military equipment within Oman and the resupply of ground forces. The sale of two C-130H aircraft does not introduce a new military capability into the region.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Lockheed Corporation of Marietta, Georgia.

Implementation of this sale will require the assignment of two additional U.S. Government or two contractor personnel for a minimum of one year.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

POLICY JUSTIFICATION

SPAIN—SHIPBOARD ANTI-SUBMARINE WARFARE (ASW) SYSTEMS

The Government of Spain has requested the development and procurement of shipboard ASW electronic suites and the purchase of 18 SH-60B Light Airborne Multi-Purpose System (LAMPS) III helicopters at an estimated cost of $510 million.

This sale will contribute to the foreign policy and national security objectives of the United States by furthering cooperation under our Treaty of Friendship and Cooperation with Spain and improving Spain's coastal defense. Such improvement will benefit the defensive posture of the southern flank of NATO and contribute to keeping the sea lanes open for supplying the U.S. in-country military facilities which are important staging and reinforcement sites.

The purchase of these ASW systems will upgrade and modernize the Spanish antisubmarine capability by supplementing or replacing existing equipment. The Spanish Navy will be capable of absorbing and maintaining these systems within their current inventory and capabilities.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor for the SH-60B LAMPS III helicopter will be the IBM Corporation, Federal Systems Division of Oswego, New York, and the associate contractor will be the Sikorsky Aircraft Division of United Technologies Corporation of Stratford, Connecticut. The prime contractor for the shipboard equipment has not been chosen because the configuration for these electronic suites is not finalized.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Spain.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

---

## DEATH OF LAWRENCE J. WASHINGTON

● Mr. LEVIN. Mr. President, I was shocked and saddened to learn of the death on Monday of a close friend and civic leader, Lawrence J. Washington. Larry was a leading figure in the National Association for the Advancement of Colored People on a national level and the unquestioned spokesperson for civil rights in Michigan. He was, in addition, a friend and adviser whose counsel I sought and respected.

Larry was a gentle person who could, when he needed, turn into a tiger in the constant battle for social justice. In a 1974 interview, he phrased his view of the world with characteristic honesty and elegance. He said then that:

I always believed in appealing to reason. Of course, I also learned that some people are more reasonable when you have them in a hammerlock.

Larry's accomplishments—achieved through both reason and the hammerlock he knew when to apply—were unquestioned. His voice will be missed, but the wisdom of his words and the fruits of his deeds will be long remembered and felt. I will always remember him—and I will always miss him.●

---

## TO BE CONSERVATIVE

● Mr. GOLDWATER. Mr. President, it is a wonderful feeling to be a conservative these days. When I ran for President 17 years ago I was told I was behind the times. Now everybody tells me I was ahead of my time. All I can say is that time certainly is an elusive companion.

But those reactions illustrate how far the ideological pendulum has swung in recent years. The American people have expressed their desire for a new course in our public policy in this country—a conservative course.

President Reagan's triumphs at the polls and in Congress during the past year are, of course, great tributes to his skill as a politician. But they also resulted, I believe, from the long-developing shift of public opinion to traditional American values.

As far as I am concerned, that shift had to come. Government had been intruding more and more into every aspect of our lives. The people just would not stand for it anymore.

I have seen it coming for a long time. Throughout my political career, since the day I took my seat in the U.S. Senate, I have preached one basic theme: The bigger Government gets, the more it threatens our freedom.

I am certain those who contributed to the growth of Government had all the best intentions. As they started one Federal program after another through the years, their motives always sounded good and the intent of the programs always seemed admirable.

Almost 150 years ago a young Frenchman came to this country and marveled at the success of the American experiment in democracy. Alexis de Tocqueville wrote after visiting this country that:

The advantage of democracy does not consist . . . in favoring the prosperity of all, but simply in contributing to the well-being of the greatest number.

And the foundation for our form of government is not in the principle of prosperity for all but in freedom for all. That is what has attracted all those who have migrated to this country. That is what has made America the symbol of hope and prosperity for all the world. Freedom: That is what true conservatism is all about.

Being a conservative in America traditionally has meant that one holds a deep, abiding respect for the Constitution. We conservatives believe sincerely in the integrity of the Constitution. We treasure the freedom that document protects.

We believe, as the Founding Fathers did, that we "are endowed by our Creator with certain unalienable rights; that among these are life, liberty and the pursuit of happiness."

And for 205 years this Nation, based on those principles, has endured. Through foreign wars and civil wars, through political scandals and economic disasters, through civil disorders and Presidential assassinations, our flag has flown high. Through it all we have survived every possible attack on our freedom.

But where the guns of war and the breadlines of the depression failed, another force could succeed in dividing our country. The specter of single issue religious groups is growing over our land. In all honesty, I must admit that the birth of the so-called "new right" is a direct reaction to years of increasing social activism by the liberal side of the religious house. Within that development lies a very serious threat to our liberty.

One of the great strengths of our political system always has been our tendency to keep religious issues in the background. By maintaining the separation of church and state, the United States has avoided the intolerance which has so divided the rest of the world with religious wars. Throughout our 200-plus

years, public policy debate has focused on political and economic issues, on which there can be compromise.

James Madison, once wrote that "If men were angels, no government would be necessary."

Well, Madison certainly recognized that humans are not angels. He realized that they tend to group together in narrow interest groups, which he called factions. And he wrote extensively in the federalist papers about how the Constitution should protect us from the abuses of various factions.

Madison saw this as the great paradox of our system: How do you control the factions without violating the people's basic freedoms?

Madison wrote:

> In framing a government which is to be administered by men over men, the great difficulty lies in this: You must first enable the government to control the governed; and in the next place oblige it to control itself.

And in a well-constructed representative government like ours, Madison said, one of our greatest strengths is our ability to "break and control the violence of faction."

What he said is that the aim of the framers of the Constitution was to allow freedom of religion and freedom of speech for everyone, not just those who follow one religious faction.

Madison said:

> A zeal for different opinions concerning religion has occasionally divided mankind . . . and rendered them much more disposed to vex and oppose each other than to cooperate for the common good.

Can any of us refute the wisdom of Madison and the other framers? Can anyone look at the carnage of Iran, the bloodshed in Northern Ireland, or the bombs bursting in Lebanon and yet question the dangers of injecting religious issues into the affairs of state?

Our political process involves a constant give and take, a continuous series of trade-offs. From this system of compromise, we get legislation that reflects input from many sectors of our society and addresses many needs and interests.

Obviously, not everyone can be pleased, but at least all sides are considered.

However, on religious issues there can be little or no compromise. There is no position on which people are so immovable as their religious beliefs. There is no more powerful ally one can claim in a debate than Jesus Christ. Or God, or Allah, or whatever one calls his supreme being.

But, like any powerful weapon, the use of God's name on one's behalf should be used sparingly.

The religious factors that are growing throughout our land are not using their religious clout with wisdom. They are trying to force government leaders into following their positions 100 percent. If you disagree with these religious groups on any particular moral issue, they cajole, they complain, they threaten you with loss of money or votes or both.

In the past couple years, I have seen many news items that referred to the moral majority, pro-life and other religious groups as "the new right," and the "new conservatism." Well, I have spent quite a number of years carrying the flag of the "old conservatism." And I can say with conviction that the religious issues of these groups have little or nothing to do with conservative or liberal politics.

The uncompromising position of these groups is a divisive element that could tear apart the very spirit of our representative system, if they gain sufficient strength.

As it is, they are diverting us away from the vital issues that our Government needs to address. We are facing serious economic and military dangers in this country today, and we need to make a concerted effort to correct our problems in these areas.

But far too much of the time of Members of Congress and officials in the executive branch is used up dealing with special interest groups on issues like abortion, school busing, ERA, prayer in the schools, and pornography. While these are important moral issues, they are secondary right now to our national security and economic survival.

I must make it clear that I do not condemn these groups for what they believe. I happen to share many of the values emphasized by these organizations.

I, too, believe that we Americans should return to our traditional values concerning morality, family closeness, self-reliance, and a day's work for a day's pay. These are the values our forebears clung to as they built this Nation into the citadel of freedom it is today.

And I, too, have been pleased with the swing of the pendulum for in recent years to the conservative, moral end of the spectrum.

But I object to certain groups jumping on that pendulum and then claiming that they caused it to swing in the first place.

And I am frankly sick and tired of the political preachers across this country telling me as a citizen that if I want to be a moral person, I must believe in "A," "B," "C," and "D." Just who do they think they are? And from where do they presume to claim the right to dictate their moral beliefs to me?

And I am more angry as a legislator who must endure the threats of every religious group who thinks it has some God-granted right to control my vote on every rollcall in the Senate.

I am warning them today: I will fight them every step of the way if they try to dictate their moral convictions to all Americans in the name of conservatism.

This unrelenting obsession with a particular goal destroys the perspective of many decent people with whom I think I agree on most issues. In the quest for moral righteousness they have become easy prey to manipulation and misjudgment.

A prime example was the recent nomination of Sandra O'Connor as a Supreme Court justice and the ensuing uproar over her stand on abortion.

The abortion issue has nothing to do with being conservative or liberal. I happen to oppose abortion, but there are many fine conservatives who would go along with regulated abortions. In fact, my own wife believes that a woman should have the freedom of choice for herself whether she is capable of continuing the pregnancy and then raising the child.

I disagree with her on that. Yet I respect her right to disagree. If I expected her to agree with me on every issue we would be in a lot of trouble.

And the same goes for prospective Supreme Court justices. No single issue ever should decide the fitness of a Supreme Court justice. To think otherwise is to go against the integrity of the Constitution.

There are many broad issues addressed each day by a jurist that are much more revealing of how that person might perform on the High Court. A judge's attitude on private property rights, State sovereignty, statutory construction, and treatment of criminals tells me more about whether a person is conservative than his or her stand on abortion.

Of course, the saddest part of the whole dispute was that Judge O'Connor was attacked by these religious factions for a position she does not hold. She opposes abortion and said so. I firmly believe that she recognizes the authority of legislatures to regulate it.

She will make an excellent justice of the Supreme Court. She will make President Reagan proud that he chose her as the best of all candidates—men or women.

And the religious factions will go on imposing their will on others unless the decent people connected to them recognize that religion has no place in public policy.

They must learn to make their views known without trying to make their views the only alternatives.

The great decisions of Government cannot be dictated by the concerns of religious factions. This was true in the days of Madison, and it is just as true today.

We have succeeded for 205 years in keeping the affairs of State separate from the uncompromising idealism of religious groups and we must not stop now.

To retreat from that separation would violate the principles of conservatism and the values upon which the framers built this democratic republic.●

## CONSULTATIONS ON INTEREST RATE REDUCTIONS

● Mr. BAUCUS. Mr. President, on July 30 my colleague, Senator MELCHER, introduced Senate Joint Resolution 104 that would require President Reagan to begin immediate consultations with the Federal Reserve Board with the aim of reducing interest rates substantially within the next 60 to 90 days.

On August 20, the members of the Montana Governor's Ad Hoc Committee on Agriculture formally endorsed Senator MELCHER's resolution. I ask that their endorsement appear in the RECORD.

The material follows:

STATE OF MONTANA,
*Helena, August 20, 1981.*

Montana's two leading cereal grains, wheat and barley, are currently selling for 50 and 56 percent of parity, resulting in an ever in-

creasing need for credit to continue operations. Current usurious interest rates are devastating to agriculture as well as the rest of the economy. A one percent increase in interest rates results in a one billion dollar increase in expenses nationally for agriculture. An 8 percent decrease in rates would mean additional income to meet expenses in the amount of 8 billion dollars.

Senator John Melcher's efforts to lower interest rates are to be commended. The undersigned members of the Governor's Ad Hoc Committee on Agriculture does hereby endorse to support Senate Joint Resolution 104 introduced by Senator Melcher directing the President of the United States to consult with the Governors of the Federal Reserve System for the purpose of substantially reducing interest rates within the next 90 days. Unless this is done it will likely cost us a generation of young farmers.

Montana Farmers Union, Montana Farm Farm Bureau, Montana Stockgrowers Association, Montana CowBelles, Montana Cattlemen's Association and Dairy Association, National Farmers Organization, Montana Grain Growers Association, Montana Women Involved in Farm Economics, Montana State Grange, Montana Department of Agriculture, Farmers Union Marketing, and Processing, Cenex, Grain Terminal Association, Montana Weed Control Association, and LENEX.●

## NOTICE OF DETERMINATIONS BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of Senate employees who propose to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Thomas A. Brooks of the staff of the Committee on Banking, Housing and Urban Affairs, and Ms. Joan McEntee of the staff of the Committee on Governmental Affairs, to participate in a program sponsored by a foreign educational organization, the Eisenhower Fellows Association in the Republic of China, from August 11 to September 4, 1981.

The committee has determined that participation by Mr. Brooks and Ms. McEntee, to discuss banking, finance and economic development in the program in Taiwan, is in the interests of the Senate and of the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. John R. Steer, legislative director to Senator STROM THURMOND, to participate in a program sponsored by a foreign educational organization, Tamkang University, in the Republic of China from August 16–24, 1981.

The committee has determined that participation by Mr. Steer in the program in the Republic of China, at the expense of Tamkang University, to discuss economics and international relations, is in the interests of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Margo Carlisle of the staff of the Republican conference, to participate in a program sponsored by the Konrad Adenauer Foundation, to be held in Cologne, Germany from September 2 through 5, 1981.

The committee has determined that participation by Ms. Carlisle in the program in Cologne, Germany, at the expense of the Konrad Adenauer Foundation, is in the interests of the Senate and the United States.

The Select Committee on Ethics has received a request for determination under rule 35 which would permit Mr. John E. Carbaugh, Jr. of the staff of Senator HELMS to participate in a program sponsored by a foreign educational organization, the Konrad Adenauer Foundation in Bonn, West Germany, from September 3–6, 1981.

The committee has determined that his participation in the program in West Germany at the expense of the Adenauer Foundation, to discuss the Atlantic Alliance, is in the interests of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Senator PAULA HAWKINS to participate in a program sponsored by a foreign educational organization, Ta Tung University, Taipei, Taiwan on August 31, 1981.

The committee has determined that participation by Senator HAWKINS in the program in Taiwan, at the expense of Ta Tung University, to speak to the faculty and student body of that university, is in the interests of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which permits Mr. Robert J. Kabel of the staff of Senator LUGAR to participate in a program sponsored by a foreign educational organization, Soochow University in Taipei, Taiwan on August 3–11, 1981.

The committee has determined that Mr. Kabel's participation in the program in Taiwan, at the expense of Soochow University, to discuss relations between the United States and the Republic of China, is in the interests of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which permits Mr. Kent Hughes of the staff of the Joint Economic Committee to participate in a program sponsored by a foreign educational organization, Tamkang University in Taiwan on August 16–24, 1981.

The committee has determined that Mr. Hughes' participation in the program in Taiwan, at the expense of Tamkang University, to discuss relations between the United States and the Repubic of China, is in the interests of the Senate and the United States.●

## SOUTH BRONX: STRENGTH FROM UNITY

● Mr. MOYNIHAN. Mr. President, the Sunday, July 26 Los Angeles Times carries a story entitled "South Bronx: Strength From Unity." As almost everyone knows by now Mr. President, politicians have made the South Bronx the most frequently visited part of New York in recent years. It is now apparent that the area is coming back to life. Its renaissance is the result of the efforts and faith of local residents and community organizations.

I ask that the text of this article be presented in the RECORD together with a letter from New York's Mayor Koch.

CITY OF NEW YORK,
*New York, N.Y., July 28, 1981.*

Hon. DANIEL PATRICK MOYNIHAN,
*Russell Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR: The South Bronx is coming back. Here's a fresh look by a reporter from the Los Angeles Times. I know you'll be pleased to read his story.

All the best.

Sincerely,

EDWARD I. KOCH,
*Mayor.*

SOUTH BRONX: STRENGTH FROM UNITY

(By John J. Goldman)

NEW YORK.—After decades of decay and delay, significant stirrings are taking place in the South Bronx.

Where despair once reigned, a series of diverse community organizations—some with such exotic names as the Banana Kelly Community Improvement Assn., the Mid-Bronx Desperadoes, the Bronx Frontier Development Corp. and the Last Hope Tenants Assn.—are beginning to bring change and a piece of the American dream to the nation's most publicized urban wasteland.

The South Bronx, 20 square miles of New York City widely believed to contain only rubble-strewn empty lots, hides surprising pockets of strength: an industrial park under construction, truck farms, rose gardens, restorations of burned-out apartment buildings, even a windmill.

Land speculators are beginning to emerge; so are tax shelters for the wealthy.

An alliance of tough parish priests, professional planners and community activists is working to stamp out arson.

POTENT, APPEALING SYMBOL

Ground has been broken for 250 suburban-style, middle-income homes. The scene isn't exactly Levittown, and the problems that remain certainly are gigantic. But the symbol of suburban middle-class home ownership as a means of anchoring slum neigborhoods is powerful and appealing to urban planners.

"I hope that people who are middle-class and who hung on will say, "Gee, we're glad we hung on and we can stay," says New York's Mayor Edward I. Koch, who was born in the South Bronx. "I hope that people who left and who are middle-class will come back and buy some of these houses."

". . . It is an accurate statement to say that the South Bronx is coming back," Koch said. "I believe it to be so. People always focus on the dreadful parts of the South Bronx. You will find an enormous amount of construction there—low-income housing, moderate-income housing that has been built over the years."

"I AM VERY ENCOURAGED"

"There are centers of strength that will be expanded as long as everybody hangs in there," adds Mitchell Sviridoff, president of the Local Initiatives Support Corp., launched by the Ford Foundation last year in an effort to revitalize neighborhoods. "I am very encouraged by what has been happening in the Bronx."

The impression that the American dream

remains permanently shattered in the South Bronx has been enduring and has been reinforced by tours of the rubble by politicians of both parties, including President Reagan and his predecessor, Jimmy Carter. Pictures of both men viewing the wasteland of Charlotte Street hide another reality—the gritty vitality of many residents who have been working, building by building and block by block, to rebuild.

"The South Bronx is both an area and a scare word. The stereotypes tend to hide the activity," says Lois Harr, a project coordinator with the Northwest Bronx Community and Clergy Coalition, one of the principal groups seeking to improve the area. "What the South Bronx is about is people struggling in their neighborhoods."

"WE ARE THE GET SET"

"I am a conservative, liberal, radical grandmother," adds Anne Devenney, 61, president of the Coalition's Board of Directors." We improve. We don't move. We are not in the jet set. We are the get set. We get things done."

Despite her optimism, getting things done in the South Bronx has traditionally been very difficult. Resources for urban renewal have been scarce generally, and New York's fiscal crisis has heightened competition among neighborhoods for the money that is available. Thus, it is no surprise that what remains to be done in the South Bronx is awesome.

Just one statistic points to the scope of the problems: At least half of the 2,900 abandoned buildings still standing are so badly damaged that they must be torn down before new neighborhoods can be built.

But, two organizations have served as catalysts.

PARTNERSHIP WITH OTHERS

One is the Local Initiatives Support Corp. Launched by the Ford Foundation, it has forged a partnership with three other foundations and 10 corporations, including banks and insurance companies, to raise close to $2 million in fresh funds for the area. Since it started last year, the corporation has been able to raise more than $25 million nationally with 25 corporations contributing.

It has already funneled $255,800 to local South Bronx groups that have shown stability, managerial competence and community rapport. Only to the extent that these and other grass-roots organizations across the nation become businesslike and self-sufficient, will they be able to weather the difficult times ahead when federal budget cuts hit home.

A FASCINATING PLACE

The second coordinating body is the South Bronx Development Organization, directed by Edward J. Logue, the veteran urban planner whose work has altered the design of Boston, New Haven and New York. This group, created by Koch, has 15 directors representing City Hall, the Bronx Borough Hall and the South Bronx's six community boards. It started operations in 1979 and last fall was again funded by the city, state and federal governments as a nonprofit local development corp. It seeks economic development, job creation, housing and rehabilitation.

"It (the South Bronx) is a fascinating place. You catch the spirit of it," Logue says. "A year from now we will have achieved more momentum and begun to change attitudes even more. We will be getting more people in there to work. And we will be significantly more along in the basic thing we have to do—change the town's attitude about itself."

"If you change the attitude of the South Bronx people and they begin to think there is a reason for staying and a reason for improving, that makes the difference . . . There is a whole public perception of what the place is like, and there is a whole different reality."

DECLINE IN POPULATION

The reality of what happened in the South Bronx has been well chronicled—the flight of the middle class to the suburbs, the influx of poor, the arson, abandonment and decay. Latest census figures show the decline.

In the 10 years since 1970, the population of the South Bronx dropped from 763,326 to 459,777—a loss of 303,549. The loss of about 40 percent of any area's residents is startling. Not only did the population leave, but it changed, becoming overwhelmingly black and Latino.

Summarizing the turbulence and what happened afterward, the police station serving the toughest area in the South Bronx changed its nickname from "Ft. Apache" to "The Little House on the Prairie." Urban planners say the South Bronx burned itself out. What remained became ripe for renewal.

PRIESTS STARTED ORGANIZING

But while attention focused on the firestorm, several groups stubbornly stayed. Parish priests, facing rows of empty pews as parishioners fled, switched to community organizing. While chaos in the classroom dominated many public schools, the tough priests and nuns kept up educational standards in parochial schools. On some blocks residents formed community organizations to repair buildings, press absentee landlords for heat and hot water and to fight for a share of available local and federal funds.

"The role of the church as a catalytic force and as a stabilizing force has been major," Logue says. "The clergy believes there is work to be done, and they are working away at it. The clergy has a very special reason. What is a clergy without a flock?

"The parochial schools could have died. They went through some lean times, and then people said, 'Hey, here I get security, here I get discipline. My child gets educated.' You don't hear of any of the parochial schools closing down."

GOOD PRICE ON A HOME

". . . I tell everybody, sure we have 150,000 or 175,000 people on welfare," Logue adds. "But we got close to 300,000 people in families who support themselves. That says something. There is a large self-supporting population."

Stabilizing that population has been a major priority of South Bronx pioneers. Building 250 private suburban homes is the most dramatic event that has happened to the area in decades. The home building is clearly aimed at residents who are tempted to move elsewhere.

The address aside, the deal is one of the best in the nation. In few other places can buyers pay $41,500 for a brand-new, two-story, three-bedroom row house, complete with driveway and front yard, all with a 4.75 percent mortgage. A four-bedroom model is available for $49,500. Purchasers are required to earn from about $14,300 to $26,000 a year.

Two factors make the offering possible—the large amount of cheap city-owned land that was cleared by arson, plus a subsidized federal mortgage plan for single-family homes.

WORKSHOPS FOR PURCHASERS

The response of South Bronx residents has been strong, even though there has been no advertising yet and model homes still are to be built. The cooperative extension service of Cornell University has been running workshops for potential purchasers. Some of the meetings in local schools and churches have attracted as many as 400 people, who receive basic lessons in budgeting and worksheets on the cash flow that it takes to pay off a mortgage.

Over the years some urban planners, concerned about the plight of the poor, have criticized bringing more affluent families into an area—a process they label gentrification.

"You know, there are people who are against gentrification as they define it. I'm for gentrification because I define it more broadly," says Koch. "I happen to believe it's helpful to an area that is perceived as low-income, near the bottom of the poverty ladder to have an infusion of middle-class people—black, white and Hispanic—to upgrade the area.

"Nobody seems to get upset when a middle-class area starts to go downhill and the poor people move in. Why should people be upset from an ideological point of view that middle-class people move into a neighborhood that is poor? It takes years and years and years before there is even a significant impact of middle-class people moving into a neighborhood. I encourage it."

As important as the private housing is the plan for Bathgate Industrial Park. When fully developed, it is designed to bring 1,500 jobs to the South Bronx. The first building on the 21.5-acre site, situated largely on city-owned land near a convenient expressway, is under construction.

When the first structure is finished it will contain 60,000 square feet and will rent at between $2.50 and $3.00 a square foot—a price attractive enough to compete with industrial parks in New Jersey and Connecticut. To be secure from theft and vandalism the industrial park will use such techniques as off-street parking and inside loading.

With Koch's backing, the first building is being erected as a speculative venture—but if indications of interest from companies continue, parts of the park will not be speculative for long. The Port of New York Authority has become a partner in the project and has agreed to develop at least three of its eight blocks. Over the next five years the South Bronx Development Organization sees a market for 2.5 million square feet of new industrial space. It has been looking for other sites.

700 LOCAL GROUPS SURVIVE

Another part of the strategy for bringing back the Bronx is strengthening existing community groups. About 700 local groups have survived, ranging from block associations to larger bodies like the Burnside Development Corp., the Northwest Bronx Community and Clergy Coalition and the Southeast Bronx Community Organization.

Daniel Rosa, who runs a meat market on Burnside Avenue, remembers the days when Loew's Burnside Theater flourished. The movie house no longer operates, and Rosa, as head of the Burnside Development Corp. consisting of 100 merchants, has been fighting to bring back what was once a very strong shopping area.

"This was always a seven-day-a-week business community, predominantly Jewish," Rosa recalls. "The void is being filled by middle-class blacks and Hispanics. They are trying to raise their children to give them a better outlook."

Rosa is part cheerleader, part urban strategist. He lobbies for better street lighting, for quick rehabilitation of buildings after fires, for better subway service and for new private investment along Burnside Avenue.

"We want to have a neighborhood office to set up tenant organizations," he said, spreading a map of the area on the top of his meat market's freezer. "We are trying the grass-roots, ground-up approach. We are trying to show the city there is a tremendous amount of vitality up here. The Bronx bottomed out a few years ago. The smart real estate people knew there is a future."

While Rosa heads one of the more successful neighborhood merchants associations, the scope of the Northwest Bronx Commu-

nity and Clergy Coalition is far broader. Its mandate covers one-fourth of the Bronx.

The coalition was organized in 1973 by the pastors of 16 parishes. Their goal was to treat the problems of their 12 neighborhoods in the Northwest Bronx and avoid the waves of destruction sweeping through the southern part of the borough. But trouble soon spread north until the area the coalition serves is now considered part of the devastated South Bronx.

The churchmen responded by convassing their neighborhoods and forming 974 tenant associations and 137 block organizations. The coalition made efforts to save hundreds of decaying buildings, fighting to have 37,000 building violations removed and improving safety in 557 structures through installing secure lobby doors, intercom systems and other measures. New boilers, plumbing, wiring, mailboxes and roofs were obtained in many cases.

The Community and Clergy Coalition has organized more than 300 cleanups of streets, sidewalks and vacant lots. It has planted trees and community gardens, sealed abandoned buildings, repaired broken sewers and supervised play streets. Neighborhood patrols have been organized. The coalition has forged alliances with several banks and insurance companies to get financing for building improvements. Three insurance companies—Aetna, Allstate and Travelers—have agreed to write policies in neighborhoods the coalition covers.

ARSON PREVENTION PROJECT

Working with members of the Bronx District Attorney's Office, the U.S. Fire Administration and the New York City Fire Department, members of the coalition have launched a unique arson prevention project in 50 buildings.

Arson-prone buildings are identified through computer analysis. Tax arrears, vacancy rate, the number of previous fires of other measurements are entered into a computer and a score is assigned to the structure. Thirteen would be an abandoned building with 12 previous fires.

"Most of the buildings we look at are in the 1.85 range," says Lois Harr, who heads the coalition's antiarson effort "We channel the buildings into a treatment program."

TREATMENT PROGRAM

That can include organizing the building's tenants, finding out who holds the insurance, inspecting the structure for repairs and meeting with cooperative landlords to arrange fix-ups or refinancing. If a landlord is uncooperative, court action can follow to put a bank-appointed manager in charge of the building.

Sometimes the satisfactions are far greater than restoring bricks and mortar. Harr, 27, who grew up in the Bronx and who graduated from Fordham University in the neighborhood where rehabilitation work is under way, remembers what happened in one building when it was finally repaired.

"The younger people, blacks and Hispanics in the building, gave a little old white-haired lady a birthday party. They learned there was something to be gained by working together. It was a thrill to go to her birthday party," Harr said. "It was the first winter in four years they had heat and hot water."

ENTERING ANOTHER WORLD

Perhaps the most spectacular progress in all 20 square miles of the South Bronx has been made in the Hunts Point section nicknamed Gigante Land, after Father Louis Gigante, an associate pastor of St. Athanasius Roman Catholic Church.

Gigante formed the Southeast Bronx Community Organization in 1968 when Hunts Point was synonymous with dilapidated housing, poor health care, crime and decay. These days, to enter Gigante Land is to enter another world.

The area is dominated by rehabilitated apartment houses and Tiffany Plaza, and outdoor, European-style plaza with ornamental fountains and lion's-head sculptures, made in Italy, spouting water. The plaza contains a stage and 30 honey locust trees. Over the years, Gigante has overseen the construction and rehabilitation of 1,100 federally subsidized apartments.

SELLING TAX SHELTERS

The group's budget is funded in part by the sale of tax shelters on its buildings. On a $10,000 investment, deductions of up to $30,000 a year for five years are possible. Selling tax shelters to wealth investors has become an increasingly common tactic among South Bronx development groups.

There also are signs that real estate speculators are beginning to purchase properties on a selective basis. Gigante's group thought it had a deal recently to buy land for a parking lot by paying the owner's back taxes. But when the time came to purchase the lot, another buyer had stepped in and was asking a much higher price for the land.

"We have to stay here. We live and die here," says Mario Tolsano, the group director. "We expect to be around for a long time just to make sure that the neighborhood becomes stable."

Clearly, the process of bringing stability to the South Bronx will be long and difficult. The hardships some community groups have endured are memorialized by such names as the Last Hope Tenants Assn. and the Mid-Bronx Desperadoes Community Housing Corp. The Mid-Bronx Desperadoes were formed by nine tenant and block associations who were desperate because of the arson and abandonment sweeping Charlotte Street and the nearby neighborhood.

In seven years the Desperadoes have rehabilitated more than 300 units of housing. The group runs senior citizen patrols, youth and senior citizen committees. It prints a community newsletter and has undertaken beautification projects that include building picket fences and planting flowers around trees that grow in the South Bronx. The Desperadoes work closely with a day-care center, sponsoring educational projects and have contacted more than 200 merchants to form an association to stabilize shopping streets.

"When we applied to the state with the name Desperadoes because were were desperate, the state refused to incorporate us. Officials thought we were a vigilante group," says Genevieve Brooks, the group's president. The problem was solved by incorporating under the initials MBD—which satisfied the lawyers.

"CLEANEST BLOCK IN CITY"

"We felt there were a lot of good people here and they should have a chance," Brooks says. "We are the cleanest block in the city. There are no graffiti on our block of Vyse Avenue. Our floors are highly polished. Curtains are on the windows. Our people are very proud of where they live. The people here are entering into a community. It's a family."

The Last Hope Tenants Assn. was formed because all the other apartment houses in a section of Charlotte Street were torn down. The association has worked successfully to stabilize the last remaining building.

While blocks of Charlotte Street typify urban blight and are startling to tourists, the contrasts now appearing in the South Bronx can be equally startling. Near an expressway on Bathgate Avenue stands a truck farm, complete with its own greenhouse. It grows cucumbers, flowers, grasses, tomatoes and herbs designed to be sold to chic Manhattan restaurants. There are plans, with logic based on locale, to plant mushrooms in darkness of a nearby abandoned building.

"Mushrooms grow in the dark, so abandoned buildings are ideal," says Connie Davis, the farm's office manager, who previously was a social worker. "The Bronx was originally farmland, and we are going back to some of its roots."

In another aspect of soil management, Bronx Frontier Development Corp. furnishes compost material for street gardens. The mulch is manufactured on what Bronx Frontier calls its "ranch," complete with a 64-foot-tall windmill named Aeolus in honor of the Greek wind god. The windmill not only furnishes electricity but is also designed to aerate the mulch pile. As an added bonus, the windmill contains a synthesizer that plays music as the blades spin.

Contrasts are equally vivid on one block of Kelly Street. Boarded-up apartment buildings stand as reminders of the area's decline, but across the street are rehabilitated redbrick buildings with solar collectors on the roof. The apartments include duplexes as chic as many found in Manhattan. Behind the renovated structures stand a rose garden, vegetable beds, a small park and a playground complete with a "dragon" made from wood and abandoned tires.

Responsible for the renovation is the Banana Kelly Community Improvement Assn., so named because part of Kelly Street is curved like a banana. In the four years since its founding, the group has weatherized and managed housing, sealed up abandoned buildings, formed a food cooperative and begun marketing a product one of its members invented—a thermoshade that is placed over windows preventing heat loss during the winter.

Some urban planners believe the transition from community groups to small businesses will be a benchmark in the future of the South Bronx. Another benchmark could be the expansion of single-family, owner-occupied housing. The technology exists for a few family members to do most of the work to erect a new house.

"If people see home ownership as a workable option in the South Bronx and if land can be made available cheaply—which it can—the impact could be magic," Logue said. "We might see a whole new wave of urban homesteaders."●

## OIL PIPELINE DECONTROL LEGISLATION

● Mr. MURKOWSKI. Mr. President, I have worked closely with Senator NICKLES over the past few weeks in an effort to design legislation to reform petroleum pipeline regulations. I share Senator NICKLES' views with respect to the need for regulatory reform of this industry. This is a competitive industry, and Government regulation is not needed.

I believe, however, that unique circumstances exist with respect to the transportation of oil through the Trans-Alaska pipeline system authorized by by the Trans-Alaska Pipeline Act to transport oil from the North Slope of Alaska to the Port of Valdez. Because of the special situation, maintaining Federal Energy Regulatory Commission responsibility for determining the transportation rate for this particular system is essential. Senator NICKLES and I have agreed on language which recognizes this. Accordingly, rate regulation over the Trans-Alaska Pipeline System will be maintained under the proposed legislation.●

## PHILIP SLOMOVITZ HONORED

● Mr. LEVIN. Mr. President, on September 22, Bar-Ilan University, the third largest university in Israel, will formally confer the degree of Doctor of Humane Letters on Philip Slomovitz and establish the "Philip Slomovitz Chair in Communications" in his honor. I rise to call this event to the attention of the Senate not just because Phil is a close friend of mine, but also because I believe that his accomplishments deserve to be recognized at the national level just as they have been in Michigan and in many parts of the world.

Phil Slomovitz has, for the past 35 years, served as the editor of one of the truly great weeklies to be published in the United States, the Detroit Jewish News. His work on the paper has allowed Phil to combine the three moving forces of his life: His love for America, his devotion to the Jewish people, and his respect for the printed word.

As a journalist, Phil is a keen observer of the world that surrounds him, reporting on events which affect his community and commenting on the forces which shape it with an insight and intelligence and elegance that have marked his writing for years. As an individual, Phil has accepted his responsibility to help make the world a better place for all people. He does not just cover events; he helps to shape them. He does not attend just to report; he shares in the decisionmaking process and his suggestions and guidance are inevitably solicited and respected.

I suspect that of all the awards he has received, and there have been many, the establishment of a chair bearing his name at Bar-Ilan University is the honor that may mean the most to him. When Phil accepts that award, and the honorary degree being bestowed on him, he will see tangible evidence of the respect and admiration and love which his work and his life have earned for him.●

## TRIBUTE TO ROY WILKINS

● Mr. HEINZ. Mr. President, behind every successful movement there is always one person who steadfastly goes about getting the job done. Roy Wilkins, who led the National Association for the Advancement of Colored People for 22 years, was such a man. If he were alive today, he would insist—correctly so—that the big job is still not done; nevertheless, it was he who laid the foundation for those laborers who will follow him.

As editor, executive, and activist, Roy Wilkins played a major role in winning progress for American blacks and other minorities in the last half century. He organized the march on Washington in 1963 that mobilized public opinion behind his people's cause and made it a national cause. We can be grateful to Roy Wilkins in large measure for the Civil Rights Act of 1964, the Voting Rights Act of 1965, and the Fair Housing Act of 1968.

Roy Wilkins' greatest quality was his ability to convey his passion for justice and his conviction that the underdog must be included in our society. He well knew that it was in the interest of all Americans to recognize the human dignity and worth of their countrymen and women. Besides his keen moral vision, he succeeded through his intelligence, his thoroughness, his quiet use of power, and his mastery of the English language.

This Congress and this administration have faced and will continue to face a series of challenges that will affect future generations. I hope that we will keep Roy Wilkins' life and work as a guide, and imitate a man who set his course on what was ultimately right and who helped move the country in that direction. America has lost a good friend.●

## THE SPRINGBOKS SHOULD GO HOME

● Mr. KENNEDY. Mr. President, I wish to express my deep opposition to the decision to invite and to permit the Springbok rugby team of South Africa to compete in the United States. These decisions run directly counter to our Nation's proud tradition of support for civil and human rights. Here in the United States, it is a basic right to participate and compete in sports regardless of race. But in South Africa, the black majority is excluded from the Springbok rugby team—as they are from opportunities in the most basic aspects of human existence by the inhumane, racist system of apartheid.

By allowing the Springboks into the United States, the Reagan administration is telling the world of its indifference to South Africa's apartheid policies. Only last month, the South African Government decided to evict over 1,200 squatters from Nyanja township, outside Capetown, and to deport them to a life of poverty and deprivation in the Transkei. Instead of indirectly supporting South Africa's racist policies, the United States should do all it can to end apartheid, which is an abhorrent violation of fundamental human rights.

The administration's decision further undermines U.S. policy in Africa. Nations throughout Africa have been clear in their opposition to this rugby tour. Yet instead of taking African views into consideration, the Reagan administration has shown once again great insensitivity to the legitimate concerns raised throughout Africa.

Moreover, this decision provides a useful propaganda tool for the Soviet Union. By opposing this rugby tour and by threatening to boycott the 1984 Olympics, the Soviet Union—not the United States—can claim to support human rights and majority rule throughout Africa. Instead of opening an avenue for Soviet gains in Africa, the United States must stand firm in its commitment to democracy and fundamental human rights.

Mr. President, in the wake of the appalling United States veto of a U.N. resolution condemning South Africa's recent invasion of Angola, it is time to put America's Africa policy back on track. We must never forget that our basic interests are those which we share with the people of Africa: upholding national sovereignty, promoting economic development and attaining fundamental goals of political and racial justice. I believe that by stating opposition to the Springbok tour, the American people can show Africa and the world that we both oppose the administration's decision and stand firm in our commitment to civil and human rights.●

## INTERNATIONAL LINER SHIPPING

● Mr. PACKWOOD. Mr. President, I have requested that my name be added as a cosponsor of S. 1593, a bill to revise regulation of international liner shipping. I am pleased that Merchant Marine Subcommittee Chairman SLADE GORTON has moved forward with this needed legislation. Before we address maritime promotional policy, we must provide U.S. maritime carriers and shippers with a legal and regulatory environment conducive to international competition.

Reinstating the immunities provided by the 1916 Shipping Act, as S. 1593 seeks to do, will go a long way toward this end.

I believe the concept of shippers councils and the precise nature of regulatory reforms affecting the Federal Maritime Commission deserve further review. Hearings on S. 1593, and S. 125, introduced by Senator INOUYE, will focus on these and related issues.

As chairman of the Commerce Committee I am committed to revitalization of the U.S. merchant marine, and support this initiative to place the U.S. industry on an equal, competitive footing.●

## OIL, OPEC, AND U.S. POLICY

● Mr. HATCH. Mr. President, for the past decade this Nation has been forced to deal with the erratic behavior of OPEC pricing policies. The 1973 oil embargo forced prices to skyrocket and sent waves of fear reverberating through the gas-buying public. In many circles it was suggested that U.S. policy, particularly toward the Middle East, would have to give greater consideration to OPEC desires in the future. Oil producing nations fostered such a belief and basked in the newly created perception of power.

In the intervening years many oil consuming nations have invested massive amounts in researching alternative energy sources. These programs, coupled with conservation campaigns, have reduced demand for oil. The net result has been a glut of oil on the world market. The recent meeting of OPEC nations failed to establish a clear policy giving supporting evidence to the economic law of supply and demand. The member nations of the cartel found it easy to agree when demand was high, but national interests take over when competition for sales becomes more intense.

On August 1, 1981 a stimulating Op-Ed piece appeared in the Chicago Tribune entitled "Oil, OPEC, and U.S. Policy." The author, Jeffrey Bergner, puts the arguments on this topic in a clear, concise manner. He outlines the positions available to the United States and our allies vis-a-vis the OPEC nations

and suggests some options. Recent actions by the Reagan administration, particularly the Libyan plane incident, demonstrate a resolve previously missing in U.S. policy. OPEC nations would do well to take notice of these events. The question is not: How much will they charge us for oil? Instead it should be: Where else will they sell their oil? It is my belief that at the present time the Soviet Union is not interested in purchasing oil on the world market at inflated prices. In fact, they would much rather seize the oilfields and the OPEC nations know it.

Mr. President, I ask that the above-mentioned article be reprinted in the RECORD.

The article follows:

OIL, OPEC, AND U.S. POLICY

(By Jeffrey Bergner)

Motorists may have had the unusual experience of paying less, not more, for gasoline in recent weeks. The arrest and reversal of a seemingly inevitable upward spiral in the price of oil is welcome in itself; but it is also occasion for reflection upon a few simple truths about oil, the OPEC cartel, and American foreign policy.

The first of these is that oil is indeed a commodity, much like any other commodity which is bought and sold. This would go without saying, were it not for the fact that OPEC oil ministers have spent several years propounding with some success a quite different view.

OPEC oil ministers have fostered the myth that oil is unique: Unlike the price of other commodities, which is set by the market, the price of oil is set by men whose goals include an integrated world economy, Third World economic development, and a more just system of distribution. When production levels go up, it is a favor to the world economy, and especially the West; when production levels go down, it is to preserve oil supplies for the good of all peoples. When prices rise, it is to compensate producing nations for Western inflation and to realize economic development goals. So the myth runs.

But price and production levels are not set by a willful cartel free of all restriction upon its plans. The recent softening of demand for world oil exports has made this clear.

There may not be a perfectly free market in oil; the fact that governments, rather than profit-seeking corporations, control oil production in many nations diminishes the freedom of the market. So, too, does the fact that these governments attempt to collude on prices. But it still remains: Because there is not a perfectly free market in oil does not mean that there is no market at all.

Supply and demand has not, nor will it ever be, abolished by fiat. In the short run there can indeed be manipulation of supply and price within certain limits. But these limits are set by the facts that national interests differ, even among the OPEC nations; that decreases in production by some nations result in revenue losses for those nations; and that increases in price make alternative energy sources more attractive.

U.S. imports are running at between 5 and 6 million barrels of oil per day, over 30 per cent below 1977 levels. Domestic production, conservation, and alternative fuels all account for this decline. Recent studies now suggest far greater elasticities of demand for oil than were once assumed. And there is room for far more improvement in the future.

All of this is not without meaning for American foreign policy. In recent years it has been argued that our policy options in the Middle East have been closely constrained by our reliance upon Persian Gulf oil; similarly, our response to Libyan-supported terrorism by our reliance upon Libyan oil; similarly, our initiatives in Nambia, Angola, and South Africa by our reliance upon Nigerian oil; and similarly, our policies in the Western hemisphere by the increasing importance of Mexico as an oil-exporting nation.

Oil is a highly tradeable commodity, as the 1974 embargo proved. It is difficult for any one nation or group of nations to cut off oil supplies to another nation and to retain business as usual with the rest of the world. To think, however, that all of the exporting nations can withhold oil from the industrialized world at once is simply unrealistic.

This is not to suggest recklessness in American foreign policy or to imply that temporary adjustments in the world market may not be inconvenient or painful to Americans. But the current decline in world demand for oil demonstrates the importance of market forces upon the commodity of oil. It suggests, too, that with some clarity of mind, consultation with other oil-importing nations and resoluteness of will that foreign policy can be liberated from the threat of the so-called oil weapon.●

## ORDER OF PROCEDURE

Mr. BAKER. Madam President, I have a number of housekeeping details to attend to and before I do proceed to their consideration and inquire of the minority leader of his wishes in respect of certain matters I have a statement I wish to make.

## WILBUR WALKER'S 65TH BIRTHDAY

Mr. BAKER. Madam President, I shall take only a moment today to depart from budget considerations and the farm bill to announce to the Senate a truly significant occurrence: Today is the 65th birthday anniversary of Wilbur Walker.

Some may say, "Who is Wilbur Walker?"

I reply, Madam President, that Wilbur Walker is one of the unsung heroes of the Senate and he has been so for more than 30 years, for Wilbur Walker is the most senior of all of the Senate drivers.

He happens to be the man who regularly travels with me in the automobile generously assigned by the Senate as I go about my official duties.

Over the years I have come to know Wilbur Walker well and to know him as the A. J. Foyt of politics. He is a modern-day pony express, and he is the one member of my staff who does not ever desert me or inquire into my position on important and earth-shaking issues.

But, Madam President, he is more than just a driver. He is my conjointment with the past, for indeed Wilbur Walker began his career as an employee of the Senate as the assigned driver for then Senator Alben Barkley of Kentucky in 1947. Since then he has been the driver for the illustrious Senator from Ohio, Senator Robert A. Taft, Sr.; for my predecessor as Republican majority leader, Senator William Knowland of California; and for Senator Everett Dirksen of Illinois, the minority leader, a man for whom I have extraordinary respect; and for Senator Griffin of Michigan when he was the assistant Republican leader of the Senate.

He is truly a professional among drivers and his professionalism was never brought to a higher level of accomplishment and never better stated than when a representative of one of the commercial television networks approached Mr. Walker one day and said, "Mr. Walker, I understand that you began driving for Alben Barkley in the 1940's and that you have driven for a series of majority and minority leaders since that time. You must have heard a lot of top politics talk in the back seat of your car," to which Wilbur Walker replied, "Indeed I have."

He said, "Mr. Walker, are you someday going to write a book?"

Wilbur Walker replied, "You may be assured that I am not," which I take to be the mark of a true professional and too infrequently noted in this world in which we politicians thrive.

Madam President, Wilbur Walker has always been proud to be part of the Senate, and I will take this opportunity to tell him that we have been proud to have him to be part of this family and of this organization.

## EXECUTIVE SESSION

Mr. BAKER. Madam President, I am prepared at this time to consider three nominations on the Executive Calendar, and I will ask the distinguished minority leader if he might examine his calendar to say whether or not we might consider those nominations appearing under National Labor Relations Board and, under New Reports, Community Services Administration at this time?

Mr. ROBERT C. BYRD. Madam President, the nominations referred to by the distinguished majority leader have been cleared on this side of the aisle.

Mr. BAKER. I thank the minority leader.

Madam President, I ask unanimous consent that the Senate now go into executive session to consider the three nominations just identified.

The PRESIDING OFFICER. Without objection, it is so ordered.

The assistant legislative clerk proceeded to read various nominations under the National Labor Relations Board and the Community Services Administration.

Mr. BAKER. Madam President, I ask unanimous consent that the three nominations be considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

NATIONAL LABOR RELATIONS BOARD

Robert P. Hunter, of Virginia, to be a member of the National Labor Relations Board for the term of 5 years expiring August 27, 1985.

COMMUNITY SERVICES ADMINISTRATION

Clarence Eugene Hodges, of Indiana, to be an Assistant Director of the Community Services Administration.

Lawrence Y. Goldberg, of Rhode Island, to be an Assistant Director of the Community Services Administration.

Mr. BAKER. Madam President, I move to reconsider the vote by which the nominations were confirmed en bloc.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Madam President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

## LEGISLATIVE SESSION

Mr. BAKER. Madam President, I now ask that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDERS FOR WEDNESDAY

ORDER FOR THE SENATE TO RECESS UNTIL 9 A.M.

Mr. BAKER. Madam President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATORS RIEGLE AND COHEN

Mr. BAKER. Madam President, I ask unanimous consent that after the two leaders are recognized under the standing order that the Senators from Michigan (Mr. RIEGLE), and Maine (Mr. COHEN) each be recognized in that order for not to exceed 15 minutes on special orders.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Madam President, I ask unanimous consent that after the recognition of the two leaders under the standing order and the two Senators just granted special orders there be a brief period for the transaction of routine morning business to extend not past the hour of 10 a.m. in which Senators may speak for not more than 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

## LEGISLATIVE PROGRAM FOR THE NEXT SEVERAL DAYS

Mr. BAKER. As some point, Madam President, I would expect this week, perhaps tomorrow, to return to the consideration of the farm bill.

After the farm bill is concluded, it is the hope of the leadership that we may proceed to the consideration of the Department of Interior appropriation bill this week.

Following on after that, Madam President, I would hope that the O'Connor nomination to be an Associate Justice of the Supreme Court of the United States would be available so that we may proceed to the consideration of that matter in executive session on Monday next.

After the disposition of the O'Connor nomination, it is the hope of the leadership that we will be in position to proceed to the consideration of the Foreign Assistance Act.

Madam President, that is a brief vignette of the legislative schedule as I see it for the next few days.

Other matters may intervene of urgent importance. Other matters, of course, will be dealt with by unanimous consent if they are available or on short-time limitations if they are required for other measures that are not very controversial.

## INQUIRY REGARDING TIME-LIMITATION AGREEMENT ON O'CONNOR NOMINATION

Mr. BAKER. Madam President, might I inquire of the distinguished minority leader if he is in a position to agree to a unanimous-consent request in respect to a limitation of time for debate on the nomination of Sandra Day O'Connor on Monday, September 21?

Mr. ROBERT C. BYRD. Madam President, the matter is being cleared on this side of the aisle. I do not at the moment anticipate any problem, but I am not in a position at this moment to give to the distinguished majority leader an answer in the affirmative.

Mr. BAKER. I thank the minority leader. I appreciate the response and I will confer with the minority leader on tomorrow.

I have no further matters to present to the Senate, and I ask the minority leader if there is any further business he wishes to transact this evening.

Mr. ROBERT C. BYRD. Madam President, I thank the distinguished majority leader. I have none.

## PROGRAM

Mr. BAKER. Madam President, tomorrow the Senate will convene at 9 o'clock. After the recognition of the two leaders under the standing order, there will be two special orders in favor of the Senator from Michigan (Mr. RIEGLE) and the Senator from Maine (Mr. COHEN). After the recognition of the two Senators under special orders, there will be a brief period for the transaction of routine morning business not to extend beyond the hour of 10 a.m. during which Senators may speak for not more than 2 minutes each.

At 10 o'clock, after the orders previously entered, the Senate will resume consideration of the farm bill. It is my hope, Madam President, that we can complete consideration of the farm bill on tomorrow.

At the hour of 2 o'clock, under the order previously entered, a vote will occur, pursuant to the provisions of rule XXII, on the cloture motion filed to end debate on the Johnston amendment to the Department of Justice authorization bill. An order has been entered heretofore that if cloture is not invoked on tomorrow the bill will be returned to the calendar automatically.

Madam President, after the disposition of the vote on the Johnston amendment, the cloture motion vote, I hope to have a further announcement in respect to a mutually satisfactory arrangement in dealing with further consideration of the Department of Justice authorization bill.

## RECESS UNTIL 9 A.M. TOMORROW

Mr. BAKER. Madam President, I now move, in accordance with the order previously entered, that the Senate stand in recess until 9 a.m. tomorrow.

The motion was agreed to; and at 6:36 p.m. the Senate recessed until Wednesday, September 16, 1981, at 9 a.m.

## NOMINATIONS

Executive nominations received by the Senate September 15, 1981:

INTERNATIONAL ATOMIC ENERGY AGENCY

The following-named persons to be the Representative and Alternate Representatives of the United States of America to the 25th session of the General Conference of the International Atomic Energy Agency:

Representative:

W. Kenneth Davis, of California.

Alternate Representatives:

Richard T. Kennedy, of the District of Columbia.

Roger Kirk, of the District of Columbia.

Thomas M. Roberts, of Tennessee.

DEPARTMENT OF STATE

John Augustus Bohn, Jr., of California, for the rank of Ambassador, while serving as U.S. Director of the Asian Development Bank.

CORPORATION FOR PUBLIC BROADCASTING

Sonia Landau, of New York, to be a Member of the Corporation for Public Broadcasting for the remainder of the term expiring March 26, 1986, vice Melba Patillo Beals.

R. Kenneth Towery, of Texas, to be a Member of the Corporation for Public Broadcasting for the remainder of the term expiring March 26, 1986, vice Reuben W. Askanase.

## CONFIRMATIONS

Executive nominations confirmed by the Senate September 15, 1981:

NATIONAL LABOR RELATIONS BOARD

Robert P. Hunter, of Virginia, to be a Member of the National Labor Relations Board for the term of 5 years expiring August 27, 1985, vice John C. Truesdale.

COMMUNITY SERVICES ADMINISTRATION

Clarence Eugene Hodges, of Indiana, to be an Assistant Director of the Community Services Administration, vice Michael T. Blouin, resigned.

Lawrence Y. Goldberg, of Rhode Island, to be an Assistant Director of the Community Services Administration, vice Robert Stern Landmann, resigned.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

# HOUSE OF REPRESENTATIVES—*Tuesday, September 15, 1981*

The House met at 12 o'clock noon.

The Reverend David G. Buescher, Washington, D.C., offered the following prayer:

Creator of the universe, God of all peoples, Father of all nations, to You we turn again today.

Without You there can be no goodness, but with You is justice, mercy, and compassion.

Be with this House today. Let Your Spirit breathe through the minds and hearts of these women and men who ask Your guidance. We trust that Your presence is here with us, creating and recreating, holding firm and starting again, dividing and reconciling. We pray that all our consultations, deliberations, and decisions will be after the image of Your own mind and in the likeness of Your just heart. Breathe where You will here and around our world until all peoples are one in Your new nation of justice, peace, and love, forever and ever. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 366, nays 12, answered "present" 1, not voting 54, as follows:

Mr. MINISH and Mr. ECKART changed their votes from "nay" to "yea."

Mr. DYMALLY changed his vote from "present" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

## MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On July 9, 1981:

H.J. Res. 238. Joint resolution to approve a constitution for the U.S. Virgin Islands.

On July 10, 1981:

H.R. 3807. An act to make technical corrections in the Defense Officer Personnel Management Act.

On July 17, 1981:

H.R. 3520. An act to amend the Clean Air Act to provide compliance date extensions for steelmaking facilities on a case-by-case basis to facilitate modernization.

On July 27, 1981:

H.R. 31. An act to amend the Truth in Lending Act to encourage cash discounts, and for other purposes.

On July 29, 1981:

H.J. Res. 308. Joint resolution making an urgent supplemental appropriation for the Department of Health and Human Services for the fiscal year ending September 30, 1981.

On August 4, 1981:

H.J. Res. 84. Joint resolution designating the week of October 4 through October 10, 1981, as "National Diabetes Week."

On August 6, 1981:

H.J. Res. 191. Joint resolution designating August 8, 1982, as "National Children's Day."

H.R. 4074. An act to revise the laws pertaining to the Maritime Administration.

On August 13, 1981:

H.R. 3982. An act to provide for reconciliation pursuant to section 301 of the first concurrent resolution on the budget for the fiscal year 1982; and

H.R. 4242. An act to amend the Internal Revenue Code of 1954 to encourage economic growth through reduction of the tax rates for individual taxpayers, acceleration of capital cost recovery of investment in plant, equipment, and real property, and incentives for savings, and for other purposes.

On August 14, 1981:

H.J. Res. 141. Joint resolution authorizing and requesting the President to issue a proclamation designating the period from October 4, 1981, through October 10, 1981, as "National Schoolbus Safety Week."

H.R. 1100. An act to amend title 38, United States Code, to improve certain benefit programs of the Veterans' Administration for veterans who are former prisoners of war, and for other purposes.

## MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments a joint resolution of the House of the following title:

H.J. Res. 223. Joint resolution to provide for the awarding of a special gold medal to Fred Waring.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1181. An act to amend titles 10 and 37, United States Code, to increase the pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes.

## REV. DAVID G. BUESCHER

(Mr. VOLKMER asked and was given permission to address the House for 1 minute.)

Mr. VOLKMER. Mr. Speaker, I am pleased to welcome to the Halls of Congress a personal friend, the Reverend David Buescher, who is currently living in Washington, D.C., but is a native of Missouri and former resident of Hannibal, Mo., my hometown.

Father Buescher, a longtime friend is currently attending Catholic University in Washington studying for his doctorate in theology. He is originally from Washington, Mo., having attended college at Cardinal Glennon College in St. Louis and then received his M.A. degree from Catholic University in Washington D.C., in 1971. Father Buescher was assigned in my hometown of Hannibal, Mo., from 1971 to 1977. During his years in Hannibal, Father Buescher showed great dedication in the teaching of young men for the priesthood at St. Thomas Seminary, and served my parish as a part-time assistant.

Again, Father David, I welcome you.

## PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the bill on the Private Calendar.

## REMEDIOS R. ALCUDIA, CHRISTOPHER, EZRA, VERMILLION, AND PERISTELLO ALCUDIA

The Clerk called the bill (H.R. 1547) for the relief of Remedios R. Alcudia, Christopher, Ezra, Vermillion, and Peristello Alcudia.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER. This concludes the call of the Private Calendar.

## PERMISSION FOR COMMITTEE ON RULES TO FILE CERTAIN PRIVILEGED REPORTS

Mr. BOLLING. Mr. Speaker, first I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain privileged reports.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

## THE LATE CHARLES SHELDON

(Mr. BOLLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOLLING. Mr. Speaker, one of the finest of all public servants died last Friday morning. I went to his memorial service today at Fort Myer.

I wish to announce to the House that I intend to ask unanimous consent for a special order on the 29th of September, if the House meets on that day, in order to extoll the virtues of a fine public servant, Charles Sheldon, of the Congressional Research Service.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

## PERMISSION FOR SUBCOMMITTEE ON ENERGY RESEARCH AND PRODUCTION OF THE COMMITTEE ON SCIENCE AND TECHNOLOGY TO SIT TODAY DURING 5-MINUTE RULE

Mrs. BOUQUARD. Mr. Speaker, I ask unanimous consent that the Subcommittee on Energy Research and Production of the Committee on Science and Technology be permitted to sit while the House is meeting under the 5-minute rule.

The purpose of this meeting is to take testimony from witnesses on the Price-Anderson Act. There will be no votes and no markup of legislation. This request has been cleared with the minority.

The SPEAKER. Is there objection to the request of the gentlewoman from Tennessee?

There was no objection.

## DISCHARGE OF COMMITTEE ON FOREIGN AFFAIRS FROM FURTHER CONSIDERATION OF EXECUTIVE COMMUNICATION NO. 2019 AND RE-REFERRAL TO COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs be discharged from the further consideration of executive communication No. 2019 and that it be re-referred to the Committee on Public Works and Transportation.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

## MAKING IN ORDER ON TOMORROW OR ANY DAY THEREAFTER CONSIDERATION OF HOUSE JOINT RESOLUTION 325, CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1982

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that it be in order on tomorrow, or any day thereafter, to consider in the House, House Joint Resolution 325, making continuing appropriations for fiscal year 1982 for a 1-month period.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. WALKER. Mr. Speaker, reserving the right to object, I reserve the right to object to ask the chairman of the committee a couple of questions with regard to the continuing resolution.

I simply ask the chairman of the Appropriations Committee the nature of the continuing resolution. Are the figures that are within the continuing resolution going to stay below the budget figures previously passed by this House?

Mr. WHITTEN. If the gentleman will yield, they are. May I point out, certain other facts that might be of interest, too. The resolution has a duration of 1 month. As the gentleman knows, unless we do get the regular appropriations bills signed by the 1st of October, under an opinion of the Attorney General, Government activities must cease.

This resolution is cosponsored by the gentleman from Massachusetts, (Mr. CONTE) and myself. The bill covers 8 of the 13 appropriations bills. The five bills that we have not included in this resolution we passed in July prior to the August recess.

Hopefully we will get those bills accepted by the Senate and signed by the President. The rates contained in this resolution are restrictive and the concept is based on the traditional continuing resolution used each year before the Budget Act was fully implemented. The rates are based on where the individual bills are at midnight on September 30. So it is altogether in line with what is going on at the present time in an effort to hold spending down and provide for the orderly operations of Government that might otherwise be jeopardized with this October 1 date.

Mr. WALKER. Further reserving the right to object, as I understand, the continuing resolution would not mandate any spending which would go over and above what is in the budget language.

Mr. WHITTEN. That is correct.

Mr. WALKER. Further reserving the right to object, I would ask the distinguished chairman of the Appropriations Committee whether or not the restrictive amendments that are in a number of appropriations bills that are now a part of law would be protected under the continuing resolution.

Mr. WHITTEN. It continues exactly as it is for the 30-day period.

Mr. WALKER. I thank the gentleman very much.

Further reserving the right to object, I would yield to the gentleman from Massachusetts (Mr. CONTE) for the figures that are within the continuing appropriation with regard to spending levels.

Mr. CONTE. Under section 101(a) of the continuing resolution, Commerce, State, District of Columbia, HHS, Military Construction, and Transportation, if passed by the House, it will be the House or the current rate, whichever is lower. If passed by the House and the Senate, House or Senate rate, whichever is lower.

Section 101(b) will take care of Defense and Foreign Aid. That will be at the budget or the current rate, whichever is lower.

Section 101(c) is the legislative, and that will be under the House reported rate.

Not covered in the bill, as the chairman said, will be Agriculture, Energy, Water, HUD, Interior, and Treasury. They all passed before the August recess.

Mr. WALKER. Further reserving the right to object, I would ask the gentleman, since HHS is going to be a part of this particular appropriation, all of the amendments such as abortion amendments, prayer amendments, all of those things that are currently in law, would be protected under this bill; is that correct?

Mr. CONTE. Yes, because we are operating under the current level, and that language was included in last year's bill. So they would be included now.

Mr. WALKER. I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

## RETIREMENT OF WASHINGTON POST REPORTER RICHARD L. LYONS

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I want to call the attention of the House to the retirement of Washington Post reporter Richard L. Lyons after 34 years of covering the House of Representatives.

For almost 20 of these years, Dick covered all major bills which came across this floor, including the landmark civil rights bills of the mid-1960's and the Great Society measures of President Johnson.

He is known for his crisp, readable style and his ability to make even the most complex of issues understandable.

□ 1230

In recent years Dick has called upon his wide knowledge of the House and Congress to write a daily column on congressional activities which has brought to the public attention many bills, issues, and inside developments not routinely covered by the press. Dick's long journalistic career has been known for accuracy and clarity in reporting often complex events.

I know all of us want to wish him and his wife, Shirley Elder Lyons, a happy retirement in the beautiful hills of New Hampshire.

## CUT OIL PRODUCER GIFT BEFORE SOCIAL SECURITY BENEFITS

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, this morning as I watched the television news, I saw one of my Democratic colleagues leaving a meeting at the White House, and he indicated in his statement that he made for the news that we may just have to cut social security benefits. Later, a Republican leader agreed with this assessment.

Mr. Speaker, I hope that before these gentlemen quickly rush in to cut social security benefits for our senior citizens, that they will join me in supporting H.R. 4460, which has just been introduced, that will repeal the $11 billion gift we gave to oil producers in this country. Surely, we cannot equate the problems of the elderly with the increased profits of oil producers.

So, for the benefit of the public at large, I hope—and I want it clearly understood—that up to this point the Democratic Party is not advocating the cuts of benefits for those under social security today, and I hope they never will.

## LEGISLATION INTRODUCED PROVIDING FOR EXPERIMENTAL DEMONSTRATION PROJECT ON OVERSIGHT

(Mr. MOFFETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker, if we think back to our seventh and eighth grade civic textbooks, we will recall that they taught us that a good Congress is one that passes a great deal of legislation. Unfortunately, those textbooks are still teaching our children and other children that very thing. It is time that we spend more time investigating and overseeing than lawmaking. It is time we spend more time making old laws work than making new laws. I know many Members share this. The feeling comes from many Members of both parties, various ideologies.

Today, I am introducing a resolution to create an experimental demonstration project on oversight which would set a 21-day legislative moratorium at the beginning of the next year. It would be set by the Speaker for 3 consecutive weeks, during which time all legislation, markups, floor action, would be halted. The Speaker, of course, would be able to grant waivers in the event of an emergency.

If successful, I will move for a permanent change in the House rules to embody this permanently into the processes.

There has already been great interest in this resolution from Members on both sides of the aisle. I urge Members' support for it.

The SPEAKER pro tempore. (Mr. MINISH). The time of the gentleman from Connecticut has expired.

## STATUS REPORT ON SECOND BUDGET RESOLUTION

(Mr. JONES of Oklahoma asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONES of Oklahoma. Mr. Speaker, today is September 15, the day by which the Congress is supposed to have completed action on the second budget resolution. I rise to inform my colleagues as to the status of that resolution.

In August, the House Budget Committee invited the chief administration spokesmen to present their revised plans for fiscal 1982 to the committee as soon as possible in September so that we could move ahead with the resolution.

Mr. Stockman agreed to testify on September 9. Later he canceled that appearance because the administration was changing its program and asked to be rescheduled on September 14. Then he canceled that date and asked to come on the 16th.

Yesterday Mr. Stockman canceled that appearance and asked to be heard by the committee on September 22 or later. Secretary Regan and others have basically bowed to Mr. Stockman's timetable and have repeatedly asked to be rescheduled.

So at this point, the House Budget Committee anticipates that the administration will testify September 24. We hope that by that time the administration will know what its plans are for the fiscal year which begins on October 1. Until then we cannot seriously consider what actions are needed to straighten out our problems.

Obviously, the committee will be unable to conform to the timetable set by the Congressional Budget and Impoundment Control Act of 1974.

But we recognize that the financial community wants certainty and specifics on budget deficits, where revenue increases will occur if at all, what specific new spending cuts will be recommended, et cetera. The Budget Committee will be ready to hear these specifics whenever the Reagan administration is ready.

## INTEREST RATES

(Mr. McCURDY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCURDY. Mr. Speaker, the American farmer chooses his vocation knowing full well the risks involved. He knows he will always face the devastating effects of drought, animal disease, insect infestations, and any other surprises that Nature can cook up.

However, he cannot know that his own Federal Government will make his daily struggle even harder. He cannot know that an administration's almost passive approach to high interest rates will send him to town looking for another job.

We are failing the American farmer, the prime source of this country's food supply. We are allowing him to smother beneath economic conditions he has little or nothing to do with.

While high interest rates have virtually eliminated the potential for production loans for farm capital improvements, the same high interest rates have been identified as a direct cause of depressed farm commodity prices.

Not only does the farmer find money on credit scarce, but he cannot make money on the market either. Rising production costs and an inability to borrow also puts the squeeze on money available to pay off outstanding loans.

Where does the American farmer go for help? I can tell you that in my district in southwest Oklahoma, help is running out. Lately, he has been selling the family farm.

## PARTS OF TAX CUT SHOULD BE DEFERRED TO SAVE SOCIAL SECURITY

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker and my colleagues, despite the enactment of the President's economic policy, Americans persist in their preference for a balanced budget over a tax cut. Wall Street has to date refused to accept budgetary gimmickry as a substitute for a balanced budget.

The best hope for lower interest rates is to defer parts of the tax cut until the budget is balanced. The Joint Committee on Taxation and the Congressional Budget Office have projected a revenue loss through 1986 of a staggering $748.9 billion from the tax cut. By deferring parts of the tax cuts until the budget is balanced, we can quiet the efforts to cut social security.

## NATIONAL PARKS IN URBAN AREAS MUST BE SAVED

(Mr. FLORIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FLORIO. Mr. Speaker, as the chairman of a subcommittee which has jurisdiction over environmental protection issues, and as a member of the Interior Committee, the policies that have been pursued by the Interior Secretary James Watt have been of deep concern to me. The Secretary's actions have the potential to cause irrevocable harm to our precious natural treasures.

Our Nation's wilderness areas, parks, and refuges ought to be managed to protect the qualities and purposes for which they were expressly created. Instead, it appears that the Secretary intends to overemphasize short-term economic goals.

He has not attempted to achieve a realistic balance between the need for conservation and energy exploration and development. Our natural resources need to be managed so that they can produce public benefits over a long period of time.

I have received numerous letters from constituents who are appalled by the Secretary's actions. They feel that his imposition of a complete moratorium on the acquisition of additional national parkland, and his actions to expedite oil and gas development on refuge lands, for example, will inevitably result in the degradation of our natural heritage. He does not appear to be guided by the spirit and intent of the laws governing our wilderness areas.

As the Representative of one of the most densely populated States in the United States, I am particularly concerned about the Secretary's proposal that Congress deauthorize certain national parks in urban areas. He has proposed that State and local governments be charged with the management of the parks in metropolitan areas. As you are all aware, the national park idea was brought to our urban areas for the express purpose of bringing the parks to the people. Visitation to the national parks has increased dramatically over the past decade.

The Secretary has proposed to deauthorize the Gateway National Park. The Gateway National Park, a 26,000-acre recreation area which stretches across the entrance of the New York Harbor from Sandy Hook, N.J., to Jamaica Bay in Queens, has over 10 million visitors per year.

According to State and local political leaders, as well as officials of the park itself, it will be virtually impossible for New York State, New Jersey, and New York City to assume the park's $8.4 million annual operating costs. The $300 million, 20-year development plan that was approved 2 years ago will be impossible to implement. In essence, the Secretary will force New Jersey and New York residents to either assume more costs or see vital services deteriorate.

I pledge to work on behalf of our national parks. Let us remember that historically this has not been a partisan issue.

## THE ADMINISTRATION MADE A COMMITMENT TO OUR SENIOR CITIZENS

(Mr. MICA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICA. Mr. Speaker, last night I was in my district in Florida in a meeting of senior citizens when someone rushed in and said, "They have just reported on the news that the President will cut social security."

There was alarm, there was anger, and there was fear. I thought it was interesting because so many of the seniors thought that they had a commitment from this administration not to cut social security.

Now, I would be the first to say that we need to stabilize that system. We need to make adjustments, but it is up to this body, the Congress, to make known the commitment that we will

not cut social security, to take away that fear, and remind the administration that the American public did agree, when the President said to the air traffic controllers, "You signed a commitment, you must live up to your commitment."

We in the Government made a commitment to our senior citizens. We must live up to that commitment. It is that kind of response the American public wants to see.

## CONGRESS MUST HAVE COURAGE TO TREAT SUGAR INDUSTRY FAIRLY

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, when the 1981 farm bill comes to the floor of the House, we in this body are going to have to make some very tough decisions. We are going to have to decide whether or not we have the courage to treat the sugar industry fairly.

Sugar is, whether some of us like it or not, a major U.S. agricultural crop. In fact, it ranks fifth in the number of tons produced. Sugar is the cheapest source of food energy; sugar is the most efficient producer of calories per acre of any crop in the United States.

The sugar industry employs over 100,000 Americans; the domestic industry contributes over $3 billion to the GNP and pays over $600 million annually in taxes.

In spite of the fact that sugar is a major U.S. agricultural crop, the United States is the only major sugar-producing nation in the world that has no sugar legislation. The sad fact of the matter is that sugar is an orphan in our agricultural family. It is time that we correct this wrong and begin to treat the sugar industry fairly.

While there are those who say that the sugar provisions in the farm bill will cost the American consumer $2.2 billion annually, the facts of this case tell a different story. And, the facts are very simple: the nonrecourse loan provisions for sugar will not cost the people the billions of dollars often cited by opponents of sugar legislation. Nor will these provisions burden the Government with more debt. Properly administered, this loan program will keep farms from going out of business when the price of sugar drops through the floor. This loan program will guarantee that we have a vital and healthy domestic sugar industry. It is simply a price stabilization program. There are no quotas. There are no set-aside programs. There are no Government payments under the sugar provisions of the farm bill.

Sugar has never cost the Government the money some claim it has. In 1977 and 1978, we did have a limited loan program for sugar. Minor forfeitures did take place. And price recoveries since 1979 and 1980 have allowed the Government to sell the forfeited sugar at a net profit of $67 million. Sugar has made money for the Government, not lost it. And anyone who maintains the contrary simply does not have the facts.

## DEFENSE DEPARTMENT IS NOT A POOR RELATIVE

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SEIBERLING. Mr. Speaker, yesterday's Washington Post quotes President Reagan as defending his proposal to cut only $2 billion from the fiscal year 1982 defense budget while cutting $15 billion or more from social and human needs by saying that "defense has been a poor relative" in recent years.

This statement aroused my curiosity, to put it mildly, so I asked my staff to get me the figures on military spending outlays in each of the post-Vietnam years, 1974 through 1982. Those figures, supplied by Congressional Research Service, add up to an astounding $1,610 billion in budget authority and $1,460 billion in outlays for the 9-year period. In this same 9-year period, defense outlays took an average of 25 percent of the total Federal budget, and they took between 5 and 6 percent of the entire GNP in each of those years.

If those huge expenditures made the Defense Department a poor relative, it is only in comparison with the even larger sums that the President proposes to spend on the military, which in the next 5 years alone would double the military spending of the last 9 years. Some poverty.

□ 1245

## SPECIAL INTERESTS PARTICIPATE TOO HEAVILY IN TAX CUT

(Mr. WEISS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, it is obvious that the Reagan administration's game plan for reviving the economy by increasing defense expenditures, cutting taxes, and balancing the budget simply is not working. What I find remarkable in all of this is that the President is making recommendations for tinkering with his game plan in all respects except one.

He complained when he signed the tax bill that the Congress gave him more than he wanted, and yet nowhere do we hear President Reagan now saying that the tax cut was too large.

Let us now take back some of that special-interest giveaway that the Congress adopted at the end of July at the President's urging. That $746 billion tax cut, the bulk of it going to the special interests, is what has caused the havoc in the Nation's economy.

Mr. Speaker, now is the time, if the Republican administration really wants to balance its budget, to take some of those revenues back. If not, then all their claims about wanting to balance the budget are a sham and a charade.

## PARRIS FIGHTS TO REMOVE PAY CAP FOR SENIOR FEDERAL EMPLOYEES

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, yesterday I testified before the Senate Governmental Affairs Civil Service Subcommittee on the critical problem of the pay cap on the salaries of our senior career employees.

Since 1979, the salaries of our top Government officials have been frozen creating a situation where executives in the top seven civil service categories are now getting the same pay. The resulting low employee morale and lack of incentive is having a devastating impact on the Federal Government.

Firms in the private sector can offer three times the salary Federal employees are receiving and these firms do not have to invest in costly training programs. Within the last 3 years, retirement of the highest ranking employees, aged 55 to 59, has risen from 18.2 to 95 percent. Executive turnover has increased at such an alarming rate that 9 out of 10 top career officials are retiring as soon as they become eligible.

Due to the pay cap, our Government is no longer able to retain its top people or attract qualified people from the private sector to fill vacancies in the top ranks.

The cap on senior salaries is having an impact on the lower ranks of civil servants as well. Since our top people have very little mobility, transfers are refused that would otherwise move top people to where they are needed the most. This lack of mobility, in addition to low morale and lack of incentives, has produced a situation where our best young executives, aged 35 to 45, are among the most likely to resign.

I strongly urge my colleagues to act now in the interest of effective Government and remove the cap on executive salaries at the earliest possible date.

## OIL PRICE DECONTROL VINDICATED, SAYS OHIO PAPER

(Mr. BROWN of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BROWN of Ohio. Mr. Speaker, the day after the Soviet Union doubled its price for domestic gasoline by

executive order, I am pleased to share an editorial from this morning's Columbus Citizen-Journal, a Scripps-Howard newspaper, which recognizes the wisdom of U.S. oil price decontrol. Entitled "Decontrol Gains," it reads:

Remember the handwringing when the Reagan administration announced the end of oil price controls last January?

Doomsayers predicted the oil companies would rob consumers blind, the economy would suffer another debilitating round of inflation and the whole thing would have little effect on oil exploration or oil imports.

They were wrong on all counts. After an initial round of increases, gasoline prices are back about where they were. The inflation rate is slower this year. Oil exploration has accelerated sharply. Oil imports are down 20 percent.

It's a good example of marketplace efficiency.

As a member of the Energy and Commerce Committee who worked to achieve energy price decontrol in the face of some doubt and criticism, I am naturally pleased at this development and applaud President Reagan for his political courage and economic good sense.

## GIVE IT A CHANCE—IT'LL WORK

(Mr. COLEMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN. Mr. Speaker, I would like to put this whole, critical discussion of the economic recovery program on a more human level.

Let us say my cheerful Uncle Sam had been overeating, drinking too much, chain smoking, and loafing around for 25 years or so. He is obese, flabby, his heart is weak, and he is easily winded.

Then one day, say last July, the Doctor says, "Sam, you've got to shape up or die."

Uncle Sam takes the doctor's advice and signs up for physical fitness classes at the local gym. Classes start October 1.

In the meantime, Uncle Sam's neighbors are laughing at him and telling him his physical fitness program is not working. "You're still fat and out of shape," they say.

But, Uncle Sam responds, "For Pete's sake, the program hasn't even started yet. Besides, it took me 25 years to get this way. It'll take awhile to get back in shape."

Mr. Speaker, I believe this analogy sums up the lack of understanding and critical reviews that have been heaped upon the budget cuts and tax cuts passed by this Congress earlier this year. Yes, interest rates are still high, we are still fat and flabby.

But, as Uncle Sam told his scornful neighbors, "For Pete's sake, the program hasn't even started yet."

What we have done thus far is the equivalent of Uncle Sam signing up for the physical fitness class which doesn't start until October 1, the start of the new fiscal year when portions of the tax cuts and other programs take effect.

## FORD MUSEUM DEDICATION CLIMAXES GRAND RAPIDS CELEBRATION

(Mr. SAWYER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. SAWYER. Mr. Speaker, I rise in great pride concerning the core city of my district, Grand Rapids, Mich., a city of about a 200,000 population, with a metropolitan area population of 375,000 or 400,000.

This week Grand Rapids embarked on a so-called Celebration on the Grand, the Grand River running right through the city. There will be the dedication of the Jerry Ford Museum, climaxing a full week's activities.

We are going to have the President there. We will have the President, the past President, Mr. Ford, the Vice President, the Speaker of the House, and we will have the majority leader of the Senate. Many others, including many celebrities from other countries will also be there—Giscard d'Estaing, Pierre Trudeau, the Premier of Canada, Lopez Portillo, President of Mexico, and others. It is going to be a great celebration.

This is the third time this city has been designated an "All-American City." This entire program has been accomplished by all the various local units getting together—organized labor, management, downtown committees, and so forth. Right now we have $250 million worth of construction going on in the downtown city.

Mr. Speaker, we have through private cooperative efforts done much to lick the big city problems, and the bigger cities could well take a look at Grand Rapids.

## BIG GOVERNMENT RESPONSIBLE FOR HIGH INTEREST RATES

(Mr. COLLINS of Texas asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. COLLINS of Texas. Mr. Speaker, the people at home are very much concerned about America's 21-percent interest rate. That is their prime concern, a 21-percent interest rate.

Here in the House we know what causes it. Last year the Democrats who controlled the House passed a budget that totaled $634 billion. Right now we are talking about a $725 billion budget just 1 year later.

Congress is overspending, and continues its overspending. Let me tell the Members how it works out. Every week the Government spends $8 billion to finance the debt and pay the interest. Every week it also takes $16 billion to operate the Government. That means that the Federal Government every week takes $24 billion out of the economy. So when the hard-pressed private sector goes into the money market for its operating funds, private business has to pay 21 percent interest.

Mr. Speaker, Congress has simply got to cut its spending.

## SOUTH AFRICA RUGBY TEAM SHOULD NOT PLAY

(Mr. GRAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRAY. Mr. Speaker, today I have introduced a resolution which expresses the sense of this body that the national rugby team of South Africa should not play in this country.

I ask my colleagues in this body to join me in this expression of outrage at the viciousness of South African apartheid. We must send a message to the world that we in the United States clearly understand that apartheid is a political frankenstein created by a deranged society that nurtures racial hatred as part of its national consciousness. We must not throw open our doors to those who would represent fascism.

Some might respond by saying that politics should be kept out of sports. But I note, Mr. Speaker, that the Springboks is the national team of South Africa, and that the South African sports council is a quasi-governmental body.

And let me quickly remind this body, that on January 24, 1980, by a vote of 386 to 12, this House voted to withdraw American participation from the summer Olympics in response to the Russian invasion of Afghanistan.

It also should be noted that in less than 3 years, the Olympics will be convened in the United States in Los Angeles. It would be a shame and a national embarrassment if we gave the Olympics and half the world did not come.

## NEW BOOK RELEASE BRINGS SUBJECT OF GAS WARFARE TO THE FOREFRONT

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, there is a nightmarish story that has played across the wire services in this city and at the U.N. over the last 3 days that I think should have the total attention of every Member of this House and the other body and every staffer interested in humanity. A book will soon be published called "Yellow Rain." The subject is toxic chemical weapons and the use of poison gas against innocent tribal people by the Soviet military. We have some familiarity with poison gas in my own family because my father was gassed several times in

World War I and received two Purple Hearts for injuries sustained. It is not a terror weapon of the past.

It appears we now have proof of poison gas being used in Afghanistan, Cambodia, and in Laos against the Muong people, the Meo tribesmen. There are reports in this book also about the use of gas in the Yemen Civil War of 1967 where leftists united with the Egyptians and Russians to tear apart a small nation on the Arabian Peninsula.

There is a great historical misconception in our country that poison gas was not used in World War II. Incorrect. The Fascists under Mussolini used gas to kill in Ethiopia, and Adolf Hitler used "Cyclone B" gas to kill a large percentage of the 6,000,000 Jews who were murdered in Europe.

Mr. Speaker, I think if there is any truth or substance to Secretary Alexander Haig's press conference on Soviet use of toxic poisons then it should be the major issue before our Committee on Foreign Affairs. I urge my colleagues to sign a letter urging our distinguished chairman, the gentleman from Wisconsin (Mr. ZABLOCKI), to hold extensive hearings as soon as possible on this affront to civilization and human decency.

## QUARTERLY REPORT ON EAST-WEST TRADE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore (Mr. MINISH) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means:

*To the Congress of the United States:*

In accordance with Section 411(c) of the Trade Act of 1974, as amended (19 U.S.C. 2441), I herewith transmit the quarterly report on East-West Trade covering the first quarter of 1981.

The report discusses United States trade relations with the Soviet Union, the People's Republic of China and the Eastern European countries.

RONALD REAGAN.

THE WHITE HOUSE, *September 15, 1981.*

## AUTHORIZING A BUST OR STATUE OF MARTIN LUTHER KING, JR., TO BE PLACED IN THE CAPITOL

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the unfinished business is the question of suspending the rules and agreeing to the concurrent resolution (H. Con. Res. 153) on which further proceedings were postponed on Monday, September 14, 1981.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. HAWKINS) that the House suspend the rules and agree to the concurrent resolution, (H. Con. Res. 153) on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 386, nays 16, not voting 31, as follows:

[Roll No. 202]

Mr. Nelson with Mr. Rhodes.
Mr. Leland with Mr. Kogovsek.

Mr. MARLENEE changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. KOGOVSEK. Mr. Speaker, on rollcall No. 202, the vote on the motion to suspend the rules and agree to House Concurrent Resolution 153, authorizing the Martin Luther King, Jr., statue for the U.S. Capitol, I was necessarily off the House floor. I support this legislation, and had I been here, I would have voted "yea."

PERSONAL EXPLANATION

Mr. BOWEN. Mr. Speaker, on rollcall No. 202, the vote on the motion to suspend the rules and agree to House Concurrent Resolution 153, authorizing a bust or statue of Martin Luther King, Jr., to be placed in the Capitol, I was meeting with a group of constituents at a place in the Capitol where I could not hear the bells announcing the vote and I could not be present in the Chamber. Had I been present, I would have voted "yea."

□ 1315

CONFERENCE REPORT ON H.R. 4034, HOUSING AND URBAN DEVELOPMENT—INDEPENDENT AGENCIES APPROPRIATION ACT, 1982

Mr. BOLAND. Mr. Speaker, pursuant to the order of the House of September 10, 1981, I call up the conference report on the bill (H.R. 4034) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of September 11, 1981.)

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. BOLAND) will be recognized for 30 minutes, and the gentleman from New York (Mr. GREEN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Speaker, I yield such time as he may consume to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, I am pleased with the agreement reached by the House and Senate on the HUD-independent agencies appropriations for fiscal year 1982. The conference agreement is about $2.5 billion below the budget estimate and about $2 billion below the amount which was passed by the House. I am particularly pleased with that portion of the HUD bill pertaining to the funding level for the Veterans' Administration. I want to commend my colleague, the very able chairman of the full committee, Mr. WHITTEN, the distinguished ranking minority member of the full committee, Mr. CONTE, the very distinguished chairman of the subcommittee, Mr. BOLAND, and the able ranking minority member of the subcommittee, the gentleman from New York, Mr. GREEN. All of the conferees are to be commended for their quick action in resolving the differences between the House and Senate and their commitment to provide an adequate level of benefits and services for our Nation's veterans.

Mr. Speaker, I am especially pleased with the agreement reached with the other body pertaining to the veterans' hospital and health care program. I note that the conference agreement has restored approximately $330,054,000 and 5,181 staff years of the budget reductions proposed by the President in his budget request of March 10.

This restoration carries out the recommendations of the Committee on Veterans' Affairs and is consistent with the agreement reached with the administration under Gramm-Latta.

The conference agreement provides $1,716,000 to treat 200 additional patients in community nursing homes.

The Appropriations Committees have taken note of the critical nursing shortage in VA hospitals and have included $4 million for the implementation of the Roberts' scholarship program signed into law last year. Approximately 800 to 1,000 beds are now closed in VA hospitals because of a lack of nurses.

The conference agreement denied $4,692,000 for the construction and operation of garage and parking facilities. It should be noted however, that in denying this request, the conferees agreed that the Veterans' Administration should continue to fund such maintenance, construction, and operational expenses from existing resources. If the deletion of the $4,692,000 from the conference agreement adversely impacts on the agency in any way in the construction of garages and parking facilities, the Administrator can request the funds in a future supplemental appropriation request.

Finally, Mr. Speaker, I must comment on one item of the conference agreement that is of particular concern to me. A few weeks ago the House and Senate Committees on Veterans' Affairs worked out their differences on the cost savings related to veterans' benefits and services as contained in H.R. 3982, the Omnibus Budget Reconciliation Act of 1981. The two committees agreed to the cuts in the amount proposed in the reconciliation instructions totaling $110 million in budget authority in fiscal year 1982. Although our committee had recommended that both flight training and correspondence training under the GI bill be terminated effective October 1, 1981, in working out our differences with the other body it was agreed that the correspondence training program would be continued and that the allowance to be paid after September 30 would be reduced from 70 percent to 55 percent of the established charge which the institution requires nonveterans to pay for the course being taken. This notwithstanding, the conference agreement now before us purports to reduce the readjustment benefit account by an amount produced by elimination of all new GI bill enrollments in correspondence training after September 30th.

Mr. Speaker, although I personally supported the administration's recommendation to terminate both the flight and correspondence training programs, I do not support the action taken by the conferees on the HUD-Independent Agencies bill that would seem to ignore the decision made by the authorizing committees on this issue. Section 1786 of title 38, United States Code, clearly establishes that any eligible veteran "who enters into an enrollment agreement to pursue a program of education exclusively by correspondence shall be paid an educational assistance allowance computed at the rate of 55 percent of the established charge which the institution requires nonveterans to pay for the course or courses pursued by the eligible veteran. * * *." Section 1652(a)(1) clearly establishes the eligibility criteria for such veteran to be paid for education programs pursued under chapters 34 and 36. Section 1661(a) of title 38, United States Code, states that such veteran "shall be entitled" to education assistance for a specified period of time up to 45 months.

Mr. Speaker, the reason I cite these provisions of law is to alert my colleagues to the fact that the education benefit paid for veterans enrolled in a correspondence training program is an entitlement under title 38. It is not discretionary, as are some other VA programs. If a veteran meets the eligibility requirements regarding service under these provisions of law, and enters into an enrollment agreement with a school to pursue a program of education through correspondence training, the Administrator must pay an educational assistance allowance not to exceed the rate established by law.

As I stated, Mr. Speaker, although I may personally prefer to see the correspondence training terminated, if such program is to be terminated, it should be done only in legislation under the

jurisdiction of the authorizing committees. It is not a function of the Appropriations Committees or appropriations bills to seek to terminate entitlements by withholding funds.

I realize the appropriations bill, as passed by the House on July 21, included an amount for readjustment benefits that assumed the termination of both programs. However, at that time, the House action was consistent with, and seemed to be taken in contemplation of, ultimate enactment of the provisions contained in the reconciliation bill previously passed by the House on June 26 proposing the termination of both programs. This was changed in conference. We reached agreement with the other body on this after many hours of negotiations.

Mr. Speaker, in my view, the agency will be facing a number of law suits under this provision of the conference agreement if the Veterans' Administration refuses to make payments for the pursuit of flight and correspondence training under the provisions of title 38 and the Reconciliation Act because the agency considers appropriations not to be available. So long as a veteran meets the criteria for eligibility established by law, payments must be made by the Administrator. Perhaps the Appropriations Committees may be able to bring about the repeal of an entitlement in an appropriation measure if the legislative language used is clear and unequivocal and makes reference to the provision sought to be repealed in direct and unambiguous fashion. But that is certainly not the case here.

Thus, in my view, Mr. Speaker, when the veteran pursues, through the courts, his or her right to benefits based on a clear entitlement in title 38, not repealed directly or indirectly, the courts will direct that payment be made. Legislated entitlements cannot be repealed by indirection or imprecise riders suggesting that the funds were not appropriated by the Congress for a vaguely defined purpose. Discretionary programs may be curtailed or even terminated when the appropriations are not made. Entitlements are another matter. Unless clearly and expressly contradicted by another law later enacted, statutory entitlements must be paid based on terms established for such payments by the authorizing laws.

As I have indicated previously, although I personally feel the GI bill correspondence training program should be terminated, the Veterans' Affairs Committee and the Congress in Public Law 97-35 enacted just last month, in working out our differences in the reconciliation process, decided not to take such action. I regret the Appropriations Committees have decided not to honor that reconciliation agreement.

Mr. Speaker, I hope this agreement will be quickly acted on by the other body so it can be submitted to the President. There is some indication that some administration officials may recommend a veto of the bill. I certainly hope not. According to the Congressional Budget Office, the agreement we are considering today is about $2.6 billion below the budget estimate. It is about $2 billion below the bill that passed the House on July 21. It will provide an adequate level of benefits and services for our Nation's veterans, and their dependents, and I shall strongly recommend to the President that he sign it.

I urge my colleagues to adopt the conference agreement.

Mr. BOLAND. Mr. Speaker, I yield such time as he may consume to the gentleman from Arkansas (Mr. HAMMERSCHMIDT).

Mr. HAMMERSCHMIDT. Mr. Speaker, I want to associate myself with the remarks of the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. Speaker, I rise in support of the conference agreement on the HUD-independent agencies appropriations for fiscal year 1982.

I compliment the conferees for bringing to the House an agreement with the other body that is approximately $2 billion below the amount which originally passed the House. I want to acknowledge the outstanding work of the chairman of the subcommittee, Mr. BOLAND, and the distinguished ranking minority member, Mr. GREEN, of New York.

I am especially pleased with that portion of the conference agreement that pertains to veterans benefits and services for the next fiscal year. The conference agreement includes approximately $330 million in outlays to restore a proposed cut of 5,181 staff years for personnel in the Veterans' Administration's hospital and medical care program. You will recall, Mr. Speaker, that this amount was contained in the so-called Gramm-Latta amendment to the first concurrent budget resolution adopted by the House. This restoration of funds supports the recommendation of the Committee on Veterans' Affairs and is consistent with the first concurrent budget resolution adopted by the House.

Mr. Speaker, the Veterans' Administration medical program cannot afford a reduction of more than 5,000 personnel and I am glad that the House and Senate conferees have agreed to restore the funds so that this reduction will not take place.

As the distinguished chairman of the Committee on Veterans' Affairs has indicated in his remarks, more than 800 beds and the VA hospitals have been closed because of a shortage of nurses. The conference agreement contains $4 million to be used for the implementation of the scholarship program which our committee initiated and which the President signed into law last year. With this $4 million, the Veterans' Administration should be able to make commitments for at least 500 nurses who would be obligated to provide 1 year of service for each year of nursing school attended through the scholarship program. This is the best way we can eventually solve the long-range problem of a shortage of nurses which exists not only in VA hospitals but the private sector as well.

I am very pleased that adequate funds have been included in the conference agreement to take care of additional patients in community nursing homes. The conference agreement provides $1,716,000 to take care of an additional 200 patients who cannot receive treatment in VA nursing homes but may be taken care of through private community nursing facilities.

Mr. Speaker, I certainly support the President in his efforts to reduce spending, and I am very pleased to take note of the fact that the conferees in the House and Senate in resolving differences on this particular bill, are proposing a reduction of approximately $2 billion from the amount approved by the House on June 26, 1981. This is a substantial reduction and I am very much in favor of the savings that have resulted from the conference with the other body.

I am convinced that if the agreement we are considering is enacted, veterans will continue to receive an adequate level of monetary benefits for disabilities incurred in service and will be assured that their medical needs will be met by a competent medical staff who operate our 172 hospitals.

I urge the adoption of the conference agreement.

Mr. BOLAND. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, I would like to give my support to final passage of the conference report of H.R. 4034, making appropriations for the Department of Housing and Urban Development and Independent Agencies. In particular, I would like to commend the committee for its support shown in the appropriations approved for the Veterans' Administration for fiscal year 1982.

As a member of the House Committee on Veterans' Affairs, I know our Nation's 30 million veterans, and those I represent in the State of Pennsylvania, can look to the coming fiscal year with the assurance that the Congress, at least, has understood their needs.

Earlier this year, in March, I received word of OMB's intention to cut approximately $600 million from the fiscal year 1982 Veterans' Administration budget. The scope of these budget reductions could have had a disastrous effect on the VA's ability to maintain basic health care and benefit delivery systems.

Since that time, it has been very clear that the House of Representatives has taken the offensive in restoring balance to the veterans budget,

not only through the House Committee on Veterans' Affairs but through the House Budget Committee and the House Appropriations Committee as well.

Significantly, the conference report targets restored and vital appropriations to the VA medical system. The bill reinstates the 5,181 VA personnel staff years which had been targeted for elimination by the administration last March. Because of this appropriation, these needed personnel will continue to fill positions mandated, in part, by the Congress, within the VA Department of Medicine and Surgery and benefit delivery systems.

Every estimate before the House Committee on Veterans' Affairs indicates that the health care needs of our Nation's veterans are expanding at an alarming rate. In less than 10 years, more than one-half of the U.S. male population over 65 years of age will be veterans. In 15 years, demand on the VA medical system is expected to triple, primarily to meet the needs of this aging veteran population.

Recognizing this need, H.R. 4034 provides funds for augmenting nursing care and extended care services for veterans. It also allows the Veterans' Administration to care for an additional 200 veterans in community nursing homes. The bill calls for $151 million to fund the valuable and award winning VA medical and prosthetic research program which is the heart of a quality, integrated medical system. The conference report would also, for the first time, appropriate $4 million to fund the nurse scholarship program approved by the Congress last year and authorized by the Veterans' Administration. Facing a chronic shortage of nurses, the VA, through implementation of this program can begin to build a steady pool of well-trained nursing staff.

H.R. 4034 targets very specific assistance to the Veterans' Administration to maintain the quality and quantity of VA health care services during the coming year. By maintaining adequate staff and funding levels we can begin to insure that the VA will not fall behind the projected curve of veterans health care delivery.

Mr. Speaker, after this conference report is approved, I understand that the administration still might not agree with the appropriations totals called for in this legislation. I would certainly hope that the continuing commitment demonstrated for the American veteran in this legislation today, could be honored, in full, not only in this appropriations bill, but in years to come.

I would like to thank the members of the Appropriations Committee, and my colleague EDDIE BOLAND and his conference committee, for their hard work on this legislation. I know they have the appreciation of all the members of the House Committee on Veterans' Affairs, but more importantly, they will continue to have the thanks of the American veteran.

Mr. BOLAND. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. GONZALEZ).

Mr. GONZALEZ. Mr. Speaker, I rise in support of the conference agreement on H.R. 4034, the HUD-independent agencies appropriation bill for fiscal year 1982.

I would like to take this opportunity to congratulate Chairman BOLAND and the other members of the HUD-Independent Agencies Subcommittee on the fine job that has been done under particularly difficult circumstances.

This administration has shown a clear lack of regard for the housing needs of this country in establishing its budget priorities. Within the severe cuts imposed on the housing programs by the Gramm-Latta budget, it has been the very difficult task of the authorizing and appropriating committees of this Congress to allocate these limited resources in a manner which best addresses the needs of low-income persons.

I am particularly pleased to note the Committee's action with respect to public housing operating subsidies. The conference report does not include the Senate provision which would have shifted development funds provided in 1982 into operating subsidies. In its place, the conferees have provided an additional $148 million for operating subsidies for fiscal year 1981. As a result, many PHA's which otherwise would have been in severe financial straits will be made whole, at least for the present time. The members of the committee should be commended in providing these additional funds, in light of the administration's refusal to recognize the grave financial problems facing PHA's, especially where energy costs are concerned. The public housing program represents a valuable Federal resource. We as a nation simply cannot afford to sit back and let existing public housing projects decay due to a lack of funds. The future cost of such inaction would be much greater than the funds we are presently providing.

I do, however, regret that the committee did not see fit to provide the full authorization level of $1.5 billion for operating subsidies for 1982, and has instead provided the amount of $1.2 billion requested by the administration. I do note, though, that the conferees have indicated in the statement of managers language that the House committee will begin a comprehensive review of the operating subsidy issue, and that it will sympathetically consider whether additional resources are required, based on the results of this survey. I urge the chairman and members of the committee not to delay in exploring this critical issue, and I commend the chairman for his continued interest in and support of the public housing program.

I also wish to commend the gentleman from Massachusetts for his perseverence with respect to the Senate amendment to limit subsidy payments on vacant section 8 units to 30 days. I had brought to the attention of the distinguished chairman in a letter dated August 3 the fact that this amendment was originally part of the omnibus reconciliation bill. In the reconciliation conference, it was agreed with full concurrence by the House and Senate conferees that this amendment would be dropped. It was felt that there was insufficient evidence as to whether the current law had ever been abused, and what the impact of changing it would be. It was agreed to have the HUD Secretary report back to the Congress on these two issues so that legislative action could be taken at a future time if necessary. That this very same Senate amendment was included in the Senate appropriations bill was a clear disregard of that agreement. I wish to thank Chairman BOLAND and the other House conferees for holding firm in supporting the approach that was ratified by the budget reconciliation conferees.

I urge my colleagues to join with me in supporting this conference agreement.

Mr. BOLAND. I thank the gentleman for his contribution.

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. I thank the gentleman for yielding.

Mr. Speaker, I also support this report. I am most pleased—and I am glad to announce to my brethren—that the Veterans' Administration has finally come to its senses and has decided to establish a national cemetery at Fort Mitchell in Alabama, one of the most beautiful sites available, and free of charge to the U.S. Government. So now that they have come to their senses, I support this great effort.

Mr. BOLAND. I thought the gentleman was going to say Fort Mitchell in California.

Mr. DANIELSON. No. Fort Mitchell in Alabama. It is a most beautiful site, and I am reserving a site with a view for myself.

Mr. BOLAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, We bring back to the House today the conference report on the 1982 HUD-independent agencies appropriation bill. Mr. Speaker, this

has been an extraordinary year for the budget process. I cannot recall a time when our work in this House has had a more profound effect on how the Government spends the taxpayer's money.

Clearly, from the beginning, this has been a different year. The President came to the Congress in March and presented a revised budget which drastically reduced the request of the former administration. The HUD bill was no exception to those reductions. In fact, in terms of budget authority, the January request for the agencies in this bill was $80 billion. The March request reduced that total by $17 billion to $63 billion.

By any standards—that is a dramatic reduction. Now where does this conference report come out against the President's revised budget? In total, the 1982 HUD-independent agencies appropriation bill is $2,558,482,000 below the budget request.

The bill is also well within the section 302 allocation to the subcommittee. In fact, on the basis of that allocation we are $3,715,000,000 below the total allocation.

And finally Mr. Speaker, and I want everyone here to understand this, the conference agreement is under the amounts authorized in the omnibus reconciliation bill by approximately $400 million.

So the facts are clear. In terms of budget authority, the 1982 HUD bill meets the test of the President's own budget request.

It meets the test of the section 302 allocation from the Budget Committee.

And it meets the test of the omnibus reconciliation bill.

But even in the face of this rather remarkable agreement—which incidentally I think the members of the HUD subcommittee can be very proud of—I have heard rumors that the President may veto this bill.

Why? Well—to tell you the truth—I am not sure why. We keep hearing that the President is going to look very carefully at the outlay impact of the various appropriation bills. So now let us talk about where the HUD bill stands in relation to outlays.

Let me first talk about the revised budget. The conference agreement is approximately $373 million above the budget request for 1982 outlays. So the bill is over the President's request in terms of outlays.

But here is the important point. What causes that? The answer is simple. The largest part of the $373 billion is represented by an increase of nearly $300 million in outlays for the medical care programs of the Veterans' Administration.

The President's revised March budget proposed cutting 5,181 staff years and $330 million from the 172 hospitals operated by the VA. Anyone who has been through a veterans hospital—anyone who has taken the time to go out on the surgical wards—anyone who looks in some detail at the operation of these hospitals—will quickly come to the conclusion that the VA cannot take a 5,181 staff-year cut. The fact is that the VA hospital system today is suffering from the most critical shortage of nurses in its history.

It was my view and it was the view of the subcommittee that we had to restore the funding for veterans medical care programs. And that is the reason—the principal reason—that this bill is over the President's request in terms of outlays.

Now when we took this bill to the floor on July 21 we got a letter from the Director of the Office of Management and Budget—who in my view is one of the more capable members to have served in this body. We got a letter from David Stockman complaining about a number of areas in the bill as reported by the committee. I think it is instructive and it is important to point out the fact that in that letter Mr. Stockman did not raise the issue—did not ask us to retreat—and did not indicate we were off base in adding $300 million back to the VA medical programs.

So the bottom line is this—we are over the President's budget in outlays for 1982—but we are over because we have had the compassion to add money where we felt it was absolutely necessary.

I am talking about those 172 VA hospitals—and a problem with shortages of nurses and doctors and lab technicians and radiologists. Without those skilled people, this Nation's veterans cannot get adequate medical care.

I cannot believe that the President would veto this bill on the basis that we are above the budget request for outlays—when he knows and when everyone here should understand that the principal reason we are over is to protect the VA medical programs.

During the Veterans' Administration's fiscal year 1982 appropriations hearings, we had extensive discussions regarding the compensation, pension and education (C.P. & E.) target system. We are pleased that the VA has worked out all of the initial technical difficulties and has the system completely operational nationwide. The Department of Veterans Benefits has achieved all of the 1,414 FTEE savings on the originally projected dates with a life cycle net savings of over $200 million.

We understand that due to continuing extension and enhancement to the system that the supporting hardware resources are reaching capacity limits. The committee would be willing to entertain an appropriate reprograming request for additional target computer hardware resources if substantiated by the VA for sound reasons.

Mr. Speaker, I think this is an excellent bill. We have made some deep cuts in this bill. We are only providing 147,000 subsidized housing units in 1982. That compares with the President's own budget request of 175,000 units and it compares with a 1981 level of 210,000 units—after the rescission cut more than 45,000 units from the original 1981 appropriation.

We have provided the President's request for the community development block grants and urban development action grants programs. Taken together these total $4.166 billion. Also, I think the subcommittee can take some pride in the fact that it maintained the urban development action grant program as a separate budget activity.

We are within the amounts authorized for the National Consumer Cooperative Bank in the Omnibus Reconciliation Act. In fact we are $9 million under the amount authorized for the bank.

We are within the amounts authorized in the Omnibus Reconciliation Act for the Solar Energy and Energy Conservation Bank. In fact we cut that authorization in half and have provided only $25 million of the $50 million authorized.

We are under the President's request for the operating programs of the Environmental Protection Agency.

We have provided the President's budget request for the Consumer Product Safety Commission—which represents a 33-percent cut in that agency.

We are under the President's request for the programs of the Federal Emergency Management Agency by $12.5 million.

And finally, Mr. Speaker, we have made a small addition above the budget of only $37 million for the programs of the National Science Foundation. That adds back only 11 percent of a $300 million cut in the March budget.

And we have added back a token amount of $70 million of a more than $600 million reduction proposed for the National Aeronautics and Space Administration.

So, Mr. Speaker, when you get to the bottom line, I believe this conference agreement is responsible.

It meets the test of the President's budget cutbacks.

It meets the test of the section 302 allocation to the subcommittee.

And it also meets the test of insuring that we do not neglect taking care of our veterans.

Mr. Speaker, I will include with my remarks a table on each item, a comparison with 1981, and the action of both Houses.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

[Fiscal years]

| | New budget authority | | | | | Conference compared with— | | | |
|---|---|---|---|---|---|---|---|---|---|
| | Enacted, 1981 | Estimates, 1982 [1] | House, 1982 | Senate, 1982 | Conference, 1982 | Enacted, 1981 | Estimate, 1982 | House bill | Senate bill |

[1] Reflects all March 1981 budget.
[2] Included for comparability only.
[3] Includes estimates of $84,705,000 not considered by House.
[4] Includes estimates of $40,953,000 not considered by House.
[5] Includes $100,000,000 requested in H. Doc. 97–42.

Mr. GREEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join the distinguished chairman of the HUD-Independent Agencies Appropriations Subcommittee in urging passage of the conference report.

As the distinguished chairman has said, we have come in well under our section 302 subcommittee allocation. We have come in way under where we were last year in this appropriation bill. I think we have really taken a very, very hard line, in terms of spending in this bill. I think that everyone in the House should understand that.

Now, it is true that the administration does have a complaint on the outlays that will be engendered as a result of this bill. But I have to say that I find the administration's analysis, at least as we know it today, to be on very shaky ground. I see it counting as outlays programs which the HUD staff tells me will not get started for most of the year. I see it counting outlays based on previous years' appropriations which obviously we cannot affect by this bill. And, frankly, it has been very difficult to work with the agencies involved and get good outlay numbers.

Before this bill came on the floor for final passage and before we went to conference, I asked the HUD budget staff how much in the way of outlays one particular program that HUD manages would cause in fiscal year 1982 as a result of the appropriation we had in this bill. And in the course of a single day, I got three different numbers back from the HUD staff. I was told $5 million, then I was told $10 million, and then I was told $65 million. Obviously, if the HUD budget office has that loose control on what the outlays are going to be from one program, it is very difficult for us in this House to estimate outlays accurately.

All I can say is that I concur in this statement of our distinguished chairman of the subcommittee. After all, OMB has a good deal of capacity to control the release of funds and to slow down outlays—but if those outlays are in the magnitude that the administration suggests, our distinguished chairman is quite correct in saying that that comes because of what we did in connection with the Veterans' Administration and our decision that we could not see a further deterioration in the quality of care in the VA hospitals and our funding for VA medical personnel.

So I do urge all of my colleagues to support the Appropriations Committee and the subcommittee in going with this bill.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. GREEN. I yield to the gentleman from Mississippi.

Mr. LOTT. I thank the gentleman for yielding.

Mr. Speaker, I would like to ask just a couple of questions, but I would like to preface those by stating that I appreciate the job, also, that the chairman and the ranking minority member on the subcommittee have done. It is always difficult to try to bring our appropriation bills when they involve HUD and independent agencies into line where we would like for them to be.

But let me ask the gentleman a series of questions, if I could. No. 1, I believe I am correct that this is the first appropriations report that we have had before the House this year that has gone through the whole process, except for the conference report approval; is that correct?

Mr. GREEN. Other than the supplemental earlier in the year, that is correct.

Mr. LOTT. And it is a fact that it is over the President's fiscal year 1982 budget in outlays. Now, we might say it is this amount or that amount, but it is in fact, I think all would agree, over what has been requested; is that correct?

Mr. GREEN. I have some trouble giving the gentleman an answer on that point because, frankly, it is very hard to pin them down as to what the outlays are going to be, and there is a good deal of discretion at OMB in terms of the time of release of the funds, which in turn determines outlays.

As I said, before we had the debate on final passage of this bill, I asked the HUD budget office to give me a number of what outlays would be engendered by the HUD section 8 existing housing program and, of course, one day I got three different numbers, $5 million, $10 million, $65 million.

To some degree that is quite controllable by OMB, depending on when they release the funds to the area offices, when the area offices advertise for proposals from the various housing authorities, and so on.

So a good deal of that number is very much within the control of the administration, particularly the HUD funds on no year funds, and they can control when those outlays come. So I do not think anyone can give the gentleman an easy answer.

□ 1330

Mr. LOTT. My understanding is clearly we might argue over the exact amount but that it is over in outlays what the President asked for.

I would like to follow up on one other point the gentleman made. The gentleman mentioned that really it was only applicable to the veterans' programs. I think in fact there are a number of programs that are over and I think I see them listed there, including, just as one example, the Consumer Co-op Bank and some other

areas where clearly additional savings could have been made and where clearly they are over what the administration requested; is that correct?

Mr. GREEN. If I may reclaim my time, I would simply say to the gentleman that the largest part by far is the Veterans' Administration spending. There are disputes as to some of the other figures. The administration is claiming $95 million, which the subcommittee believes is actually the result of previous appropriations bills and not related to this bill whatsoever.

The administration claims a $140 million expenditure for the temporary mortgage assistance program which we do not think is going to happen because of the delays in HUD in getting the program going.

So, I think the gentleman is right about the Co-op Bank, but that was included in the reconciliation bill, so that is something that this House has already approved in the authorizing legislation. And, as I would point out, we are well under the section 302 allocation that this subcommittee got.

So what we are getting down to is the very fuzzy numbers on actual outlays. Those are very difficult numbers on which to pin down the administration.

Mr. LOTT. If the gentleman will yield further, I appreciate the gentleman answering those questions, but I do want to urge my colleagues on both sides of the aisle to look very carefully at this conference report and the questions that are being raised here now and will in the future be raised, perhaps by the administration, and that the Members weigh very carefully their vote.

I think in view of the allegations, and I think they are correct, that it is over in outlays, this Member will have to vote "no" and I believe we will be hearing more from the administration in that regard.

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. GREEN. I yield to the gentleman from Massachusetts.

Mr. BOLAND. I thank the gentleman for yielding. I do not think anybody can disagree with the statement of the gentleman from Mississippi. This bill is over in outlays. The question is how much is it over in outlays?

The administration sent up a paper—I think most Members have the paper—indicating that this bill is over in outlays by $620 million. That is not quite accurate. In the scorekeeping to come to that particular figure, the administration has figured in, No. 1, $95 million that occurs as a result of the 1981 supplemental appropriations and rescission bill. I do not know of any bill that has ever included that kind of a figure in the current appropriations bill. I think it is wrong to include it. It ought not to be in there. But it is in there.

Another item that is included is $140 million for the temporary mortgage assistance payments program. That $140 million payment will not occur, cannot occur. No regulations have been established so far. The target date for the Department establishing the regulations was September 1. That date has passed. There is not a chance in the world of a dime being paid out under the temporary mortgage assistance program until very late in fiscal year 1982, if at all.

Yes, there is money in here for the National Consumers Cooperative Bank. There is something like $28 million in outlays over the budget. They object. They object to that $28 million. They object to it today, but that objection was not raised when the reconciliation bill was being considered. The administration, agreed, as the gentleman from Ohio (Mr. WYLIE), who championed this particular program, and the gentleman from Connecticut (Mr. MCKINNEY) indicated during consideration of the Omnibus Reconciliation Act. The Office of Management and Budget agreed it would permit the National Consumers Cooperative Bank to be part of the reconciliation bill and so it was. In a letter to the chairman dated September 11, Mr. Stockman did not object to funding the bank. Now there seems to be some objection. Included in the $620 million that the administration believes the bill is over in outlays, is $292 million for the Veterans' Administration.

There is no objection, there was no objection on the part of the administration at the time this bill was brought to the floor with the increase in the Veterans' Administration.

Now they have objected to the bill as being $620 million over in outlays. My understanding is that as of this moment they do not have any objection to the amount that was increased in the VA budget by this Congress. So the $620 million figure is a mirage and it is not a correct figure.

Mr. GREEN. Mr. Speaker, I now yield such time as he may consume to the gentleman from Michigan (Mr. DUNN).

Mr. DUNN. Mr. Speaker, I intend to vote for the conference report on the HUD and independent agencies appropriations bill. This decision is made in spite of the additional cuts in funding by conferees for the National Science Foundation. The House Committee on Science and Technology, of which I am a member, after much deliberation, reported out an authorization figure of $1.16 million for NSF. I strongly supported this level because I believe that the broad impact of NSF science, engineering, and social science research and education programs in our economy and strategic interest is great in comparison to this relatively small part of the budget.

The House in consideration of its version of the appropriations bill, again with my support, defeated a proposal to bring the NSF figure down to the level recommended by the administration. Now, in compromise with the other body, we are asked to cut another $32 million from that already passed by the House, and I fear that if this report is not accepted, this cut will go deeper.

I commend the House conferees for managing to retain as much as they did for the NSF. Although I would prefer to see higher funding for some NSF programs, to avoid further reductions I will vote to accept this report.

Mr. GREEN. Mr. Speaker, I think it shows something of the difficulty under which this committee, this subcommittee operates, that we have now been criticized from this side of the House both for spending too much and for spending too little. I think we have done a good job and we have struck the right balance and I would urge the Members to support the bill.

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. GREEN. I yield to the gentleman from Massachusetts.

Mr. BOLAND. I thank the gentleman for yielding.

In response to the gentleman who just made some remarks with reference to the National Science Foundation, my own judgment is—it is only my own judgment—it would seem to me if this bill is vetoed, and that veto is sustained, that there will be less money in the National Science Foundation than we carry in the conference report.

Mr. GREEN. I yield such time as he may consume to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, I thank the gentleman for yielding, and as he well knows, for many years I served on the Appropriations Committee before I was elected leader on our side. I know of the diligence with which the members of the various subcommittees approach their task and doing the very best they can under whatever conditions prevail at that time. They frequently come to the floor of the House and are overturned with no more argument than there has been a change of time, a change of events and circumstances.

I do not think these are normal times, and even though I would like to commend both the chairman and ranking member for the job they have done here on this bill, a bill that under conditions of the past would be accepted, even though being somewhat over the President's budget figure, I cannot endorse the final product.

I am a little bit distressed that there is this disparity of computation between the Appropriations Committee and the Office of Management and Budget as to the difference between outlays and budget authority.

As my dear friend, the gentleman from Massachusetts indicated, it is over the President's budget in outlays. It is over by some $620 million.

Now, there is no good way under this given time and circumstances that we can accept a conference report $620

million over the President's budget in outlays and expect to get the right kind of message to the folks in the money markets that we are going to toe the mark here in the Congress.

So I have to very reluctantly tell my friends that I have to personally vote against the conference report, even though we do not have any assured signal yet that the President will definitely veto the measure, though the prospects are very good that he will. If he does, and if it is the first one and is over half a billion dollars above his budget, there is no alternative for us but to build up a sufficient number of votes in this House to sustain a veto to make absolutely sure that what the President is talking about today in holding the line will be upheld.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Illinois.

Mr. YATES. The gentleman and I served on the Appropriations Committee for many years and he knows the difficulties of the budget process. This House struggled to come forward with a budget. It approved the Gramm-Latta budget. I happened to have voted against it, but the House accepted the Gramm-Latta budget and the President signed it into law.

The level of that budget was then distributed to the various appropriations committees and under section 302 we were told that if we brought our budgets in under the levels established under that section 302 we would be complying with the Gramm-Latta.

As I understand the argument the gentleman is making, the effect of it is to say the President has the budget, the President has the say, the Congress has no say at all in how much money should be spent. We have complied with the budget that has been approved by the Congress, that has been approved by the President, by signing into law, and now the President, according to what the gentleman says, wants to throw it out the window.

Mr. MICHEL. Well, I think that is probably an exaggeration but I would remind my friend that when the President initially proposed his reductions in the budget we were talking in terms of $48 to $49 billion.

Through the process of reconciliation, we ended up with a reduction in the neighborhood of $35 billion.

Mr. YATES. Why did not the President veto it at that time?

Mr. MICHEL. There has been this margin of difference between what we agreed to in Gramm-Latta II and what the President really feels now that we have to achieve. We have got to do a better job. That is the reason I make the comments that I do today.

Mr. GREEN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from New York (Mr. GREEN).

Mr. GREEN. I do think though that the minority leader does understand the difficulty in which this places all of us. We all, through the gentleman's good offices, negotiated with the administration about funding levels for various programs and we reached agreements and we decided either to vote for or against the various pieces of the economic plan on the basis of those agreements that we reached, and now to be told that those agreements are meaningless and it is back to the drawing board and we cannot proceed on the basis of the agreement we reached, is something this Member finds very difficult to take.

Mr. MICHEL. I understand and I have read some of the gentleman's comments and they are well taken, because as he well knows, during that agonizing period in the formulation of the reconciliation process we had many hours in which we discussed specific items and we do not mean to be taking it out on any one individual or any group of individuals, but I think if we default on our responsibility of taking another look at the overall picture and what we have got to do, to reassure people that we do mean business here, I have no alternative but to do the best I can here to give the President that flexibility that if he feels compelled to veto this measure that there will be that 140-plus votes in this body, particularly that would sustain a veto if there should be one.

Mr. GREEN. If the gentleman will yield further, if I may just make one further point, I think it is plain that all during those negotiations many of us raised the question of whether funds could not be transferred out of the defense budget categories into the other budget categories.

I think we were told by the Director of the Office of Management and Budget, our former colleague, Mr. Stockman, that in essence he viewed the defense budget as a reserve against contingencies, that he recognized there would be softness there, as there were in other department requests, but that he basically has to deal with the fact there might be higher interest rates than one expected, or there might be another Mount St. Helens, that is where he had his reserve for contingencies.

I say that now those contingencies have occurred, interest rates are running higher and I think that is the place we ought to be looking now for dealing with these problems, to come back on these agreements where we reached agreement, where this committee has come in well under its section 302 allocation and say this work was all for naught and those agreements mean nothing I find very difficult.

Mr. GREEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. LATTA).

Mr. LATTA. I thank the gentleman for yielding.

I do not want to be put in the position of, "I told you so," but I did not support this bill when it passed the House initially, I thought it was too high. I think it is too high now, as pointed out by the minority leader, $620 million too high. We have 13 appropriations bills. If we just let each one slip by of $620 million, we will end up being $8 billion over the budget.

So we must hold the line.

I note you are funding the National Consumers Bank. Here is a piece of legislation that should not have been passed in the first place. It passed the House by one vote. What we do not need in this country is one more bank funded by the taxpayers.

□ 1345

Now, we do not need one more bank funded by the taxpayers of this country and since this legislation funds such a bank, we ought to vote down the supplemental and send it back to committee with instructions to "Take it out. We don't need to expend taxpayers' funds for such a bank."

Mr. BOLAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I think this has been a very interesting debate so far. I think perhaps there is less light shed upon it than the Members of the House are entitled to.

First of all, I am impressed, as I always am, by the logic of the distinguished gentleman from Ohio (Mr. LATTA), my long-time friend. As I listen to the gentleman, I am convinced that he is an advocate or a devotee of the new math. The gentleman takes $620 million and multiplies it by 13 subcommittees and comes up with $8 billion in outlays over the President's request for 1982. But the fact of the matter is, and I would hope that the Members recognize that the $620 million figure is a false figure. You cannot describe it in any other way. It is a false figure.

Now what makes up that figure of $620 million? To begin with they are charging this 1982 bill with $95 million of outlays—some of which was for veterans medical programs—which was provided for in the 1981 supplemental appropriations and rescission bill. That is a new way to scorekeep—that I have never heard of before. It is the most illogical approach possible—and it makes no sense whatsoever—because it has nothing to do with action taken on the 1982 bill.

Even if the distinguished Director of the Office of Management and Budget were still a Member of this House—and as persuasive as he always was on this floor, one of the most brilliant men we have ever had here—he would have problems with these figures. I do not recall at any time that Dave Stockman, when he was a Member of this House and was arguing about appropriations and authorizations and budget authority and outlays, I do not recall that he ever counted into any particular figure that he gave the membership of this House actions which occurred 1 year ago.

Second, the administration is claiming that we added $140 million in outlays to the 1982 bill because of our failure to approve something known as a temporary mortgage assistance payments program. I do not think that he should include $140 million for the temporary mortgage assistance program.

The request was for a $75 million limitation on the Federal Housing Administration Fund to begin this program.

Do you want me to tell you why we did not approve the $75 million limitation? The answer is easy—the Department already has had $14 million available for the past 12 months and has still not got the regulations out. And the fact is that a representative of the administration in conference last Thursday indicated that the regulations have not gone to final clearances yet. It is very unlikely that any savings through this program could occur before next August.

So that fact is that it is the administration's inability to get the regulations out that is costing them that extra $140 million in outlays—not the action of this committee.

Let me also add that in the statement of the managers we have agreed to provide that $75 million in next year's supplemental when we can be sure that the regulations are in place and the program is ready to begin.

So the $140 million of the $620 million above the budget in outlays is wrong.

Another item is the $28 million for the National Consumer Cooperative Bank. It has been the judgment of the Members of this body that we ought to have the bank.

Incidentally, this is the last year of funding for this program and we say so. Both the House and the Senate conferees have said that. There has been an indication that the Office of Management and Budget supports the bank. It said so in connection with the reconciliation bill and in a letter to the HUD conferees.

With reference to the $292 million add-on for the Veterans' Administration, the administration supported that. There was no objection on the part of OMB.

So in my judgment, and I appeal to the membership of this body, in my judgment this is one of the most fiscally responsible appropriation bills we are going to get this year. If this one is vetoed, God help the others that are coming down the road.

Mr. DICKS. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Washington.

Mr. DICKS. Mr. Speaker, I would like to ask a question of the gentleman from New York, who shares with me a concern about the waste water treatment program. I am just concerned whether the gentleman has heard from the administration. As I understand, there is a zero request for funding in the fiscal year 1982 appropriations bill. Is the administration intending at some point to send up a budget request for that item? How does this fit into the bill?

Mr. GREEN. If the gentleman will yield.

Mr. BOLAND. Yes, I yield.

Mr. GREEN. I am evidently not a spokesman for the administration, so I cannot give the gentleman an answer to that one. I do not think the situation has changed since our discussion in the Appropriations Committee itself yesterday.

I am not sure what the administration was proposing. As the gentleman knows, that item has been outside the whole budget process from day one. It was not included in the Budget Committee's proposal. It was not included in the Gramm-Latta substitute. It was not included in the reconciliation bill. It is just $2.4 billion sitting there. I hope we will have it on October 1, but I do not know.

Mr. DICKS. Well, I think Members ought to be aware of that fact, because all over this country we are going to be hearing from the municipalities who say to us, "Now, wait a minute. Are you really serious? You have cut off all money for the Environmental Protection Agency's waste water treatment plant and all the ramifications of that through construction and home building and everything else in this country?"

I am rather astonished that something has not been said by the administration about what their plans are in relationship to this very significant program.

Mr. GREEN. Mr. Speaker, if the gentleman will yield further, I think what the administration has said is that it would support a $2.4 billion appropriation so long as an authorizing bill is passed that meets certain criteria that they have.

Mr. DICKS. But they would send up a budget request for that amount so that we would not be further over the budget.

Mr. GREEN. If the gentleman will yield further, my understanding is that the March 10 budget proposal of the President did specify $2.4 billion for that purpose on that commission.

Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. STANTON).

Mr. STANTON of Ohio. Mr. Speaker, within the hour on the wire services of United Press International appeared the following statement:

The stock market, which has been under the gun for the past several months because of high interest rates, was trying to mount a rally today as banks lowered their prime lending rates. Trading was moderate. The Dow was ahead 2.66 points to 868.81. Trend setting Citibank encouraged some investors when it lowered its prime lending rate to 20 percent.

Mr. Speaker, the debate that we have heard on this HUD appropriation bill is excellent. My good friend, the gentleman from Massachusetts, in my opinion, is the most outstanding subcommittee chairman on the Appropriations Committee. He has brought into this committee a reasonable budget in reasonable time.

But Mr. Speaker, these are not reasonable times. And I incur to you the idea that the United Press International ticker tape will pick up the fact that what the White House has done, in my humble opinion, is not against the Housing and Urban Development appropriation bill, which in my understanding, as ranking Republican on the minority of the Housing Subcommittee, it is not against the Housing Subcommittee; but what it is against is the $620 million in outlays over the President's budget.

The die has been cast. It is a frustrating thing to a member of this committee, to my friend, the gentleman from Massachusetts, but it is interpreted in the marketplace, and the gentleman from Illinois makes the point, it is how our actions are interpreted that will create confidence in the President's program.

They are watching. They are going to see if we do what we said we would do when we passed the budget.

Despite the rhetoric, we might as well vote so, because either today we will vote "No," or we have got to sustain the President's veto when it comes up to it. It is that simple.

So, Mr. Speaker, I appreciate the opportunity to present my views and to congratulate the gentleman on the excellent job he has done. I am sorry that the gentleman was caught in this first appropriation bill. I say to my friend from New York and my friend from Massachusetts, you are the victims of circumstances and it should not have happened to two nice people like the two of you. However, this will assure us that all future appropriation bills do not exceed the budget.

Mr. MICHEL. Mr. Speaker, would my friend yield?

Mr. STANTON of Ohio. I would be happy to.

Mr. MICHEL. Mr. Speaker, I just want to commend the gentleman for his statement. I think there is no question we are living in a day of images and impressions. It is not so much what have we really got here, but what is it perceived to be? I think that is what the gentleman from Ohio is saying. It is perceived to be a bill that, even conceding the rescission minus $95 million, is over half a billion dollars more in outlays than what the President talked about. That is the difference and that is the thing that will be communicated, and that is why I am urging a "No" vote on the conference report.

Mr. BOLAND. Mr. Speaker, I do not think we ought to act on perceptions here. Obviously, I must be a lousy advocate and a poor persuader. I made no impression, obviously, on some on that side of the aisle with respect to the $620 million figure; but what I say is absolutely accurate.

This is a $60 billion bill. If we adjust the reasoning, and I think it ought to be adjusted, that OMB attaches to the figure of $620 million of outlays in excess of the administration for fiscal year 1982, you will arrive at an excess outlay figure of $65 million in a $60 billion bill. Taking $620 million and adjusting it by the amount of excess outlays in the Veterans' Administration and the National Consumer Cooperative Bank—which the administration does not oppose—and by the 1981 outlays and by the TMAP program results in $65 million.

Let me give you the bottom line that the distinguished minority leader would want and all of you on that side want and I want, because it reflects about what is going to happen to spending in this area in the future. Let me make one final point on outlays and then I will move the previous question.

The total outlay figure for all the outyears in this bill, and hold on to your hats, is $2,411,000,000 under the administration. Just think what we are going to do for a balanced budget in 1984, 1985, and 1986 with this bill. So by the action we are taking in this bill, we will ultimately save the Government and the taxpayers more than $2.4 billion. Now, if Wall Street gets that message today, then I presume the market will be up 5 points tomorrow.

Mr. GREEN. Mr. Speaker, I would like to make one further observation; that is, I think people ought to understand that this outlay budget authority problem is complicated in the case of the HUD appropriation, because of the fact if you try to save money in the long term, you do accelerate outlays.

In the case of the HUD budget, we have as a matter of policy, and I think this has been concurred in by the Banking Committee, been shifting the section 8 funds from the new construction and the substantial rehabilitation program, which require commitments of 20 and 30 and 40 years of budget authority but where there is no outlays because the project does not get built for 1½ or 2½ or 3½ years, we have been shifting out of that and over to the existing housing and the moderate rehabilitation program where the money comes on stream a lot faster; but in the existing housing program it only costs half the amount per unit and you are only tying up the Government for 15 years, rather than 20 or 30 or 40 years.

As we try to do this and make life easier for future Budget Directors by having less in the way of these long-term, full faith and credit obligations under the section 8 program, to some degree it is true. We have accelerated the outlays.

I think this is one case where it is well to do that, because in essence we are saving simply tens of billions of dollars in future years by making that move.

Now to attack us because the result is some acceleration of outlays, I think is penny wise and pound foolish.

Mr. BOLAND. Mr. Speaker, I rise only to commend the distinguished gentleman from New York. The gentleman is in a very difficult position, coming from a great city where they have great problems. I want to commend him for the manner in which he has served on this particular subcommittee. He has been a marvelous and magnificent member of this subcommittee and what the gentleman says about the assisted housing program is absolutely correct.

A year ago, in the Carter budget for fiscal year 1981 we had in the assisted housing program something like 255,000 units. Do you know what is carried in this bill? One hundred and forty-seven thousand units for assisted housing. Now, if that does not indicate a willingness on the part of the subcommittee, and a willingness on the part of the entire Congress, to try to control spending, I do not know what figures could be more effective.

● Mr. WALGREN. Mr. Speaker, I rise in support of the conference report on H.R. 4034, appropriations for HUD and independent agencies. I wish to take a minute to speak in support of funding for the National Science Foundation.

The conference has reported a total figure of $1,070.95 million for the Foundation. This amount, though short of the figure that my subcommittee has recommended for authorization, still provides for strengthening several programs of utmost importance to this Nation's scientific and technological needs. Here I am referring to the important programs in research instrumentation, the women and minorities in science programs, the social and economic sciences, the programs in innovation and the international activities. Unfortunately, the amount for science and engineering education, though higher than requested, is still short for what I and others perceive to be the critical science and technology issue for this country in the next decade.

I realize that Mr. BOLAND has made extraordinary efforts in producing the funding changes we have achieved. I want to thank him for that support and commend him for his efforts in providing a balanced and fair budget for the Foundation's activities.

Mr. Speaker, the House voted overwhelmingly by a vote of 264 to 152 to support strengthened funding of the Foundation's programs when H.R. 4034 was originally considered. I certainly believe that my colleagues should continue that endorsement. I strongly urge they vote for adoption of the conference report.●

● Mr. WEISS. Mr. Speaker, the HUD and related agencies 1982 conference report represents a broken promise to low- and moderate-income families in desperate need of a suitable place to live. It constitutes an assault on efforts to reduce the blight and deterioration that plagues both urban and rural communities across this Nation. And it sacrifices the health and environmental safety of our citizens for the sake of misguided budget priorities. For these reasons, I must vote against the conference report, as I did against the House appropriations bill. Given the tenuous situation surrounding this year's appropriations process, I might add that my vote in no way reflects a condonation of the administration strategy to bypass this process in order to make further cuts in the budget.

Funding levels considered today will only make a bad situation more painful for millions of families who are dwelling in substandard housing, who have been displaced, who are paying excessive rents and who are unable to find affordable and decent housing. Presently the Federal Government is the major source of funds for additional assisted housing to meet this critical need of lower income families. Their only hope for decent shelter is gravely threatened by this legislation.

With its knife falling most sharply on assisted housing, this bill severely cuts funds for additional units of section 8 and public housing. The administration proposed to drastically reduce the number of units by 34 percent from the Carter recommendation of 260,000 to a mere 175,000. Congress, however, may now outdo the President. Shamefully, this bill contains funding for only 148,000 units. To make matters worse, GNMA tandem funding is slashed; thereby limiting the availability of low-interest loans which enable developers to build low income housing.

These cuts come at a time when housing problems are at crisis levels. HUD estimates that nearly 11 million American families either live in substandard housing or spend more than 25 percent of their income on housing. In New York City alone, there are at least 35,000 families in need of this assistance; yet, tragically, the city may only receive about 7,500 units if these cuts are enacted. Clearly, the damage done by these reductions is far reaching—it means fewer housing units, higher rents across the board in the rental market, fewer jobs for construction workers and greater suffering for those in need.

Not only does this bill reduce the number of units available, it also commits a further injustice against low-income renters by raising rents for those in subsidized housing. At the administration's request, rents will be raised for most tenants from 25 percent to 30 percent of their incomes, a rent increase of 20 percent. Let us not forget that the 3.3 million families living in assisted housing are generally the poorest of the poor. The 1978 median income of families in section 8 housing was $4,330. For tenants in New York City, it has been estimated

that the average rent increase over the next 5 years would amount to $1,065. How can we expect these families to afford excessive rents and still meet other essential needs out of their nominal incomes? Raising rents would essentially defeat the purpose of the program which is to provide affordable housing for low-income residents.

Another vital program slated for virtual extinction is the section 312 rehabilitation loan fund. The appropriations bill authorizes no new funding; it forces the program to die a slow death by providing only minimal proceeds from the program's revolving loan fund. Epitomizing sound economic principles, this program stretched dwindling housing stock at a relatively modest cost. As of July, there were 15,000 requests for these funds to rehabilitate buildings in New York City. Once again in this budget process, we are closing our eyes to fiscally responsible decisions which contribute to economic revitalization as well as serve basic human needs.

The list of irresponsible and inhumane cuts in housing programs goes on and on. Each cut will create an additional burden for our distressed cities.

This unprecedented attack on urban areas does not stop with housing. No funds are provided for the municipal waste treatment grant program. The administration has refused to request any funding until certain changes, which it characterizes as reforms, are made in the program. The Water Resources Subcommittee of the House Public Works and Transportation Committee is now making a conscientious and speedy review of the program, but there is obviously no assurance that the whole reauthorization and reappropriation process will be soon completed.

As a result, the entire national effort to clean up our waterways has been left in the lurch. In my district, a plant envisioned since the 1940's and now under a Federal court's consent decree is jeopardized. Because that plant, the North River plant, is only partially built, raw sewage continues to pour into the Hudson River in our Nation's largest city.

The President's "reforms" would cut the program's authorization in half, from $5 billion to $2.4 billion a year. The appropriation would be cut from $3.5 billion in 1981 to $2.4 billion in 1982. These provisions alone, apart from other proposed changes, will make it nearly impossible for many States and localities to complete the facilities they need. Some restructuring may be needed. But the President wishes to redefine away more than two-thirds of the $90 billion Federal share of the remaining need. This is absolutely unjustifiable.

This gap in funding is a disaster. I cannot vote for a bill that treats our waters and our health as a mere detail of budgeting, to be deleted and restored when convenient. Wastewater treatment is essential for a livable society. I strenously object to its omission from this report.

Mr. BOLAND. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the yeas appeared to have it.

Mr. LOTT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 209, nays 197, not voting 27, as follows:

Mr. Ertel with Mr. Evans of Georgia.
Mr. Ottinger with Mr. Gilman.
Mr. Fuqua with Mr. Foglietta.
Mr. Long of Louisiana with Mr. Ireland.
Mr. de la Garza with Mr. Fithian.

Mr. GINN changed his vote from "yea" to "nay."

Mr. DOWDY and Mr. LENT changed their votes from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

□ 1415

AMENDMENTS IN DISAGREEMENT

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that all Senate amendments in disagreement be designated by number, considered as read, and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 4: Page 2, line 18, after "19,742,645,500" insert: ": *Provided further*, That no less than 6.3 per centum and no more than 17 per centum of the budget authority provided herein which would otherwise be used for purposes other than under sections 8 and 14 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437f and 1437l) shall be transferred from amounts which would otherwise be used for new construction other than pursuant to section 8(b)(2) of such Act (42 U.S.C. 1437f) on or prior to July 1, 1982, by the Secretary of Housing and Urban Development to Payments for Operation of Low-Income Housing Projects, and appropriations for payments to public housing agencies for operating subsidies for low-income housing projects as authorized by section 9 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437g) are increased to the extent budget authority is transferred".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 4 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ": *Provided further*, That of the budget authority provided herein, $2,354,400,000 shall be allocated for public housing new construction other than for low-income housing for Indian families".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 5: Page 4, after line 24, insert:

CONGREGATE SERVICES PROGRAM

For contracts with and payments to public housing agencies and nonprofit corporations for congregate services programs as authorized by the Congregate Housing Services Act of 1978, $10,000,000 to remain available until expended.

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 5 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS—FISCAL YEAR 1981

For an additional amount for "Payments for operation of low-income housing projects", $148,000,000, to remain available until December 31, 1981.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 13: Page 9, line 8, strike out "$3,800,000,000" and insert "$4,166,000,000".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 13 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$3,666,000,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 22: Page 19, line 4, strike out "$54,084,000" and insert "$134,789,000".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 22 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 23: Page 19, line 24, strike out "$29,010,000" and insert "$67,456,000".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 23 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert $65,456,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 28: Page 21, line 17, after "1983" insert ": *Provided*, That none of these funds shall be used to support the definition and development of techniques to analyze extraterrestrial radio signals for patterns that may be generated by intelligent sources".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 28 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 35: Page 24, line 18, strike out "$500,000" and insert "$1,500,000".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 35 and concur therein.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

## GENERAL LEAVE

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the conference report on the bill, H.R. 4034, as well as the Senate amendments reported in disagreement, and that I may include tables, charts, and other extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

## ARMED FORCES PAY ACT OF 1981

Mr. NICHOLS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3380) to increase the pay and allowances of members of the Armed Forces.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Alabama (Mr. NICHOLS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3380, with Mr. BINGHAM in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Monday, September 14, 1981, the bill had been considered as having been read and open to amendment at any point.

APPROPRIATIONS COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the Appropriations Committee amendment.

The Clerk read as follows:

Appropriations Committee amendment: On page 2, beginning at line 6, through line 11 on page 3, delete all of section 2 and insert in lieu thereof a new section 2, as follows:

PAY INCREASE OF 9.1 PER CENTUM FOR MEMBERS OF THE UNIFORMED SERVICES

SEC. 2. (a) Any adjustment required under the provisions of section 1009 of title 37, United States Code, relating to adjustments in the compensation of members of the uniformed services, that would otherwise first become effective beginning with any pay period in fiscal year 1982 shall not become effective.

(b)(1) Subject to the provisions of paragraph (2), each element of compensation specified in section 1009(a) of title 37, United States Code, shall be increased for members of the uniformed services by 9.1 per centum effective with the first pay period beginning after September 30, 1981.

(2) The President may allocate the percentage increase specified under paragraph (1) in the same manner and to the same extent the President is authorized under subsections (c) and (d) of section 1009 of title 37, United States Code, to allocate any percentage increase described in subsection (b)(3) of section 1009 of such title, except that the provisions of subsection (d)(2)(B) of such section shall not apply to this subsection or any action of the President under this subsection.

Mr. ADDABBO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD at this time. It has been printed in the RECORD previously.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

AMENDMENT OFFERED BY MR. ADDABBO AS A SUBSTITUTE FOR THE APPROPRIATIONS COMMITTEE AMENDMENT

Mr. ADDABBO. Mr. Chairman, I offer an amendment as a substitute for the Appropriations Committee amendment.

The Clerk read as follows:

Amendment offered by Mr. ADDABBO as a substitute for the Appropriations Committee Amendment: On page 2, beginning on line 6 through line 11 on page 3, delete all of section 2, and insert in lieu thereof a revised section 2, as follows:

PAY INCREASE FOR MEMBERS OF THE UNIFORMED SERVICES

SEC. 2. (a) Any adjustment required under the provisions of section 1009 of title 37, United States Code, relating to adjustments in the compensation of members of the uniformed services, that would otherwise first become effective beginning with any pay period in fiscal year 1982 shall not become effective.

(b) Effective with the first pay period after September 30, 1981, the monthly basic pay for members of the uniformed services within each pay grade, based on years of service computed under section 205 of title 37, United States Code, shall be as follows:

COMMISSIONED OFFICERS [1]

| Pay grade | 2 or less | Over 2 | Over 3 | Over 4 | Over 6 | Over 8 | Over 10 | Over 12 | Over 14 | Over 16 | Over 18 | Over 20 | Over 22 | Over 26 | Over 30 |

[1] While serving as Sergeant Major of the Army, Master Chief Petty Officer of the Navy or Coast Guard, Chief Master Sergeant of the Air Force, or Sergeant Major of the Marine Corps, basic pay for this grade is $2,633.10 regardless of cumulative years of service computed under sec. 205 of title 37 of the United States Code.

(c) If the President determines such action to be in the national interest, effective with the first pay period after September 30, 1981, he may decrease by not more than 2 percent the amount of basic pay established in subsection (b) for any pay grade based on years of service and he may apply the amounts derived from any such decreases to increase by not more than 2 percent the amount of basic pay established in subsection (b) for any pay grade based on years of service.

(d) the basic allowance for subsistence authorized enlisted members and officers by section 402 of title 37, United States Code, shall be as follows:

| | |
|---|---|
| "Officers | $94.39 per month |
| "Enlisted members when on leave or authorized to mess separately. | $4.50 per day |
| "When rations in-kind are not available. | $5.09 per day |

"When assigned to duty under emergency conditions where no messing facilities of the United States are available. $6.73 per day";

and

(e) the basic allowances for quarters authorized members of the uniformed services by section 403(a) of title 37, United States Code, shall be as follows:

| "Pay grade | Without dependents | | With dependents |
|---|---|---|---|
| | Full rate | Partial rate [1] | |
| "Commissioned officers: | | | |
| O–10 | $489.00 | $50.70 | $611.70 |
| O–9 | 489.00 | 50.70 | 611.70 |
| O–8 | 489.00 | 50.70 | 611.70 |
| O–7 | 489.00 | 50.70 | 611.70 |
| O–6 | 438.90 | 39.60 | 535.50 |

| E–1 | 117.90 | 6.90 | 205.50 |

"[1] Payable to a member without dependents who, under section 403 (b) or (c) of title 37, United States Code, is not entitled to receive a basic allowance for quarters.".

(f) Section 203(c)(1) of title 37, United States Code, authorizing the monthly pay of cadets and midshipmen is amended by striking out "$313.20" and inserting in lieu thereof "$448.80".

Mr. ADDABBO (during the reading). Mr. Chairman, I plan to explain what my amendment is designed to accomplish, and I ask unanimous consent that it be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ADDABBO. Mr. Chairman, yesterday I was fortunate to have been a guest on an hour-long national cable television program of C-Span, which is hosted by Ms. Gale Picker. Most of the questions that were asked of me concerned the military pay raise, which we have before us today. And most of the callers were career military personnel from all three services and the thing they repeated over and over again was that they deeply resented new recruits earning almost as much as they did after 10 or 12 years of service. In my viewpoint, they are absolutely right and I believe that is the best reason we need to provide pay increases to targeted groups within the Military Establishment.

Make no mistake, I believe that all members of the military require a substantial pay increase. But I am convinced that if we are to retain those men and women from those critical ranks where we are now losing experience in droves, we must provide extra incentive to these people to stay. The men and women who called yesteday made it very clear that what we do on this bill before us today will play a major role in whether they remain in military service or whether they leave if for higher paying jobs in civilian life.

Mr. Chairman, if we are going to have anything resembling military preparedness in years to come, we are going to be relying on those middle level men and women in the enlisted ranks and in those middle ranks in the officer corps to bring that about. If we desert them today, they almost certainly will desert their military careers as soon as their commitments are up. If we do not target the pay increase to those necessary skills we need to retain, then it will be us who become the eventual losers.

Mr. Chairman, as I stated earlier during general debate, I believe that this bill is basically a good bill. With only one exception it provides needed solutions to specifically defined problems. That one exception, however, is the heart of the bill—the military pay raise.

I believe there is general agreement here today that military pay may be out of line with the private sector and something must be done in the way of a catchup raise. The only disagreement is over how this catchup raise should be spread.

The approach taken by the Armed Services Committee suggests that all military personnel should receive the same 14.3-percent raise. On the surface this has the ring of fairness about it. However, a more thorough analysis shows this logic to be faulty.

When the All-Volunteer Force was established, pay levels were designed to be competitive with similar jobs in private industry. In addition, a mechanism was included to provide adjustments in pay levels for inflation. If the approach suggested by the Armed Services Committee is correct, over the last 10 years all military personnel have suffered equally at the hands of inflation. This has clearly not been the case. According to DOD's own pay adequacy study of 1979, the more experienced enlisted personnel were worse off than the more junior personnel when compared with civilian sector pay raises since 1972. Furthermore the fact that retention, not recruiting, is the biggest defense manpower problem should indicate that it is time we stopped ignoring these talented people who form the backbone of our Military Establishment.

The estimated costs of the targeted and across-the-board approaches for the 14.3-percent raise are roughly equal at $4.5 billion apiece in fiscal year 1982. You may hear some people say that the targeting approach is more costly since you do not now see the eventual increased retirement costs of $300 million. I would like to point out what these people do not tell you. For example, to replace one experienced technician the Rand Corp. estimates it takes two novices. To have two novices on hand you must recruit three people since one will drop out before he finishes training. When you work through the calculations, it is easy to show that it is cheaper to retain one skilled individual than it is to recruit and train the three replacements necessary. Moreover, who do you think can better maintain and operate sophisticated multibillion dollar weapons systems—a skilled sergeant or a new private, first class?

Briefly, my amendment would vary the pay raise from 7 to 22 percent depending upon the rank but would still average 14.3 percent. Specifically, a raw recruit would receive a raise of 7 percent, a corporal would get 14 percent, and sergeants and above would get raises ranging from 18 to 22 percent. For officers the raises would range from 9 percent for a second lieutenant to a high of 16.5 percent for majors where the greatest officer retention problem exists and then back down to 12 percent for the top brass.

I will close my comments by quoting from an official Department of Army statement of manpower and personnel issues for fiscal year 1982.

Inequities in compensation tend to frustrate the desired manning of the force * * *. At the inception of the All-Volunteer Force, pay rates for lower enlisted grades were raised disproportionately to those of careerists in order to attract volunteers * * *. A potential solution is reallocation of the annual pay adjustment for various grades * * *. The remaining alternative appears to be for Congress to appropriate funds specifically targeted on resolving pay compression.

Since DOD has not prepared a targeting plan, the Army is correct in proposing that it be done by the Congress. I urge you to support the amendment.

□ 1430

The CHAIRMAN. The time of the gentleman from New York (Mr. ADDABBO) has expired.

(On request of Mr. SKELTON, and by unanimous consent, Mr. ADDABBO was allowed to proceed for 2 additional minutes.)

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Chairman, as I understand it, the gentleman's substitute is one that targets toward the grades and not the skills; is that not correct?

Mr. ADDABBO. Except that the grades are those of the men who have the skills, so it is almost synonymous.

Mr. SKELTON. So a sergeant who happens to be a mess sergeant would receive the same as one who happens to be in a highly technical area; is that correct?

Mr. ADDABBO. That is true, but we also have provisions where there can be some further increases or bonuses

for special skills. But meanwhile those who have the training, even a mess sergeant who has specific skills as a mess sergeant, are more important than raw recruits.

Mr. SKELTON. Mr. Chairman, if the gentleman will yield further, is it not true the gentleman's substitute allows for a pay inversion in the U.S. Marine Corps so a platoon sergeant receives $140 less than a staff sergeant who works under him? Is that correct?

Mr. ADDABBO. If that is correct, then the military can correct it, because in our amendment we also permit the Pentagon leeway up to 2 percent where they can target it in situations where there may be inequities.

Mr. SKELTON. Mr. Chairman, I thank the gentleman.

Mr. NICHOLS. Mr. Chairman, I rise in strong opposition to the amendments offered by the Committee on Appropriations.

There are a number of reasons to reject these amendments, and I will summarize them here.

Any change in the compensation system must be evaluated in terms of its impact on military manpower. We do have significant problems in terms of impact on military manpower. Under the substitute offered by the Appropriations Committee, according to the Department of Defense, 10,000 fewer individuals will be recruited each year. Under both the substitute and the 14.3-percent across-the-board increase, the desired career force size will be attained in the services, even assuming the forces grow substantially in the future. However, the 14.3-percent increase does better in attracting high-quality high school graduates into the military.

The movement to an All-Volunteer Force in the early 1970's offered a commitment to maintain the pay levels established at that time relative to the pay in the private sector. The commitment was broken, Mr. Chairman, in 1975 by the pay cap. It was broken again in 1978 and again in 1979. Military pay has fallen behind since that time, and an adverse impact on force manning, both recruiting and retention, has been apparent during this period. The 14.3-percent across-the-board increase to all grades and all years of service will reaffirm this commitment.

When an enlisted man considers a career in the military, one of the factors he considers is the future increases in pay that he can expect. Inspecting the pay tables, he would observe an increase of nearly 4 percent per year as he achieves more seniority. These increases are the result of promotions and longevity changes. If he were looking at the increases he might receive in the private sector, he would observe only a 3-percent increase per year. In other words, pay increases are slightly faster for military personnel than for equally educated civilians. There is no "pay compression" that needs to be eliminated by a raise that provides greater increases for senior personnel than for junior personnel. The 14.3-percent increase maintains a slight advantage to those who join the military personnel.

The Secretary of Defense, appearing before the Armed Services Committee on June 23 of this year, stated his strong support of the pay increase provided in H.R. 3380. He has also indicated his intent to direct the newly appointed Military Manpower Task Force to look at the subject of the structure of the basic pay table and to recommend such reallocation as it may consider necessary before the final determination of the increase is implemented. An in-depth investigation is required if the modifications of the basic pay table are not to have unforeseen and adverse effects, and that investigation, Mr. Chairman, can be performed best within the Department of Defense. H.R. 3380 provides the flexibility for the results and the recommendations of the task force to be carried out.

In the early part of the August recess, I spoke on the 63d anniversary of the chemical school at Fort McClellan, Ala. After my brief remarks, the command sergeant major of the chemical school, Sgt. Maj. Donald West, a career man of many years in the military, came by to talk about the military pay raise.

I remarked to Sergeant Major West that I suspected the committee bill, which is the Senate bill, would probably do more for him, since he was an E–9, than my bill would, in all frankness. His remarks were these, Mr. Chairman:

> I understand that, but in the interest of recruiting for the future years that we so badly need in the military, I am going to support your across-the-board 14.3 percent.

Now, here is a most senior, noncommissioned officer whose experience has been lengthy and detailed in the military, and he would receive one of the largest raises under the substitute. Yet he could see the value of an across-the-board increase, and he supported the committee bill.

The CHAIRMAN. The time of the gentleman from Alabama (Mr. NICHOLS) has expired.

(By unanimous consent, Mr. NICHOLS was allowed to proceed for 1 additional minute.)

Mr. NICHOLS. Mr. Chairman, I would point out again that Sergeant West has a concern for the viability of the Army which he personally serves, and he believes an across-the-board increase is in the best interest of the Army.

Mr. Chairman, I strongly urge the Members to reject the substitute offered by the Committee on Appropriations.

Mr. MITCHELL of New York. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, we have all heard many times the old saying that "the road to hell is paved with good intentions," and I think it is appropriate here.

I am sure that the Committee on Appropriations worked very hard to help the armed services personnel secure the pay raise they so justly deserve. I think the committee should be given an E for effort. I think they really are concerned with the problem of retention of senior enlisted personnel, but I feel they went overboard in trying to resolve a problem that does not really need the attention they gave it.

The distinguished chairman of the subcommittee, my good friend, the gentleman from New York (Mr. ADDABBO), made the quote just a couple of minutes ago that new recruits are earning almost as much as oldtimers. That statement is true compared to what the situation was before the All-Volunteer Force, but it is not really true when we compare it with the civilian sector.

Before the All-Volunteer Force, there used to be a huge disparity in pay between the E–9 and E–1, perhaps as much as 9 to 1. There was a very steep pay grade differential, but since the All-Volunteer Force we have had to offer the E–1's more money to come into the service. We have had to give them more pay so that we could attract them. Now the ratio is back to 3 to 1, which is about the way it is in the civilian sector for similar levels of responsibility.

After 2 years of service, then the ratio resumes its rather sharp curve to what it used to be, which is what the gentleman was referring to.

The gentleman also mentions that General Meyer supports the Senate version. It is true that he does, but he is almost all alone in his support of it as far as our defense experts are concerned. Let me read a list of those who support the House version, the 14.3 percent, across-the-board increase. We have the Secretary of Defense, Mr. Weinberger, and, I assume, the whole administration; we have the Secretaries of each of the military services, the Chief of Naval Operations, Admiral Hayward, the Personnel Chief of the Air Force, General Osway, and we have most of the military associations, the Fleet Reserve, the National Association of Uniformed Services, the Air Force Sergeants, the Veterans of Foreign Wars, the United States Army Warrant Officers Association. All of them like the 14.3-percent across-the-board increase, even though General Meyer likes the Senate version.

The trouble with the Appropriations Committee bill or the Senate version is that there is a targeting provision, and this is the keystone of their program. This is the thrust of their bill, but it tends to create chaos and confusion and inequities.

The sad part of it is that it is not even needed to address the problem of retention. They are solving a problem

that does not exist, because our bill solves this problem. But in spending so much money and targeting so much to solve the retention problem, they create a very serious problem with recruitment. That is the other side of the scales. Retention is on one side; recruitment is on the other.

We do not need any additional targeting. Under the House bill, we permit up to 25 percent of the 14.3-percent, across-the-board pay rise to be targeted if it is needed. I seriously hope that the administration does not target $1 of it because it is not necessary, but the flexibility is there in the event we do want to do that.

Then, too, we already target about $2 billion, almost as much as this whole bill represents, for many different areas of shortages. We target for sub pay, we target for sea pay, and we target for flight pay, hazardous duty pay, and proficiency pay. We pay extra money for health professionals, nuclear qualified officers and enlisted men, and we also pay enlistment and reenlistment bonuses. We can expand this procedure if necessary. If we have shortages in certain areas, we can target further.

This is the preferred method, to target to skills, not target to grades, as the Senate version does.

Let us take a look at retention. Both bills, Mr. Chairman, solve the retention easily, with 50,000 or 80,000 people left over, in a very short period of time. It is true that the Senate version does it a little faster, maybe by 3 months, 4 months, or 5 months. As one speaker suggested, he was going to support the Senate bill because it would provide us with 4,000 more senior enlisteds the first year. That is true. It does provide 4,000 more, but it is 4,000 out of 790,000. It is less than 1 percent. It is six-tenths of 1 percent.

Mr. Chairman, to get a mere 4,000 additional out of almost 800,000, they would seriously hurt the recruitment effort. When they allocate huge sums to the senior enlisted portion of the bill, they have to take it from some place. They have to rob Peter to pay Paul. And who do they take it from? They take it from the little guy, the new guy, the junior enlisted man. In fact, they are going to take 50 percent of what they would get under the 14.3-percent-pay increase. That is 50 percent.

The CHAIRMAN. The time of the gentleman from New York (Mr. MITCHELL) has expired.

(By unanimous consent, Mr. MITCHELL of New York was allowed to proceed for 2 additional minutes.)

Mr. MITCHELL of New York. Mr. Chairman, in addition to the 50 percent that junior enlisteds would lose, we are also going to disappoint 64 percent of the people in the service because they are all going to receive less than they would under our 14.3-percent, across-the-board-pay raise. Two-thirds of the people in our armed services are going to get less then they would under our pay bill.

The CBO predicts that under the House Armed Services Committee bill all the services will meet the recruitment goals for 1982. Under the House bill everybody stays healthy. Under the Senate version, there will be 10,000 people short, and we will start down that road again of lower quality and shortages throughout the services.

Mr. Chairman, we do not need to go that route. It is far better to go with the House version and pay the 14.3-percent, across-the-board-pay raise, and it addresses the comparability problem, Mr. Chairman.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from Washington.

Mr. DICKS. Mr. Chairman, I want to say to the gentleman from New York (Mr. MITCHELL) that I appreciate his statement. There is not any member of the Committee on Armed Services for whom I have greater respect than the gentleman from New York.

I would just like to point out to the gentleman that I take a little disagreement with his point about the NCO's. General Jones testified:

> Our greatest problem has been in the retention of the professionals. These are the leaders who must insist on proper discipline, performance, and productivity.

I think it is that point that we have to focus on today. Just how many NCO's are we short?

□ 1445

In the Army we are short 8,000 NCO's in 11 fields. In the Navy we are short 21,779 petty officers. In the Marine Corps we are short 9,154 NCO's. In the Air Force we are short 18,000.

It seems to me that that is the real retention problem that we face, and that the bill provides for a targeted pay increase that addresses that problem. Also, if my colleagues are concerned about the person at the low level, the early recruit, his pay in the first year normally goes up 16 percent as he advances through the ranks.

The CHAIRMAN. The time of the gentleman from New York (Mr. MITCHELL) has expired.

(At the request of Mr. DICKS and by unanimous consent, Mr. MITCHELL of New York was allowed to proceed for 3 additional minutes.)

Mr. DICKS. If the gentleman will continue to yield, most surveys show it is not the early salary levels that attracts somebody into the service. That is not what makes his judgment. It is a question of his desire for a career and a career responsibility, educational training, things of that nature that really draw him into the military service.

So I think, and I do not say this to be argumentative, I just think our approach tackles the real problem, which is the retention of those middle managers, those NCO's that are so critical to the training and the kind of experience that the early recruit has. In fact, I think one of the reasons the early recruits get out of the service is because they do not have good supervision. This attacks the supervision problem.

Mr. MITCHELL of New York. I would agree with my friend from Washington that we do need to address this problem. But I would tell the gentleman that both bills address it almost equally well. That is a point that I have been making, that the version by the other body solves the problem about 3 months or 6 months before the House version. That 4,000 additional people at the end of the first year the gentleman is talking about is 4,000 out of almost 800,000. So it is not really terribly important.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. The figure of 4,000 out of 800,000 seems very slight. But we also know that when we lose one man we need three new recruits to take that spot because we lose so many in the reenlistments. So we are not talking about 4,000, we are talking more in the order of 12,000, plus the additional costs for training. So that must also be taken into consideration.

Mr. NICHOLS. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from Alabama (Mr. NICHOLS).

Mr. NICHOLS. I would like to respond to the allegations about the shortfalls, and they are not allegations, they are true. Certainly we have a shortfall.

But I want to point out to the distinguished gentleman that the record will show that these shortfalls came about prior to 1972, right after the Vietnam war. The military was not popular then. The 1970 and 1972 classes of enlistees that went into the military, if my colleagues will look at the record of how many of them stuck, it is a very dismal record. They left in droves as soon as they had the opportunity.

So the shortfalls, I submit to the gentleman from New York (Mr. MITCHELL) that we see now are really shortfalls that came about in 1970 and 1972 from so many of our people taking it and running when their first enlistment was up. Now 10 years later those shortfalls are still in the pipeline.

Frankly, I do not know of much that is going to cure this other than time. The records also show when a man makes 10 years in the military, 90 percent of them continue to make the other 10 for total time.

I thank the gentleman for yielding.

Mr. MITCHELL of New York. I thank the gentleman for his comments.

The CHAIRMAN. The time of the gentleman from New York has again expired.

(By unanimous consent, Mr. MITCHELL of New York was allowed to proceed for 2 additional minutes.)

Mr. MITCHELL of New York. I would like to say, Mr. Chairman, this bill addresses the comparability problem. It provides members of the armed services with pay comparable to those in the civilian sector, just as Congress promised back in 1972.

If we do not go with our bill, then we are reneging on a promise that Congress made some 9 years ago, and armed services personnel will not receive raises that were promised, raises that they want and expect and some have no doubt spent. With the House Armed Services Committee revision we can continue momentum in recruiting and retention in our armed services which began last year. We want to keep this momentum building, Mr. Chairman; it is very important.

One other factor is that our bill will save about $1 billion over a 10-year period. We know that money is getting tighter and we are all asked to make more sacrifices, so $1 billion saved is an important item. It will send a strong, clear signal too, Mr. Chairman, to all members of the armed services that, not just 30-some percent of them, but all members of the armed services, that we appreciate the sacrifices they make and we want them to continue their service to our country.

I feel sincerely that the House version is a better bill that deserves our support, and I would urge my colleagues to vote against this amendment.

Mr. PRICE. Mr. Chairman, I move to strike the requisite number of words and rise in opposition to the amendment.

Mr. Chairman I would like to urge my colleagues' support for the House Armed Services Committee's military pay bill. It is a balanced approach to the two manpower problems which have plagued us in recent years: recruitment and retention. Failure to live up to our pledge of comparability, due to repeated Presidential pay caps on military pay raises, caused a great deal of turbulence and dissatisfaction among the troops, with a resultant loss of many skilled careerists.

Congress attacked the problem head-on with a comprehensive package of compensation initiatives last year. We are seeing substantial results this year through improved retention statistics for all the services. The turnaround thus far has been quite significant; H.R. 3380 represents the final installment on restoring full comparability for the career force.

We must not overlook the other manpower problem looming on the horizon; namely, recruiting. Congress has imposed strict quality controls on new recruits in terms of both mental capability and educational attainment, and these quality restrictions are paying off. The services are working harder to recruit high school graduates. Despite their beneficial effect generally, the quality restraints are making recruiting more difficult. It is, therefore, particularly important to assure that salaries for junior enlisted people are high enough to attract the kinds of individuals we are looking for.

H.R. 3380, as reported by the Armed Services Committee, accomplishes both goals. Analyses by the Department of Defense and the Congressional Budget Office indicate that all the services will be more than able to meet their career force requirements within the next 5 years, all except the Navy by fiscal year 1982. Retention figures are most encouraging at this point. This legislation will help to assure that they remain that way. I should also emphasize that we are achieving substantial progress toward targeting more money into skill shortage areas through the additional bonuses and special pays enacted in last year's compensation package and through further initiatives included in this bill. Equally important, H.R. 3380 will provide the best chance of meeting recruiting requirements as well.

The House Armed Services Committee's bill insures that we restore comparability, which is very important to retention. It also makes certain, in today's high-cost environment, that we offer a decent wage to lower ranking personnel. It strikes a middle ground between our recruitment and retention objectives, and I urge my colleagues' strong support.

Mr. BETHUNE. Mr. Chairman, will the gentleman yield to me?

Mr. PRICE. I yield to the gentleman from Arkansas (Mr. BETHUNE).

Mr. BETHUNE. I thank the gentleman.

Mr. Chairman, September 19 will mark the anniversary of a very important date for our country, the people of Arkansas and most specifically, the people of Damascus, Ark. One year ago, a Titan II facility in Damascus was destroyed by an explosion that resulted in the death of one U.S. airman and the injury of several others.

September 19 also marks the end of a year-long process of review, of soul searching and reevaluation of the role of the Titan's safety as part of the landscape in Arkansas, Arizona, and Kansas.

From the moment I learned of the accident at Damascus, my highest priority has been to insure the safety of the civilians living near the remaining 17 Titan II sites in my congressional district. Early in the unfolding of the investigation that immediately followed the accident, I concluded that it was best to leave faultfinding and accident analysis to others better equipped for such work. I turned my attention to the business of making the system as safe as possible until the Government decides what to do with the Titans.

As you and other Members know, the Titan II system is a 17-year-old defense system. Just like a 17-year-old car or home, it requires maintenance, and it has various systems that begin to exhibit faults not previously identified. A number of system-related problems had become apparent in the Titan II's prior to the disaster at Damascus. The other accidents, however, had not shown so vividly the need for constant review of the system's safety.

Mr. Chairman, the people of Arkansas, especially those with Titan II sites literally in their backyards, are to be commended. They have always viewed their relationship to the missile system as a duty necessitated by national security. They have never complained. Even after the Damascus explosion they remain calm and collected. They are reasonable people and good Americans.

During the past year, the executive branch, through the Air Force, has worked well with Arkansans to enhance Titan II safety. Both Secretary Mark, and most recently, Secretary Orr, have visited Arkansas Titan sites and the destroyed Damascus site. We have more generals in Little Rock than you can find in the Pentagon on some days. Throughout the year, Air Force safety and community relations on the Titan issues have been greatly improved, and this has not gone unnoticed by our people.

Arkansas officials and the people near the sites all report much success in working and living with Titan facilities. State and local governmental officials have devoted a great deal of time, money, and attention to designing appropriate means for dealing with any problems at the remaining 17 facilities. They are all to be commended for their efforts.

Congress, on the other hand, has not addressed itself to the Titan question. Recently, I wrote our chairman of the Armed Services Committee and suggested that the time may now have arrived wherein it would be appropriate to have a complete House review of the role Titans play in our defense mechanism. I also suggested to the chairman that Congress needs to review the maintenance issues and safety issues associated with the existence of the system.

Out of that letter a good rapport with the committee has evolved, and for that I thank the Chairman. I would also like to thank the Chairman for his indication of intention to look closely at the Titan system after the first of the year when the Armed Services Committee reviews the authorization legislation for the Air Force.

Mr. Chairman, at this time I would like to ask the chairman of the Committee (Mr. PRICE) to join me in a colloquy about the attitude of Congress toward the safety of the Titan system and also about the compensation of

the airmen working with the hazardous fuel and oxidizer.

Mr. Chairman, until now Congress has not really had a good opportunity to tell the people of Arkansas, Arizona, or Kansas exactly how critically we view safety around Titan II installations. The assurances of the Air Force and the Department of Defense are most encouraging, but we all realize that they must act within ranges created by Congress.

Mr. Chairman, in your role as head of the Armed Services Committee, you are well aware of the nature of the Titan system and the hazards associated with a missile of this nature. Further, I understand your preference to review the system in the context of Air Force authorizing legislation.

So, Mr. Chairman, in light of all that has happened, and given the complex nature of Titan II, do you share my view that Congress should again—by the record we are writing here today—tell the American people that we are strongly dedicated to taking all steps that are necessary, or might become necessary, to insure the safety of Titan II facilities?

Mr. PRICE. I certainly share the gentleman's concern and the concern for the welfare of the people in the area he serves. He makes good, valid points in what he has said.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(At the request of Mr. BETHUNE and by unanimous consent Mr. PRICE was allowed to proceed for 5 additional minutes.)

Mr. PRICE. There is no question that the people of the Southwest, of Arkansas, Arizona, and Kansas as well as the Armed Forces personnel dealing with the Titan II system are to be commended for the service they contribute to the security of our country.

I will report that experts that the committee has been able to talk with assure us of the significant role played by the Titan system in our Nation's defense. They also assure us of the safety of the system.

But as the gentleman from Arkansas (Mr. BETHUNE) has observed, all high technology systems require maintenance and constant vigilence to insure their reliability and safety, and I share the gentleman's views that the Congress should pledge with the Air Force and others involved in the operation of this critical defense tool to assure the citizens of the country that we will do all that is necessary or might become necessary to see that the Titan system is safe and reliable.

Mr. BETHUNE. The assurances of the chairman are most welcome. I would also like to ask him and the chairman of the Subcommittee on Military Personnel and Compensation about the classification and compensation of personnel associated with the servicing of the missiles. The legislation adopted last week in the other body establishes hazardous, or incentive, pay for these Air Force personnel at $110 a month for officers and $83 a month for enlisted personnel. H.R. 3380 offers slightly lower levels. Would the chairman of the committee or the subcommittee see any reason the other body's figures could not be adopted to even better signal the intent of Congress to the Air Force that the personnel working with Titans be properly recognized for the service they provide the Nation?

Mr. NICHOLS. Mr. Chairman, will the gentleman yield to me?

Mr. PRICE. I yield to the gentleman from Alabama (Mr. NICHOLS).

Mr. NICHOLS. Mr. Chairman, let me just say briefly that the House should be able to agree in conference to a language established by the other body unless action is specifically taken by this body to prohibit such an agreement. The gentleman from Arkansas (Mr. BETHUNE) has observed we have established special pay categories in the past to signify the importance and the risks associated with this particular task.

I would also note that frequently additional pay serves to help recruit the best personnel for these major jobs. Also it builds a strong desire among those personnel to excell at the tasks they perform.

I thank the gentleman for yielding.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield to me?

Mr. PRICE. I yield to the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Chairman, I thank the gentleman for yielding and commend the gentleman for bringing this point to the attention of the House because it is so important that those people who live in danger areas around these missiles be protected.

I would point out that the GAO pointed out that 50 percent of all weapons systems failures are due to human error, many of which are traceable to shortages of skilled personnel. That is the reason for our targeting, to make sure we keep in the skilled personnel.

Again I commend the gentleman for bringing this vital problem to the attention of the Congress so that we do keep following up on the question of safety.

□ 1500

Mr. ASPIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. MITCHELL of New York. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from New York.

Mr. MITCHELL of New York. I thank the gentleman for yielding.

Mr. Chairman, I would say that the request of the gentleman from Arkansas makes good sense. He has a valid request, and I support it.

Mr. BETHUNE. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Arkansas.

Mr. BETHUNE. Mr. Chairman, I just had a few more points that I would like to make. However, the committee is fully aware of the points that I am about to make, as is the ranking minority member.

The assurances you have given are appreciated. I had intended to offer an amendment, but I believe this colloquy will suffice.

I would like to add that we all realize the hazard of duty around the missiles. But, we also know that special recognition can also help the personnel better realize Congress strong desire to see these facilities operated to perfection. In other words, we need to give them the incentive to do a good job. We have learned that serious disasters can occur, but until such time as the administration, in consultation with Congress, decides to dismantle or modify the Titan II system, we need to see that it will serve our Nation's security with the highest regard for the safety of military personnel and civilians.

I would also like to observe that Congress has a responsibility to review certain safety cost associated with Titan facilities that have come to rest on the meager treasuries of State and local governments. In Arkansas, county governments, as well as the State government, have had to expend large sums of time and money to work with Air Force personnel in the preparation of evacuation plans and in the testing of those and other warning systems.

The cost to local and State governments, like the cost the Air Force has expended, has been well worth the investment. The preparedness for a disaster is much greater today than ever before and, if in the unlikely event another disaster occurred, these governments would be better prepared. But, I hope the Committee will review this question and design some system to allow the Air Force to help meet part of these costs so that local and State governments can continue to work to insure community safety. After Damascus it was easy to understand the willingness of all involved parties to spend funds to review and plan for safety of civilians. But, time has a way of allowing our guard to drop. The Air Force should absorb out-of-pocket costs associated with local, nonmilitary development of necessary safety systems.

I hope the Air Force will review this question and report to the Armed Services Committee and the Committee on Appropriations early next year on the need for any additional authority or funds required to help local and State governments continue to cooperate in the creation of comprehensive safety mechanisms.

In conclusion, Mr. Chairman, I thank the committee leaders for their contributions today and want them and other Members of Congress to realize that no greater patriots exist

than those folks living in the shadow of our Titan defense system. But, all Americans—through this Congress—must assure our people continually that everything will be done to make the Titan II's as safe as they can possibly be.

I yield back the balance of my time.

Mr. ASPIN. Mr. Chairman, let me just make a few comments of my own about the bill and the amendment that is before the Committee here this afternoon.

I am a member of the Armed Services Committee, but I do agree with the philosophy behind the proposal of the Appropriations Committee; and I voted against the Armed Services Committee proposal in the full committee, and I am supporting the Appropriations Committee position—not because I think it is a really easy or clear cut choice, but because on reflection I think that what the Appropriations Committee is doing is the better alternative.

Leaving aside the numbers, you have got two bills here. One bill by the Appropriations Committee, which is essentially aimed at retention, is geared toward keeping people, more senior people, in the service.

The bill which comes out of the Armed Services Committee is an across-the-board pay increase, which is more geared toward recruiting people into the service, early, first-term recruitments.

Whether the numbers are exactly right or not, it is quite clear that the Armed Services Committee bill does better toward recruitment, and the Appropriations Committee bill does better toward retention.

In connection with that, I would just make the following two points: One is that, as far as recruitment goes, you can solve some of the recruitment problems by better retention. You can do it principally in the Air Force and in the Navy, not so much in the Army, but in the Air Force and in the Navy, if you retain people in for a longer time, you reduce the need for recruitment. So I think that is a point in favor of the Appropriations Committee bill.

The second point that I think is important is that the recruitment, which the Armed Services Committee addresses, is essentially a recruitment in quantity rather than in quality. I think if you look back at the history and the studies that have gone on in connection with greater pay, pay increases help to bring more recruits. They do not necessarily mean a higher quality of recruits.

So I think that what we are trying to do, or what we are going to have to do, under either proposal, is eventually face the question of what do we do about the quality of the recruiting in the Armed Forces?

I think that eventually we are going to have to go toward some of the suggestions that have been made in terms of some educational advantages or some educational breaks to people who join the military, other kinds of things, to encourage a better quality, higher mobile, upwardly mobile kind of recruit coming into the services.

So I think no matter what we do, even if we were to pass the Armed Services Committee bill, it would not take care of the kinds of problems that we are having with the early recruits in the Armed Forces.

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentlewoman from Maryland.

Mrs. HOLT. I was recently in Panama and I had the opportunity to talk with some of the retention NCO's, and they felt very strongly about service to country and really trying to keep people in. Their response to me on this question was, "Let's get the across the board." They would like to have the extra money, but they feel very, very strongly that giving that young recruit that first taste of military will go farther than anything that we can do in retaining him and then recruiting others and making it satisfactory.

How does the gentleman respond to that?

Mr. ASPIN. I think you can find all kinds of people on all sides of the issue. And if you go out and ask people in the services, as we have had people quoted back and forth, the chairman of the committee and the chairman of the Subcommittee on Appropriations have been quoting back and forth various military officers and people with experience in the field in support of both of these bills.

Mrs. HOLT. Well, the Department of Defense and the Congressional Budget Office both agree, if the gentleman will continue to yield to me, that recruiting is going to be a problem now and not retention, because we are retaining people at 90 percent now, those who are in certain skills.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ASPIN) has expired.

(On request of Mrs. HOLT and by unanimous consent, Mr. ASPIN was allowed to proceed for 1 additional minute.)

Mrs. HOLT. If the gentleman will continue to yield, how does the gentleman respond to that? We are retaining them now.

Mr. ASPIN. I understand what the gentlewoman is saying. What I am saying is that I think, for the long-term retention problems and for the long-term health of the services, the compression of those pay scales has gone too far.

We do not have enough natural rewards for people in the higher brackets than people in the lower ranks. In order to do something about that, you have got to widen it, is what essentially the Appropriations Committee is doing.

I think that there are some things, particularly in the Air Force and Navy, that there is a tradeoff between greater retention reduces the need for more recruitment. And I think it is not so true in the Army, but it is true in the Air Force and in the Navy that there is that kind of a tradeoff.

So I think you are addressing, to a certain extent, the recruitment problem in the bill that is offered by the gentleman from New York.

I think it is not an easy choice. I am not saying that all of the bill on one side of this issue is all good and the other is all bad, but only to say that, on balance, I come down on the side of the Appropriations Committee.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ASPIN) has again expired.

(On request of Mr. ADDABBO and by unanimous consent, Mr. ASPIN was allowed to proceed for 2 additional minutes.)

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from New York.

Mr. ADDABBO. I thank the gentleman for yielding.

In the testimony before our Subcommittee on Appropriations, the gentleman from Virginia asked General Meyer:

> Does that infer that housing is more important than additional pay, General?

And General Meyer's answer was this:

> It infers that for that basic soldier. In my judgment, the factors of where he lives, where he works, how he is taken care of and if he is given a meaningful job are more important than additional pay. They do not apply as much for the careerist. I think that for the careerist the two are in balance in terms of importance.

Again, just on yesterday, on a nationwide cable TV, I received over 25 calls from people in the military, throughout the country, as far west as Hawaii, saying that the most important thing for them to remain in the service is a targeted pay increase and that if they get that, they will remain; if not, the careers and the pay out in the civilian world are higher and they will leave the service. In addition to that, as I pointed out earlier, for every careerist that we lose, for every professionally trained person that we lose, we must fill that spot with two untrained people, which means that we must recruit three because of the fact that we lose so many enlistees.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of legislation increasing the pay of our dedicated men and women serving in the U.S. military service.

Although motives of patriotism and national responsibility undoubtedly characterize the entry of many of our citizens to military service, it is unreal-

istic and unfair to expect that selfless devotion to country should be relied upon to man the armed services of the free world's flagship nation. America's position as world leader in the struggle for peace and stability is too heavy a burden for us to pretend that we can play it cheap in recruiting and retaining the kind of men and women needed to make up our armed services.

First of all, as a practical matter, we should recognize that quality personnel can only be recruited and retained when incentives outweigh or, at least, equal disincentives. In an increasingly complex technological world, we need in our military services some of the best and brightest of the Nation's minds. We will not recruit those minds on the cheap.

Second, we owe our military men and women a decent living scale as a matter of the Nation's gratitude for their work and as an expression of pride in their stations. They are the defenders of the faith, the protectors of our homes, hopes, and democratic ideals. They wage peace in a divided, troublesome world. Surely, we owe these individuals a guarantee of reasonable living standards as a small expression of our thanks.

Third, as a matter of individual justice, we seek to recognize the worth and importance of the job each man and woman performs in the military service. It is easy to speak in the aggregate when we discuss military affairs and overlook the vital role each individual plays in carrying out his or her duties. The total military establishment can be only as strong as the combined spirit and ability of the individuals contributing to that establishment. The Nation needs to say to each man and woman in the military: we value your individual contribution.

Mr. Chairman, along with increased pay for our military personnel, I support the National Youth Service Act as an additional means of strengthening America's defense posture. Taken together, these actions will go a long way to restoring our preparedness for battle as the free world's prime keeper of the peace.

Mr. ASPIN. Which bill is the gentleman for?

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ASPIN) has again expired.

(On request of Mr. HUNTER and by unanimous consent, Mr. ASPIN was allowed to proceed for 2 additional minutes.)

Mr. HUNTER. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding.

Mr. Chairman, I would like to explore, briefly, the statements that have been made concerning the pay compression and the confrontation between recruitment and retention.

If you look at the facts, the senior NCO, an average senior NCO, is making about $1,600 a month. He is only going to get about an extra $68 in the variation between the two plans. The difference to the E-1, who is making around $500, is about $35.

I think the point we should look at is that that extra $35 for that guy who is only making about $500 could be the difference between being able to get affordable housing, especially in a high cost-of-living area like San Diego, between being able to buy that extra sack of groceries a month or not being able to do it. The senior NCO is making $1,600, is getting a healthy pay increase anyway. He is going to be knocking down about an extra $200. And necessarily, because he has a larger base, to start out with, when you put that 14.3-percent multiplier on it. He is going to be making about three times as much as the lower enlisted man in the pay increase.

I have had a number of forums in San Diego. We are the home of the largest naval base in the world. I find it hard to believe that an extra $60—I agree we have got to have that 14.3 percent; obviously, both bills will help retention and recruitment—is going to mean everything to the senior NCO.

Another thing that we have not addressed here is that this 14.3-percent raise is not a bonus, and it is not targeted to critical skills. It is really supposed to make up for cost-of-living raises which are generated by a high inflation rate, and that inflation rate hits that young NCO or officer harder, perhaps, than it does the senior NCO, because the young fellow has not made life's purchases, he has not gotten that education for his children, he has not purchased a house, he does not have a standard mortgage rate; his cost of living really is reflected, probably accurately, by the Consumer Price Index.

So if we are going to recognize this as being something which is supposed to make up for inflation, we have to recognize that it should be across the board.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ASPIN) has again expired.

(On request of Mr. HUNTER and by unanimous consent, Mr. ASPIN was allowed to proceed for 2 additional minutes.)

Mr. ASPIN. I would just like to respond to the point.

I think the points you are making are very valid and very important. I think that, on the other side, though, the problem is that with senior people in the military, we as taxpayers and the military as an institution have a great deal invested in them, in terms of training, in terms of schooling, and other kinds of skills that they may have acquired. The military, unlike other businesses, does not have cross-lateral transfers. You do not have a person leaving the private sector and coming into the military as a sergeant. You only get people in the higher ranks of the military by bringing them up through the lower ranks in the military.

So you have a greater investment in these people, and it is those people who have an opportunity to go out and get another job, and you find that the training we have given them, in many cases, are very valuable in the private sector. So the threat is that these people we have brought in and trained and have brought along will acquire the skills to be marketed on the outside.

I think we have to give these people more money to keep them in, to keep them attracted, and in effect to back up the investment that we have already put into them.

Mr. HUNTER. If the gentleman will yield further, I think the gentleman has just reiterated the point that our chairman made, and that is, as the gentleman says, the people that we have as senior NCO's today came up through the pipeline, and the reason we have such a crunch on our senior NCO's now is because those people who were young NCO's immediately after the Vietnam war did not stay in.

So we want to make sure that we do not do the same thing with this class as we have with the class of 13- to 30-year people now. And that includes keeping the younger people in. We have got to keep the whole pipeline healthy.

Mr. ASPIN. I agree.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Washington.

Mr. DICKS. I just want to point out that I think there was a misstatement, not intentional, but I do not think it accurately reflects history here.

These are DOD numbers on the number of NCO's who have left the service during the last 5 years before retirement eligibility excluding separations based on medical and behavioral factors.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ASPIN) has again expired.

(On request of Mr. DICKS and by unanimous consent, Mr. ASPIN was allowed to proceed for 2 additional minutes.)

Mr. DICKS. If the gentleman will yield further, these are E-5's to E-9's separating for expiration of term of service, excluding retirees.

In fiscal year 1976, the number was 53,000; in fiscal year 1977, 52,000; in fiscal year 1978, 55,000; in fiscal year 1979, 62,000; in fiscal year 1980, 63,000.

We do not have a problem based in Vietnam. We have a problem right here today that we are trying to deal with in this particular legislation, and we cannot base it on something that happened 15 years ago. This is going on today. These are the people we have an investment in. We have to retain them. And that is what we are trying to do here.

□ 1530

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Missouri.

Mr. SKELTON. I thank the gentleman for yielding.

The gentleman is familiar with the fact that the Department of Defense does estimate that the future problem of the armed services is going to be recruiting?

Mr. ASPIN. I understand.

Mr. SKELTON. And in the across-the-board pay raise that the committee has, this takes care of both of those problems, retention and the recruiting, as best we can, and one does not become a sergeant, as the gentleman has so aptly pointed out, unless one is recruited first. That is why I think the committee position is so much better.

Mr. ASPIN. If I could just address that point. The problem is I think that the evidence indicates that more money offered to early recruits increases the quantity of recruits but not necessarily the quality, and I think that it is a problem that we are going to have to address no matter which one of these bills passes today.

Mr. SKELTON. If I may interrupt, this Congress has done that. This Congress, regarding the Army, has decreed as to the quality the percentage of what may be in the category, the percentage of what may be high school graduates. We have already done that; so consequently let us get at the business at hand and go in and try to keep the recruits coming in.

Mr. ASPIN. But not so simple because what happens is that we can pass those kinds of quotas and those kinds of standards saying so many CAT 4's, so many CAT 3's. Unless they come in through the door, what are you going to do? We have to increase the attractiveness for people who are high school graduates, who are category one. That means, I think, educational benefits and other things that are not part of this bill.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

I think there have been a couple of points that perhaps have been overlooked in this debate which we ought to reemphasize, and that is that I do not believe that the statistics will indicate that the loss in terms of petty officers and noncommissioned officers, the so-called trained experts who are getting out, was primarily on account of pay.

In fact, the gentleman from Washington just indicated the numbers who were getting out even before they could qualify for retirement, and anybody who throws away a retirement in the military certainly either is not interested in money or else he does not know how to add.

The fact of the matter is that all of the evidence indicates that the senior noncommissioned officers who have been getting out have been getting out because this is not the kind of disciplined military force that they grew up in and that they were comfortable in serving with and they have been protesting, not against the pay scales, but against the way that we are operating.

Instead of discipline, we have encounter sessions and things of that kind, and that is the sort of thing that top, hard trained experienced top sergeants and petty officers and long-term chiefs in the Navy are not likely to put up with, and we can pay them anything we want to and they are not going to stay in there.

I think this is something that has been totally overlooked.

The other thing that I would like to suggest is that we ought also to remember that in the military the traditional arrangement for pay has been that everybody proceeds pretty much on the same basis. I do not think that the fact that we are going to pay the E-1's the same percentage increase as the E-9's means that we are wasting money on the initial recruits. It means that we are carrying on an arrangement where everybody can expect to get the same break.

If we do not give the 4.8-percent increase to our staffs when it comes through on the first of October, we are not going to have those members who do not get the increase very happy. I think we have got to recognize that the increase that we are giving here has got to be given to everybody if we are going to have an Army and Navy and a military where there is not going to be any odious comparisons in salary with two people doing the same job along side of each other.

Mr. HUNTER. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding.

I commend the gentleman for his statement and I would like to point out that the sea pay pay rates have been increased. In 1980 they were increased for an E-4 with 3 years of duty from about $125 to $160 per month. Submarine pay was increased. Reenlist bonus authority was expanded.

I think one point that has to be made extremely clear, this is not a bonus, this is a pay raise, and another point I think which has been missed by some of our Members is that this raise, the proposed targeting by the Appropriations Committee, is not targeted to skills. It is targeted only to grades.

Mr. STRATTON. I think the gentleman is making a very good point because we have been adding bonuses and bonuses on top of bonuses. We have been trying to give bonuses to the nuclear navy to get them to stay in. Even those bonuses have not helped.

In terms of providing for the senior people and for the skilled people, we have been doing very well. But money is not the thing that keeps somebody in the nuclear submarine services.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from New York.

Mr. ADDABBO. I thank the gentleman for yielding.

I am happy the gentleman brought up the question of discipline. I think the targeting, as we proposed in the appropriations, will meet that question, because many of the officers we have spoken to, and many telephone calls I received on yesterday, the officers have not been given the recognition of their skills. They have not been given the recognition which they have earned. And by targeting, the Congress recognizes those men who have made a career and want to make a career and will stay in if they are given that recognition. And the targeting gives them that recognition.

Mr. STRATTON. I think this targeting is going to work just as well as targeting when you fail to give any of your employees the 4.8 pay raise.

Mr. DICKINSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take this opportunity to speak against the amendment, not because I do not think a raise is needed, but I think that we are looking at two sides of a problem, and I would like to put it in perspective as I see it.

As has been pointed out, Mr. Chairman, we have two big problems in the military. One is in recruitment—getting them in the services—but the other problem and, in my opinion, the most important problem, is in keeping the people in the service once they enter.

We talk about recruitment. We talk about possibly going to a draft. How do we get the people into the services?

The fact is that we can offer inducements to get the young people to come in. We have seen this work in the past, and we are working on inducements now.

But when that midcareer person, that guy with 8, 10, or 12 years in, and he is making up his mind is this what he is going to do for the rest of his life—is he going to make a commitment after he gets over the halfway mark and say, "I might as well go on and finish out the 20-year tour." When that midcareer guy, the E-7, E-8, E-9, or whatever, when he decides to go out the gate for good—and this is true of officers also—whether he is a captain, a major, lieutenant colonel, maybe an airplane pilot, maybe he has some other skill, when he goes out the gate for good, he not only takes that warm body, so to speak, and creates that vacancy, he takes with him hundreds of thousands of dollars' worth of training that the Government has in-

vested in him. He takes his skills and expertise, and he takes those that the Government has paid for to train, and he takes those on the marketplace, and quite often they can find them.

Then you not only have to recruit someone or induce them into the services to fill that slot that has been vacated, you have got to spend the same number of years and the same hundreds of thousands of dollars to train that new person just to get him where the E-7 or E-8 was when he went out the gate.

So you have wasted all the time and all the money. That is why it is so important for us today to recognize what we are doing, what it is we are attempting to accomplish, and why we are offering this comparability in income for our servicemen, whether they be enlisted or officers.

There are two ways to go about it. One is as our House committee did, chaired by my good friend, the gentleman from Alabama (Mr. NICHOLS). They give an across-the-board 14.3-pay increase with the flexibility to the Secretary of Defense to say, "Mr. Secretary, of this raise, you can take 25 percent of it and you can slew it, skew it, you can aim it where you, the military, see the need."

The alternative is to do what has been in the other body, and which I understand by the amendment, is being attempted, to say now we are going to decide what is best for you in the military, and we are going to decide where these weighted factors should go. So that—according to the amendment—the recruit would get a 7-percent increase. But if he goes all the way up to the E-7, he would get an 18-percent increase.

But we are letting the author of the amendment, or the Senate, if their amendment is ultimately adopted, make the decision for the Secretary of Defense. And they will say where the needs are and what can be paid.

By the House amendment, by the House bill that we are discussing and debating here today, and as has been explained by our chairman, we are saying that we are going to give an across-the-board raise of 14.3 percent which will really give them comparability with their civilian counterparts, and give the Secretary of Defense the authority, based on his expertise and his military people and the recommendations of the service Secretaries, and the people who have to live in uniform, let them recognize the need and let them target then where a portion of the raise that we are giving will go.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON. I yield to the gentleman from Washington.

Mr. DICKS. I thank the gentleman for yielding.

Is it not true that last year when the committee did an outstanding job of passing a pay raise, that they allowed 25 percent of that pay raise could be targeted, and the Secretary of Defense, both in this administration and the prior administration——

The CHAIRMAN. The time of the gentleman from Alabama (Mr. DICKINSON) has expired.

(At the request of Mr. DICKS and by unanimous consent, Mr. DICKINSON was allowed to proceed for 2 additional minutes.)

Mr. DICKS. If the gentleman will yield further, the administration refused to target even $1 of that pay increase and, therefore, has ignored the flexibility that the committee gave it, and there is no indication that they are going to do anything else this year?

Mr. DICKINSON. The gentleman asked a question. I thought I would respond.

Mr. DICKS. I want to give the gentleman the full context.

The amendment of the gentleman from New York, which we support, gives 2-percent flexibility to the administration, in the hopes that they might use that discretion.

Mr. DICKINSON. In the hopes. The gentleman is correct, and if I were representing the past administration that failed to act, as they did fail to act, I would be very, very embarrassed about it, and I am sure some on that side of the aisle are.

Mr. DICKS. And this administration chose not to act either.

Mr. DICKINSON. This administration is favoring the bill we are sponsoring now and I have had any numbers of calls from people in the Pentagon, and talked to the Secretary himself. They favor the bill sponsored by the House Committee on Armed Services. The Secretary of Defense has. My chairman has a letter from him. They want the flexibility. I do not think they would ask for it if they intend not to use it.

So, to say a 2-percent flexibility that is proposed is as good as 25-percent flexibility, which our committee proposes, which is asked for by the Secretary of Defense, makes little sense.

So what we are saying is we are all for a raise. We just do not want Congress dictating how it is to be given. Let us let the Secretary of Defense do his job and give him the flexibility.

Mr. NICHOLS. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON. I yield to the gentleman from Alabama.

Mr. NICHOLS. I thank the gentleman for yielding.

I want to concur with what the gentleman has said.

The people who ought to be doing the targeting, if we are going to do targeting, ought to be the people who know the military best, not Senator "X" or Senator "Y" or Senator "Z" or even Congressman NICHOLS and Congressman DICKINSON.

Mr. DICKINSON. The gentleman might go too far there.

Mr. NICHOLS. Right. I think these people ought to have an input into it.

Now, if I might indulge the gentlemen just a minute.

The CHAIRMAN. The time of the gentleman from Alabama (Mr. DICKINSON) has again expired.

(At the request of Mr. NICHOLS and by unanimous consent, Mr. DICKINSON was allowed to proceed for 2 additional minutes.)

Mr. NICHOLS. A statement was made yesterday to the effect that perhaps the Secretary of Defense had no intention of reallocating. I raised that question with him and I would like to read excerpts from this letter.

DEAR MR. CHAIRMAN: On June 18, 1981, I wrote to you expressing the Department of Defense's strong support for H.R. 3380 . . . I mentioned the reallocation authority contained in that bill . . . (the Nichols bill, the Mitchell bill, 3380) . . . as being very important to the Department, because the Military Manpower Task Force might conclude that the October raise should be targeted.

Yesterday, you inquired as to whether or not the Department had modified its position on reallocation or had definitely decided not to reallocate. This is not the case. As I forecasted in my June 18, 1981 letter, the Military Manpower Task Force has been grappling with the issues of whether or not the October raise should be targeted, and if so, how it should be targeted. Presently, the Task Force is refining several options relative to reallocation and these will be studied in depth . . .

□ 1530

I will say to the gentleman that that task force has had four meetings on this particular issue.

It is my intention to keep these options open and to make a decision on reallocation soon so that the October pay raise is not delayed.

Signed by Secretary of Defense, Mr. Weinberger.

Mr. Chairman, I include the letter as follows:

THE SECRETARY OF DEFENSE,
*Washington, September 15, 1981.*

Hon. BILL NICHOLS,
*Chairman, Subcommittee on Military Personnel and Compensation, Committee on Armed Services, House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: On June 18, 1981 I wrote to you expressing the Department of Defense's strong support for H.R. 3380, the Nichols/Mitchell pay bill. Specifically, I mentioned the reallocation authority contained in that bill as being very important to the Department because the Military Manpower Task Force might conclude that the October raise should be targeted and that the reallocation authority would provide us the tool for accomplishing that end.

Yesterday you inquired as to whether or not the Department had modified its position on reallocation, or had definitely decided not to reallocate. This is not the case. As I forecasted in my June 18, 1981 letter, the Military Manpower Task Force has been grappling with the issues of whether or not the October raise should be targeted, and if so, how it should be targeted. Presently, the Task Force is refining several options relative to reallocation and these will be studied in depth before any final reallocation decision is made. It is my intention to keep these options open and to make a decision

on reallocation soon so that the October raise is not delayed.

CAP WEINBERGER.

Mr. EDWARDS of Alabama. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON. I would be happy to yield to my colleague, the gentleman from Alabama, and to the other gentleman over there as time permits.

Mr. EDWARDS of Alabama. Mr. Chairman, I thank the gentleman for yielding.

I am the one who made the statement on the floor yesterday that Mr. Weinberger had said he would not exercise any targeting on the 14.3 percent because he felt like 14.3 percent across the board was necessary to bring everybody up to comparability and then next year we would start talking about targeting.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

(At the request of Mr. EDWARDS of Alabama, and by unanimous consent, Mr. DICKINSON was allowed to proceed for 1 additional minute.)

Mr. EDWARDS of Alabama. Mr. Chairman, will the gentleman yield further?

Mr. DICKINSON. I will be happy to yield.

Mr. EDWARDS of Alabama. I do believe that the Secretary, in fact, told me that some months ago. I did discuss this with him today. He did say to me exactly what the gentleman has just read, that perhaps he would, depending on what this study showed.

I guess I certainly take the Secretary's word. At the time it was discussed months ago, however, that was not what was said.

Since the gentleman has raised the point, I should say to him that when I do get the floor, it had been my intention to make such a statement.

Mr. DICKINSON. Mr Chairman, in my concluding few seconds, let me say that in the last 2 or 3 years I have served on the ad hoc NATO subcommittee of the Committee on Armed Services; about 18 months ago we were in this capacity in London, talking to the Defense Minister there. He said something that was very impressive to all of us that visited with him, as we visited some of the NATO countries. He said that they were suffering from the same problems that we did.

The CHAIRMAN. The time of the gentleman from Alabama has again expired.

(By unanimous consent, Mr. DICKINSON was allowed to proceed for 2 additional minutes.)

Mr. DICKINSON. He said they were suffering the same turbulence and the same tremendous costs to keep people in the service and retrain those getting out and that the Thatcher government had given two pay increases. They have a 12 percent and an 18 percent, that adds up to 30 percent in the first 3 years, and their turbulence and their retention problem had fallen to almost zero and they were very pleased with it, because they had at least brought their military up to comparability with their civilian counterparts. That is what we are wanting to do here.

We have no problem with the thrust of the amendment offered by the gentleman from New York. We are just saying, we are both trying to accomplish the same good. We think ours is the preferred way.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON. I would be very pleased to yield to the gentleman from Washington.

Mr. DICKS. Mr. Chairman, I would like to clarify the record that when we say 2 percent, we mean a pay increase of 7 percent, could go up to 9 percent; so in actuality it is about a 14-percent flexibility.

Now, I point out that under our approach we would target initially, I cannot imagine a circumstance in which we would give somebody a 14.3-percent pay increase effective October 1 and then during the year say, "Oh, by the way, we are going to reduce your pay and reallocate it to somebody else."

That is why targeting under the gentleman's bill, I do not think really has any chance of working.

I think therefore if we are going to attack the problem of NCO retention and retain those skills that the gentleman so eloquently mentioned that targeting is necessary—we were a little curious whether the gentleman was speaking on our side or on the committee's side, because the gentleman hit the problem right on the head.

Mr. DICKINSON. I usually do.

Mr. DICKS. The gentleman always hits it on the head. We have hundreds of thousands of dollars invested in these people.

We want to keep those people in and we think by giving them the substantial reward and recognizing those years of service and skill and talent that we are going to have a better chance, plus if you have those skilled NCO's training those new enlistees and they have a good initial experience, then they will stay in.

We find out from the early enlistees when they get out, that they thought they had lousy training, that they did not have a good experience because they did not have skilled senior people there to train them initially.

The CHAIRMAN. The time of the gentleman from Alabama has again expired.

(By unanimous consent, Mr. DICKINSON was allowed to proceed for 1 additional minute.)

Mr. DICKINSON. Let me just say this. We are all trying to effect the same common good. It is just a question of which is the best approach.

The other body has essentially passed what is being proposed here, as I understand it. The only difference being that they do not even allow a 2-percent flexibility. The gentleman has at least put in 2 percent.

I would ask my colleagues, go on and pass what the Secretary has asked for and what our committee has done, the product of our committee, and then let us go to conference and see where the lines cross and where we can accomplish the most of what we are trying to do without being locked into a position that the Senate says no flexibility or the gentleman says 2-percent flexibility. We say 25-percent flexibility.

Let us pass the House position and then in conference I think we can work it out as men of good faith, as we always say.

Mr. DICKS. Mr. Chairman, will the gentleman yield further?

Mr. DICKINSON. I yield to the gentleman from Washington.

Mr. DICKS. I would like to say that the committee has done an outstanding job in all areas of military compensation over the last 2 years. We have turned this problem around. We just happen to think that our approach deals with this retention problem a little more directly. It is not meant in any way to undercut the fine work of the gentleman from Alabama and the committee.

Mr. DICKINSON. I thank the gentleman.

Mr. BENNETT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendments of the Committee on Appropriations.

One of the major benefits of the October pay raise this year will be the signal that it sends to our service members. There has been a revolutionary change in the attitudes and perceptions of our service members in the recent past. To some degree this is a result of the substantial pay increases provided last year. In part, it is due to a new feeling of patriotism spreading throughout the country.

But this change is a tenuous thing. The expectation of the service member is that the administration and the Congress have taken a new look at the importance of maintaining an adequate compensation system for our military personnel and that actions to improve this system will be sustained in the future. If this expectation is not fulfilled, it is unlikely that the benefits we have accrued as a result of these recent actions will continue.

Part of this expectation is that military pay will be returned to the standard established in 1972. A 14.3-percent across-the-board pay increase is required to meet this goal.

As the Members are all aware, the administration proposed a 5.3-percent pay increase in July and approximately 9 percent pay increase in October. Service members were told that the 5.3 percent was needed in order to remove the effect of the pay caps imposed in 1975, 1978, and 1979, on mili-

tary pay. In addition, service members were told the 9-percent increase was needed in order to keep pace with the growth of wages in the private sector.

A 5.3-percent increase in July will not happen. This makes the combined increase all the more important for October. The 14.3-percent increase is needed to meet the commitment to the service member. It was not designed—nor should it be designed—to address specific, transitory problems, but it will, in part, alleviate some of the problems that exist today.

The administration has strongly sought this full increase, and the service member is fully aware of this position.

Mr. Chairman, we must fulfill the expectations of our service members and reject the amendments of the Committee on Appropriations.

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. BENNETT. I yield to the gentleman.

Mr. SKELTON. Mr. Chairman, I wish to commend the gentleman, because the gentleman has hit the nail right on the head. The morale problem is the problem concerning this pay raise.

Recently, as the gentleman knows, I have talked with dozens, hundreds of young men and women in the service in Europe and South Carolina and North Carolina and Kentucky. In all of my conversations, morale is presently high because they felt the people of the country as well as Congress last year were behind them because of the pay raise that they were given. They feel the same thing now.

I think some of them were disappointed bacuse they did not get the 5-percent pay raise that was discussed by the administration in July, but they consider that part of the 14-percent pay raise that is coming up now, they expect it and if we are to continue to have outstanding morale, we must pass this committee bill.

I commend the gentleman for his statement because the gentleman is right on the target.

Mr. BENNETT. I thank the gentleman very much.

Mrs. BYRON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to the substitute amendment offered by the Committee on Appropriations.

The amendment offered by the Committee on Appropriations fails to recognize the function of the basic pay table and the annual increases made to that table each year. Basic pay, basic allowance for quarters, and basic allowance for subsistence, provide the foundation upon which the military compensation system is constructed. The basic pay table reflects differences in experience, training, responsibility, and authority.

Basic pay is also the only element of compensation that is received as cash by all service members, regardless of assignment or skill.

All military personnel serve to meet the mission of the Department of Defense. Although each individual may hold a job in peacetime that is more or less related to a civilian occupation, fundamentally these individuals all contribute equally to the defense during a national emergency. The basic pay and allowance system is an outgrowth of this fundamental principle.

As the foundation, the pay and allowances system should not be used to solve short-term problems. Obviously, today some of the services are experiencing shortages of manpower in certain years of service; and all services are experiencing manpower shortages in individual skills. But these shortages are transitory in nature. They developed over time, partially as a result of pay caps imposed in 1975, 1978, and 1979, and partially as a result of management policies existing during a period of conscription. But these are not problems that are a result of a fundamental inadequacy of the underlying compensation system.

Tinkering with this underlying compensation system, to solve a transitory problem, will cause worse problems to exist in the future. For example, a shortage exists in the Navy of petty officers between 10 and 20 years of service. This problem can only be solved over time as persons with less than 10 years of service continue on into the midcareer years and fill the shortages that exist today. If retention rates for individuals with less than 10 years of service are increased too far, while more people will flow into the area exhibiting shortages today, eventually too many individuals will be in that category. The shortages by years of service will eventually disappear if normal retention rates are maintained. A 14.3-percent increase is required to reestablish and maintain these normal rates.

While the goal of the Appropriations Committee is understandable—attempting to solve existing problems with variable basic pay increases if it is a target area they are in—these problems are better solved through modifications in bonuses and special pays. The 14.32-percent across-the-board pay increase is needed to return the foundation of the military pay system to a firm footing.

Mr. Chairman, the substitute amendment could have very adverse impacts on a fundamentally sound compensation system, and I ask Members to reject it.

Mr. WHITE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to speak in opposition to the amendment.

Mr. Chairman, the question as posed earlier by one of the Members speaking was whether you will have a pay raise across the board or whether you will target.

I would say that you should certainly have a pay raise across the board, primarily because it is fair.

Now, let us talk about why it is fair. Of the 14.3-percent pay increase, 5.3 percent is a catchup to remove the caps that were imposed in 1975, 1978, and 1979, and 9 percent is reflective of trying to bring the personnel up to the private-sector wages since last year.

Now, if you are going to target, where will this money come from? It will come from the junior enlisted personnel, and this is precisely what will cause a shortfall in recruitment, as has already been said. It will cause something estimated to be 10,000 persons.

Now, we have already last year imposed more strictures in category 4's, and high school graduates. We are trying to get quality people into the service at the present time. If you target, you will be giving 38.5 percent of the raises to 16 percent of the personnel.

□ 1545

This is not by skills but by grade. What we have been talking about today is by skills; that we want to keep people in that have certain skills. But this is not going to do it.

If you are talking about people from the midlevel, 10 to 20 years, the estimate is that 90 percent of those people today will continue their career on to retirement. But when you get the young recruit, the person of quality that we are trying to attract in, after his first enlistment, we have some difficulty keeping him in.

This is the most married Army in the history of this country. The wives who have to go out and take second jobs are the ones that are going to be saying, "Let's get out and get something that will give us at least the amenities of life. We were supposed to get a 14.3-percent pay increase and they cut it down and they gave it to the people who already have a much higher income at the present time."

The low retention rates that we have, the shortages that we have today, hark back to the time of Vietnam.

Now we have come up to the present time and we have this continued shortage because of the strictures that this Congress imposed on the services.

Targeting the costs is going to cost considerably more and does certainly less than you have in mind.

And listen to this, those of you who are concerned about economy. These are the figures from the Congressional Budget Office. To target would cost $78 million more per year. And in addition, targeting increases retirement costs by $275 million over the next 5 years, compared to the across-the-board.

The soldiers, marines, and sailors and airmen of this Nation are expecting a 14.3-percent raise. They have been waiting and their morale was raised by the last pay increase. They

are looking for comparability; they are looking for an opportunity to live in some equality with their neighbors.

I do not think we want to impose on the military of this Nation this blow to their morale, this unfairness, today, this thing that will not give the skills that we are talking about, that goes to the upper level by grades and not by skills.

We are already giving bonuses and other inducements by skills. Let us do the skill inducements and retention through other means that this Congress has already taken and will take in the future.

So I reject this amendment in the interests of the armed services.

Thank you.

Mr. TRIBLE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment. Either initiative before us will help, but I believe the across-the-board approach of the Armed Services Committee is the preferable approach.

We must restore to all members of our military community the purchasing power that has been lost over the last decade. We must reestablish for all military members rough comparability with the private sector. That is why the across-the-board approach is so vital.

Once we have done that, once we have made up for the neglect of the last decade, then let us start talking about targeting, increases over and above that, to meet our special needs.

The fact is we have targeted $2 billion in pay increases in recent months: sea pay, flight pay, and other special duty pays and other initiatives.

The last, as we have heard today, gives the President the authority to adjust salary increases by up to 25 percent.

A study is now underway, and this administration will certainly adjust these pay increases as the need requires.

Finally, and perhaps most important, to give only a 7-percent raise to junior enlisted personnel would be, in my judgment, inequitable. It would send a very discouraging signal to our people. These are the people who have been forced to rely on food stamps, who have been forced to hold second and third jobs to make ends meet. A 7-percent raise to these junior level personnel would put them further and further behind. It would severely damage morale. It would complicate our readiness problems and everything we are trying to do now to strengthen our defense posture.

Also, DOD estimates suggest that a 7-percent raise as opposed to the full 14.3-percent increase would result in 10,000 fewer recruits each year.

These are facts that must be considered by all of us.

In my judgment the Armed Services Committee approach is equitable. It will boost first-term enlistments. It will aid retention and it will provide an encouragement to all of our military personnel.

The Appropriations Subcommittee substitute, while meeting many of these goals, does not achieve as much. I would recommend that that amendment be rejected.

Mr. HUNTER. Will the gentleman yield?

Mr. TRIBLE. I would be happy to yield.

Mr. HUNTER. I commend the gentleman. I would like to commend him especially for recognizing that this pay raise is engineered to make up for inflation, for the ravages of inflation. If we are coming down to a 7-percent raise for the lower enlisted grades we are actually only giving them 50 percent of the comparability that we pledged to them in the early part of the decade. This is not a bonus. This is not targeted for skills. This is a pay raise which was designed to make up for inflation.

I especially commend my colleague for his comments regarding the effect that inflation has had, especially on our junior people.

Coming from San Diego, I see housing that is going for $300, $350, even for minimal housing, for junior enlisted grades. Again, these are the people who have not yet purchased a house, as many of the senior people have. Every time the Consumer Price Index jumps, their cost of living actually does jump.

They are ravaged by inflation, just as much, if not more, than the senior grades.

Mr. TRIBLE. I thank the gentleman for his contribution.

I yield back the balance of my time.

Mr. DELLUMS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, members of the committee, I find myself in a terribly unique posture.

Normally as a member of the Armed Services Committee I stand in the well of the House to vehemently and adamantly challenge the position of the Armed Services Committee, challenge the massive expenditures, the extraordinary increases. But I find myself today standing in the well in support of the position proposed by my colleagues on the Armed Services Committee.

First, I would like to comment to the general proposition of the need for a pay raise among our personnel in the armed services. All of us have read the reports of a number of our young people who serve in the military who are recipients of welfare, food stamps. We have all read a number of stories of how the ravages of inflation have harmed a number of our personnel who serve in Europe.

So clearly there are a number of reasons why we ought to be supporting a pay raise for our military. If we are going to have one, then they ought to be able to serve with dignity. They ought to be able to serve with integrity; that the pay ought to speak to the principles of equity, and they ought to speak to the principles of justice.

A number of our young people are married, and it would seem to me that if they are going to have an opportunity to serve, then they ought to be able to make enough money to be able to do it. That is a reality in our society.

So as a general proposition, it would seem to me that all of us, as members of the Armed Services Committee, at this particular moment in history ought to be willing to support the general proposition of a pay raise.

We find ourselves today confronted with two proposals, one proposed by the Armed Services Committee that would provide for across-the-board pay of 14.3 percent. We have another proposition offered by my distinguished colleague and friend, the gentleman from New York, that would target the pay to the various ranks between 7 and 22 percent.

Clearly, both proposals address the general proposition, and that is the need for a pay riase. Both of them attempt to accomplish this.

A number of my colleagues have already spoken as to why the Armed Services Committee proposal is a superior one. I would simply add one or two remarks.

First, it would seem to me that a pay raise from 7 to 22 percent clearly speaks to a lack of equity at the extreme entry level, 7 percent; and 14.3 percent, it seems to me, is much more equitable.

Second, our proposal provides the flexibility on the part of the Secretary to take 25—up to 25 percent of these funds and to target skills as opposed to building in an elitist system of targeting grade, and I think where there is necessity for a particular skill in our society, or in the military, then we ought to have the resources at our disposal to target for those skills.

But finally, and this is the one argument that I would like to make, and I think my colleague on the other side of the aisle, the gentleman from Virginia, touched upon it: One of the arguments of the proponents of the targeting approach says that we already have enough junior enlisted people, or there is no problem in recruiting them. Why do junior enlisted people come into the military? Why are there so many young blacks and Hispanics and low-income and poor whites who come into the military at this particular moment in history? It reflects the reality of the hardships of our economic circumstances across the board.

My question is: Why should these people have to carry the burden of the problems of our economy, realizing that the only place at this moment they can find a job is in the military and have to be penalized for going in the military by being the people who receive the least resources? Seven percent, whether you target it to 9 per-

cent a few months later or 14 percent a few months later, it still is not across the board, it still does not project that equity. I think those young people who go into the military because there is no other avenue open to them at this particular moment in our society are not to be penalized for having made that particular decision.

So in summary, No. 1, I think all of us ought to support our pay raise for the military if we have one, and I think people ought to live with dignity and receive enough money to care for themselves, and in situations where they have families they ought to be able to do that.

In the two proposals, I would assume we can walk in this well and argue either side of this question, because both proposals provide a pay raise. I simply come down on the side of the Armed Services Committee: First, because I think there is much more equity in 14.3 across the board; second, targeting skills, it seems to me, makes more sense than to build in the elitism of targeting ranks; and third, I do not think those junior people who are coming into the military because they have no other way of expressing themselves in terms of employment ought to be penalized for having made that decision.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I first yield to the chairman. Then I will be happy to yield to my colleague.

(On request of Mr. NICHOLS and by unanimous consent, Mr. DELLUMS was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. I thank my colleague, and I yield to the chairman of the subcommittee, the gentleman from Alabama.

Mr. NICHOLS. I deeply appreciate the support of the gentleman from California.

I would say to my colleague, in his admonition relative to the support of the legislation in the past, a former chairman of this committee, Mendel Rivers, used to have a saying that the light in the window still burns, and the wayward son can still return. We are glad to have him on our side on this particular argument. But the gentleman from California has always been on the side of the underprivileged, the grunts, the man at the low end of the totem pole. Certainly that is the enlisted man. I appreciate the gentleman's support.

What the gentleman from California had intended to say, I am sure, with reference to targeting particular grades was that in this particular pay bill we do target certain skills in that we raise the enlistment bonus, and we pay specialties for some of our hard-to-get engineers in the service.

I appreciate the support of the gentleman from California.

Mr. DELLUMS. I thank the chairman.

I now yield to the gentleman from Washington (Mr. DICKS).

Mr. DICKS. I thank the gentleman for yielding.

Mr. Chairman, I have always had a great deal of respect for the gentleman from California and his advocacy of the rights of those people who have the greatest needs in our society. I just would point out, just to clarify the record, the chairman has done, that the reallocation of 25 percent that is allowed has to be done on the basis of rank, not on the basis of skills. Therefore, there is nothing except the reenlistment bonuses that allows us to address that problem.

The only point I would make to the gentleman also is that instead of being 7 to 22 percent, when you add in the housing and the BAQ and subsistence, actually it is a 10-percent increase overall for the person at the lowest end, the enlistee, plus the enlistee's pay goes up in the very first year that he is in the service, and his pay increases by 16 percent.

So we are trying to also be fair under our approach to the most junior enlistee. But what we are really concerned about is the training and the investment that we have in those NCO's, trying to make sure that that enlistee has a good military experience and reenlists at the end of his first term.

Mr. DELLUMS. I thank my colleague for his comments. I appreciate the clarification.

I think we could debate that issue all day, all week. But, it seems to me that the reality is that the differences here to some extent are rather subtle. It would seem to me that there is no need to prolong the issue. I simply stand in the well saying there are two proposals, they both address the problems that we choose to confront, and reasonable people can differ. I simply come down at this particular moment on the side of the Armed Services Committee for the reasons I have articulated.

(By unanimous consent, Mr. DELLUMS was allowed to proceed for 2 additional minutes.)

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I yield to my colleague from Missouri.

Mr. SKELTON. I commend my colleague on his statement and for his very clear explanation as to why he feels the way he does.

The gentleman points out, I think very properly, that those who are the young recruits, the new recruits, the privates, the corporals, the petty officers, are the ones who really need it, and it will be a severe morale problem if they do not receive the pay that they have been led to believe they are to receive. They received a substantial pay increase last year. This year, as we say in Missouri, they will play catchup football. They will be at least somewhat in the ball park of being adequately compensated in relation to their counterparts in the civilian life. So, I think, the gentleman has hit the nail on the head.

One last comment. Being a former marine, I know that the gentleman would feel strongly, as I do, about the pay inversion problem that the amendment, the substitute amendment, would pay a marine staff sergeant, platoon sergeant, $140 more than his marine second lieutenant.

Mr. DELLUMS. I thank my colleague.

Mr. Chairman, I would simply respond to the distinguished subcommittee chairman and indicate that it is a pleasure to join him to improve the quality of life of our service personnel, but our coalition is very temporary.

□ 1600

When the $226 billion budget comes back to the floor, we will be out there fighting it and against the chairman to that extent.

Mr. HARTNETT. Mr. Chairman, I move to strike the requisite number of words, and I rise in strong opposition to the substitute amendment.

The substitute amendment represents an unnecessary and potentially harmful restriction on the existing authority of the President to reallocate a portion of the basic pay increase.

Current law provides the President with authority to reallocate up to 25 percent of a basic pay increase into the basic allowance for quarters and basic allowance for subsistence elements of military compensation or, as is more germane to the current discussion, from the basic pay of one pay grade and year of service to the basic pay of different pay grades and years of service.

In no case under this authority could an individual receive less than 75 percent of the across-the-board increase.

Under this authority, which is retained in H.R. 3380, as reported by the Committee on Armed Services, the President has the authority to provide a raise as low as 10.7 percent for certain grades and years of service and to increase other grades and years of service above the 14.3-percent level. This is substantial authority.

The substitute amendment, which provides only a 7-percent increase to the most junior enlisted personnel, requires up to 50 percent of the basic pay increase to be reallocated. The magnitude of this reallocation is clearly outside the original intent of the comparability mechanism established in the early 1970's. While variations in the distribution of military pay increases should be implemented from time to time to reflect variations in private sector pay increases, no evidence is available that supports such a substantial reallocation as is proposed by the substitute amendment.

The President has formed a Military Manpower Task Force that is looking at the current pay system before the

October pay increase and may recommend a change to that system in sufficient time to exercise the reallocation authority if required.

Existing authority provides an equity-management balance. On the one hand, it provides management with the flexibility to modify the pay system to respond to stable trends that evolve over time. But at the same time, it contains a safeguard to protect the individual service member from bearing the brunt of an ill-conceived or hastily manufactured reallocation. Because only a portion of the pay increase can be reallocated at any one time, the existing reallocation authority also insures that responses to transitory manpower problems are not overly aggressive.

All in all, the existing system of reallocation is both fair and useful when needed. I see no compelling reason for change and many reasons for continuing within the existing framework.

Mr. Chairman, I urge a rejection of the substitute and of the original amendment.

Mr. SMITH of New Jersey. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to the gentlemen from New Jersey.

Mr. SMITH of New Jersey. Mr. Chairman, I thank the gentleman from South Carolina for yielding.

Mr. Chairman, on July 16, this body passed the largest defense package in U.S. history. We provided funds for new ships, new tanks, a new strategic bomber, the Trident submarine, new helicopters, new automatic weapons, and a variety of additional military hardware.

In the midst of a massive Soviet military buildup, this action is vital for the refurbishing of our national defense capabilities. However, Mr. Chairman, we have learned from experience that sophisticated military equipment is of little value if we do not have skilled personnel to operate it.

Today, as we prepare to vote on H.R. 3380, the Armed Forces Pay Act of 1981, we have the opportunity to help our military attract and retain the highly skilled and qualified personnel that they urgently need.

The administration and the Armed Services Committee support a 14.3-percent increase in pay across the board. While this proposal would be an improvement, I strongly favor another alternative—the Appropriations Committee amendment. This proposal also provides for an overall increase of 14.3 percent but does so in a targeted manner that will help our armed services retain trained professionals who, in turn, will provide the leadership that is vital for the effective functioning of our military.

Mr. Chairman, in the past year, the Army reports that it has made encouraging gains in attracting recruits. Additionally, Army officials say that the quality of recruits has also improved significantly. As of July, 69 percent of the Army's recruits were high school graduates, who, experience has shown us, tend to make better soldiers than those who dropped out. A year ago, only 40 percent of the recruits were high school graduates.

At the same time, a review of the enlistment test scores shows that 72 percent of the Army's newest recruits are in the top three mental categories, compared to 51 percent just a year ago.

These gains have been attributed to several factors—better pay and the promise of further increase in compensation have been major contributors to this improved situation. High unemployment in the civilian work force and greater cohesion and stability in Army life have also been cited as big factors. Thus, a year after the Army Chief of Staff, Gen. Edward C. Meyer, declared that he was presiding over a hollow Army, we are finally moving in the right direction.

Despite this improved situation, we cannot afford to become complacent. Nor should we entertain any notions of delaying or deferring this particular pay raise. And such action would be a breach of faith that would send a very unhealthy signal to the very people that we want to stay in the military and continue to serve their country.

Mr. Chairman, the Appropriations Committee amendment, which has the support of the chairman and ranking minority member of that committee and support of the Defense Subcommittee, goes a long way toward correcting the inequities and disincentives that exist under our current pay structure. Many officers and enlisted men and women find themselves in such a financial dilemma that they have to apply for food stamps, rent subsidies, fuel subsidies, and nutritional programs.

Mr. Chairman, a staff sergeant, with 10 years of service who is classified as an E-6 and has a good deal of supervisory responsibility, receives only $943.50 per month. This noncommissioned officer, the heart of our defense forces, makes only about $11,000 per year. Clearly, we cannot expect an experienced officer to raise a family on that kind of a salary.

The Appropriations Committee proposal, which has already been passed by the Senate, provides that pay raises of as much as 22 percent should be granted to certain highly skilled and experienced enlisted personnel who are in short supply. Others will receive raises in varying lesser amounts, with everyone receiving raises of at least 7 percent.

Mr. Chairman, according to the Congressional Budget Office, this targeted pay raise will allow the services to recruit virtually the same number of quality personnel over the next 5 years as they would under the House Armed Services Committee's across-the-board proposal. However, CBO estimates that the Appropriations Committee's targeted proposal would increase the size of the career force by 19,000 trained and experienced leaders.

In the long run, these improved conditions for experienced personnel should help the military to attract more career-oriented individuals. By encouraging experienced people to stay in for longer periods of time, our armed services will also be able to avoid the high cost of training new people to fill these important positions.

While the basic thrust of the Appropriations Committee's amendment is to retain experienced personnel, the amendment also raises the ceiling of the enlistment bonus. If recruitment officers and military advertisements make potential recruits aware of these bonuses and if they let them know that the average recruit moves up through the ranks in his first year sufficiently for his or her pay to increase about 16 percent, we should find that a good number of qualified recruits will respond to these incentives.

Mr. Chairman, the men and women who are serving in our Armed Forces have every right to take pride in the contribution they are making to our Nation. We have entrusted them with the responsibility of defending our democratic ideals and our freedoms. We should all give them the recognition—and the compensation—they deserve for the sacrifices they make on our behalf.

I urge my colleagues to join me in supporting the Appropriations Committee's amendment to the Armed Forces Pay Act of 1981.

The CHAIRMAN. The time of the gentleman from South Carolina (Mr. HARTNETT) has expired.

(On request of Mr. SMITH of New Jersey and by unanimous consent, Mr. HARTNETT was allowed to proceed for 4 additional minutes.)

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I appreciate the gentleman yielding to me very much. I unfortunately will also take a position which is the opposite of his, and speak in favor of the amendment. I appreciate his allowing me to take some of his time for that purpose.

Mr. Chairman, I am here because I have a commitment. I serve in the Naval Reserve—and for the cynics I would point out that I serve without pay and at my own expense—but I have two commitments.

One is to report back, because I have spent the last 2 years on my active duty 2 weeks traveling among the ship and shore stations and the Naval Establishment. During that period, I have spoken to several hundred enlisted men and officers. My main concern was morale and what we should do in order to improve the morale and the quality of our servicemen.

First of all, I have the commitment to them to come back and to thank the committee here and this body for the pay raise of the last year. It has done a tremendous thing for morale, no question about that.

My second question to them was, what must we do now, and where is their most critical problem. The most critical problem that was expressed to me is retention; that if we are going to retain the kind of quality enlisted men and petty officers we need in order to have the fighting force that is necessary for this country, we have to pay the attention to that scope. That is why I support the Appropriations Committee amendment.

To me, that does focus the attention in the area where it is needed, for if we do not have the kind of quality enlisted men in the kind of grades we must have, and have to retain them and their expertise in those areas, it does not make any difference what we have at the bottom level. Let us face it, those men at the bottom level are looking and asking, "What is in it for the future for me?"

That is what they were telling their wives: "What happens if we stay in? Where will we be in 4 or 6 or 10, or at the end of 20 years?"

That is of more interest to them, or as much as their present pay. We should give them a pay increase. They are more interested in where the service will lead them. The best way to do that is to give them the kind of incentives the Appropriations Committee amendment will give them.

I think both committees have done a good job there, but I think, and it is my understanding of the Appropriations Committee amendment, with all the other benefits and flexibility, it could be up to 12-percent increase for those in the lower pay scale, so we are not talking about 7 percent. We are talking about something above that, presuming, as the committee would say, the Secretary would exercise his discretion to increase that 2 percent to the lower pay grades.

□ 1610

Mr. HUNTER. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to the gentleman from California.

Mr. HUNTER. Mr. Chairman, I thank the gentleman for yielding.

I think that the last two gentlemen who have spoken have stated a good general proposition, but I think they have missed the point that really this pay increase under the alternative that is offered by the Appropriations Committee is only going to mean about an extra $60 or $70 a month to that senior NCO who is making $1,600 or $1,700. As we get these NCO's who are getting down close to their 20 or 30 years of service, it is really not credible to say that an extra $60 or $70 a month is going to be the deciding factor between their staying in the service and getting out of the service. They are already making a tremendous advance here.

The CHAIRMAN. The time of the gentleman from South Carolina (Mr. HARTNETT) has expired.

(By unanimous consent, Mr. HARTNETT was allowed to proceed for 1 additional minute.)

Mr. HUNTER. Mr. Chairman, if the gentleman will yield further, they are already making a tremendous advance with this pay raise, which, for example, for the NCO making $1,600 a month, means he is going to have about a $200 increase under our bill, and as they are getting down close to 20 and 30 years of service, they are looking at incentives which are worth literally hundreds of thousands of dollars.

So that extra $60 or $70 is not going to be that important to them, but that extra $20 or $30 a month is going to be extremely important to the young enlisted man who is only making $160 a month and who is really having problems securing food and housing and the other necessities of life.

Mr. HARTNETT. Mr. Chairman, now that all the Members have heard both sides of the issue, I urge my colleagues to do the right thing and vote for the 14.3-percent, across-the-board increase for everybody.

Mr. MONTGOMERY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the substitute amendment.

Mr. Chairman, I rise in support of the original committee bill that was reported out by the Committee on Armed Services.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I am pleased to yield to the gentleman from North Carolina.

Mr. JONES of North Carolina. Mr. Chairman, I thank the gentleman for yielding.

I would like to direct a question to the chairman of the subcommittee. Does this authorization bill provide a pay increase for the U.S. Coast Guard personnel?

Mr. NICHOLS. Mr. Chairman, if the gentleman from Mississippi will yield, the answer is in the affirmative, it does include the Coast Guard.

Mr. DYSON. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I am pleased to yield to the gentleman from Maryland.

Mr. DYSON. Mr. Chairman, I applaud the gentleman from Mississippi (Mr. MONTGOMERY), a member of our committee, on the position he has taken, and I commend other Members who have taken the floor to talk about the morale problem we face in the armed services today.

The fact is that we have seen a great turbulence with the men and women in uniform because of the uncertainties about their pay and other benefits, and I think our committee, the Committee on Armed Services, is anxious to reassure the active duty personnel that, in fact, we will continue to bring about a strong commitment to their welfare.

Mr. Chairman, I rise in opposition to the amendment and to the substitute offered by the Committee on Appropriations.

We have encountered far too much turbulence among our men and women in uniform because of the uncertainties about pay and other benefits. The Armed Services Committee is anxious to reassure active duty personnel of the Nation's continued, strong commitment to their welfare.

In 1972, Congress decreed that military pay should be comparable—in other words, that salaries should keep pace with similar jobs in the private sector. Unfortunately, that commitment was not kept because of a series of Presidential pay caps imposed in 1975, 1978, and 1979. The results have been all too apparent: shortfalls in recruiting, the exodus of skilled people, a decline in quality.

The compensation package enacted by the previous Congress was a substantial step forward toward restoring military pay to a competitive level. We would make a serious mistake to halt the momentum. The 14.3-percent, across-the-board raise represents the final installment on the comparability promised military people in 1972. It will go a long way toward restoring confidence among the military community that the Congress, indeed, does plan to look out for their welfare—on a continuing basis, rather than just when some problems reach crisis proportions. Funds expended for manpower must achieve two goals: recruitment and retention. H.R. 3380 affords the best opportunity of doing both. There has been much discussion today of which is the more severe problem. Analyses by the Department of Defense and the Congressional Budget Office show that the primary, and most persistent, problem over the next decade will be recruitment. The shrinking manpower pool, improved economic conditions, and tighter congressional quality controls on new recruits will all make the task of recruiting higher mental category high school graduates increasingly difficult, particularly for the Army. By assuring that junior enlisted people receive a decent wage, as provided by the 14.3-percent, across-the-board raise, we increase the likelihood of meeting our recruiting objectives. The chances are much slimmer under the considerably smaller raises for lower ranking people proposed in the substitute.

We must also assure that any pay raise enhances the retention of the skilled career personnel, particularly the midlevel NCO's who are the backbone of the military. The repeated pay caps I mentioned earlier reneged on

our commitment to keep military pay competitive with the private sector, resulting in much dissatisfaction among the career force and the loss of some skilled careerists. Last year's pay package attacked this situation directly through a pay raise partially closing the comparability gap and through a variety of pay initiatives aimed at specific problems in the career force. This investment is paying off; retention rates for both first termers and more senior personnel have improved dramatically.

Studies by both the Department of Defense and the Congressional Budget Office show that, with the restoration of full comparability embodied in H.R. 3380, we will more than achieve our retention goals in the coming years. Both the Armed Services Committee's bill and the substitute will insure a more than adequate supply of careerists. The primary distinction between the two approaches is this: The Armed Services Committee bill also gives us a fighting chance of meeting recruiting requirements as well. I urge my colleagues' support of H.R. 3380, as reported from the Armed Services Committee and your opposition to the substitute.

Mr. MONTGOMERY. Mr. Chairman, I appreciate the remarks of the gentleman from Maryland (Mr. DYSON). He also serves on the Committee on Armed Services.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. Mr. Chairman, I want to take several minutes first, and then I will yield to the gentleman from Pennsylvania. I would just like to make a couple of points that I do not believe have been made here today.

The Congressional Budget Office, has pointed out that the targeting of pay is more of an incentive toward not recruiting but retention, and the problem that I see in the National Guard and the Reserves, which have well over 45 percent of the combat missions now assigned to Europe and the Middle East, is in recruiting. We are getting enough people coming out of the service into the Reserves to get their 20 or 30 years in, and they are filling up to the top grade ranks. Our problem is getting recruits.

Under the Appropriation Committee's bill there would be only 7 percent targeted toward recruiting, and under the committee bill that the gentleman from Alabama (Mr. NICHOLS) has sponsored this 14.3-percent, across-the-board increase would include recruits.

So, Mr. Chairman, this is very important if we are going to help the National Guard and the Reserves, which have 50 percent of the missions. I believe now we should vote for this across-the-board increase recommended by the Committee on Armed Services.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I thank the gentleman for yielding, and I commend the gentleman in the well for his statement.

Mr. Chairman, I rise in support of the position taken by the Committee on Armed Services and the subcommittee chairman, the gentleman from Alabama, Mr. BILL NICHOLS, and I oppose the Appropriations Committee amendment.

It seems to me that what we are dealing with today is not only adequate benefits for our military but we are dealing with the whole question of how we take the all-volunteer service and make it work well. I think that the gentleman from California (Mr. DELLUMS) hit the target when he said that people being recruited into the system need the same kind of cost-of-living increment as those who have served in the system for a long time. It is a question of this: How do we recruit adequately for the All Volunteer Forces, and how do we retain people within the All-Volunteer Forces on a long-term basis?

The gentleman in the well, as chairman of the Committee on Veterans' Affairs, has authored another piece of legislation called H.R. 1400. That bill, in my opinion, is a companion piece of legislation to H.R. 3380. It provides for a GI education in a two-step provision. The gentleman has recognized that we need to recruit quality people within the service, both with pay and with education, and his bill provides for $300 a month for 36 months if a person comes into the service and serves for 3 years.

Second, it provides that after a recommitment for 6 years of active duty service, someone would be able to receive $600 a month for 36 months of GI education, making the point that if one stays within the service and helps us over that hump of training a person within the military, we can give him adequate benefits and adequate pay to stay in.

One of the points with the legislation the gentleman in the well has authored is also an opportunity after 10 years of service to transfer those benefits to a spouse and to the children. I think this kind of educational benefit is what many people are looking for to retain quality NCO's and other mid-level career people within the services.

The Committee on Veterans' Affairs has overwhelmingly supported a GI education component, and we stand together today supporting the legislation coming out of the Committee on Armed Services on pay and hope that we can put the pay increment of 14 percent in place in this legislation, plus a GI education bill in place, so that we can have recruitment and retention in place to power ourselves in the future with quality people in the All-Volunteer Forces.

Mr. Chairman, I have one further comment. As we begin to reduce the number of basic educational opportunity grants, I think many people who are quality people will be encouraged to go in and serve in the All-Volunteer Forces.

Mr. Chairman, I would like to give my support to the distinguished subcommittee chairman, BILL NICHOLS, and to H.R. 3380 as approved by the House Armed Services Committee. I believe that a full 14.3-percent, across-the-board increase for all military personnel is totally justified.

The House Veterans' Affairs Subcommittee on Education, Training, and Employment, which I chair, has recently completed a series of six hearings aimed at designing a new GI education bill for the All-Volunteer Force. The House Veterans' Affairs Committee has since approved the proposal as contained in H.R. 1400, the Veterans' Educational Assistance Act of 1981. To date, over 125 Members of the House have joined us in cosponsoring the legislation which is now jointly referred to the House Armed Services Committee.

Our subcommittee received testimony from nearly 200 witnesses in Washington and in the field. We heard from generals to privates. We listened to Government experts and to individual citizens. We learned that education benefits can be the critical additional factor to the overall benefit equation for the All-Volunteer Force. We also received a thorough overview of the U.S. military from the vantage point of scores of individual soldiers, sailors, and airmen of all ranks and ages. We learned what had brought them into the military; and we learned what was either keeping them in the military or driving them out.

We were impressed during our hearings with the confidence and pride these military personnel held in their service. They felt that the All-Volunteer Force was working and could continue to improve, but only if they could be sure that the Congress and the American people were behind them.

We noted a growing sense of frustration among these men and women over a perceived decline in the quality of military life. This deterioration in life style was, in many cases, not equal to the demands placed upon them by their service. Faced with the attractions and rewards of civilian life, including education benefits for themselves and their families, many of these individuals had already considered, or were planning, to leave the service.

Army Chief of Staff, Edward C. Meyer, told our committee that the biggest problem in the Army today is "turbulence." Noting the current attrition rate, he said that the equivalent of a combat division turns over every 18 months. This attrition rate is caused by dissatisfaction, not only in the critical skill areas, but in the basic skill areas as well. Both the young

first termer trying to feed his family with food stamps, and the midcareer NCO attracted by high paying positions in the civilian sector are definitely feeling the crunch. The results are inefficiency, weakened defense capability, and enormous training and retraining costs in recycling new recruits.

Despite rumors in the press, both the President of the United States and the Secretary of Defense have restated their opposition to the draft and their support for the all-volunteer concept. I believe we ought to follow that lead.

The men and women who serve in the All-Volunteer Force deserve our confidence and our support. In many cases they told us they felt as though they were guinea pigs in some great social experiment: "Benefits for some, but not for others, pay increases for some but not for others."

I believe it is time to stop switching signals. It is time to either fish or cut bait with the All-Volunteer Force.

The Armed Forces need a solid, well-rounded benefit package. Education benefits can and should, once again, be part of that package. However, providing the additional incentives through adequate basic pay and allowances is also a vital tool to enhance the quality and meaning of military service.

The CHAIRMAN. The time of the gentleman from Mississippi (Mr. MONTGOMERY) has expired.

(By unanimous consent, Mr. MONTGOMERY was allowed to proceed for 1 additional minute.)

Mr. KAZEN. Mr. Chairman, will the distinguished gentleman yield?

Mr. MONTGOMERY. I am pleased to yield to the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, I wish to commend the gentleman in the well and the chairman of our subcommittee, the gentleman from Alabama (Mr. NICHOLS), for bringing forth this bill.

I think, after listening to the debate today on both sides of the question, that the Members have a pretty good idea of what is going on. I think, as the gentleman from Alabama (Mr. DICKINSON) said, the thing that we are now doing is trying to set our feet in concrete between the two versions that we have, one passed by the other body, which is essentially what the Appropriations Subcommittee has brought in, and the other supported by those of us who serve on the Committee on Armed Services.

I think that we ought to, because of the tremendous weight of the evidence and the debate here this afternoon, go with the bill that we brought out of the Committee on Armed Services, and if there should be any question, let that be debated in the conference. Let us have something that we can go to conference with instead of making the final decision here today, because, frankly, I think the decision made by the Committee on Armed Services is the right one, and with this bill, these people will get their raise.

Mr. EDWARDS of Alabama. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think that if nothing else comes out of this debate, it will be that, for the first time in many a day, we have spent a sufficient amount of time debating the problems of our military as far as pay is concerned and as far as allowances are concerned, and I think that the service people of our country should be gratified by the caliber of the debate. They should be gratified by the marvelous piece of work that has come out of the Committee on Armed Services under the chairmanship of the gentleman from Alabama (Mr. NICHOLS).

I spoke about this yesterday, and I feel very seriously that the Members have done a great job in bringing this bill to the floor. I do regret that we have this one little difference as to how we ought to go about it, but the bottom line is that the service person is going to benefit from what goes on here today no matter how it turns out.

I think every Member in the Chamber will agree to that, and it is important that we continue to keep the faith of the service men and women in this country as we try to bring them into a comparability structure where they can be induced, through pay and allowances and love of country and all that goes into the military, to continue to stay in and serve this country in the uniformed services.

□ 1620

So it is extremely important, I think, that we have had this debate and I hope very shortly we can wind it up. I frankly did not realize how many members of the Armed Services Committee there were.

I believe we have heard from all of them. I want to say I am uplifted by the debate and by the caliber of it.

What is it that we are really trying to do on the Appropriations Committee, and what is it that the other body, in fact, did on Friday? We believe that rather than giving an across-the-board 14.3-percent increase, that there is a clear need to target to those areas of those service people who are getting out of the service in great numbers because of pay and other reasons. So we have tried to target on the range from 7 to 22 percent the men and women in the service leading primarily to those skills that are so important to conduct the affairs of the military service.

We have talked about targeting skills and targeting grades. Let us get one thing clear. We tend to talk about skills in the sense of a person who can work as a mechanic on an airplane or ship or a tank and that person, therefore, is a skilled person we think and, therefore, that person should get an increase.

I would argue to my colleagues that there is just as much need for the skill of the guy who leads the infantry or who is out there with the artillery, who is in the trenches with the troops, or who is at boot camp trying to teach those young recruits how to be good soldiers. That clearly requires a skilled service person. I think we have to see that we pay those people just as well.

Now what has happened is that we have gone into a system of bonuses where we seem to have a bonus for everything. If someone does not get one somehow, they are mad at everybody else in the squad because they got one. Or if they want to be recruited and they do not measure up to this bonus, why, then, they come in unhappy. There are all kinds of problems with the incentive bonus issue that is before us.

Someone here earlier today ticked off many of the different types of bonuses and pay arrangements that we have with the troops. We have a clear body of skilled people in the military service, in that NCO rank and in the petty officer rank and in the young and middle level officer rank that we desperately need to keep in the service. That is why we are making this distinction here today on the part of the Appropriations Committee.

Some have said they do not quite understand what the Appropriations Committee is doing; they propose an amendment to go back to the 9.1 percent, and then the gentleman from New York (Mr. ADDABBO) comes along and talks about something called targeting. Let me say to all those listening that the Parliamentarian told us that is the only way we could make the issue on the floor, so we came with that procedure. But the key issue here today is very simple, and that is: Will we have a 14.3-percent across-the-board pay raise for all of the service people or will we take, in substance, the total of that increase and target it between 7 and 22 percent, going primarily to those skills we feel are so important?

The CHAIRMAN. Time of the gentleman from Alabama has expired.

(By unanimous consent, Mr. EDWARDS of Alabama was allowed to proceed for 2 additional minutes.)

Mr. EDWARDS of Alabama. One final point and that is, I heard the gentleman from California (Mr. DELLUMS) make a good speech here today and I agreed with basically what he said. But I want to make this point, the E-1, under our proposal, would get a 7-percent increase. The E-2 would get an 8-percent increase, and the E-3, which is private first class—for some of you old salts—would get a 9-percent increase. Once you become a corporal, which is at that point where you are really starting to learn something and become a leader in the military, under our proposal and under the proposal of the other body, you start at a 14-percent increase and the increase then goes up to the sergeant major, where you would get a 22-percent increase.

Another item of interest, I think, is that during the first enlistment time, we lose between 30 and 40 percent of

the new people who come into the service, people who cannot quite cut it, people who, for one reason or another, have to leave the service before they complete their first enlistment. So what we are trying to do is save that kind of money that the committee bill would give to those who just come into the service, for those who are staying in and who can be induced to stay in longer because of the increase in pay. We think this is extremely important.

Finally, the amendment offered by the gentleman from New York (Mr. ADDABBO), gives a 2-percent flexibility to the Pentagon so if, in fact, there is some reason why the targeting we are proposing here does not quite work out in a proper way, they have the flexibility to make it work in a proper way.

I would hope, Mr. Chairman, that the Members of this body would support the approach of the Committee on Appropriations. I think it is a reasoned approach, and I think it is a good approach.

But I want to say finally that if you do not, if you do not support what we are trying to do with targeting, you will still do a good day's work supporting the Committee on Armed Services.

(At the request of Mr. DICKS and by unanimous consent, Mr. EDWARDS of Alabama was allowed to proceed for 2 additional minutes.)

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Alabama. I yield to the gentleman from Washington (Mr. DICKS).

Mr. DICKS. Mr. Chairman, I want to compliment my colleague on the subcommittee for, as usual, an outstanding speech and a good summary of this important issue. I think we both agree we are so happy we are here arguing about the dimensions of a pay raise, not whether we ought to have one or not have one.

But I would take this opportunity to raise with the gentleman the fact that it seems to me a person who has the most concern of all of us in this country about this is the Army Chief of Staff, "Shy" Meyer, and he states: "Addressing this pay compression problem is absolutely essential," and that is a primary reason he supports the Appropriations Committee approach to the pay increase.

Of course, Admiral Hayward has said:

> We used to have an abundant number of chiefs. Today, you don't have the right numbers of chiefs or first class, and that is where your shortage is. You have translated the shortage from one of numbers to one of experience and talent at the same time that our ships, aircraft, and weapons are getting far, far more complex than they were a decade or two ago.

It seems to me that the people who really understand the problem of the All-Volunteer Force are saying that we have to address the shortfall of skilled people. I think this is what our pay increase does under the appropriations alternative. The gentleman from Alabama (Mr. EDWARDS) has had far more experience than I, but it seems to me that this is the problem that we really face in manning our services, and this is the way to address it.

Mr. EDWARDS of Alabama. I thank the gentleman for his contribution.

May I say, Mr. Chairman, as I understand it, right shortly, I hope we will be voting on this issue and a "yes" vote would be to vote for the Addabbo amendment which would be to target this pay raise from 7 to 22 percent, targeted mainly toward the skills in the service. A "no" vote, in effect, would be to go with the 14.3-percent across the board. I state this so Members clearly understand what they are doing. In either case, I do not think the servicemen will go wrong.

I yield back the balance of my time.

Mr. DICKS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Addabbo amendment.

Mr. Chairman, the House today has the opportunity to choose between two alternative methods of addressing needed increases in military compensation. We can either provide every member of the armed services with a 14.3-percent pay increase across the board, or we can target the pay raise to the areas of greatest demonstrated need. I strongly support the Appropriation Committee amendment to target our allocation of compensation increases.

The across-the-board approach is intended to return us to the same relationship between civilian and military pay that existed in 1972 when the Volunteer Force was created. It assumes that this 1972 relationship was the ideal relationship. While our best estimate of an appropriate level at the time, we now have nearly a decade of experience and should not blindly adhere to the decisions made at its inception. The Department, in fact, testified that since there is no precise "correct" pay comparability, it is fruitless to quibble about any year that should be used as a comparison basis.

There is, in fact, considerable debate about the size of the increase in compensation needed to achieve this so-called comparability. The Department, in testimony before our committee, indicated that with the institution of the variable housing allowance, increases in regular military pay since 1972 are within 1 percent of the increases in PATC pay. They further testified that "we do not pretend to have a precise or magic percentage increase in military pay that will achieve comparability."

In fact, the military and civilian work forces are so fundamentally different and their pay systems so complicated that any effort to define real comparability is doomed from the start.

But regardless of theoretical debates on comparability, we can see the real problems in military manpower. The most glaring for the readiness of our current forces are shortages in critical skill areas, and especially in senior noncommissioned officers. It is these shortages that lead to Army divisions being rated as unready, which force juggling of Navy crews to keep our ships at sea, and which lower the readiness of our most sophisticated aircraft.

By targeting a larger portion of the pay increase to these individuals, we can help reduce the already desperate situation we face in many skills, and insure that a maximum number of junior candidates remain in the service to fill these positions.

By providing more realistic compensation for noncommissioned officers, we can also help attract back into the service many who left in recent years because of uncompetitive pay levels. Such returns will meet the shortage sooner and will avoid the high cost of training these important individuals.

The targeted approach will also allow us to address the problem of pay compression between junior and senior enlisted personnel. Before the Vietnam war, the ratio between the pay of a senior NCO and a new recruit was 7 to 1. Today it is 3 to 1, and with each across-the-board pay raise, it increases in real terms, since the NCO's higher pay is also taxed at a higher rate. Army Chief of Staff "Shy" Meyer states that addressing this pay compression problem is absolutely essential. And that is a primary reason he supports the Appropriations Committee approach to the pay increase.

Advocates of across-the-board increases do not deny the importance of the skill shortages, but argue that bonuses and special pays can be used for skills that require additional compensation. Thus, on the one hand, they say they are for comparability. On the other hand, when it is pointed out that across-the-board increases inherently overcompensate some while undercompensating others, that way we should provide additional incentives to those it undercompensates through bonuses, and so forth, but make no correction for those it overcompensates. We simply cannot afford such wasteful ways of addressing military compensation. You cannot have your cake and eat it too.

Some argue that we should wait for the current large number of junior noncommissioned officers to proceed through the ranks to naturally make up the current shortfall. This argument ignores the fact that we must act to meet the problem now. A solution that will be achieved, perhaps, some years down the line will do little good if we are forced to fight today. It also minimizes the demands of plans to substantially expand the force, which will require additional NCO's as the first step. It ignores the trend toward a greater career force ratio. Gen. R. Dean Tice, Assistant Secretary of Defense for Military Personnel Policy, testified that "If military service

should become, for whatever reason, so attractive that more NCO's were willing to reenlist than we had spaces for them to fill, we would be in the enviable position of being able to: First, be more selective in whom we reenlist; and second, cut back on reenlistment bonuses. We are not at that point, and we will never have a surplus of NCO's." I, for one at least, would not be terribly disturbed if we were, in fact, able to provide compensation that would allow us to select the highest quality applicants to lead our troops in combat.

Some argue that our targeted plan would not provide enough of a pay increase to meet the recruiting needs of the Army. It must be remembered that a typical recruit moves up through the ranks in his first year sufficiently for his or her pay to increase about 16 percent. This does not take into account any enlistment bonus or other benefits. This bill, in fact, doubles the maximum enlistment bonus, and our committee has urged that the services, in particular the Army, better advertise the existence of these bonuses in their recruitment efforts.

More importantly, there is little evidence that increases in entry compensation have as significant an impact on recruitment as the private job market's variations. Simply put, we are recruiting on the margin. Of over 100,000 first termers in Army combat arms, only 25 had a college education. Marginal increases in pay for new recruits will not change this situation. If we want the All-Volunteer Force to attract those who have higher career ambitions, we will have to dramatically increase the incentives. I personally feel that a modified GI bill would be an important step in that direction. Another option would be to place some form of service requirement or incentive for obtaining regular student loans from the Federal Government.

Finally, our committee's hearings brought out the problems that we could face on a future mobilization with higher pay levels for new recruits that an across-the-board pay increase fosters. These considerations certainly deserve full examination in setting entry pay levels.

Meeting the personnel challenge is, in my judgment, the most important aspect of our efforts to improve our defense capabilities. Multibillion-dollar procurement programs will do little good if we do not have the leaders in the field to operate them and to train soldiers in their use. I do not think any of us advocating this amendment would claim it is perfect. We recognize that under the armed services bill there is some authority to reallocate the increase. But the Department of Defense has never shown a willingness to use this authority, and even if implemented fully, would only allow a 3.5-percent variation. Hopefully, in the future, the Department will be more willing to target compensation increases rather than simply trying to dump dollars on the problem. But until that commitment is made, it is up to us, in the Congress, to take the first step. We know we have to address the compression problem. This amendment does that. It is a start we can build on for the future.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. ADDABBO) as a substitute for the Appropriations Committee amendment.

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ADDABBO. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 170, noes 232, not voting 31, as follows:

[Roll No. 204]

| Foglietta | Nelson | Young (AK) |
| Frank | O'Brien | |
| Fuqua | Ottinger | |

□ 1650

The Clerk announced the following pairs:

On this vote:

Mr. Nelson for, with Mr. Crockett against.

Mr. O'Brien for, with Mr. Lee against.

Messrs. DYMALLY, APPLEGATE, BENEDICT, and KILDEE, and Mrs. BOGGS changed their votes from "aye" to "no."

Messrs. PHILIP M. CRANE, ALEXANDER, McCOLLUM, SAWYER, PATMAN, PERKINS, and BONKER changed their votes from "no" to "aye."

So the amendment offered as a substitute for the Appropriations Committee amendment was rejected.

The result of the vote was announced as above recorded.

□ 1650

The CHAIRMAN. The question is on the Appropriations Committee amendment.

The Appropriations Committee amendment was rejected.

AMENDMENT OFFERED BY MR. SKELTON

Mr. SKELTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SKELTON: Page 16, after line 3, add the following new section (and redesignate the succeeding section accordingly):

SPECIAL PAY FOR AIR WEAPONS CONTROLLERS ON AIRBORNE WARNING AND CONTROL SYSTEM (AWACS) AIRCRAFT

SEC. 11. (a) Subsection (a) of section 301 of title 37, United States Code, is amended—

(1) by striking out "or" at the end of clause (9);

(2) by striking out the period at the end of clause (10) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new clause:

"(11) involving frequent and regular participation in aerial flight by an officer (other than a warrant officer) who is serving as an air weapons controller crew member, as defined by the Secretary concerned, aboard an airborne warning and control system aircraft, as designated by such Secretary, and who is not entitled to incentive pay under section 301a of this title.".

(b) Subsection (c) of such section is amended—

(1) by inserting "(1)" before "For the performance"; and

(2) by adding at the end thereof the following new paragraph:

"(2) For the performance of hazardous duty described in clause (11) of subsection (a) of this section, an officer is entitled to monthly incentive pay as follows:

"YEARS OF SERVICE AS AN OFFICER AS COMPUTED UNDER SECTION 205

| Pay grade | 2 or less | Over 2 | Over 3 | Over 4 | Over 6 | Over 8 | Over 10 | Over 12 | Over 14 | Over 16 | Over 18 | Over 20 | Over 22 | Over 24 | Over 25 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 0–7 and above | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $110 |
| 0–6 | 225 | 250 | 300 | 350 | 400 | 400 | 400 | 400 | 400 | 400 | 370 | 340 | 310 | 280 | 250 |
| 0–5 | 200 | 250 | 300 | 350 | 400 | 400 | 400 | 400 | 400 | 400 | 370 | 340 | 310 | 280 | 250 |
| 0–4 | 175 | 225 | 275 | 335 | 400 | 400 | 400 | 400 | 400 | 400 | 370 | 340 | 310 | 280 | 250 |
| 0–3 | 125 | 156 | 188 | 206 | 400 | 400 | 400 | 400 | 400 | 400 | 350 | 300 | 300 | 275 | 250 |
| 0–2 | 125 | 156 | 188 | 206 | 250 | 300 | 300 | 300 | 300 | 300 | 300 | 300 | 300 | 275 | 220 |
| 0–1 | 125 | 156 | 188 | 206 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 200.". |

Mr. SKELTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. SKELTON. Mr. Chairman, I wish to propose an amendment to the bill presently under consideration that will increase the flying pay for air weapons controllers performing aircrew duties aboard airborne warning and control system aircraft. Increased incentive pay is now justified to reduce the severe shortages of these highly trained professionals who today perform essential and critical duties aboard our AWACS aircraft. The Air Force's ability to provide enough highly skilled people to meet the AWACS global mission is now in jeopardy as a result of increasing requirements and declining weapons controller volunteers.

For example, the Air Force had 5 AWACS aircraft in 1977, 24 aircraft today, 33 by 1985. Accordingly, weapons controller authorizations will increase from 27 in 1976 to about 1,000 in the mideighties. However, while demand will increase, the supply of experienced volunteers has not increased proportionately. Today, the Air Force is 20-percent short captains, majors, and lieutenant colonels in weapons controller duties. In the past several years, field grade volunteers have been almost nonexistent. For example, since the beginning of fiscal year 1980, the Air Force had only 17 field grade volunteers for 78 mission crew commander positions—about a 20-percent fill rate. As a result of this deficit, the Air Force has been forced to accept inexperienced lieutenants to fill senior weapons controller positions. One of the major reasons for the shortage of volunteers is the nature of AWACS duty. AWACS duty is arduous and perceived by weapons controllers as having few rewards. In the past 3 years, the AWACS deployed on short notice around the globe including Iceland, Japan, Korea, Egypt, Saudia Arabia, and West Germany. These deployments translated to lengthy periods of family separation with controllers averaging 150 days per year in temporary tours of duty. In the troubled decade ahead, we can expect our worldwide AWACS commitment to expand, thereby exacerbating the weapons controller manning problem.

The major reason for the shortage of volunteers, however, is the great disparity between the flight pay paid to pilots and that paid to weapons controllers. This is a major disincentive. While the pilot and navigator receive up to $306 per month as incentive, weapons controllers receive only $110 per month. Prior to 1974, all commissioned aircrew members received the same rates of flying pay. The rates ranged up to $245 per month depending upon grade and experience. With the enactment of the Aviation Career Incentive Act in 1974, aircrew members other than pilots and navigators were excluded from the higher rates, and were authorized to receive only $110 per month—a significant cut. The existing hazardous duty incentive pay rate dates from 1955, since then, the Consumer Price Index has tripled. Moreover, in 1955, the hazardous duty incentive pay of a captain exceeded 25 percent of his basic pay; today, this incentive pay is less than 6 percent of basic pay. Today's hazardous duty incentive pay simply is not enough to attract and keep the people we need, to overcome the hardships all aircrew members endure—the irregular schedules, long periods of no-notice family separation, and the hazards involved in flying close to international trouble spots.

Mr. Chairman, we are on the horns of a dilemma. On the one hand, we have the AWACS, the most sophisticated surveillance aircraft in the world; a proven system which, through its many deployments since 1977, has proven to be an invaluable instrument of national policy. On the other hand, we are failing to attract and retain the very people who can insure the AWACS remains an effective instrument of national policy. It is time to address the problem and enhance hazardous duty incentive pay is the optimum vehicle.

The annual DOD cost of enhanced hazardous duty incentive pay would be less than $1.3 million. I am firmly convinced that the increased readiness that will result is a sound investment in national defense and I strongly urge your support.

Mr. NICHOLS. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from Alabama.

Mr. NICHOLS. Mr. Chairman, I thank the gentleman for yielding.

I would like to commend the gentleman from Missouri for bringing up this matter at this particular time.

On our side of the aisle, we have had an opportunity to review the amendment and we have no objection to its substance. There are a number of ways of addressing this particular problem, but I think the position of the gentleman from Missouri is undoubtedly the best.

I would urge Members to accept the amendment.

Mr. MITCHELL of New York. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to my friend, the gentleman from New York.

Mr. MITCHELL of New York. Mr. Chairman, I thank the gentleman for yielding.

I, too, would like to join with my chairman in commending the gentleman on his amendment. I think it addresses a serious inequity in incentive pay.

I am pleased to say that it is not going to cost very much money, so here on this side we are pleased to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. SKELTON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SKELTON

Mr. SKELTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SKELTON: Page 16, line 3, insert the following new section (and redesignate the succeeding section accordingly):

INCREASE IN NUMBER OF SENIOR RESERVE OFFICERS' TRAINING CORPS SCHOLARSHIPS

SEC. 11. Section 2107(h) of title 10, United States Code, relating to financial assistance for specially selected members, is amended—

(1) by striking out "6,000" and inserting in lieu thereof "8,000"; and

(2) by striking out "6,500" and inserting in lieu thereof "9,500".

Mr. SKELTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. SKELTON. Mr. Chairman, my amendment would simply increase the authorized number of senior Reserve Officers' Training Corps scholarships for the Navy and the Air Force.

If the Members recall, in the 96th Congress in Public Law 96-357 the number of authorized senior ROTC scholarships for the Army was increased to 12,000. This was to address a shortage of junior officers in the Army Reserve and Army National Guard.

My amendment would increase the number of authorized scholarships for the Navy by 2,000 and for the Air Force by 3,000. Currently each of these services is having difficulty meeting its requirements for engineering and scientific officer accessions. The Navy, in particular, is having difficulty in recruiting engineers and other technically qualified officers for the nuclear power field. The Air Force is already 1,100 engineers short of requirements in fields such as electrical engineering and aeronautical and astronautical engineering. Increasing the number of scholarships will substantially assist recruiting qualified individuals for these critical skill areas.

As the Members recall, ROTC scholarships provide tuition, fees, books, laboratory expenses, and $100 per month for personal expenses for selected senior ROTC students.

Mr. Chairman, the language of this amendment is included in the Senate pay bill that was passed by the Senate last Friday.

I urge adoption of the amendment.

Mr. NICHOLS. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from Alabama.

Mr. NICHOLS. Mr. Chairman, I have examined the gentleman's amendment. It is very similar, maybe virtually the same thing as an amendment that was added on the Senate side.

I am familiar with the gentleman's long-time interest in the ROTC program, and on our side of the aisle we are prepared to accept the amendment.

Mr. MITCHELL of New York. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from New York.

Mr. MITCHELL of New York. Mr. Chairman, I thank the gentleman from Missouri for yielding.

I do understand the need for this increase. I feel it is a good investment in the defense of our Nation for the future.

I would observe that it is not going to be a big cost and we can accept it on this side of the aisle.

Mr. SKELTON. I thank the gentleman. I appreciate the gentleman's concern.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. SKELTON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. NICHOLS

Mr. NICHOLS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NICHOLS: Page 9, after the matter following line 22, insert the following new section (and redesignate the succeeding sections accordingly):

RATE FOR MEALS PORTION OF PER DIEM FOR CERTAIN MEMBERS AWAY FROM DESIGNATED POST OF DUTY

SEC. 6. Section 404(b) of title 37, United States Code, is amended by adding at the end thereof the following new sentence:

"In prescribing such conditions and allowances, the Secretaries concerned shall provide that a member who is performing travel under orders away from his designated post of duty (other than a member on field duty or sea duty, as defined in regulations prescribed under section 402(e) of this title, or a member of a unit operating in a overseas area in a case in which the Secretary concerned has determined that unit messing is essential to the accomplishment of that unit's training and readiness) shall, whenever a per diem is authorized under clause (2) of subsection (d) of this section, be paid for the meals portion of that per diem in a cash amount at a rate that is not less than the rate established under section 1011(a) of this title for meals sold to members.".

Mr. NICHOLS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. NICHOLS. Mr. Chairman, this amendment is a clarifying amendment to a provision passed by the Congress last year. One of the provisions of the massive Defense Officer Personnel Management Act (DOPMA) was related to what we called per diem equity.

Simply, this provision called for equal treatment of officers and enlisted personnel when they were assigned on temporary duty. Before this provision was enacted last year, officers received both their basic allowance for subsistence and the portion of per diem related to subsistence. If a mess was available for the officer, his per diem was less, being sufficient to cover the cost of eating in the mess. If he ate in the mess, he broke even; if he did not, he incurred additional expenses that were not reimbursed.

The intent of the amendment in DOPMA was to afford this same treatment to enlisted personnel. The amendment I offer today simply clarifies this original intent.

I urge the Members to accept it.

Mr. MITCHELL of New York. Mr. Chairman, will the gentleman yield?

Mr. NICHOLS. I yield to the gentleman from New York.

Mr. MITCHELL of New York. Mr. Chairman, I thank the gentleman for yielding.

We have no objection to the amendment on this side of the aisle, Mr. Chairman, to the clarifying amendment. The chairman has accurately stated the intent of the amendment. It is a needed amendment. We support it on this side of the aisle.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama (Mr. NICHOLS).

The amendment was agreed to.

● Mr. RATCHFORD. Mr. Chairman, I rise in support of the Armed Forces Pay Act of 1981. This House is all too familar with the difficulties the military services have experienced in recent years in attracting enough high-quality enlisted recruits into active-duty service, and in retaining many career personnel. These problems have been particularly acute with regard to the hazardous or highly technical positions.

While the primary thrust of the administration has been the procurement of massive new weapons systems, we must not forget that we need a large and capable conventional force to permit responses to threats without resorting to the strategic nuclear war that we so greatly fear. I for one am unalterably committed to the concept of the All-Volunteer Force, but do indeed recognize that this system will

continue to falter unless we adequately address serious recruiting and Reserve shortfalls, and significant problems with the quality or our Active Force.

The most effective way to solve these existing problems is through a two-pronged effort. As represented in this measure before us today, we must finally make military pay comparable to that of the private sector so that we can attract more enlistees to military service. Pay caps imposed in recent years have resulted in military pay lagging behind private sector pay by 5.3 percent. Not only will this bill eliminate that critical differential, it will grant the President the authority to reallocate up to 25 percent of the increase in basic pay to selected years and grades of service to meet particular service needs. Second, by increasing enlistment and reenlistment bonuses for personnel in critical skill positions we will be able to remedy the most serious problem of the military identified in recent days—that of attracting and retaining the individual to fill positions that require technical skills that many enlistees are not capable of filling. Such individuals have been leaving the military in droves to assume technician positions in the private sector that provide substantially more pay and attractive benefits, leaving several branches of the military woefully short on technically skilled personnel.

The bill also contains provisions for the extension of other special bonuses for individuals charged wth unusually hazardous duties or those performed under unusually severe working conditions. Other bonuses for engineers and other officers possessing critical scientific skills, as well as for travel and transportation, will help alleviate the financial hardships that military service sometimes necessitates. Only through the adoption of this bill, Mr. Chairman, can we keep our promise of restoring the comparability of military pay to that of the private sector as it existed in 1972, and extend the kind of special bonuses that will ease greatly the problems we have experienced in recruitment and retention of enlistees, particularly those with valuable technical skills. If we come up short on this effort we will only perpetuate inherent problems of the All-Volunteer Force to the point that our conventional capability will be undermined and the doubters in this administration will have all they need to force a resumption of the draft upon us.●

---

□ 1700

Are there further amendments? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MINISH) having assumed the chair, Mr. BINGHAM, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3380) to increase the pay and allowances of members of the Armed Forces, pursuant to House Resolution 162, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 396, nays 1, not voting 36, as follows:

[Roll No. 205]

□ 1710

The Clerk announced the following pairs:

Mr. Biaggi with Mr. O'Brien.
Mr. AuCoin with Mr. Young of Alaska.
Mr. Nelson with Mr. Rudd.
Mr. Pepper with Mr. Dougherty.
Mr. Price with Mr. Courter.
Mr. Crockett with Mr. Burgener.
Mr. Phillip Burton with Mr. Nelligan.
Mr. Boland with Philip M. Crane.
Mr. de la Garza with Mr. Johnston.
Mr. Long of Louisiana with Mr. Gilman.
Mr. Fuqua with Mr. Rhodes.
Mr. Frank with Mr. Vander Jagt.
Mr. Ertel with Mr. Foglietta.
Mr. Savage with Mr. Fithian.
Mr. Santini with Mr. Lee.
Mr. Walgren with Mr. Ottinger.
Mr. Goldwater with Mr. Lujan.

Mr. DENARDIS changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. NICHOLS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1181) to amend titles 10 and 37, United States Code, to increase the pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1181

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Uniformed Services Pay and Benefits Act of 1981".

INCREASE IN BASIC PAY AND ALLOWANCES

SEC. 2. (a) In this section "uniformed services" has the same meaning given to that term by section 101(3) of title 37, United States Code.

(b) Any adjustment required under the provisions of section 1009 of title 37, United States Code, relating to adjustments in the compensation of members of the uniformed services, that would otherwise first become effective beginning with any pay period in fiscal year 1982 shall not become effective. Effective with the first pay period beginning after September 30, 1981, the rates for each element of compensation specified in section 1009(a) of such title shall be as provided in subsection (c) of this section.

(c)(1) The monthly basic pay authorized members of the uniformed services, based on years of service computed under section 205 of title 37, United States Code, shall be as follows:

"COMMISSIONED OFFICERS[1]

"[1] Payable to a member without dependents who, under section 403 (b) or (c) of title 37, United States Code, is not entitled to receive a basic allowance for quarters.".

MONTHLY PAY OF CADETS AND MIDSHIPMEN

SEC. 3. Section 203(c)(1) of title 37, United States Code, is amended by striking out "$313.20" and inserting in lieu thereof "$448.80".

SPECIAL PAY FOR CERTAIN HAZARDOUS DUTY

SEC. 4. (a) Section 301(a) of title 37, United States Code, is amended—

(1) by striking out "or" at the end of clause (9); and

(2) by striking out clause (10) and inserting in lieu thereof the following:

"(10) involving frequent and regular participation in flight operations on the deck of an aircraft carrier or on a ship other than an aircraft carrier from which aircraft are launched;

"(11) involving frequent and regular exposure to highly toxic pesticides or involving laboratory work which utilizes live dangerous viruses or bacteria; or

"(12) involving the servicing of aircraft or missiles with highly toxic fuels or propellants.".

(b) The table contained in section 301(b) of such title is amended to read as follows:

"ENLISTED MEMBERS

(c) Section 301(c) of such title is amended—

(1) by striking out "or (10)," and inserting in lieu thereof "(10), (11), or (12),"; and

(2) by striking out "$55" and inserting in lieu thereof "$83".

AVIATION CAREER INCENTIVE PAY

SEC. 5. (a) Paragraph 5 of section 301a(a) of title 37, United States Code, is amended by adding at the end thereof the following new sentence: "All entitlement to continuous monthly incentive pay ceases for officers in pay grades O-1 through O-10 upon completion of 25 years of officer service, but officers in pay grades O-1 through O-6 remain entitled to monthly incentive pay in the amount set forth in subsection (b)(1) of this section for an officer with over 25 years of officer service for the performance of subsequent operational flying duty.".

(b)(1) The tables in clause (1) of section 301a(b) of such title are amended to read as follows:

"Phase I

| "Years of aviation service (including flight training) as an officer: | Monthly rate |
|---|---|
| 2 or less | $125 |
| Over 2 | 156 |
| Over 3 | 188 |
| Over 4 | 206 |
| Over 6 | 400 |

"Phase II

| "Years of service as an officer as computed under section 205: | |
|---|---|
| Over 18 | $370 |
| Over 20 | 340 |
| Over 22 | 310 |
| Over 24 | 280 |
| Over 25 | 250". |

(2) The table in clause (2) of section 301a(b) of such title is amended to read as follows:

| "Years of aviation service as an officer: | Monthly rate |
|---|---|
| 2 or less | $125 |
| Over 2 | 156 |
| Over 3 | 188 |
| Over 4 | 206 |
| Over 6 | 400". |

YEARS OF SERVICE COMPUTATION FOR SUBMARINE DUTY INCENTIVE PAY

SEC. 6. Paragraphs (3) and (4) of section 301c(a) of title 37, United States Code, are amended by inserting ", not including, in the case of an officer, periods as an enlisted member prior to initial appointment as an officer" after "title", each place it appears.

SPECIAL PAY FOR DIVING DUTY

SEC. 7. Section 304 of title 37, United States Code, is amended to read as follows:

**"§304. Special pay: diving duty**

"(a) Under regulations prescribed by the Secretary concerned, a member of a uniformed service who is entitled to basic pay is entitled to special pay, in the amount set forth in subsection (b) of this section, for periods during which such member—

"(1) is assigned by orders to the duty of diving;

"(2) is required to maintain proficiency as a diver by frequent and regular dives; and

"(3) actually performs diving duty.

"(b) Special pay payable under subsection (a) of this section shall be paid at the rate of not more than $200 a month, in the case of an officer, and at the rate of not more than $300 a month, in the case of an enlisted member.

"(c) A member may be paid special pay under this section and incentive pay under section 301 of this title for the same period of service only if that member is assigned by orders to a hazardous duty described in section 301(a) of this title in addition to a duty described in subsection (a) of this section. However, if a member is paid special pay under this section, that member is not entitled to more than one payment of incentive pay under section 301 of this title.".

ENLISTMENT BONUSES

SEC. 8. (a) Section 308a(a) of title 37, United States Code, is amended—

(1) by striking out "$5,000" and inserting in lieu thereof "$7,500"; and

(2) by striking out the second sentence and inserting in lieu thereof the following: "The bonus shall be paid in periodic installments, as determined by the appropriate Secretary, except that the first installment may not exceed $4,000 and the remainder shall be paid in equal periodic installments which may not be paid less frequently than once every 3 months.".

(b)(1) Chapter 5 of title 37, United States Code, is amended by inserting after section 308e the following new section:

**"§308f. Special pay: bonus for enlistment in the Army**

"(a) Under regulations prescribed by the Secretary of the Army, a person—

"(1) who is a high school graduate or has been awarded high school education equivalency credentials;

"(2) whose score on the Armed Forces Qualification Test is at or above the fiftieth percentile; and

"(3) who enlists in the Army for a period of at least 3 years in a skill designated as critical,

may be paid a bonus in an amount prescribed by the Secretary of the Army, but not more than $3,000. The bonus may be paid in a lump sum or in equal periodic installments, as determined by the Secretary of the Army.

"(b)(1) Under regulations prescribed by the Secretary of the Army, a person who voluntarily, or because of his misconduct, does not complete the term of enlistment for which a bonus was paid to him under this section or a person who is not technically qualified in the skill for which a bonus was paid to him under this section (other

than a person who is not qualified because of injury, illness, or other impairment not the result of his own misconduct) shall refund to the United States that percentage of the bonus that the unexpired part of his enlistment is of the total enlistment period for which the bonus was paid.

"(2) An obligation to reimburse the United States imposed under paragraph (1) of this subsection is for all purposes a debt owed to the United States.

"(3) A discharge in bankruptcy under title 11 that is entered less than 5 years after the termination of an agreement under this section does not discharge the member signing such agreement from a debt arising under such agreement or under paragraph (1) of this subsection. This paragraph applies to any case commenced under title 11 after September 30, 1981.

"(c) No bonus may be paid under this section with respect to any enlistment in the Army made after September 30, 1982.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 308e the following new item:

"308f. Special pay: bonus for enlistment in the Army.".

(c) The amendments made by this section shall apply to enlistments or reenlistments made after September 30, 1981.

ACTIVE-SERVICE AGREEMENTS FOR NUCLEAR QUALIFIED OFFICERS

SEC. 9. Notwithstanding subsections (a) and (b) of section 312 of title 37, United States Code, and under regulations prescribed by the Secretary of the Navy, the Secretary may permit an officer of the naval service who is performing obligated service as the result of an active service agreement executed under such section before January 1, 1981, to cancel that active-service agreement effective on the day before any anniversary of the day on which that agreement was executed and execute a new active-service agreement under such section for one period of not more than four years. Any such cancellation of an existing agreement and execution of a new agreement may be effective on the day before an anniversary date occurring on or after January 1, 1981.

TRAVEL AND TRANSPORTATION ALLOWANCES

SEC. 10. (a)(1) Section 404 of title 37, United States Code, is amended by striking out "Under regulations prescribed by the Secretaries concerned" in subsection (a) and inserting in lieu thereof "Except as provided in subsection (f) of this section and under regulations prescribed by the Secretaries concerned".

(2) Subsection (c) of such section is amended—

(A) by inserting "(1)" after "(c)";

(B) by redesignating clauses (1) and (2) as (A) and (B), respectively;

(C) by inserting "and as provided in paragraph (2)" before ", select his home"; and

(D) by adding at the end thereof the following new paragraph:

"(2) A member described in paragraph (1) of this subsection may select as his home—

"(A) any place within the United States;

"(B) the place outside the United States from which such member was called or ordered to active duty to his first duty station; or

"(C) any other place.

However, if a member selects as his home a place described in clause (C) of the preceding sentence, the travel and transportation allowances authorized by subsection (a) of this section may not exceed the allowances which would be payable if the place selected as his home were in the United States (other than Hawaii or Alaska).".

(3) Subsection (f) of such section is amended to read as follows:

"(f)(1) The travel and transportation allowances authorized under this section may be paid or provided to a member upon his separation from the service or release from active duty for travel which is actually performed and only if—

"(A) the member, on the date of his separation from the service or release from active duty, has served on active duty for a period of time equal to at least 90 percent of the period of time for which the member initially enlisted or otherwise initially agreed to serve; and

"(B) the member's separation from the service or release from active duty is under honorable conditions, as determined by the Secretary concerned.

"(2) Clauses (A) and (B) of paragraph (1) of this subsection shall not apply to any member—

"(A) described in subsection (c)(1) of this section;

"(B) discharged under section 1173 of title 10; or

"(C) separated from the service or released from active duty under unusual circumstances, as determined by the Secretary concerned.".

(b)(1) Subsection (a) of section 406 of title 37, United States Code, is amended—

(A) by inserting "(1)" after "(a)";

(B) by inserting "paragraph (2) of this subsection and" before "subsection (i) of this section"; and

(C) by adding at the end thereof the following new paragraphs:

"(2) The transportation and allowances authorized under paragraph (1) of this subsection may be paid or provided to a member upon his separation from the service or release from active duty only if—

"(A) the member, on the date of his separation from the service or release from active duty, has served on active duty for a period of time which is equal to at least 90 percent of the period of time for which the member initially enlisted or otherwise initially agreed to serve; and

"(B) the member's separation from the service or release from active duty is under honorable conditions, as determined by the Secretary concerned.

The requirements of this paragraph shall not apply to any member (i) described in subsection (g)(1) of this section, (ii) discharged under section 1173 of title 10, or (iii) separated from the service or released from active duty under unusual circumstances, as determined by the Secretary concerned.

"(3) The allowances authorized under this subsection may be paid in advance.".

(2) Subsection (b) of such section is amended—

(A) by inserting "(1)" after "(b)";

(B) by striking out "In" and inserting in lieu thereof "Except as provided in paragraph (2) of this subsection, in";

(C) by adding at the end of paragraph (1), as designated by clause (A) of this paragraph, the following new sentences: "Temporary storage in excess of 180 days may be authorized. In those cases of permanent change of station in which the Secretary concerned has authorized transportation under section 2634 of title 10 of one motor vehicle owned by the member or his dependents and for the personal use of the member or his dependents, the member is entitled to transportation of that motor vehicle to the point at which transportation authorized under section 2634 of title 10 commences and from the point at which transportation authorized under such section terminates, or to reimbursement therefor."; and

(D) by adding at the end thereof the following new paragraph:

"(2)(A) The transportation and allowances authorized under paragraph (1) of this subsection may be paid or provided to a member upon his separation from the service or release from active duty only if—

"(i) the transportation (including the packing, crating, drayage, temporary storage, and unpacking) is commenced not later than 90 days after the date of such separation from the service or release from active duty;

"(ii) the member, on the date of his separation from the service or release from active duty, has served on active duty for a period of time which is equal to at least 90 percent of the period of time for which the member initially enlisted or otherwise initially agreed to serve; and

"(iii) the member's separation from the service or release from active duty is under honorable conditions, as determined by the Secretary concerned.

The requirements of this paragraph shall not apply to any member (i) described in subsection (g)(1) of this section, (ii) discharged under section 1173 of title 10, or (iii) separated from the service or released from active duty under unusual circumstances, as determined by the Secretary concerned.

"(B) If nontemporary storage is authorized under subsection (d) of this section for a member to whom subparagraph (A) of this paragraph applies, the 90-day period provided for in clause (i) of such subparagraph shall not begin until such authorization for nontemporary storage expires.".

(3) Subsection (g) of such section is amended—

(A) by inserting "(1)" after "(g)";

(B) by redesignating clauses (1) and (2) as (A) and (B), respectively; and

(C) by striking out all after the second sentence and inserting in lieu thereof the following new paragraphs:

"(2) If a shipment is made to a home described in section 404(c)(2)(C) of this title or to a location other than the home selected by the member and the cost of such shipment is in excess of that which would have been incurred if the shipment had been made to a location in the United States (other than Hawaii or Alaska), the member shall pay that excess cost.

"(3) If a member authorized to select a home under section 404(c) of this title accrues that right or any entitlement under this subsection but dies before he exercises it, that right or entitlement accrues to and may be exercised by his surviving dependents, or his baggage and household effects may be shipped to the home of the person legally entitled thereto if there are no surviving dependents. However, if a shipment is made under circumstances described in paragraph (2) of this subsection in which the member would have been required to pay the excess cost of such shipment, the surviving dependents or the person legally entitled to the baggage and household effects, as the case may be, shall pay that excess cost.

"(4) Subsection (h) of such section is amended by striking out "and for this or his dependent's personal use" in clause (2) and inserting in lieu thereof "or his dependents and for the personal use of the member or his dependents.".

(c)(1) Except as provided in paragraphs (2), (3), and (4) of this subsection, all amendments made by this section shall take effect on October 1, 1981, and shall apply to members who are separated from the service or released from active duty on or after October 1, 1981.

(2) The amendments made by subsection (b)(1)(C) which add a new paragraph (3) to section 406(a) of title 37, United States Code, shall take effect on the date of enactment of this Act.

(3) The amendments made by subsection (a)(2) and subsection (b)(3) of this section shall take effect on October 1, 1981, and shall apply to members who are retired, placed on the temporary disability retired list, discharged, or involuntarily released on or after October 1, 1981, except that such amendments shall not apply to any member who before October 1, 1981, had completed eighteen years of active service.

(4) The amendments made by subsection (b)(2)(C) of this section shall take effect on the date of enactment of this Act.

TEMPORARY LODGING EXPENSES

SEC. 11. (a)(1) Chapter 7 of title 37, United States Code, is amended by inserting after section 404 the following new section:

"§ 404a. Travel and transportation allowances: temporary and lodging expenses

"(a) Under regulations prescribed by the Secretaries concerned, a member of a uniformed service who is ordered to make a change of permanent station from any duty station to a duty station in the United States (other than Hawaii or Alaska) may be paid or reimbursed for subsistence expenses actually incurred by the member and the member's dependents during a period not exceeding four days while occupying temporary quarters incident to that change of permanent station.

"(b) Regulations prescribed under subsection (a) of this section shall prescribe average daily subsistence rates for purposes of this section for the member and for each dependent. Such rates may not exceed the maximum per diem rates prescribed by or under section 404(d) of this title for the area where the temporary quarters are located. However, a member may not be paid or reimbursed more than $110 a day under this section.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 404 the following new item:

"404a. Travel and transportation allowances: temporary lodging expenses.".

(b) Section 411(a) of such title is amended by inserting "404a," after "(d)-(f),".

ADVANCE PAYMENT OF EVACUATION ALLOWANCES

SEC. 12. Section 405a(a) of title 37, United States Code, is amended by inserting after the second sentence the following new sentence: "Such allowances may be paid in advance.".

ADVANCE PAYMENT OF DISLOCATION ALLOWANCE

SEC. 13. Section 407(a) of title 37, United States Code, is amended by adding at the end thereof the following new sentence: "An allowance payable under this section may be paid in advance.".

TRAVEL AND TRANSPORTATION FOR MEMBERS SERVING CONSECUTIVE ASSIGNMENTS OVERSEAS

SEC. 14. Section 411b(a) of title 37, United States Code, is amended—

(1) by inserting "(1)" after "(a)";

(2) by inserting "who is ordered to a consecutive tour of duty at the same duty station or" after "District of Columbia" the first time it appears; and

(3) by adding at the end thereof the following new paragraph:

"(2) If, because of military necessity, a member authorized travel and transportation allowances under this subsection is denied leave between the two tours of duty overseas, the member shall be authorized to use such travel and transportation allowances from his current duty station at the first time the member is granted leave.".

ENVIRONMENTAL AND EMERGENCY TRAVEL

SEC. 15. (a) Chapter 7 of title 37, United States Code, is amended by inserting after section 411b the following new sections:

"§411c. Travel and transportation allowances: travel performed in connection with leave from certain stations in foreign countries

"(a) Under uniform regulations prescribed by the Secretaries concerned, a member of a uniformed service, while serving at a duty station outside the United States in an area specifically designated for purposes of this section by the Secretary concerned, and each dependent of such member authorized to reside at his duty station, may be paid for or provided transportation—

"(1) to another location outside the United States having different social, climatic, or environmental conditions than those at the duty station at which the member is serving; or

"(2) to a location in the United States.

"(b) The transportation authorized by this section is limited to transportation of the member and each dependent of the member for one roundtrip during any continuous two-year tour and two roundtrips during any continuous three-year tour.

"§411d. Travel and transportation allowances: transportation incident to certain emergencies for members stationed abroad

"(a) Under uniform regulations prescribed by the Secretaries concerned, transportation for a member of a uniformed service stationed outside the United States (other than Hawaii and Alaska) may be provided from the area of the member's duty station to the United States, Puerto Rico, the Virgin Islands, or the possessions of the United States, incident to a personal emergency of the member.

"(b) Transportation under this section may be authorized only upon a determination that Government transportation is not reasonably available, considering the nature of the personal emergency involved. The cost of transportation authorized under this section may not exceed the cost of Government-procured commercial air travel from the international airport nearest the location of the member at the time notification of the personal emergency is received or the international airport nearest the member's duty station—

"(1) to the international airport within the United States (other than Hawaii and Alaska) closest to the international airport from which the member departed; or

"(2) to an airport in Alaska, Hawaii, Puerto Rico, the Virgin Islands, or the possessions of the United States, as determined by the Secretary concerned,

and return to either the international airport from which the member departed or to the international airport nearest the duty station of the member.

"(c) In this section, 'personal emergency of the member' means the death, serious injury, or serious illness of—

"(1) the spouse of the member;

"(2) a child of the member (including a stepchild, an adopted child, or an illegitimate child whose alleged member-parent has been judicially decreed to be the parent of the child or judicially ordered to contribute to the child's support, or whose parentage has been admitted in writing by the member);

"(3) a parent of the member (including a stepparent, parent by adoption, or any person, including a former stepparent, who has stood in loco parentis to the member at any time for a continuous period of at least five years before the member became 21 years of age); or

"(4) a brother or sister of the member (including a stepbrother or stepsister, a half brother or half sister, or a brother or sister through adoption).

"§411e. Travel and transportation allowances: transportation incident to certain emergencies for members performing temporary duty

"(a) Under uniform regulations prescribed by the Secretaries concerned, a member of a uniformed service who is performing temporary duty away from his permanent duty station or is assigned to a ship or unit operating away from its home port may be provided transportation in kind, reimbursement therefore, or a monetary allowance at the rate prescribed in such regulations, from his place of temporary duty or his ship or unit to his permanent duty station, the home port of the ship or unit, or any other location, and return (if applicable), incident to a personal emergency of the member.

"(b) Transportation under this section may be authorized only upon a determination that Government transportation is not reasonably available, considering the nature of the personal emergency involved. The cost of transportation authorized under this section may not exceed the cost of Government-procured commercial air travel from the member's place of temporary duty or ship or unit to the member's permanent duty station or the home port of the ship or unit, and return (if applicable).

"(c) In this section, 'personal emergency of the member' means the death, serious injury, or serious illness of a dependent of the member.".

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 411b the following new items:

"411c. Travel and transportation allowances: travel performed in connection with leave from certain stations in foreign countries.

"411d. Travel and transportation allowances: transportation incident to certain emergencies for members stationed abroad.

"411e. Travel and transportation allowances: transportation incident to certain emergencies for members performing temporary duty.".

UNIFORM ALLOWANCES AND ADVANCE PAY FOR MEMBERS OF THE ARMED FORCES HEALTH PROFESSIONS SCHOLARSHIP PROGRAM

SEC. 16. (a) Subsection (a) of section 415 of title 37, United States Code, is amended—

(1) by striking out "or" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new paragraph:

"(4) upon reporting for the first period of active duty required by section 2121(c) of title 10 as a member of the Armed Forces Health Professions Scholarship program.".

(b) Section 1006 of such title is amended by adding at the end thereof the following new subsection:

"(i) Under regulations prescribed by the Secretary concerned, not more than one month's pay may be paid in advance to a member of the Armed Forces Health Professions Scholarship program upon reporting for a period of active duty required by section 2121(c) of title 10.".

MILITARY JUSTICE AMENDMENTS

SEC. 17. (a) Chapter 40 of title 10, United States Code, is amended—

(1) in section 701(a)—

(A) by striking out "and" at the end of clause (2);

(B) by striking out the period at the end of clause (3) and inserting in lieu thereof "; and"; and

(C) by adding after clause (3) the following new clause:

"(4) involuntary leave required to be taken under section 706 of this title.";

(2) by adding at the end thereof the following new sections:

"§706. Involuntary leave: appellate review of certain court-martial convictions

"(a) Under regulations prescribed by the Secretary concerned, a member of an armed force who has been sentenced by court-martial may be required to take leave pending completion of action under subchapter IX of chapter 47 of this title if the sentence, as approved by the officer exercising general court-martial jurisdiction under section 864 or 865 of this title, includes an unsuspended dismissal or dishonorable or bad-conduct discharge. The member may be required to begin such involuntary leave at any time on or after the date on which such sentence is approved by the officer exercising general court-martial jurisdiction. Such leave may be continued until any time on or before the date on which action is completed under subchapter IX of chapter 47 of this title.

"(b) Any period of leave required to be taken under this section shall be charged first against any accrued leave to the member's credit on the day before the day such involuntary leave begins, unless the member elects to be paid for such accrued leave under subsection (c). If a member does not elect to be paid for such accrued leave under subsection (c) or does not have sufficient accrued leave to his credit to cover the total period of involuntary leave, the leave not covered by accrued leave shall be charged as excess leave. If a member elects to be paid for accrued leave under subsection (c), the total period of involuntary leave shall be charged as excess leave.

"(c)(1) A member who is required to take leave under this section and who has accrued leave to his credit on the day before the day such leave begins may elect to be paid for such accrued leave on the basis of the basic pay to which he was entitled on the day before the day such involuntary leave begins or, if he does not so elect, is entitled to pay and allowances during any period of such accrued leave required to be taken under this section.

"(2) Except as provided in paragraph (1) and in section 707 of this title, a member shall not accrue or receive any pay or allowances during any period of involuntary leave required to be taken under this section.

"(d) No member required to take leave under this section shall become entitled to any right or benefit under section 2021 of title 38, United States Code, solely because of any employment during such leave.

"(e) The provisions of section 974 of this title shall not apply to any member required to take involuntary leave under this section during any period of such involuntary leave.

**"§707. Payment for excess leave: disapproval of certain court-martial sentences**

"(a) A member—

"(1) who is required to take involuntary leave under section 706 of this title, any period of which is charged as excess leave; and

"(2) whose sentence by court-martial to dismissal or dishonorable or bad-conduct discharge is set aside or disapproved by a Court of Military Review under section 866 of this title or by the United States Court of Military Appeals under section 867 of this title,

shall be paid, as provided in subsection (b), for the period of leave charged as excess leave, unless a rehearing or new trial is ordered and a dismissal or dishonorable or bad-conduct discharge is included in the result of the rehearing or new trial and such dismissal or discharge is later executed.

"(b) A member entitled to be paid under this section shall be deemed, for purposes of this section, to have accrued pay and allowances on each day of involuntary leave charged as excess leave (except days of accrued leave for which the member has been paid under section 706(c)(1) of this title and which have been charged as excess leave). Such pay and allowances shall be deemed to have accrued in the lower of the pay grade held by the member on the day before the date his court-martial sentence was approved by the convening authority, or any lower pay grade to which the member was reduced as a result of the court-martial sentence (including any reduction under section 858a of this title) if such reduction has not been set aside, disapproved, or otherwise vacated. Such a member shall be paid the amount of pay and allowances which he is deemed to have accrued, reduced by the total amount of his gross earnings from wages, salaries, tips, other personal service income, or unemployment or other public assistance benefits from any government agency during the period such member is deemed to have accrued pay and allowances under this subsection. Except as provided in the following sentence, when a member's sentence by court-martial to dismissal or dishonorable or bad-conduct discharge has been ordered set aside or disapproved—

"(1) payment shall be made within two months from the date of such order if no rehearing or new trial has been ordered;

"(2) payment shall be made within six months from the date of such order if a rehearing or new trial has been ordered but charges have not been referred to a rehearing or new trial within four months from the date of such order;

"(3) if a rehearing or new trial has been ordered and a dismissal or dishonorable or bad-conduct discharge is not included in the result of such rehearing or new trial, payment shall be made within two months of the announcement of the result of such rehearing or new trial; or

"(4) if a rehearing or new trial has been ordered and a dismissal or dishonorable or bad-conduct discharge is included in the result of such rehearing or new trial, but such dismissal or discharge is not later executed, payment shall be made within two months of the order which set aside, disapproved, or otherwise vacated such dismissal or discharge.

If a member is entitled to be paid under this section but fails to provide sufficient information in a timely manner regarding his gross earnings received from wages, salaries, tips, other personal service income, and unemployment or other public assistance benefits from any government agency when such information is requested under regulations prescribed under subsection (c) the periods of time established in the preceding sentence shall be extended until one month after the member provides such requested information.

"(c) This section shall be administered under uniform regulations prescribed by the Secretaries concerned. Such regulations may provide for the method of determining a member's gross earnings during any period such member is deemed to have accrued pay and allowances, including a requirement that the member provide income tax returns and other documentation to verify the amount of his earnings."; and

(3) by adding in the table of sections at the beginning of such chapter after the item relating to section 705 the following new items:

"706. Involuntary leave: appellate review of certain court-martial convictions.

"707. Payment for excess leave: disapproval of certain court-martial sentences.".

(b) Section 813 (article 13) of such title is amended—

(1) by striking out "Subject to section 857 of this title (article 57), no" and inserting in lieu thereof "No"; and

(2) by striking out "or the result of trial".

(c) Section 832(b) (article 32(b)) of such title is amended by striking out the second sentence and inserting in lieu thereof "The accused has the right to be represented at that investigation as provided in section 838 of this title (article 38) and in regulations prescribed under that section.".

(d) Section 838(b) (article 38(b)) of such title is amended to read as follows:

"(b) The accused has the right to be represented in his defense before a general or special court-martial or at an investigation under section 832 of this title (article 32) as follows:

"(1) The accused may be represented by civilian counsel if provided by him.

"(2) Subject to paragraphs (3) through (6), the accused may be represented by—

"(A) military counsel detailed under section 827 of this title (article 27); or

"(B) military counsel of his own selection if that military counsel is reasonably available.

"(3) When the accused is represented by civilian counsel, military counsel detailed or selected under paragraph (2) shall act as associate counsel unless excused at the request of the accused.

"(4) When the accused is represented by military counsel of his own selection under paragraph (2)(B), any military counsel detailed under paragraph (2)(A) shall, subject to paragraph (5), be excused.

"(5) An accused is not entitled to be represented in his defense by more than one military counsel. However, a convening authority may, in his sole discretion—

"(A) detail additional military counsel as assistant defense counsel; and

"(B) approve a request from the accused that military counsel detailed under paragraph (2)(A) act as associate defense counsel when the accused is represented by military counsel of his own selection.

"(6) The Secretary concerned may, by regulations, define 'reasonably available' and may, under such regulations, establish procedures for determining whether military counsel selected by an accused under paragraph (2)(B) is reasonably available. Such regulations shall establish uniform policies to the fullest extent practicable, recognizing the differences in the circumstances and needs of the armed forces and shall be reported to the Committees on Armed Services of both Houses of the Congress.".

(e) Subsection (c) of section 867 (article 67(c)) of such title is amended to read as follows:

"(c) The accused may petition the Court of Military Appeals for review of a decision of a Court of Military Review within 60 days from the earlier of—

"(1) the date on which the accused is notified of such decision of a Court of Military Review; or

"(2) the date on which a copy of such decision of a Court of Military Review, after being served on appellate counsel of record for the accused (if any), is deposited in the United States mails for delivery by first class certified mail to the accused at an address provided by the accused or, if no such address has been provided by the accused, at the latest address listed for the accused in the accused's official service record.

The Court of Military Appeals shall act upon such a petition promptly in accordance with the rules of the court.".

(f) Section 869 (article 69) of such title is amended by adding at the end thereof the following new sentence: "When such a case is considered upon application of the accused, the application must be filed in the Office of the Judge Advocate General by the accused—

"(1) on or before October 1, 1983; or

"(2) within two years after the date the sentence is approved by the convening authority or, in a special court-martial case which requires action under section 865(b) of this title (article 65(b)), the officer exercising general court-martial jurisdiction,

whichever is later, unless the accused establishes good cause for failure to file within that time.".

(g)(1) The amendments made by this section shall become effective 60 days after the date of enactment of this Act.

(2)(A) The amendments made by subsection (a) shall apply to members whose sentences by court-martial are approved by the officer exercising general court-martial jurisdiction under section 864 or 865 (article 64 or 65) of title 10, United States Code, on or after the effective date of this section.

(B) The amendments made by subsection (b) shall apply to all persons held as the result of a court-martial sentence announced on or after the effective date of this section.

(C) The amendments made by subsection (c) shall apply to investigations under section 832 (article 32) of title 10, United States Code, which commence on or after the effective date of this section.

(D) The amendments made by subsection (d) shall apply to trials by courts-martial in which all charges are referred to trial on or after the effective date of this section.

(E) The amendments made by subsection (e) shall apply to any accused with respect to a Court of Military Review decision which is dated on or after the effective date of this section.

(F) The amendments made by subsection (f) shall apply to applications received in the Office of the Judge Advocate General on or after the effective date of this section.

MILITARY RECRUITING INFORMATION

SEC. 18. (a) The Congress finds and declares that in order for the Congress to carry out effectively its constitutional authority to raise and support armies, it is essential—

(1) that the Secretary of Defense obtain and compile directory information pertaining to students enrolled in secondary schools throughout the United States; and

(2) that such directory information be used only for military recruiting purposes and be retained in the case of each person with respect to whom such information is obtained and compiled for a limited period of time.

(b) Section 503 of title 10, United States Code, relating to enlistments, is amended—

(1) by inserting "(a)" before "The Secretary"; and

(2) by adding at the end thereof the following new subsection:

"(b)(1) The Secretary of Defense is authorized to collect and compile directory information pertaining to each student who is seventeen years of age or older, or who is in the eleventh grade (or its equivalent) or higher regardless of age, and who is enrolled in a secondary school in the United States, its territories, possessions, or the Commonwealth of Puerto Rico.

"(2) Directory information collected and compiled by the Secretary of Defense under this subsection may be made available to the armed forces for military recruiting purposes only.

"(3) Directory information pertaining to any person may not be maintained for more than three years after the date the information pertaining to such person is first collected and compiled by the Secretary of Defense under this subsection.

"(4) Directory information collected and compiled under this subsection shall be confidential and no person who has had access to such information may disclose such information except for the purposes described in paragraph (2).

"(5) The Secretary of Defense shall prescribe regulations necessary to carry out the provisions of this subsection and may authorize each Secretary concerned to issue further implementing regulations necessary to administer the program established under this subsection. Any regulations issued pursuant to this section shall be reported to the Committees on Armed Services of both Houses of the Congress. Any regulations issued by the Secretaries concerned shall be as uniform as practicable.

"(6) In this subsection, 'directory information' means, with respect to a student, the student's name, address, telephone listing, date and place of birth, level of education, degrees received, academic grades and class standing, and the most recent previous educational agency or institution attended by the student.".

(c)(1) The heading of section 503 of such title is amended to read as follows:

**"§503. Enlistments: recruiting campaigns; compilation of directory information"**

(2) The item in the table of sections at the beginning of chapter 31 of such title relating to section 503 is amended to read as follows:

"503. Enlistments: recruiting campaigns; compilation of directory information.".

(d)(1) Chapter 31 of title 10, United States Code, relating to enlistments, is amended by adding at the end thereof the following new section:

**"§520. Criminal history information for military recruiting purposes**

"(a) Each State and each unit of general local government of a State is requested to make available, upon request, to the Secretary concerned any criminal history information maintained by or available to such State or unit of general local government which pertains to (1) any person who, within 90 days before the date on which such information was requested, has made application for enlistment in the armed forces, or (2) any person who, within 90 days before the date on which such information was requested, has in connection with an application for enlistment also has made application for participation in a program of the armed forces which requires a determination of trustworthiness of persons who participate in such program.

"(b) In this section, 'criminal history information' means the following information with respect to any juvenile or adult arrest, charge, citation, or conviction of any person referred to in subsection (a): (1) offense; (2) date; (3) place; (4) age; (5) disposition; and (6) court.

"(c) Criminal history information received under this section shall be confidential and no person who has had access to any information received under this section may disclose such information except to facilitate military recruiting.

"(d) The Secretaries concerned shall prescribe regulations necessary to carry out the provisions of this section, which shall be as uniform as practicable. Any regulations issued pursuant to this section shall be reported to the Committees on Armed Services of both Houses of the Congress.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"520. Criminal history information for military recruiting purposes.".

COMPUTING AUTHORIZED DAILY AVERAGE NUMBER OF ENLISTED MEMBERS IN PAY GRADES E-8 AND E-9

SEC. 19. Section 517(a) of title 10, United States Code, is amended—

(1) by inserting "the combined" before "pay grades"; and

(2) by striking out "2 percent and 1 percent, respectively," and inserting in lieu thereof "3 percent, but not to exceed 1 percent in pay grade E-9,".

INCREASE IN RESERVE OFFICERS' TRAINING CORPS SCHOLARSHIPS

SEC. 20. Section 2107(h) of title 10, United States Code, is amended by striking out "6,000" and "6,500" and inserting in lieu thereof "8,000" and "9,500", respectively.

CLARIFICATION OF AUTHORITY TO TRANSPORT CERTAIN MOTOR VEHICLES

SEC. 21. Section 2634(a) of title 10, United States Code, is amended—

(1) by striking out "and for his personal use or the use of his dependents" in the first sentence and inserting in lieu thereof "or his dependents and for the personal use of the member or his dependents"; and

(2) by inserting "or his dependents" in the second sentence after "motor vehicle of the member".

NOMINATIONS BY THE SUPERINTENDENTS OF THE SERVICE ACADEMIES

SEC. 22. (a) Section 4342 of title 10, United States Code, is amended by striking out subsection (d) and inserting in lieu thereof the following:

"(d)(1) Subject to paragraph (2), the Superintendent may nominate persons for appointment as cadets at the Academy. Nominations by the Superintendent may be made at any time, but not more than 50 such nominations may be made for appointment in any year.

"(2) Appointments of persons nominated under paragraph (1) may not displace any appointment authorized under clauses (2)-(7), (9), or (10) of subsection (a) and may not cause the total strength of the Corps of Cadets to exceed that authorized by subsections (a) and (b).".

(b)(1) Chapter 403 of such title, relating to the Military Academy, is amended by inserting after section 4341 the following new section:

**"§4341a. Cadets: appointment by the President**

"Cadets at the Academy shall be appointed by the President alone. An appointment is conditional until the cadet is admitted.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 4341 the following new item:

"4341a. Cadets: appointment by the President.".

(c)(1) Section 6953 of title 10, United States Code, relating to appointment of midshipmen at the United States Naval

Academy, is amended by adding at the end thereof the following new sentence: "An appointment is conditional until a midshipman is admitted.".

(2) Section 6954 of title 10, United States Code, relating to appointment of midshipmen at the United States Naval Academy, is amended—

(A) by redesignating subsections (d) and (e) as subsections (e) and (f), respectively;

(B) by inserting after subsection (c) the following new subsection:

"(d)(1) Subject to paragraph (2), the Superintendent of the Naval Academy may nominate persons for appointment as midshipmen at the Naval Academy. Nominations by the Superintendent may be made at any time, but not more than 50 such nominations may be made for appointment in any year.

"(2) Appointments of persons nominated under paragraph (1) may not displace any appointment authorized under clauses (2)–(7), (9), or (10) of subsection (a) and may not cause the total strength of midshipmen at the Naval Academy to exceed that authorized by subsections (a) and (b)."; and

(C) by striking out "Effective beginning with nominations for appointment to the Academy in the calendar year 1964, the" in subsection (f) (as redesignated by clause (A)) and by inserting in lieu thereof "The".

(d) Section 9342 of title 10, United States Code, relating to the appointment of cadets at the United States Air Force Academy, is amended by striking out subsection (d) and inserting in lieu thereof the following:

"(d)(1) Subject to paragraph (2), the Superintendent may nominate persons for appointment as cadets at the Academy. Nominations by the Superintendent may be made at any time, but not more than 50 such nominations may be made for appointment in any year.

"(2) Appointments of persons nominated under paragraph (1) may not displace any appointment authorized under clauses (2)–(7), (9), or (10) of subsection (a) and may not cause the total strength of the Air Force cadets to exceed that authorized by subsections (a) and (b).".

(e)(1) Chapter 403 of such title, relating to the Air Force Academy, is amended by inserting after section 9341 the following new section:

"§9341a. Cadets: appointment by the President

"Cadets at the Academy shall be appointed by the President alone. An appointment is conditional until the cadet is admitted.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 9341 the following new item:

"9341a. Cadets: appointment by the President.".

(f) The amendments made by this section shall apply to nominations for appointment to the first class admitted to each Academy after the date of enactment of this Act.

COMPANY COMMANDERS AT THE UNITED STATES MILITARY ACADEMY

SEC. 23. Section 4349(a) of title 10, United States Code, is amended by inserting ", Navy, Air Force, or Marine Corps" after "Army".

AUTHORITY OF THE SECRETARY OF THE NAVY TO ISSUE REGULATIONS

SEC. 24. (a)(1) Section 5031 of title 10, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) The Secretary of the Navy may prescribe regulations to carry out his functions, powers, and duties under this title. The authority of the Secretary under the preceding sentence is in addition to the authority of the Secretary under section 6011 of this title.".

(2) Section 6011 of such title is amended by striking out "with the approval of the President".

(b) United States Navy regulations issued under section 6011 of such title before the effective date of this section shall remain in effect in accordance with their terms until amended or revoked by the Secretary of the Navy.

PER DIEM FOR MEMBERS OF THE NAVAL RESEARCH ADVISORY COMMITTEE

SEC. 25. Section 5153 of title 10, United States Code, is amended by striking out subsection (c) and redesignating subsection (d) as subsection (c).

ELIMINATING DATE FOR NOMINATIONS TO THE NAVAL ACADEMY

SEC. 26. Section 6956 of title 10, United States Code, is amended by striking out subsections (b) and (c) and redesignating subsections (d), (e), and (f) as (b), (c), and (d), respectively.

REIMBURSEMENT FOR ACCOMMODATIONS IN PLACE OF QUARTERS FOR MEMBERS ON SEA DUTY

SEC. 27. (a) Section 3 of Public Law 96-357 (94 Stat. 1182; 10 U.S.C. 7572 note) is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982".

(b) Section 7572(b) of title 10, United States Code, as amended by section 3 of Public Law 96-357 (94 Stat. 1182; 10 U.S.C. 7572 note) is amended to read as follows:

"(b) Under such regulations as the Secretary prescribes, any member of a uniformed service on sea duty who is deprived of quarters on board ship because of repairs or because of other conditions that make the member's quarters uninhabitable and for whom it is impracticable to furnish accommodations under subsection (a), may be reimbursed for expenses incurred in obtaining quarters in an amount not more than the total of—

"(1) the basic allowance for quarters of a member of the same pay grade without dependents; and

"(2) a variable housing allowance which could be paid to a member of the same pay grade under section 403 of title 37 at the location where the member is deprived of quarters on board ship.

A member entitled to receipt of basic allowance for quarters may not be reimbursed for expenses under this subsection when deprived of quarters on board ship at a location at which the member can reside with such member's dependents. The total amount of such reimbursement may not exceed $9,000,000 for the fiscal year ending September 30, 1981, and may not exceed $6,300,000 for the fiscal year ending September 30, 1982.".

LIMITATIONS ON AMOUNTS PAYABLE TO AVIATION CAREER OFFICERS

SEC. 28. (a)(1) An officer who receives special pay for any period under an agreement executed and accepted under section 301b of title 37, United States Code, shall not be entitled to aviation career incentive pay under section 301a of such title during such period at a rate which exceeds the rate in effect on the day before the effective date of the increase in the rate of aviation career incentive pay provided for by section 5 of this Act.

(2) From the date of enactment of this Act until September 30, 1982, only agreements executed by officers of the Navy or Marine Corps under such section 301b may be accepted.

(b) Section 301b of title 37, United States Code, is amended by adding at the end thereof the following new subsection:

"(e) Special pay may be paid under this section only for agreements accepted before October 1, 1982.".

(c) This section shall become effective on the date of enactment of this Act.

$3,000 ACCESSION BONUS FOR SURFACE NUCLEAR POWER APPLICANTS

SEC. 29. Section 312b of title 37, United States Code, as amended by the Uniformed Services Pay and Allowances Benefits Act of 1980, is amended by striking out "submarine" in paragraph (a)(1).

SEA PAY TO MEMBERS OF TWO-CREW VESSELS

SEC. 30. Section 305a of title 37, United States Code, relating to career sea pay, as amended by the Military Pay and Allowances Benefits Act of 1980, is amended by inserting "such service to include periods as a member of the off crew of a two-crewed submarine" after "underway" in paragraph (d)(1).

AMENDMENTS TO THE MILITARY SELECTIVE SERVICE ACT TO PERMIT PERSONS OVER 65 YEARS OF AGE TO SERVE ON LOCAL DRAFT BOARDS

SEC. 31. Section 10(b)(3) of the Military Selective Service Act (50 U.S.C. App. 460(b)(3)) is amended by striking out "who has attained the age of 65 or" in the sixth complete sentence thereof.

EFFECTIVE DATES

SEC. 32. (a) Except as provided in subsection (b) and otherwise in this Act, the amendments made by this Act shall take effect on October 1, 1981.

(b)(1) The amendments made by section 11 shall take effect on April 1, 1982.

(2) The amendments made by sections 6, 9, 12, 13, 14, 16, 19, 21, 22, 23, 24, 29, 30, and 31 shall take effect on the date of enactment of this Act.

MOTION OFFERED BY MR. NICHOLS

Mr. NICHOLS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. NICHOLS moves to strike out all after the enacting clause of the Senate bill, S. 1181, and to insert in lieu thereof the provisions contained in H.R. 3380, as passed by the House, as follows:

SHORT TITLE

SECTION 1. This Act may be cited as the "Armed Forces Pay Act of 1981".

PAY INCREASE OF 14.3 PER CENTUM FOR MEMBERS OF THE UNIFORMED SERVICES

SEC. 2. (a) Any adjustment required under the provisions of section 1009 of title 37, United States Code, relating to adjustments in the compensation of members of the uniformed services, that would otherwise first become effective beginning with any pay period in fiscal year 1982 shall not become effective.

(b)(1) Subject to the provisions of paragraph (2), each element of compensation specified in section 1009(a) of title 37, United States Code, shall be increased for members of the uniformed services by 14.3 per centum effective with the first pay period beginning after September 30, 1981.

(2) The President may allocate the percentage increase specified under paragraph (1) in the same manner and to the same extent the President is authorized under subsections (c) and (d) of section 1009 of title 37, United States Code, to allocate any percentage increase described in subsection (b)(3) of section 1009 of such title, except that the provisions of subsection (d)(2)(B) of such section shall not apply to this subsection or any action of the President under this subsection.

REENLISTMENT AND ENLISTMENT BONUSES

SEC. 3. (a) Section 308(e) of title 37, United States Code, is amended to read as follows:

"(e) Any unserved period of an enlistment (including any extension of enlistment) for which no bonus has been paid or for which no bonus is otherwise payable under this section may, under regulations prescribed by the Secretary concerned, be considered as part of an immediately subsequent term of reenlistment (or as part of an immediately subsequent voluntary extension of an enlistment) for the purpose of determining the eligibility of the member for a bonus under this section and for the purpose of computing the amount of such bonus.".

(b) Section 308a of such title is amended—

(1) by striking out "for a period of at least four years";

(2) by striking out "to a total of at least four years"; and

(3) by striking out "$5,000" and inserting in lieu thereof "$10,000".

SPECIAL PAY FOR UNUSUALLY HAZARDOUS DUTY OR DUTY PERFORMED UNDER UNUSUALLY SEVERE WORKING CONDITIONS

SEC. 4. (a) Chapter 5 of title 37, United States Code, is amended by adding at the end thereof the following new section:

**"§315. Special pay: unusually hazardous duty or duty performed under unusually severe working conditions**

"(a) Under regulations prescribed by the Secretary concerned, a member of a uniformed service who is entitled to basic pay may be paid special pay, in the amount set forth in subsection (b) of this section, for any month during which the member performs duties that have been determined by the Secretary concerned to be—

"(1) unusually hazardous; or

"(2) performed under unusually severe working conditions.

"(b) Special pay payable under subsection (a) of this section shall be paid at the rate of $110 per month, in the case of an officer, and at the rate of $55 per month, in the case of an enlisted member.

"(c)(1) A member may not be paid more than one payment of special pay under this section for any month.

"(2) A member may not be paid special pay under this section for any period of service for which that member receives special or incentive pay under section 301, 301a, 301c, or 304 of this title.

"(d) In time of war, the President may suspend the payment of special pay under this section.".

(b) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"315. Special pay: unusually hazardous duty or duty performed under unusually severe working conditions.".

DUTY REQUIRING AN ENGINEERING OR SCIENTIFIC SKILL DESIGNATED AS CRITICAL

SEC. 5. (a) Chapter 5 of title 37, United States Code, is amended by adding after 315 (as added by section 4) the following new section:

**"§316. Special pay: engineering and scientific career accession bonus and continuation pay**

"(a) In this section, the term 'engineering or scientific duty' means service performed by an officer holding a degree in engineering or science from an accredited college or university that requires a skill designated under regulations prescribed by the President as critical and that requires an engineering or science degree.

"(b) Under regulations prescribed by the President, an officer of an armed force who—

"(1) is entitled to basic pay;

"(2) has been certified by the Secretary concerned as having the technical qualifications for detail to engineering or scientific duty; and

"(3) executes a written agreement to serve on active duty for detail to engineering or scientific duties for a period of at least four years;

may be paid, in addition to all other compensation to which the officer is entitled, a bonus in an amount not to exceed $15,000. The bonus may be paid in a lump sum or in equal periodic installments, as determined by the Secretary concerned.

"(c) Under regulations prescribed by the President, an officer of an armed force who—

"(1) is entitled to basic pay;

"(2) is below the pay grade of O-7;

"(3) has been certified by the Secretary concerned as having the technical qualifications for detail to engineering or scientific duty;

"(4) has completed at least three but less than nineteen years of engineering or scientific duty as an officer;

"(5) is not serving a period of obligated service under subsection (b) of this section; and

"(6) executes a written agreement to remain on active duty for detail to engineering or scientific duty for at least one year, but no more than four years, of active service;

may, upon acceptance of the written agreement by the Secretary concerned, be paid, in addition to all other compensation to which the officer is entitled, an amount not to exceed $3,000 multiplied by the number of years, or monthly fraction thereof, of obligated service to which the officer agrees under the agreement. The total amount payable may be paid in a lump sum or in equal periodic installments, as determined by the Secretary concerned.

"(d)(1) An officer who does not serve on active duty for the entire period for which he has been paid under subsection (b) or (c) of this section shall refund that percentage of the payment that the unserved part of the period is of the total period for which the payment was made. Nothing in this subsection shall alter or modify the obligation of a regular officer to perform active service at the pleasure of the President. Completion by a regular officer of the total period of obligated service specified in an agreement under subsection (b) or (c) of this section does not obligate the President to accept a resignation submitted by that officer.

"(2) Subject to paragraph (3) of this subsection, an obligation to reimburse the United States imposed under paragraph (1) of this subsection is for all purposes a debt owed to the United States.

"(3) The Secretary concerned may waive, in whole or in part, a refund required under paragraph (1) of this subsection if the Secretary concerned determines that recovery would be against equity and good conscience or would be contrary to the best interests of the United States.

"(4) A discharge in bankruptcy under title 11 that is entered less than five years after the termination of an agreement under this section does not discharge the member signing such agreement from a debt arising under such agreement or under paragraph (1) of this subsection. This paragraph applies to any case commenced under title 11 after September 30, 1981.".

(b) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"316. Special pay: engineering and scientific career accession bonus and continuation pay.".

RATE FOR MEALS PORTION OF PER DIEM FOR CERTAIN MEMBERS AWAY FROM DESIGNATED POST OF DUTY

SEC. 6. Section 404(b) of title 37, United States Code, is amended by adding at the end thereof the following new sentence: "In prescribing such conditions and allowances, the Secretaries concerned shall provide that a member who is performing travel under orders away from his designated post of duty (other than a member on field duty or sea duty, as defined in regulations prescribed under section 402(e) of this title, or a member of a unit operating in an overseas area in a case in which the Secretary concerned has determined that unit messing is essential to the accomplishment of that unit's training and readiness) shall, whenever a per diem is authorized under clause (2) of subsection (d) of this section, be paid for the meals portion of that per diem in a cash amount at a rate that is not less than the rate established under section 1011(a) of this title for meals sold to members.".

TEMPORARY LODGING EXPENSES

SEC. 7. (a)(1) Chapter 7 of title 37, United States Code, is amended by inserting after section 404 the following new section:

**"§404a. Travel and transportation allowances: temporary lodging expenses**

"(a) Under regulations prescribed by the Secretary concerned, a member of a uniformed service who is ordered to make a change of permanent station to another station in the United States may be paid or reimbursed for subsistence expenses actually incurred by the member and the member's dependents during a period not exceeding four days while occupying temporary quarters incident to that change of permanent station.

"(b) Regulations prescribed under subsection (a) of this section shall prescribe average daily subsistence rates for purposes of this section for the member and for each dependent. Such rates may not exceed the maximum per diem rates prescribed by or under section 404(d) of this title for the area where the temporary quarters are located.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 404 the following new item:

"404a. Travel and transportation allowances: temporary lodging expenses.".

(b) Section 411(a) of such title is amended by inserting "404a," after "(d)-(f),".

ADVANCE PAYMENT OF CERTAIN TRAVEL AND TRANSPORTATION ALLOWANCES

SEC. 8. (a) Section 405a(a) of title 37, United States Code, is amended by inserting after the second sentence in that section the following new sentence: "Such allowances may be paid in advance.".

(b) Section 406(a) of such title is amended by adding at the end thereof the following new sentence: "Travel and transportation allowances authorized by this section may be paid in advance.".

(c) Section 407(a) of such title is amended by adding at the end thereof the following new sentence: "An allowance payable under this section may be paid in advance.".

TRAVEL AND TRANSPORTATION FOR MEMBERS SERVING CONSECUTIVE ASSIGNMENTS OVERSEAS

SEC. 9. Section 411b(a) of title 37, United States Code, is amended—

(1) by inserting "(1)" after "(a)";

(2) by inserting "who is ordered to a consecutive tour of duty at the same duty station or" after "District of Columbia"; and

(3) by adding at the end thereof the following new paragraph:

"(2) If, because of military necessity, a member authorized travel and transportation allowances under this subsection is denied leave between the two tours of duty overseas, the member shall be authorized to use such travel and transportation allowances from his current duty station at the first time the member is granted leave.".

TRAVEL FROM ISOLATED DUTY STATIONS AND TRAVEL INCIDENT TO EMERGENCY LEAVE

SEC. 10. (a) Chapter 7 of title 37, United States Code, is amended by inserting after section 411b the following new sections:

**"§411c. Travel and transportation allowances: travel performed in connection with leave from certain stations in foreign countries**

"(a) Under uniform regulations prescribed by the Secretaries concerned, a member of a uniformed service, while serving at a duty station abroad in an area specifically designated by the Secretary concerned for purposes of this section, may be paid transportation—

"(1) to another location abroad having different social, climatic, or environmental conditions than those at the duty station at which the member is serving; or

"(2) to a location in the United States.

"(b) The transportation authorized by this section is limited to payment for transportation of the member, and of each dependent of the member authorized to reside at the member's duty station, for one roundtrip during any continuous two-year tour and two roundtrips during any continuous three-year tour.

**"§411d. Travel and transportation allowances: transportation for members stationed abroad and dependents incident to emergency leave**

"(a) Under uniform regulations prescribed by the Secretaries concerned, roundtrip transportation for a member stationed overseas and for dependents of the member authorized to reside at the member's duty station may be provided from the member's duty station to the United States or its possessions incident to emergency leave granted for reasons of personal emergency (or, in the case of transportation provided only for a dependent, under circumstances involving a personal emergency similar to the circumstances for which emergency leave could be granted a member).

"(b) Transportation under this section may be authorized only upon a determination that, considering the nature of the emergency involved, Government transportation is not reasonably available. Transportation authorized under this section shall be limited to the cost of Government-procured commercial roundtrip air travel from the international airport nearest the location of the member and dependents at the time notification of the emergency is received or the international airport nearest the duty station of the member and dependents in the overseas area—

"(1) to the international airport within the continental United States closest to the overseas airport from which the member or dependents depart; or

"(2) as determined by the Secretary concerned, to an airport within the United States or its possessions convenient to the uniformed service involved.

**"§411e. Travel and transportation allowances: travel performed in certain emergency situations**

"Under regulations prescribed by the Secretaries concerned, a member of a uniformed service who is performing temporary duty away from his permanent duty station may be paid the travel and transportation allowances provided by section 404 of this title for travel performed from his place of temporary duty to his permanent duty station or to any other location, and return (if applicable), if such travel has been approved because of the serious illness or injury or the death of a dependent of the member. Travel and transportation to a location other than the permanent duty station of the member may not be paid under this section in excess of the amount for such travel and transportation to the member's permanent duty station, and return (if applicable).".

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 411b the following new items:

"411c. Travel and transportation allowances: travel performed in connection with leave from certain stations in foreign countries.

"411d. Travel and transportation allowances: transportation for members stationed abroad and dependents incident to emergency leave.

"411e. Travel and transportation allowances: travel performed in certain emergency situations.".

UNIFORM ALLOWANCES AND ADVANCED PAY FOR MEMBERS OF THE ARMED FORCES HEALTH PROFESSIONS SCHOLARSHIP PROGRAM

SEC. 11. (a) Subsection (a) of section 415 of title 37, United States Code, is amended—

(1) by striking out "or" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new paragraph:

"(4) upon reporting for the first period of active duty required by section 2121(c) of title 10, United States Code, as a member of the Armed Forces Health Professions Scholarship Program.".

(b) Section 1006 of such title is amended by adding at the end thereof the following new subsection:

"(i) Under regulations prescribed by the Secretary concerned, not more than one month's pay may be paid in advance to a member of the Armed Forces Health Professions Scholarship Program upon reporting for a period of active duty required by section 2121(c) of title 10.".

SPECIAL PAY FOR AIR WEAPONS CONTROLLERS ON AIRBORNE WARNING AND CONTROL SYSTEM (AWACS) AIRCRAFT

SEC. 12. (a) Subsection (a) of section 301 of title 37, United States Code, is amended—

(1) by striking out "or" at the end of clause (9);

(2) by striking out the period at the end of clause (10) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new clause:

"(11) involving frequent and regular participation in aerial flight by an officer (other than a warrant officer) who is serving as an air weapons controller crew member, as defined by the Secretary concerned, aboard an airborne warning and control system aircraft, as designated by such Secretary, and who is not entitled to incentive pay under section 301a of this title.". (b) Subsection (c) of such section is amended—

(1) by inserting "(1)" before "For the performance"; and

(2) by adding at the end thereof the following new paragraph:

"(2) For the performance of hazardous duty described in clause (11) of subsection (a) of this section, an officer is entitled to monthly incentive pay as follows:

"YEARS OF SERVICE AS AN OFFICER AS COMPUTED UNDER SECTION 205

| Pay grade | 2 or less | Over 2 | Over 3 | Over 4 | Over 6 | Over 8 | Over 10 | Over 12 | Over 14 | Over 16 | Over 18 | Over 20 | Over 22 | Over 24 | Over 25 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 0–7 and above | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $110 |
| 0–6 | 225 | 250 | 300 | 350 | 400 | 400 | 400 | 400 | 400 | 400 | 370 | 340 | 310 | 280 | 250 |
| 0–5 | 200 | 250 | 300 | 350 | 400 | 400 | 400 | 400 | 400 | 400 | 370 | 340 | 310 | 280 | 250 |
| 0–4 | 175 | 225 | 275 | 335 | 400 | 400 | 400 | 400 | 400 | 400 | 370 | 340 | 310 | 280 | 250 |
| 0–3 | 125 | 156 | 188 | 206 | 400 | 400 | 400 | 400 | 400 | 400 | 350 | 300 | 300 | 275 | 250 |
| 0–2 | 125 | 156 | 188 | 206 | 250 | 300 | 300 | 300 | 300 | 300 | 300 | 300 | 300 | 275 | 220 |
| 0–1 | 125 | 156 | 188 | 206 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 200.". |

INCREASE IN NUMBER OF SENIOR RESERVE OFFICERS' TRAINING CORPS SCHOLARSHIPS

SEC. 13. Section 2107(h) of title 10, United States Code, relating to financial assistance for specially selected member, is amended—

(1) by striking out "6,000" and inserting in lieu thereof "8,000"; and

(2) by striking out "6,500" and inserting in lieu thereof "9,500".

EFFECTIVE DATES

SEC. 14. (a) Except as provided in subsection (b), the amendments made by this Act shall take effect on October 1, 1981.

(b) The amendments made by section 7 shall take effect on April 1, 1982.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The title was amended so as to read: "A bill to increase the pay and allowances of members of the Armed Forces."

A similar House bill (H.R. 3380) was laid on the table.

□ 1720

## AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF HOUSE AMENDMENTS TO S. 1181, ARMED FORCES PAY ACT OF 1981

Mr. NICHOLS. Mr. Speaker, I ask unanimous consent that in the engrossment of the House amendments to the Senate bill, S. 1181, the Clerk be authorized to make necessary tech-

nical corrections, including section numbers, punctuation, and cross references, as may be necessary to reflect the actions of the House in amending the bill H.R. 3380.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

## GENERAL LEAVE

Mr. NICHOLS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

## HOUR OF MEETING ON TOMORROW, WEDNESDAY, SEPTEMBER 16, 1981

Mr. FOLEY. I ask unanimous consent that when the House adjourns tonight, it adjourn to meet tomorrow at noon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. LOTT. Mr. Speaker, reserving the right to object, could I inquire of the gentleman from Washington (Mr. FOLEY) what the schedule will be tomorrow and what time we might expect to finish up tomorrow, since we will be coming in at noon?

Mr. FOLEY. Mr. Speaker, if the gentleman will yield, we are anticipating that we will adjourn tomorrow at a reasonable hour, something similar to the schedule that is anticipated for today. It is not anticipated that we will be in late tomorrow night.

The schedule tomorrow will be the continuing appropriations resolution and the beginning of the military construction appropriations bill.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I am delighted to yield to our distinguished leader.

Mr. MICHEL. Mr. Speaker, I appreciate the gentleman's yielding.

Might I ask the distinguished majority whip if the question has been asked as to what the program might be on Friday? The gentleman will recall. I think, that we had a conversation earlier about that because we have a conference with the Canadians that is very critical, with a number of Members involved on both sides, and we discussed the embarrassment that might follow if it has to be canceled again, that conference having to do with acid rain, which is a very critical problem.

I wonder if the distinguished majority whip would give us any kind of indication as to whether or not we could assure Members there would not be rollcall votes on Friday that would in anyway inhibit that conference?

Mr. FOLEY. Mr. Speaker, will the gentleman from Mississippi yield further?

Mr. LOTT. I am happy to yield to the distinguished majority whip.

Mr. FOLEY. Mr. Speaker, in response to the distinguished Republican leader's inquiry, we have three matters we would like to complete this week, the continuing appropriations resolution, the military construction bill, and State Department authorizations. Upon the completion of those matters, which could be accomplished tomorrow and Thursday, then we would have no more than a pro forma session on Friday. However, it is the intention of the leadership to try to conclude those three items of legislation this week, and we would have to reserve the possibility of a Friday session in the event we cannot complete the business on the calendar by Thursday evening. I understand the distinguished Republican leader's concern, and we would hope to accommodate that concern with no more than a pro forma session on Friday, without substantial votes in any case, if we could get through these three items of legislation.

Mr. MICHEL. Mr. Speaker, I thank the gentleman, and with that response I would give the gentleman our utmost assurance of our cooperation in order to meet that schedule and so we would not embarrass Members with a full Friday session.

Mr. FOLEY. Mr. Speaker, needless to say, the conference is important to both sides of the aisle, and I am sure the gentleman knows we have a deep concern with the ongoing relations between the parliamentarians of Canada and the United States.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I appreciate the gentleman's yielding.

So that means that there is a real possibility on Thursday that we might be in late in order to complete the schedule?

Mr. FOLEY. Mr. Speaker, if the gentleman will yield, yes, we might be in late Thursday. I think the fact is that if we finish the week's agenda by Thursday afternoon late, the Members would rather conclude the schedule and avoid a Friday session.

Mr. LOTT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

## PERMISSION FOR COMMITTEE ON THE JUDICIARY TO FILE REPORT ON H.R. 3112, VOTING RIGHTS EXTENSION ACT

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may have until midnight tonight to file a report on H.R. 3112.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. WALKER. Mr. Speaker, reserving the right to object, could the gentleman tell us what that bill is?

Mr. EDWARDS of California. Mr. Speaker, if the gentleman will yield, that is the Voting Rights Extension Act.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

## NATIONAL CYSTIC FIBROSIS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 62) to authorize and request the President to designate the week of September 20 through 26, 1981, as "National Cystic Fibrosis Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 62

Whereas cystic fibrosis is the number one genetic killer of children in America, and between one thousand five hundred and two thousand five hundred are born each year in this country with the disease; and

Whereas public understanding of cystic fibrosis is essential to enhance early detection and treatment of the disease and reduce the misunderstanding and confusion concerning the symptoms of cystic fibrosis; and

Whereas a national awareness of the cystic fibrosis problem will stimulate interest and concern leading to increased research and eventually a cure for cystic fibrosis: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the week of September 20 through 26, 1981, is designated as "National Cystic Fibrosis Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

## GENERAL LEAVE

Mr. KOGOVSEK. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks, and to include therein extraneous material, on the subject of the special order speech today by the gentleman from Oklahoma (Mr. SYNAR).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

## GENERAL LEAVE

Mr. KOGOVSEK. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks, and to include therein extraneous material, on the subject of the special order speech today by the gentleman from Arkansas (Mr. ALEXANDER).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was not objection.

## SECRETARY OF INTERIOR WATT MUST BE DISMISSED

(Mr. HARKIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARKIN. Mr. Speaker, the great conservationist, Aldo Leopold, once said "we abuse land because we regard it as a commodity belonging to us. When we see land as a community to which we belong, we may begin to use it with love and respect."

I believe therein lies the reasons for Mr. Watt's actions to date. Mr. Watt sees our land and our wilderness areas, not as the community to which we belong, but as a commodity to be used and to be dispensed with. That is why almost all of the conservationist groups in this country—the Sierrra Club, the Wilderness Society, the National Wildlife Federation, the Isaac Walton League—have all called for Mr. Watt's removal.

It is a shame that the Republican Party, which has a proud heritage of concern for our wilderness areas and for our natural resources, has not come to the forefront and also asked for Mr. Watt's removal.

I call upon my friends and colleagues in the Republican Party to reclaim that proud heritage of Teddy Roosevelt, to ride Jim Watt out of town on a rail and send him back to this private law firm in Denver where he can represent his special interests as they ought to be represented, by a private lawyer and not by a Secretary of the Interior.

Mr. Speaker, the Secretary of the Interior has historically been relied on by the American public to place the value of environmental conservation above the values of big business and profiteering.

Many people still believe this is the role of the Interior Secretary and that Mr. Watt is not fulfilling that role, and please count me among them. In 6 short months Watt has managed to incur the wrath of every major environmental and conservation group in the country—from the most liberal to the most conservative.

The Sierra Club has more than 750,000 signature on a petition asking for Watt's removal.

The Wilderness Society's board of directors has called for Watt's removal.

The National Wildlife Federation's 4.5 million members, when polled, opposed Watt by a 13-1 margin. This is a group that supported President Reagan in November 2 to 1.

The Izaak Walton League of America characterized by its executive director, Jack Lorenz, as extremely conservative, passed a resolution at its annual conference asking for Watt's removal.

Watt's declaration that environmental policy will be made using the budget system as an excuse is highly irresponsible.

Let me cite for you some of the anti-Interior positions and actions of Mr. Watt. He advocates:

Giving national park concessionaires a greater role in park management;

A weakening of Federal surface mining controls;

A relaxation of the environmental impact statement process; and

Accelerated offshore leasing while reducing funds for environmental assessments.

This spring he abolished the Heritage Conservation and Recreation Service while programs administered by it were still in existence, hoping that through the budget process they too would be dismantled.

Once again, I would like to join with other Members of Congress and millions of Americans in calling for Secretary James G. Watt's dismissal.

## SOCIAL AND ENERGY SECURITY

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. NELLIGAN. Mr. Speaker, I am introducing a bill to earmark the revenues collected by the Federal Government—and generated from offshore exploration and drilling by gas and oil companies—to the social security old age and survivors insurance trust fund.

As you know, the future solvency of the social security system is not assured. According to Health and Human Services Secretary Richard Schweiker, the social security system could go broke as early as the fall of 1982 if necessary steps are not taken. In addition, the social security trust fund deficit could climb as high as $111 billion in the next 5 years.

Some may argue whether the situation is that serious. However, it is obvious that some steps must be taken to shore up the system.

There have been various proposals made to save the system, most of which I cannot support. One proposal which comes to mind is that of raising the retirement age from 65 to 68. Another proposal I have a problem accepting is the reduction of benefits for early retirees.

I come from a district in Pennsylvania where a major portion of the population is elderly and is therefore greatly dependent on social security. As their representative, I am very concerned about any attempt to cut social security benefits. I cannot—and will not—support the cutting of benefits for those elderly persons already dependent on the system. Instead of altering benefits or the retirement age to fit the current and anticipated revenues of the social security system, we must find additional funds to continue operation of the system.

The Federal Government currently opens up its offshore areas to gas and oil exploration and development. As a result, the Government collects revenues from the companies in exchange for exploration and production rights.

According to the most recent Health and Human Services Department survey, and using the President's economic assumptions, $59 billion more will flow out of the social security system between January 1, 1981 and January 1, 1986, than will flow into it. The total offshore revenue for that same time period is projected to be about $65 billion. If these revenues were to be earmarked for the social security system, about $6 billion more would flow into the system than out of it.

However, I would like to make clear that my bill would draw no funds away from the land and water conservation fund, which is used for the acquisition of conservation land such as parks and wildlife refuges. Presently, $900 million in offshore revenues are earmarked for the land and water conservation fund each year. My bill states explicitly that no funds credited to the conservation fund can go to the social security trust fund. Even after subtracting $900 million per year from the offshore revenues placed into social security, $1.5 billion more would flow into the system than out of it over the 5-year period.

The attached chart shows the projected net inflow or outflow in the social security system for the years 1981 through 1985. Also in the chart are estimated revenues to be generated from offshore exploration and drilling, minus funds earmarked for the land and water conservation fund. The third column shows the status of the

social security old age trust fund after the addition of the offshore revenues. As can be seen, the addition of these revenues would eliminate the short-term social security deficit over the 5-year period. After this period, the fund should stay in balance until almost the year 2020, using the President's economic assumptions.

I believe that to take these offshore revenues for use in the social security system makes sense. The offshore areas belong to the Federal Government and, as such, belong to all of the people. The social security system is important to all Americans, too. Therefore, I think it appropriate that what belongs to the people should be used to shore up the social security system, which concerns and affects all of us.

In addition, tying the social security system and the offshore leasing program together will encourage the development of our offshore oil and gas resources. I believe that 99 percent of our Nation's problems stem from the failure to achieve energy independence. My bill will help assure social security for the elderly and energy security for the Nation.

I am very much concerned over the future of the social security system. As I stated before, I represent a district which has a high proportion of elderly people who are dependent—or will soon be dependent—on social security. I cannot, in good conscience, justify taking away any of their benefits. Therefore, I am introducing this bill to help generate the necessary funds for the social security system without cutting benefits.

I urge my colleagues to join me in cosponsoring this bill.

EFFECT OF ADDING OFFSHORE REVENUES TO THE SOCIAL SECURITY OLD AGE AND SURVIVORS INSURANCE TRUST FUND (OASI)

[In billions of dollars]

| Year | OASI income over disbursements | Offshore energy revenues [1] | OASI income over disbursements with offshore revenues added |
|---|---|---|---|
| 1981 | −3.7 | 9.5 | 5.8 |
| 1982 | −11.8 | 10.5 | −1.3 |
| 1983 | −15.1 | 11.8 | −3.3 |
| 1984 | −16.9 | 13.2 | −3.7 |

## THE PASSING OF ROY WILKINS: 1901–81

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 60 minutes.

GENERAL LEAVE

Mr. ADDABBO. Mr. Speaker, in honor of Roy Wilkins, and so that Members of Congress may say goodby to this remarkable man, I have requested this special order in honor of Roy Wilkins, and I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ADDABBO. Mr. Speaker, our Nation is a poorer place spiritually and morally, as it mourns the passing of Roy Wilkins, a dear friend, constituent, and civil rights leader who passed away in New York City at the age of 80. As the former executive director of the National Association for the Advancement of Colored People for a great many years Roy Wilkins helped achieve unprecedented economic and civil rights gains for the minority of this country. As a leader who taught and fought for the poor, the weak, and the discriminated, he was without peer, and as a compassionate human being striving for justice, he was without parallel.

For a half a century the name Roy Wilkins was synonymous with reason and justice for millions of black Americans who were denied the rights and dignity expressed in our Constitution. For 50 years he fought this Nation's greatest battle, a battle against ignorance and prejudice, segregation and oppression. For 50 long and sometimes bitter and painful years he walked the Halls of Congress fighting for people who's voices were too soft to be heard. For 50 years he marched in demonstrations demanding equal protection under the laws. And for 50 years he stood his ground in courts across this Nation fighting to achieve voting rights, integrated schools, and fair housing for black Americans

To give you an idea of just how important Roy will remain in the hearts of all Americans, just consider that it was he who set the legal process in motion to eventually have the Supreme Court in 1954 rule that "separate but equal" facilities in public education was unconstitutional. It was a decision that many legal scholars consider one of the most important of all time.

Though Roy has passed away he leaves with us many monuments of his work. They are not buildings of stone, but rather, edifices of justice and equality, structures in law which will always remain standing.

To his wife, a wonderful woman who was instrumental in helping Roy maintain his spirit and seemingly endless supply of energy, my prayers are with her in this time of mourning. She surely must be comforted, secure in the knowledge that her husband was loved by millions of Americans who today and in the future will benefit from his work.

Mrs. CHISHOLM. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentlewoman from New York.

Mrs. CHISHOLM. Mr. Speaker, I, too, would like to add a few words to this congressional tribute to the memory of Roy Wilkins.

I was shocked and saddened by the passing of one of America's great leaders. He was not only a leader of the blacks of this Nation. He spoke and he struggled for a liberation of spirit which has uplifted all of America. His untiring commitment to the civil rights movement brought about a lessening of the segregation, discrimination, and exploitation that have been a longstanding blight on the national conscience.

It has been said that in order to hold a man down, you have to stay down there with him. Roy Wilkins helped us all to climb from the dark hole of racism into the bright light of equality.

This great man was born at a time when the freedoms won during the Civil War had been subverted by a pervasive system of segregation, Jim Crow laws, political disenfranchisement, and the use of physical terror against those who sought to exercise all their constitutional rights. He reached maturity in an environment in which nearly every road to opportunity and advancement was blocked for all but white males. He saw and he felt the need for a "second reconstruction," a new national drive to finally put an end to second-class citizenship for millions of black Americans.

Roy Wilkins' legendary role in the 1954 school desegregation case is testimony enough of his contribution to that "second reconstruction"; but it is just one exemplary achievement in a long list of accomplishments.

He participated, he was there, in the battles that resulted in the enactment of civil rights laws, in the integration of schools and universities, in the election of minority public officials, and in the appearance of blacks in institutions and professions where none had been welcome.

Without flamboyance, without noisy rhetoric, and without militant appeals, he quietly and persistently directed the work of the NAACP. With dedication and determination, he adhered to the principles of nonviolent struggle in the legislatures and courts of the Nation.

Particularly during the turbulence of the sixties, more radical activists came on the scene, preached revolution, but soon dropped from view. However, like A. Philip Randolph and Dr. Martin Luther King, Jr., Roy Wilkins understood how to bring about lasting change in America. The outcome of his labors will benefit generations of citizens years after the recent day he drew his last breath.

We who survive him have an opportunity, and a responsibility, to pick up the banner and renew the struggle. The agenda he set, the dream he held so dear for an America of real equality, remains unrealized. To truly honor

his memory, we must complete his work and free our Nation from the curse of discrimination, wherever it may linger.

Mr. MITCHELL of Maryland. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Speaker, I thank the gentleman for yielding, and I commend him for taking this special order. Indeed this Nation is the lesser because of the passing of Roy Wilkins, and I want to join in this tribute to his life.

Mr. Speaker, on September 8, 1981, this Nation lost a leader whose legacy moves us one step closer to the achievement of equality for all people. Roy Wilkins, a leader and stalwart of the National Association for the Advancement of Colored People (NAACP) for 46 years, and its executive director for 22 years, passed away following a serious battle with ill health.

While sadness over his recent death remains with us, the strength of Roy Wilkins' life and the very spirit of his commitment will continue to guide us for many years to come. There are not many who will forget or cease to benefit from Mr. Wilkins' significant contributions and leading role in landmark decisions and laws which helped to form the foundation for the national focus on civil and human rights. For example, it was Roy Wilkins who was the NAACP administrator when this organization won the monumental Brown against Board of Education decision in the U.S. Supreme Court in 1954. This decision provided the essential impetus for the pursuit of equal educational opportunities since it overturned the 1896 Plessy against Ferguson decision, which maintained the legal justification for racial segregation in this country.

Roy Wilkins' tenure as a leader within the NAACP was marked with many other triumphs for those who sought the equal application of justice to all citizens under our Nation's laws. Some of the highlights include his role as a key supporter and organizer of the historic 1963 March on Washington. This march, a reiteration of many citizens' concerns for the enjoyment of equal rights by all, was a part of Roy Wilkins' work which led to the congressional passage of the 1964 national Civil Rights Act.

As we reflect on the life of Roy Wilkins, we can see that this "quiet storm" of a man provided an example worthy of duplication. We must share with our children the works of this great human being, and the constant reminder that his statements and actions were based on intensive research and the thorough completion of his homework.

Throughout his life, Roy Wilkins' work symbolized pride, dedication, tenacity, and concern for all people. His particular activities to safeguard and promote the rights of black people in this Nation epitomized a human who, in his heart, felt that the meaning of "family" extended beyond strict biological boundaries. These are but a few of the things about Roy Wilkins which will never be forgotten.

□ 1730

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from New York.

Mr. WEISS. Mr. Speaker, Roy Wilkins' life should be an inspiration to all those who believe that human values should be preeminent in our society. He was a man who achieved great things in a momentous cause.

Roy Wilkins was a model for all leaders. He showed that intensity of belief can be consistent with responsible political style. He was a man with a vision, a vision whose clarity and consistency gave him strength to persist on its behalf. He was a pragmatist who knew the value of sound planning and careful execution. He knew that men and women must stand up for their rights. The grandson of a Mississippi slave, Roy Wilkins began his career as the crusading editor of a black weekly, the Call, in Kansas City, Mo. Within a few years, he had been asked to join the staff of the National Association for the Advancement of Colored People NAACP. His first project was the exposure of the virtual slave conditions under which blacks worked building levees beside the Mississippi River on a Federal project. After working those levees incognito, Wilkins said he had learned more about racism than in years of journalistic and academic observation.

That experience must have fortified him for the struggles to come. The high point, he said, was the ruling of the U.S. Supreme Court in the 1954 case, Brown against Board of Education, overturning the doctrine of "separate but equal" and the racial segregation it condoned. It is Roy Wilkins who deserves much of the credit for planning the legal battle that led to that decision.

Wilkins was a key planner of the 1963 march on Washington, when civil rights flowered as an issue in the national mind. He worked behind the scenes to insure passage of the landmark civil rights laws of the 1960's. And 30 years before, he had led the drive to enact antilynching laws when that foul practice was still common in the rural South and Midwest.

Roy Wilkins worked for the NAACP for 50 years. He served as its executive director for 22 years. During his tenure with the organization, it grew from 25,000 members to a powerful force of 400,000, and annual income rose from $80,000 to $3.6 million. It always got its basic support from the ordinary people of this land, especially the working blacks whose rights Roy Wilkins so eloquently fought for.

Those who criticized his low-key style during the sixties today must know that Roy Wilkins was an invaluable leader. Without his dogged pursuit of legal and legislative goals, the codification of all Americans' civil rights may not have been achieved when it was, or in the form that it was. Due to his leadership, black and white children in Virginia, Texas, New York, Massachusetts, and across the Nation now attend school together. The most hideous legal barriers to equality, that once marked this land with an American apartheid, have fallen. His fellow Americans have seen that civil rights is a cause that transcends self-interest, one that will ennoble us all by its realization.

Roy Wilkins struggled for the rights of all people. He knew that without common understanding, no one will ever be free. It is an honor to remember him, and to have worked in some small way to help in the cause he did so much to advance.

Mr. CONYERS. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Speaker, I thank my colleague for yielding and for taking this special order on Roy Wilkins. I feel a personal loss.

Throughout my career in the North as a civil rights activist, Roy Wilkins was the word, was the image, was the strategist that brought many in the communities across this Nation together in a very unique way. In addition, of course, he worked very closely with the Presidents of the United States in the passage of civil rights legislation.

So I very proudly join with my colleagues who pay Roy Wilkins this important tribute this day in this House.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding and congratulate him on assembling this tribute to Roy Wilkins.

As Director of the Office of Civil Rights, I had the opportunity to work very closely with Mr. Wilkins in the effort to try to achieve equal education in this country. I think he was a man who was very sensitive to the needs of everyone in the effort to obtain equal rights, and we will miss him a great deal in the efforts to implement civil rights laws in this country.

Mr. Speaker, I would like to pay tribute to a heroic figure in recent American history, Mr. Roy Wilkins, whose death last week saddened everyone who cares about freedom and social justice.

The grandson of a Mississippi slave and the son of a college graduate who was forced to earn a living tending a brick kiln, Mr. Wilkins took an activist role in the civil rights movement at an early age. As a student at the University of Minnesota and as managing

editor of a Kansas City newspaper, he called attention to the plight of blacks in America. In the early thirties, when lynchings still occurred in alarming numbers throughout the country, Mr. Wilkins joined the staff of the NAACP, later becoming greatly involved in planning for the landmark Brown against Board of Education case, in which the Supreme Court outlawed "separate but equal" public schools. In 1955 he was named executive director of the NAACP, a post he held for 22 years, years that saw the economic and political status of American blacks improve dramatically.

Mr. Wilkins served as the calm eye in the storm that swirled around the civil rights movement. He refused to advocate violence and disruption to achieve the goals of the movement, but rather advised blacks to work within the legal system and with government to secure rights owed them under the Constitution. The numerous statutes that now exist guaranteeing minority rights in elections, housing, and jobs are a testament to Mr. Wilkins' persuasiveness and dedication to the civil rights movement. We were all fortunate to have so fine a man in such a sensitive position throughout one of the most difficult periods of our history.

As Director of the Office for Civil Rights, I had the opportunity to work closely with Mr. Wilkins in the effort to promote equal education for our children.

Mr. DYMALLY. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from California.

Mr. DYMALLY. Mr. Speaker, on Tuesday, September 8, 1981, America lost one of her greatest sons.

The tributes from those who loved and admired Roy Wilkins, as well as from those who were compelled to respect him even as they differed with him, speak eloquently of the mark he made on this Nation's life.

As is true of all the faithful who seek not to tyrannize, but to serve humankind, Roy Wilkins lived his commitment. His was not the way of empty ritual or hypocritical rhetoric, but of action.

He literally put his life on the line that those he considered his brothers and sisters—and they were both black and white—might inherit lives of freedom and dignity. Few indeed there are of whom as much can be said.

As journalist, as civil rights worker, as leader of the NAACP during two of the most critical decades of this century, Roy Wilkins showed the rest of us how to live a life of humanitarian concern.

There is a certain irony, and yet a profound symbolism, in his sojourn with us coming to an end as America is turning away from the values he held dear. It is almost as if he chose to stage one last grand protest of the violence and selfishness and greed that has gripped our Nation's soul.

It is sometimes the case that circumstances are such as to enable the voice of a prophet to be heard only in death. I pray this final act of his may serve to waken us to the options we have before us—indeed, awaken us to the reality that we do have options.

This would surely be the most fitting tribute, for Roy Wilkins' fight, above all else, was a fight against the intolerance and closed-mindednesss of dogmatism that denies us options and so denies us freedom.

His was a spirit that rejoiced in opening the gates to opportunity. If we seek to honor that spirit, let us not utter mere words; let us authenticate in our actions our own faith that his was the right way, the just way, and what ought to be the American way.

Ms. FERRARO. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I am pleased to yield to the gentlewoman from New York.

Ms. FERRARO. Mr. Speaker, I want to commend my distinguished colleague and good friend, the gentleman from New York, for asking for this special order to honor a man who contributed so much to American history over the past 50 years—Roy Wilkins.

In 1958, when I was a student at the Fordham University Law School, I had the opportunity to interview Roy Wilkins, who at the time had already been active in the civil rights movement for a quarter century and was executive director of the NAACP.

In that interview, Roy Wilkins impressed me as a brilliant, articulate, compassionate man, totally dedicated to the cause of civil rights.

In the years following, Roy Wilkins would become a nationally known figure and one of the leading lights in this country's struggle to escape the darkness of racial prejudice.

His efforts made possible the 1963 Freedom March on Washington at which Martin Luther King, Jr., made his historic "I Have A Dream" speech.

He always believed in working within the system. When the frustrations and pressures forced some to turn to violence, he steadfastly pursued his goals of justice, equality, and opportunity in the Congress, in the courts, and in the country.

Perhaps more than any other person out of government, Roy Wilkins played a vital role in the passage of the major civil rights legislation of the sixties. The Civil Rights Act of 1964, the Voting Rights Act of 1965, and the Fair Housing Act of 1968 all bore the mark of his influence.

A few years ago, I had the opportunity to meet Roy Wilkins again. While he was not as physically active as he had been—in fact, his wife had to read his speech that day—his words showed the same brilliance, the same reasonableness, the same dedication to the cause that fired a nations's spirit.

In our continuing efforts to achieve racial equality, we will miss Roy Wilkins.

Mr. WASHINGTON. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Illinois.

Mr. WASHINGTON. Mr. Speaker, it is with sadness and a deep sense of loss that I join my colleagues today in paying our respects to the late Roy Wilkins.

No one can doubt that Roy Wilkins was a man worthy of our respect and a man who won the respect of the entire Nation.

But Roy Wilkins, the man, is gone. So let us look beyond the man to his lasting legacy, the contributions he made to his community, his Nation, and his world. Let us look at what he did and how he did it.

Like most of us, Roy Wilkins was a product of his time. A man of great dignity, he sought dignity in others. A deeply tolerant man, he believed that tolerance and patient perseverance would bring out the best in all men and women. His entire career, every major act in his 46 years of service at the NAACP, was testimony to the depth of Roy Wilkins' unshakable faith in his fellow human beings.

Roy Wilkins was no Joshua. He was not the one to make the walls come tumbling down. Roy Wilkins was a man who believed in knocking at the door, a man with faith that, in righteous time, the doors would be opened.

That one word, faith, is the key to understanding Roy Wilkins. It was faith that kept him going when the obstacles seemed insurmountable. It was faith which made him a most patient, most persistent spokesman for black people, through periods of hardship which would drive a lesser man to deep despair.

He had faith in the American people, that one day we would all march together—black and white, young and old—in a history-making crusade for racial and economic justice.

He had faith in the Congress and the Presidency, faith that this Nation's leaders would adopt and sign the civil rights laws which were needed to transform the fine words of the Bill of Rights and of the 13th, 14th and 15th amendments to the Constitution into a living reality for all citizens.

He had faith that the American system would prevail; that the words "liberty and justice for all" were more than just rhetoric; that our Nation's Government and private institutions would respond to patient, reasoned arguments and forthright but tactful pressure. He believed in working through channels. He believed—as much as any Member of this body—in the legislative process, in the judiciary, in the Presidency. He believed that the wheels of justice would turn, that justice would be done, even when all the historical evidence suggested otherwise.

It was faith such as his which sustained the civil rights movement

through the difficult fifties into the vital legislative advances of the sixties. Against all the odds, this faith prevailed.

Yet, today that great legacy is endangered.

The Voting Rights Act, for which he labored so diligently in 1965, is being questioned and even attacked just as its impact is starting to be felt. The economic and social achievements of the sixties have become the target for a conservative backlash in the eighties.

In such an era, we cannot pay our respects to Roy Wilkins with words alone.

Roy Wilkins gave this Nation the best years of his life. He served, not just black people, but all Americans who care about social justice. He pursued a noble, but simple objective—to make the words of the Bill of Rights and the Constitution ring true. His accomplishments may have been remarkable. But his goals and ideals were composed of the simple truths which make our Nation great.

For those who believe in those goals the time for faith alone is clearly past. We can pay our respects, to the memory of Roy Wilkins, by working for the future betterment of our Nation and all its people; by working to revive and sustain the movement for social justice to which he gave every ounce of his intelligence, his commitment, and his faith.

● Mr. RODINO. Mr. Speaker, I could scarcely give words to the sorrow I felt when I learned that my dear and longtime friend, Roy Wilkins, had died.

How difficult it is to face the reality that his voice, so eloquent in his half-century struggle for equality and justice, is now silent. How difficult it is to accept that this indomitable man, who for 46 years was a propelling yet steadying force within the National Association for the Advancement of Colored People, is no longer here to counsel us, to inspire us, as he always did in his relentless quest for full citizenship for all who suffer racial prejudice.

During his long years as head of the NAACP he was a thoughtful, stable, effective leader. He was the chief architect of the legal strategy that resulted in the 1954 Supreme Court ruling that declared so-called separate but equal public schools unconstitutional. His role was inestimable in the passage of the Civil Rights Act of 1964, the Voting Rights Act of 1965, and the Fair Housing Act of 1968.

Under his leadership, the NAACP chose to fight the battles for justice and against bigotry in the Congress and the courts. Roy Wilkins followed this course of working within the law, within the system, even during the years when less patient civil rights leaders counseled a more militant approach, because he believed his tactics the correct one to achieve equal rights and equal opportunities.

But early in his career, and in subsequent years, Roy Wilkins proved his willingness to take his cause to the streets when he thought this would help break down the barriers to his goals. As early as 1934, He was arrested in a demonstration in support of antilynching laws. He was among the leaders of the later civil rights marches in Washington, in Selma, in Montgomery, in Memphis, and in other cities.

In the words of his nephew, Roger Wilkins, Roy loved above all to compose "elegant statements and send them or take them out to do the battle for justice to which his life was committed."

Roger Wilkins wrote at the death of his uncle:

> He did other things in the movement of course. He marched in demonstrations, he orchestrated the March on Washington in 1963. He met in rooms from battered shacks in Alabama to the Oval Office on Pennsylvania Avenue to help shape strategies to secure more justice for all Americans.
>
> But it was the word he loved and used with joy and power in his life's fight.

Although Roy Wilkins is now dead, his lifelong dedication to freedom and equality will remain a bright and lasting beacon for us all in the continuing struggle for justice for all.

Roy Wilkins retired as executive director of the NAACP in 1977. During his tenure the membership of that organization had grown from 25,000 in 1931 to more than 400,000.

On the occasion of his retirement, He promised, "As long as there is breath in my body, I shall be with you in this fight."

That breath is now stilled, but his promise will last beyond his life. The values, the courage, the fervor, the elegant statements of Roy Wilkins will endure.

He will remain with us in the fight that does, indeed, still lie ahead.●

● Mr. STOKES. Mr. Speaker, I would like to thank my distinguished colleague, the gentleman from New York (Mr. ADDABBO), for taking this special order so the Members of the House can pay tribute to one of this Nation's greatest leaders—Mr. Roy Wilkins. As all of my colleagues know, Roy Wilkins, the former executive director of the National Association for the Advancement of Colored People, died on September 8, 1981, at the age of 80.

The fact that Members of this body are taking this time to pay tribute to this great civil rights leader is in itself a testimonial to the principles and civil rights victories of Roy Wilkins. He believed and fought for the principle that all men, regardless of their skin color or economic status, had the same rights and by law should have the same opportunity to pursue the American dream.

Mr. Speaker, Roy Wilkins worked everyday of his life for these convictions in his own effective methodical style. It was his perseverance which paved the way for blacks in this Nation to rise above the throes of injustice and discrimination and simultaneously elevate the sense of morality and justice in this Nation.

Mr. Speaker, Roy Wilkins' accomplishment in the field of civil rights were unmatched. His ingenuity as a master strategist for civil rights legislation is something we all can be thankful for.

In my mind, Roy Wilkins was and will always be regarded as the positive catalyst and one of the first architects of the civil rights movement. He was, at the same time, the eloquent voice for change and the voice of rationality in that struggle for change.

We will sorely miss Roy Wilkins' wit and his tenacity for getting the job done in terms of righting the wrongs of this Nation with regards to blacks and the poor. He leaves us a strong legacy of love, determination, and justice that every Member of this body and this Nation can take pride in.

With those thoughts in mind, Mr. Speaker, I join my colleagues in acknowledging the death of one of our greatest citizens: Mr. Roy Wilkins. Although the physical presence of Roy Wilkins is no longer with us, the movement that he nurtured will live on.

● Mr. MAZZOLI. Mr. Speaker, I would like to join my colleagues in the House of Representatives in paying tribute to Roy Wilkins, who passed away September 8, 1981, at the age of 80.

As a leader of the NAACP for 42 years and its executive director for 22 years, Roy Wilkins helped shape the course of the civil rights movement in the United States.

Though Mr. Wilkins' work was, for the most part, behind the scenes, his determination and conviction provided the guiding spirit of the civil rights movement. Indeed, as a man who could fight for the poor, the weak, and the hungry, Roy Wilkins was unsurpassed.

His life and his work should serve as an example to us all. Roy Wilkins deserves the highest acclaim from all freedom-loving Americans who, in many ways, owe their cherished rights and liberties to this dedicated, giving man.

We shall all miss him greatly.●

● Mr. FROST. Mr. Speaker, I am saddened by the death of Roy Wilkins, a man who championed the rights of minorities in this country. His contributions to the civil rights movement will not soon be forgotten. While his efforts may have been matched by other civil rights leaders, black achievements over the past 50 years surely would not have been possible without his help.

During a time when militancy often became the preferred strategy, Roy Wilkins' was the voice of reason—the man who preferred to work within the system to correct its deficiencies rather than destroying it entirely. Roy Wilkins knew the system could be used to the advantage of blacks. He

was the architect of the 1954 Supreme Court ruling striking down the "separate but equal" doctrine—a victory over a system that had so often failed his race.

Wilkins steered the National Association for the Advancement of Colored People through its years of greatest achievement. He was both strategist and architect during those years. But his greatest contribution was to the individual black man and woman. Roy Wilkins had no apologies for his color, and knew no limits to his potential. His inspiration taught young blacks to see themselves as people, rather than products of a system. For this contribution, he will be badly missed by everyone who profited from his efforts.●

● Mr. FLORIO. Mr. Speaker, this past week our Nation was shocked and deeply grieved by the news that Roy Wilkins, leader of the National Association for the Advancement of Colored People and an activist in the cause of civil rights for more than 50 years, passed away at the age of 80 in New York City.

From 1931, when Wilkins joined the NAACP until 1977, when he retired as executive director after 22 years in that post, Mr. Wilkins and the NAACP were one. He guided the NAACP, the Nation's largest and oldest civil rights group, through its time of greatest growth and prestige. During his tenure as a top official, membership rose from approximately 25,000 in 1931 to more than 400,000 in July 1977. The number of branches of the NAACP also rose from 690 in 1931 to approximately 1,700 in 1977.

Roy Wilkins was the chief planner of the legal battle that resulted in the 1954 Supreme Court decision outlawing "separate but equal" public schools. This laid the foundation for the civil rights gains of the 1960's.

Mr. Wilkins was instrumental in the development of a better life for blacks throughout this Nation, most prominently in the fields of education, employment and housing.

Roy Wilkins was an inspiration to countless people in the civil rights movement, and young people throughout the world. He left behind a legacy of achievement, of cooperation and of progress.

On the death of Wilkins, mourners throughout the world expressed their sorrow and praised not only what he did in his life, but the way he did it and what he stood for.

Although Roy Wilkins will no longer be with us, the accomplishments of his life will continue on.●

● Mrs. HOLT. Mr. Speaker, we might all hope that upon reaching the age of 80, we could look back upon a life of great accomplishment that earned the respect of millions of our fellow citizens.

Roy Wilkins attained that marvelous level of success; he even looked forward to greater triumphs for the cause he led, and he had the respect of all of us.

Perhaps it is not proper to mourn the passing of such a great man. Perhaps we should instead be giving thanks to God that he was among us and achieved good things.

As executive director of the NAACP, Mr. Wilkins worked to achieve social justice by using the courts and the legislative process in our great constitutional system of Government, and he appealed to the conscience of the people.

Much of the progress we have made in fighting racial discrimination can be credited to his noble work. We as a people owe much to his labors, the fruits of which we will be seeing long into the future.

We Americans are one people, and he always reminded us of it.●

● Mr. GEJDENSON. Mr. Speaker, I would like to join with my colleagues today in paying tribute to a great man, Mr. Roy Wilkins. Roy Wilkins, who was the grandson of a slave, will be remembered as one of the main moving forces behind the civil rights movement in this country.

Mr. Wilkins, who served as the Executive Director of the NAACP for 22 years, truly devoted himself to the cause of social justice. Fighting for civil rights has never been an easy business, but Roy Wilkins literally risked his life in the pursuit of that goal. He led the drive to enact antilynching laws in the 1930's, and he was a leader of the NAACP when that organization won the landmark case of Brown against Board of Education.

As a close friend and trusted adviser of President Johnson, Roy Wilkins was instrumental in the passage of our most important civil rights laws. His quiet style and effective coalition building was crucial to the enactment of the Civil Rights Act of 1964, the Voting Rights Act of 1965, and the Fair Housing Act of 1968.

Because of Roy Wilkins great strides have been made toward guaranteeing civil rights for all Americans, but the fight is far from over. In these times, when apathy seems to be the order of the day, we can be thankful that we have the memory of Roy Wilkins to look to for inspiration. Whenever we are feeling too tired, or too busy, or just to lazy to speak out against injustice we should all remember Roy Wilkins and renew our commitment to the fight for equality.●

● Mr. VENTO. Roy Wilkins was a great American. He could have sought material wealth, but he aimed for the stars. His quest was to breathe life into the American dream.

Roy Wilkins will be remembered with other great leaders like Hubert Humphrey and Luther Youngdahl. He shared their goals and visions, and they shared his. He contributed to their greatness as much as they contributed to his. It was really as a result of their mutual respect and support for each other that we were able to achieve the remarkable social progress we did.

We are especially proud of Roy Wilkins' close ties to St. Paul, Minn. But our feelings about him and our respect for what he did transcend the local interest.

Many people in St. Paul knew Roy Wilkins personally. I did not. I only knew him through his ideas and his beliefs. His legacy of hard work, commitment and determination became his hallmark. It is a hallmark which can be built upon by those who continue his work to improve the lives of all Americans, black and white, red and yellow.

In labor, they say that Roy Wilkins had a "working man's scholarship." That means that he worked 40, 50, and 60 hours a week. Roy Wilkins worked hard to gain his skills and know-how. He may have been a genius, but more likely it was 95-percent determination that enabled him to achieve such a long list of successes and lay such a strong foundation for our civil rights programs.

If Roy Wilkins is known for his determination, he is also known for his unselfishness. What he gained from his education, he turned back to the community by using his knowledge and skills to help better his neighborhood, his city, his country. There is an old saying that a man of humanity is one who, in seeking to establish himself, finds a foothold for others, and who, desiring attainment for himself, helps others to attain. Roy Wilkins was a man of humanity and a man of humility.

We should cherish the lessons and examples of Roy Wilkins' life. He was a role model not just for black Americans, but for all Americans who care about people and social justice.

Roy Wilkins will be greatly missed.●

● Mr. CLAY. Mr. Speaker, it is with profound sadness that I take this opportunity to express my condolences upon the death of Mr. Roy Wilkins.

Mr. Wilkins, elder statesman of the civil rights movement, was born in St. Louis, Mo., in 1901, graduated from the University of Mimesota, and worked for the Kansas City Call newspaper before joining the National Association for the Advancement of Colored People (NAACP) in 1931. He spent 46 years of his life with the NAACP where he rose from the position of assistant secretary to executive director.

The life of Roy Wilkins reflects a record of persistent battling for the underprivileged and black Americans in our Nation. His commitment and determination to right wrongs in our society were unrelenting. For over 46 years, he was the moral conscience of this country. He was unwavering in his determination to use all legal and constitutional means at his disposal to help black Americans achieve the right of full citizenship and total equality of opportunity within the

democratic framework of American society.

Mr. Wilkins seemed happiest when he was about the business of correcting socioeconomic and racial inequities and advocating human possibilities for blacks and those who were historically excluded from the mainstream of American life. He was untiring in working to help direct the fight for equal rights and opportunities for blacks.

He stood as a monument of integrity, perseverance, and fidelity to social justice and a belief in the improvability of all mankind. Mr. Wilkins leaves behind a distinguished legacy of outstanding achievements and contributions which are luminescent examples of personal courage, and steadfast moral conviction which will shine forever as a beacon of wisdom and guidance for all of us who follow the path of struggle in pursuit of lasting justice for all.

Among his many awards and achievements, Mr. Wilkins won the Spingarn Medal in 1964 for his work in civil rights.

Roy Wilkins was a man for all seasons. He was proud of his heritage, riveted to the cause of equality of opportunity, bold in his pursuit of social justice, and a proud black spartan who was unremitting in his efforts to achieve a just society.

The legacy of Roy Wilkins will remain with us eternally for the work he accomplished. To his dear wife, Minnie, I extend my deepest sympathy.

● Mr. RICHMOND. Mr. Speaker, I join my colleagues in honoring one of the greatest and most effective civil rights leaders in our Nation's history—Roy Wilkins, former executive director of the National Association for the Advancement of Colored People.

Roy Wilkins guided and shaped the growth of the NAACP, in which he served from 1931 until his retirement in 1977.

He was a key organizer of the March on Washington in August 1963, when 250,000 people came to Washington in the cause of civil rights, justice, and equality.

In his quiet, efficient way, Roy Wilkins worked within the system, teaching, organizing, inspiring—and winning victory after victory in the struggle to enable black Americans to participate fully in American society.

When he retired from the executive directorship of the NAACP, all of the battles had not yet been won. But, as a result of his courageous and ceaseless efforts over more than half a century, the principle of racial equality is firmly rooted in our laws and daily life.

Roy Wilkins was a man of eloquence, modesty, and grace; an enduring, inspirational leader whose every action was motivated by love, by compassion, and by a passionate opposition to injustice.

● Mr. BIAGGI. Mr. Speaker, I wish to join my colleagues in paying a richly deserved tribute to a leading pioneer in our Nation's civil rights movement—Roy Wilkins. While I deeply regret his death at the age of 80, I would like to take this time to salute his life.

A Mississippi slave's grandson, Roy Wilkins knew poverty at an early age and soon discovered prejudice. He tolerated neither. Instead, his unsurpassed strength and determination allowed him to climb out of the ghetto, obtain a college education, and become one of our Nation's most respected and effective civil rights leaders.

As a leader of the National Association for the Advancement of Colored People (NAACP) for 46 years, he played a major role in the enactment of antilynching laws in the 1930's; obtaining the 1954 Supreme Court decision, Brown against Board of Education, which reversed radial segregation policies in the United States; organizing the 1963 civil rights march on Washington; and enacting the landmark 1964 Civil Rights Act.

His methods, while sometimes less than dynamic, were always effective. His patience and ability to work within the system allowed Mr. Wilkins to succeed where others had failed. For this, all Americans, no matter what creed or color, can be thankful.

Mr. Speaker, Roy Wilkins spent a lifetime helping to rid this Nation of racial injustice. As a direct result, America is a better place to live. But—as I am sure Roy Wilkins would want us to recognize—no matter how far we have come, the journey is still far from over. His life was spent laying the foundation for justice and equality; I am hopeful his memory will provide the inspiration for others to complete the task.●

● Mr. HALL of Ohio. Mr. Speaker, I join my colleagues in mourning the loss of a great civil rights leader and a great American, Roy Wilkins.

For half a century, Wilkins fought to improve the lives of black people by guaranteeing their political and economic rights. He was an active participant in every major civil rights advancement since the 1930's when he helped establish State antilynching laws. He was the architect of the historic 1954 Surpeme Court decision which overturned the doctrine of "separate but equal," paving the way for school desegregation. He worked to pass the Civil Rights Acts of 1957, 1960, and 1964, as well as the Voting Rights Act of 1965.

As an executive of the National Association for the Advancement of Colored People, Wilkins led the group from a membership of 25,000 in 1931 to a broad-based organization of 500,000 in 1977. From 1955, he served as executive director.

Wilkins was a man of courage who was unafraid to fight for the rights of black people. He risked his life by investigating poor conditions of black workers rebuilding levees on the Mississippi River in 1931. He was arrested several times for participating in civil rights demonstrations. He was always outspoken, ready to condemn any leader—black or white—who opposed the concept of equality of all peoples.

Yet Wilkins preferred negotiation to confrontation. His eloquence, quietness, and powers of persuasion gave him a special effectiveness in dealing within the political and legal system. He was a statesman of the first order.

Roy Wilkins dedicated his life to justice and equality. Let us always keep his memory alive by continuing his unfinished work.●

● Mr. ANDERSON. Mr. Speaker, this past September 8 America lost a great leader, Roy Wilkins, the former executive director of the NAACP. During most of his 80 years amongst us, Roy Wilkins contributed tremendously toward improving the quality of life of all Americans, by dedicating himself to combating racial prejudice.

As a youth, following his graduation from the University of Minnesota, Wilkins worked for Chester A. Franklin's Kansas City Call, a Negro newsweekly which shortly made him its managing editor. However, Wilkins was not satisfied with taking the nonactivist position of merely covering the news. He continually urged the paper's readers to vote and assert their rights. It is believed that this stance contributed to the defeat of Senator Henry J. Allen, a man Wilkins referred to as "a militant racist."

These activities brought Wilkins to the attention of Walter White, then the executive secretary of the NAACP. White brought Wilkins into that organization, where Wilkins would remain for over 40 years. During Wilkins years with the NAACP, its membership grew from 25,000 in 1931 to over 400,000 at the time of his retirement in 1977. In the thirties, when there were over 30 lynchings annually, Wilkins led the fight to stop them. He organized picketing of U.S. Attorney General Homer G. Cummings' office, after the latter's failure to place lynching on the national crime agenda. In later years, as executive director of the NAACP, Wilkins masterminded the legal assault against segregation which culminated in the Supreme Court's decision in Brown against the Board of Education. Afterward, Wilkins formed a friendship with President Johnson and helped him develop the Civil Rights Act of 1964.

Throughout his life, Roy Wilkins remained a man of consistency, integrity and honesty who worked within the law to obtain his people's rights. In his own words, Roy Wilkins believed that the Negro—

> Has to parlay what actual power he has along with the goodwill of the white majority. . . He must gain the sympathy of the large majority of the American public.

However, he never believed that blacks had to docily accept the status quo. Wilkins also said:

We must condemn the propaganda that Negro citizens must "earn" their rights through good behavior; . . . No American is required to earn his rights as a citizen. His human rights come from God and his citizenship rights come from the Constitution.

All his life, Roy Wilkins was a crusader for justice condemning oppression without exception, be it a dictator like Idi Amin abroad or Jim Crow laws at home. Always, he maintained his integrity by working within the law and reshaping it into a more just instrument than when he started. I was fortunate to have had the opportunity to meet this great man, and I believe we might best honor him by continuing the work that still remains unfinished to insure equality for all Americans.●

● Mr. MOFFETT. Mr. Speaker, I rise today to express my sadness at the death of NAACP leader Roy Wilkins, and also to express my respect and admiration for his efforts on behalf of equal rights for all Americans.

Mr. Wilkins led the NAACP through times of considerable turmoil in this country; yet he always maintained a cool, calm, and reasoned approach to the issue of civil rights. His attitude toward equality for black Americans was one of peaceful protest and change wrought through the legislative process. He believed in the system, and he used it successfully in efforts to desegregate the classroom, to achieve voting rights, fair housing, and employment opportunities. Mr. Wilkins was the driving force behind such landmark civil rights policy as the Brown against Board of Education Supreme Court decision. His ability to absorb and articulate the issues of concern to black Americans won him the unqualified respect and appreciation of Presidents, the Congress, and his fellow Americans.

It is with great sadness that we observe Mr. Wilkins' death. Eighty-one years ago, the poet Paul Laurence Dunbar said that black life in America was a promise and not a fulfillment. Roy Wilkins made an enormous contribution toward that fulfillment, but the battle—as he himself recognized—is yet to be won. We have an unfulfilled agenda for many minorities in our society. Let us not permit progress to wane on the issues to which Mr. Wilkins committed his life: voting rights, housing, employment opportunities, health, and education. I pay homage to this great man and thank him for his good work on behalf of all the races in this Nation.●

● Mr. FASCELL. Mr. Speaker, I am grateful to our distinguished colleague from New York, Mr. ADDABBO, for this opportunity to pay tribute to the memory of a truly great American, Roy Wilkins.

Roy Wilkins was a fighter, a leader for a cause which he knew to be just—the civil rights of black Americans. His struggle was not an easy one. He abhorred the Jim Crow and lynching laws accepted in many parts of the country earlier in this century, and was a key instigator in eliminating these atrocities. He was harassed, ridiculed, and even arrested for his civil rights activities. These obstacles, too, were eventually overcome.

There are many ways to fight a battle. Roy Wilkins' way was to work within the law, with political, religious, and community leaders; to gradually, yet effectively, change the system which had previously seemed immovable. He chose his weapons carefully; he could not condone the use of violence, destruction, hatred, or bitterness. His weapons were words—strong, persuasive words—and the use of legislation and the courts to help secure the victories which he fought so diligently to gain. He once said, "No American is required to 'earn' his rights as a citizen. His rights come from God and his citizenship rights come from the Constitution." Firm in this conviction, his messages were transferred into major successes—the 1963 march on Washington, the Supreme Court decision in Brown against Board of Education, the Voting Rights Act, the Fair Housing Act, and the Civil Rights Act. Presidents Kennedy and Johnson depended on his honesty, faith, and judgment in helping formulate many of these policies.

While we shall all miss Roy Wilkins, we must consider ourselves fortunate to have known and benefited from this man and his honorable cause. As the late columnist Walter Lippmann so accurately stated,

The final test of a leader is that he leaves behind him in other men the conviction and the will to carry on . . . The genius of a good leader is to leave behind him a situation which commonsense, without the grace of genius, can deal with effectively.

Let us work together, with the same conviction and good sense of Roy Wilkins, to achieve what must remain one of our highest national goals—the true equality of all Americans.●

● Mr. FISH. Mr. Speaker, it is with a great sense of loss to our country that I join my colleagues in paying tribute to the late Roy Wilkins. His greatness came out of an ability to inspire people and achieve purpose—the purpose of progressive social change.

Mr. Wilkins will be remembered as the last of a generation of civil rights leaders whose work began when American society was still rigidly segregated by law and lynching was a regular occurrence. Roy Wilkins was the guiding force behind the National Association for the Advancement of Colored People for a half-century, and was in the forefront of the struggle to achieve for black Americans—and thus for all people of color—the social, political, and economic gains which have been reached today and for which the effort continues on behalf of those yet to achieve equality. Roy Wilkins also sought the fruits of liberty and justice established by the Founding Fathers in the Declaration of Independence and the Constitution.

A pillar of intellectual and moral strength, the message of his life and work endures and will have an impact on future generations. His goal was clear: to work a revolution in the laws of the Nation. Many goals of this battle for equality have been achieved, and Roy Wilkins, who dedicated his life to this valiant fight, has instilled in all of us the determination to never give up the struggle for justice and freedom.●

● Mr. MARKS. Mr. Speaker, American flags have flown at half-mast throughout the world—at every U.S. diplomatic and military post, on U.S. naval vessels steaming across the oceans, and whenever our national ensign is displayed. To those around the globe asking Americans why our flag was at half-mast, the answer must have been near unbelievable. The flags of the United States were dipped in mourning for a former redcap, dining car waiter, and black journalist who became one of the most influential Americans of this century.

Roy Wilkins went from doing undercover work with Thurgood Marshall, in documenting the massive abuse of blacks in our society, to guiding President Johnson in managing and coordinating legislative and judicial efforts which vastly expanded the rights and social and economic opportunities of colored people of every color.

One can just imagine the reaction of peoples throughout the world, less blessed with freedom than we are, that a member of a repressed minority would achieve such a reputation that the American Nation would bow its collective head in sorrow at his death but gratitude for his life.

Mr. Speaker, the achievements of Roy Wilkins are a legacy which will sustain us and our continuing efforts to provide equality of opportunity to all Americans. His successful efforts to eradicate lynching from the American scene, his quiet but effective leadership in opening America's schools to every child, his day-by-day work with President Johnson and Vice President Humphrey in securing passage of the 1964 Civil Rights Act and Voting Rights Act of 1965—all are shining tributes to a man of humble stubbornness and persistent dedication to ideals of freedom and equality which identify the just society toward which America must continue to strive.

From 1931 until his death Roy Wilkins not only provided the intellectual and legislative leadership for the civil rights movement, he also led the way in many marches and peaceful demonstrations which focused the attention of America's conscience on the needs and rights of all minorities.

The 1963 Washington march, in which Dr. King spoke of a dream, which must be shared by all Americans, was organized by Roy Wilkins. His wise determination that the civil

rights movement would achieve truly lasting success by working within the legislative and judicial systems has been proven right. How very different might be relations between the races today had the movement taken a different direction. All Americans, of whatever color, owe Roy Wilkins a debt of gratitude we can never repay. His quiet but firm leadership kept us all on a peaceful path—a path which carefully took us through a veritable minefield of potentially explosive confrontations—confrontations which could very well have institutionalized strife as the only means of communication.

Mr. Speaker, it is only fitting that the words which best describe the life, death, and legacy of Roy Wilkins be his own: "The heritage of a man of peace will endure and shine into the darkness of this world." So while we do bow our heads in sorrow, we also bow them in gratitude for the life of this man of peace—a man whose life must continue to show us our way through the darkness.●

● Mr. WEBER of Ohio. Mr. Speaker, I was saddened to hear of the death of Roy Wilkins, a man who will be remembered as one who shaped some of the most important events in the history of the U.S. civil rights movement.

I was in the audience a few years ago when Roy Wilkins, then executive director of the National Association for the Advancement of Colored People, came to Toledo to speak. I remember him as a forceful and eloquent speaker who inspired confidence in his leadership. Roy Wilkins was a man who would get things done. He didn't talk about "what if"—he preferred accomplishment to rhetroic.

Roy Wilkins was a leader in the true sense of the word. He was deeply devoted to the cause of equal rights, equal opportunity, and equal responsibility for all persons. At the same time he recognized the need to build lasting bridges of harmony and understanding between the races.

Roy Wilkins' passing will be felt by everyone who loves what he stood for—a better country for each and every person in the United States. We are all well served by his accomplishments and his ideals.

Thank you, Mr. Speaker.●

● Mr. BOLAND. Mr. Speaker, I appreciate this opportunity to join the Members of the House in paying tribute to Mr. Roy Wilkins who died on Tuesday, September 8, 1981, at the age of 80.

Roy Wilkins devoted his entire life to promoting racial equality. He was one of the most effective advocates of civil rights causes, and many of the civil rights gains made by black people in this country are directly attributable to his efforts.

Roy Wilkins was internationally known for his eloquence, intelligence, and diplomatic manner. These and other qualities made him a dynamic leader, who won the respect of his strongest opponents. He was always recognized as a leader of the civil rights movement and as an expert on racial matters. For these reasons Mr. Wilkins was frequently consulted by the Congress on matters affecting race relations.

As executive director of the National Association for the Advancement of Colored People for 22 years, Roy Wilkins established an outstanding record of leadership and accomplishment. The civil rights movement has in Roy Wilkins' memory a powerful symbol of courage, personal dedication, and compassion. This symbol will surely guide the civil rights movement to further progress on the road to justice.●

● Mr. ROE. Mr. Speaker, I rise today to join my colleagues in this well-deserved salute to the late Roy Wilkins, who perhaps more than any other man represented the era of great progress for the black people of our Nation.

Roy Wilkins was a man of vision who embraced the philosophy that the rule of law rather than confrontation would present the greatest opportunity for the advancement of his people.

As the chief executive of the National Association for the Advancement of Colored People from 1955 to 1977, the Nation's oldest and largest civil rights organization, Roy Wilkins led the way in the fight against such heinous roadblocks to racial equality as the poll tax, segregation in the Armed Forces, public accommodations, and schools.

Mr. Speaker, perhaps the greatest legacy that Roy Wilkins left for his people and all freedom-loving Americans was the U.S. Supreme Court's reversal in 1954 of the Brown against Board of Education decision, which had made "separate but equal" the law of the land.

Roy Wilkins was a man who deeply understood the needs of the black people as they attempted to break free from the bonds of segregation.

Born in 1901, he was the grandson of a slave. As a young man he worked as a redcap, a dishwasher, a train car waiter, and a clean-up man in a slaughterhouse.

Roy Wilkins first became involved in the black movement as a student at the University of Minnesota where he witnessed the lynching of a black man.

After graduating, he became managing editor of a black newspaper, the Kansas City Call, and was instrumental in calling attention to police brutality against blacks in that city. As a result of those efforts, Roy Wilkins was persuaded by the NAACP Director Walter White to become his assistant in 1931.

It was during the 1930's that Roy Wilkins, as editor of the NAACP magazine investigated and published some of the most searing exposés of black mistreatment that the American public had ever seen. The results of those articles were earthshaking with their tremors reaching the Congress, the Supreme Court, and the White House.

In the 1960's Roy Wilkins worked closely with Presidents Kennedy and Johnson in helping draft the Civil Rights Acts of 1964 and 1965.

During the turbulent late 1960's when violence swept the streets of our urban centers, Roy Wilkins strongly condemned the rioting and worked diligently as a member of President Johnson's National Advisory Commission on Civil Disorders to quell those disturbances. His greatest fear was that the flareups would lead to two societies in America; one black and one white.

Roy Wilkins was condemned at that time by several black militants as being an "Uncle Tom." But Wilkins resisted the pressure from those groups and continued working until his recent death to convince blacks that their best hopes for the future lay in working within the existing societal structure rather than against it.

Mr. Speaker, Roy Wilkins was a rare human being whose devotion to his people will both serve as an inspiration and standard for all who will continue his work in the years ahead.

The American people have indeed lost a good friend.●

● Mr. BONER of Tennessee. Mr. Speaker, all Americans are saddened by the death yesterday of civil rights leader Roy Wilkins.

Roy Wilkins was a quiet, but persistent man. Some would even characterize him as stubborn. Yet, he was one of the most effective leaders of the civil rights movement—a leader who, using his great skill, was able to translate the frustration and turbulence of the streets into visions of the future that were comprehensible to policymakers in Washington. His association with officials in the Kennedy and Johnson administrations enabled him to persuade reluctant and fearful politicians that the time was right for legislation to guarantee for the black man and woman what was an unalienable right for all the rest of us—equal justice under law. In a time of lynch law and Jim Crow, Roy Wilkins was a pioneer whose trusted position and determined style contributed to the passage of the Civil Rights Act of 1964, the Voting Rights Act of 1965, and the Fair Housing Act of 1968.

From inauspicious beginnings as the grandson of a Mississippi slave, Roy Wilkins dedicated his life to the protection of all peoples. As executive director of the National Association for the Advancement of Colored People, he guided the organization through its period of greatest growth, prestige, and accomplishment. His role in the historic Brown against Board of Education Supreme Court decision is legendary. His role in supporting and organizing the 1963 March on Washington, however, is too often overlooked. Yet, it was Roy Wilkins, using his greatest persuasive skills, who was

able to translate the great emotion present at the March and subsequent shift in public opinion into legislation and legal rulings that benefited blacks and, as a result, all Americans.

Roy Wilkins worked for equality, spoke for freedom, and marched for justice. His quiet and unassuming manner masked his tremendous passion for civil and human rights. While his voice is now stilled, his spirit and accomplishments will remain among us—encouraging all Americans to carry forward his life's work.●

● Mr. PEPPER. Mr. Speaker, distinguished colleagues, I would like to remember today one of the Founding Fathers our country has been so honored to count as one of its own.

This man was not of the 18th century, nor did he help write our glorious Constitution. It must be said that he worked all his life to bring more of our constitutional protections and liberties home to America.

Roy Wilkins, longtime executive secretary of the NAACP, who was chosen to succeed Walter White in 1955, was one of the fathers of modern America. He, among other outstanding contributors to our public life and cultural perceptions, labored mightily to give constructive form to our modern world. Most of us agree that it is a far, far better world today thanks to the efforts of Roy Wilkins.

Although poverty still exists, discrepancies are still rampant and many hopes have still not been fulfilled, Roy Wilkins' achievement in his time as a man who led the effort for better lives stands undeniable—a monument to human courage and intelligent sacrifice for the advancement of our Nation and our people of every color. For all of us benefit from a climate of liberty as intended under the Constitution and from the freedom of debate and economic enterprise which enlarged our prosperity during the last two decades.

Through marches, legal arguments, courageous civil action and always with the letter and spirit of the Constitution and of human decency, Roy Wilkins insisted on the political, ethical, and practical human equality of black Americans.

His contribution to our cultural growth, our national cohesion, our economic improvement, our human improvement, and our standing in the world was a great and lasting gift he gave to his country.●

● Mr. BINGHAM. Mr. Speaker, I rise to join in the widespread expressions of sorrow at the death of Roy Wilkins, executive director of the NAACP from 1955 to 1977. I wish to thank my colleague from New York, Mr. ADDABBO, for arranging this special order.

Roy Wilkins was 80 years old when he died last Tuesday and, although we grieve at his passing, we must also celebrate a life of such inspiration and achievement.

Roy Wilkins was the grandson of a Mississippi slave. His parents were both college graduates and he grew up in a poor but integrated neighborhood in St. Paul, Minn. He worked his way through the University of Minnesota and, upon graduation, became the editor of a black weekly in Kansas City. It was in Kansas City that Roy Wilkins first encountered the racial discrimination and grinding poverty that were the lot of most American blacks in the early decades of this century. Roy Wilkins could have turned away. He could have retreated into the comfort of middle-class life in Minnesota.

But Wilkins could not do that. In a pattern that marked his entire life, Wilkins entered into the struggle for civil rights and equality. He joined the staff of the NAACP and stayed with that organization for almost 50 years. Wilkins was one of the leaders of the struggles against the poll taxes, segregation in the Armed Forces, and segregation in public accommodations. Perhaps the NAACP's greatest victory was the 1954 Supreme Court decision in Brown against Board of Education which overturned the "separate but equal" doctrine in public school systems. In the 1960's and 1970's, when some militants of the civil rights movement called for violent protest, Wilkins continued to fight for change through peaceful means. He worked with Presidents Kennedy and Johnson on the civil rights legislation of the 1960's which accomplished so much good for all Americans. Roy Wilkins cared less about rhetoric than accomplishment, less about the fashions of the moment than achieving long-term goals. Black separatism never appealed to him. He always insisted that integration, not separation, was the only way.

At various times in my life and as a life member of the NAACP, I had the privilege of meeting Mr. Wilkins on several occasions. I was always impressed with his modesty, his essential goodness, and his shrewd sense of what was possible and what was not. I shall miss the counsel of Roy Wilkins and believe that he will not easily be replaced.●

● Mr. BROWN of California. Mr. Speaker, I wish to submit to the RECORD an editorial, written in Newsweek magazine, September 21, 1981.

Many of my colleagues are paying tribute to the late Roy Wilkins, former executive director of the National Association for the Advancement of Colored People in the coming days. His death hit all members of society as we remember him as a lifelong fighter for equal rights for blacks. Although he is gone, his legacy will never die. Mr. Speaker, I submit this article from Newsweek magazine that captures the essence of the man.

ROY WILKINS, 1901-81

His grandfather was a slave, and his father tended a brick kiln. He worked at turns as a redcap, a dishwasher, a Pullman-car waiter and a cleanup man in a St. Paul slaughterhouse. But since 1931, when Roy Wilkins joined the staff of the National Association for the Advancement of Colored People, his name has been synonymous with the nation's oldest and largest civil-rights organization. His tenure, from 1955 to 1977, as the NAACP's chief executive embraced the era of greatest progress for black Americans. Though he lacked the magnetism of Martin Luther King Jr. or the fire of Stokely Carmichael, he quietly made an enduring contribution to the cause of equal rights, embodying the will of the majority of black citizens to work within the system. When he died last week in New York City of kidney failure, just after his 80th birthday, he left behind a landscape of broken barriers and a lifetime in the fight for integration—against the recalcitrant South and, later, against the forces of separatism within his own race.

Wilkins was most remarkable for his longevity in the civil-rights movement. When the black revolution reached fever pitch in the 1960s, he had already spent four decades battling to make the U.S. legal system work for blacks. Born in 1901 in St. Louis and raised by an aunt and uncle in a poor, integrated section of St. Paul, he knew little racial hatred in his early life. But at the University of Minnesota, he was deeply affected by a lynching in Duluth and after graduation, as managing editor of a black weekly, the Kansas City Call, he experienced Jim Crow firsthand. His efforts on the Call in the 1920s to halt police brutality against blacks and to defeat segregationist politicians attracted the attention of NAACP director Walter White, who persuaded Wilkins to come to New York as his assistant in 1931.

Crusade: For the NAACP the 1930s were the heyday of the anti-lynching campaign, the Scottsboro case and battles against all-white primaries. Wilkins ran the day-to-day operations and spearheaded some of the NAACP's famed exposes. Dressed as a day laborer, he infiltrated Army-run construction projects in 1932, and his revelations that blacks were working twelve hour days for as little as 10 cents an hour forced a Congressional review. As editor of the NAACP magazine, The Crisis, Wilkins also crusaded against poll taxes and segregation in the armed forces, public accommodations and schools. Looking back on his career, he viewed the 1954 Supreme Court decision in *Brown v. Board of Education*, which overturned the "separate but equal" doctrine, as the NAACP's greatest victory.

When the civil-rights battle shifted to the streets in the 1960s, the NAACP and Wilkins—by then its director—lost the limelight to groups like King's Southern Christian Leadership Conference and the Congress of Racial Equality. The NAACP did participate in the sit-ins, boycotts and marches that wrenched the South into compliance with the law, Wilkins liked to point out, but usually its role was to provide bail and legal assistance to other demonstrators. The SCLC and Core "furnish the noise," Wilkins said in 1963, while the NAACP "pays the bills." Wilkins personally spent much of the early 1960s working with John F. Kennedy and Lyndon Johnson on the civil-rights acts of 1964 and 1965 and increasingly, he differed with more visible black leaders who, to Wilkins, some times seemed more interested in protest than progress.

'Jim Crow': The rifts in the civil-rights leadership grew deeper when blacks in Northern urban ghettos rioted in the mid-1960s. Wilkins understood the anger and, as a member of Johnson's National Advisory Commission on Civil Disorders, he was instrumental in drafting the tough language in the panel's 1968 report that warned of

the emergence of "two societies, one black, one white." But Wilkins steadfastly condemned the violence and he advocated the use of Federal troops, when necessary, to contain it. He also opposed the growing black separatist movement. The clamor for all-black dorms and autonomous black-studies departments on some campuses, he declared, were simply "another version of Jim Crow."

Militant black leaders, in turn, branded Wilkins an Uncle Tom, activists picketed his home and a band of revolutionaries was arrested for plotting to assassinate him. Within the NAACP itself, a group known as the Young Turks battled bitterly to steer the organization toward a more militant posture. But Wilkins resisted. He had lived through the back-to-Africa movement and the communist appeal to blacks in the early 1900s, and he still believed that the best hopes of blacks lay in working with whites toward a shared equality.

Wilkins's voice grew quieter in the 1970s, though he continued to press for better opportunities for blacks and assailed Richard Nixon, Gerald Ford and suddenly timid liberals for slowing the pace of desegregation, particularly in school busing. His final years with the NAACP were clouded in a dispute with the group's directors, who suggested that he had stayed too long. But when, at 75, he finally surrendered the helm to former Federal Communications Commission head Benjamin Hooks in 1977, he was met with an outpouring of appreciation for his 46 years of service. Increasingly feeble—he needed a pacemaker and a wheelchair and had developed a speech impediment—Wilkins spent his last years living quietly with his wife, Minnie, a former social worker, accepting awards and working on his autobiography, to be published next year. It should tell a remarkable story of faith, optimism and endurance through an era of historic change.—MELINDA BECK.●

● Mr. WAXMAN. Mr. Speaker, in the death of Roy Wilkins at age 80, we have lost a national treasure. Although I am saddened by his passing, none can doubt that we are immeasurably richer as a nation by virtue of his selfless contributions to our society.

As we all know so well, Roy Wilkins' life spanned an era of change in American civil rights—an era which, without his persistence and quiet genius, might not have occurred. In the 1930's, when America was seemingly blind to the fact that it had a racial problem, Roy Wilkins was risking his life to document discrimination against blacks working on flood control projects along the Mississippi River. His report led to congressional inquiries and legislation against unequal pay and exploitation by employers. It was a victory destined to be followed by countless others. He went on to lead the NAACP for two decades, becoming a pillar of the civil rights movement, guiding America through a veritable social revolution in race relations.

Roy Wilkins placed his belief in the law; his faith in our system of justice. Roy Wilkins' greatest victory in this effort—the landmark Supreme Court decision in Brown against Board of Education—was ours as well. Although it became fashionable among some groups in the late 1960's and 1970's to criticize Roy Wilkins' tactics, the groundwork he laid and the legislative and judicial milestones he erected have served as the firmest foundation for progress in civil rights. We are all in debt to Mr. Wilkins for his courage and dedication.

Let us remember him, then, for his efforts and his hope for the future. They will serve as an inspiration to us to continue the struggle for dignity and equality for all people—just as they have during Roy Wilkins' extraordinary life.●

● Mrs. COLLINS of Illinois. I would like to commend my colleague, Representative JOSEPH ADDABBO, for reserving a special order today so that all Members would have the opportunity en masse to pay tribute to Roy Wilkins, longtime head of the National Association for the Advancement of Colored People (NAACP), who passed of heart failure on September 8, 1981.

In the early morning of the 8th, the public, indeed the world was shocked and saddened to learn of the death of Roy Wilkins. Because Roy lived, the history and indeed, the path of the world changed. His courage and leadership in the 1950's provided the momentum for the activism of the 1960's and 1970's.

At a time when lynchings of young black men were rampant, segregation loomed threateningly over the lives of all black people, and few voices of righteousness and reasoning could be heard, Roy Wilkins took to the picket lines. His objective: To securely and without question establish, in his words, "the Negro as a legal entity with the rights and privileges of a citizen."

Through his active membership with NAACP, Roy was able to effectively lobby State after State in order to help enact antilynching laws. He led the fight against school desegregation by filing a desegregation suit, and scored a victory when the Supreme Court in 1953 directed all public schools to integrate.

His accomplishments were perhaps best described by the Reverend Joseph Lowery, president of the Southern Christian Leadership Conference (SCLC) who said, "He served during the toughest of periods."

Perhaps, in living Roy Wilkins summed up his own life when he said, "the heritage of a man of peace will endure and shine into the darkness of this world."

As a peace-loving man, a strategist, a fighter, and a mover of men, Roy Wilkins, the man and the ideals he preached must continue on. In his name we must rededicate ourselves and not let the clock be turned back on his life's work which was freedom, justice, equality, and economic democracy for all.●

● Mrs. BOGGS. Mr. Speaker, along with many of our colleagues, I am deeply saddened by the death of Roy Wilkins. The sterling qualities he possessed were a rarity that will be difficult, if not impossible, for any of us to experience again in the entity of a single person.

Many people knew Roy Wilkins because of his efforts to improve the social, political, and economic status of his fellow blacks, but many of us will remember his as well as a great humanitarian dedicated to equal opportunity for all Americans. Those of us in public service will also remember him as a skilled politician and statesman.

The son of a Methodist minister, Mr. Wilkins believed that human rights come from God and citizenship rights come from the Constitution, and he fought for constitutional rights in order to secure equality.

In the spirit and memory of Roy Wilkins, this Congress hopefully will heed his words to not turn back the clock on civil rights progress.

I should like to assure Roy Wilkins' family members and close associates that his lifelong struggle to gain respect for others has gained the undying respect of millions of Americans.

Mr. Speaker, I ask permission to include, at this point, in the RECORD an editorial that appeared in the New Orleans Times-Picayune/States-Item on September 10.

ROY WILKINS

If Martin Luther King Jr. was the spiritual leader of the American civil rights movement, Roy Wilkins was its mind. Mr. Wilkins, who died Tuesday at 80, will not be remembered for his impassioned speeches but for his relentless pursuit of racial equality through the nation's legal process.

For 22 years before his retirement in 1977, Mr. Wilkins was executive director of the integrated National Association for the Advancement of Colored People. In all, he served the civil rights organization for 46 years. Quietly but determinedly and skillfully, he worked to broaden the base of support for black civil rights among all Americans. Because of his strategy of working with and through established institutions, he was mistakenly labeled an "Uncle Tom" by some younger black activists impatient for radical change but whose own achievements pale in comparison to the monumental successes of Mr. Wilkins.

He was in the forefront of the civil rights movement "during the toughest of periods," to borrow the words of the Rev. Joseph Lowery, president of the Southern Leadership Conference. "The whole point of the NAACP," Mr. Wilkins once said, "was to establish the Negro as a legal entity with the rights and privileges of a citizen."

To that end, he worked tirelessly and with great success. The high point of the NAACP's legal approach, pursued initially by Roy White, Mr. Wilkins' predecessor as director, came in the famous 1954 Brown vs. the Board of Education decision, when the U.S. Supreme Court held "separate but equal" schools unconstitutional. Later, Mr. Wilkins guided the campaigns that resulted in passage of the historic Civil Rights and Voting Rights Acts during the presidency of Lyndon B. Johnson. These new laws opened the way for the full participation of blacks in the political process, and were largely responsible for the steady increase in the number of black elected officials in the South and elsewhere.

For all his devotion to the cause of civil rights of members of his own race, Roy Wil-

kins fundamentally was a humanitarian who believed deeply in the worth and dignity of the individual. Today, the rights of all Americans are more secure because of his life's work. His place in the history of his country is firmly established.●

● Mr. RATCHFORD. Mr. Speaker, I join my colleagues in grieving the passing of a great American, Roy Wilkins, the former executive director of the National Association for the Advancement of Colored People and a leader in the fight for civil rights for half a century. Born at a time when Jim Crow laws and other forms of socially accepted discriminatory practices were in wide use, Mr. Wilkins dedicated his life to ridding this country of these racial inequities.

Roy Wilkins was instrumental in pushing for legislation that eliminated the "separate-but-equal" philosophy in many of our public school systems, and he championed the Civil Rights Act of 1964, the Voting Rights Act of 1965, and the Fair Housing Act of 1968. Because of his patience and persistence, and the rightness of his cause, the goals of racial equality have been embodied in American law.

He was a teacher and an organizer, an activist, and a statesman. His leadership role on behalf of black Americans awakened our society to the recognition that blacks deserved equal opportunities, basic rights that had been denied for centuries. Although there were some who criticized him and the organization he headed in the turbulent 1960's as being too accommodating and too moderate, the goals of the NAACP were achieved—legal racial equality in the voting booth, in the job and housing markets, in virtually every facet of American society. I am sure that historians will remember Roy Wilkins, the grandson of slaves, as a warrior who fought lone battles for equal rights and who won the war.

In the 48 years that he worked for the NAACP, Mr. Wilkins saw the gains made by his race. I am certain he took satisfaction in looking back over the decades and seeing black Americans participating as full members of our society. He was a man who could not accept mediocrity; he believed in excellence and he instilled those high standards in the whole of the civil rights movement.

Roy Wilkins was truly a man who dedicated his life to improving race relations, to promoting equality for all. We are a better people, a stronger and more just Nation, for the contributions he made in a lifetime of public service.●

● Mr. STARK. Mr. Speaker, September 8 was indeed a sad day for this Nation. Not only did we lose our beloved friend and respected colleague, Bill Cotter, but the Nation also lost the leadership of Mr. Roy Wilkins.

His leadership and guidance were instrumental in securing the passage of the 1964 Civil Rights Act, and other pieces of monumental legislation to help black Americans. His leadership of the NAACP was a selfless dedication to the betterment of black America. But every American, black and white, is better off because of Roy Wilkins. He was not only a leader, but a fighter, willing to lay himself on the line for the future of the black people in this country.

Roy Wilkins lived through some of the hardest times this country has ever known, and out of those hardships he built rights and liberties for the most oppressed members of our society. Roy Wilkins is a man unequaled in dedication, patriotism, and a true sense of justice.

As Americans we should all give thanks for Roy Wilkins.●

● Mr. COUGHLIN. Mr. Speaker, I join my colleagues in paying tribute to Roy Wilkins, a peerless advocate of civil rights for all Americans. As our Nation mourns the loss of this great leader, I too wish to salute Mr. Wilkins' unparalleled accomplishments as executive director of the National Association for the Advancement of Colored People. His lifelong mission against racial discrimination will serve as a testimony to future generations that persistence, tempered with patience, can right the wrongs of past generations.

Roy Wilkins felt the sting of racial prejudice at an early age. As a young man at the forefront of a campaign for antilynching laws in the 1930's, he began his practice of entering the courts, rather than taking to the streets, to combat the injustice of discrimination. In his capacity as editor of the NAACP magazine, the Crisis, Mr. Wilkins built a reputation as both a scholar and emerging leader, willing to work within the system, yet unwilling to accept that system's injustices.

While playing a key role for the prosecution in the historic Supreme Court decision, Brown against Board of Education, Roy Wilkins again demonstrated both his respect for the law and his determination that it must be changed. As his political power increased in the 1960's, Mr. Wilkins initiated a peaceful drive to secure passage of the 1964 Civil Rights Act.

In the course of the urban riots of the latter part of that decade, Mr. Wilkins served as a moderating, yet no less concerned voice, in easing our Nation through that difficult period. Up until, and after he ended his 22-year stewardship of the NAACP, his behind-the-scenes leadership continued to further the cause of civil rights.

Throughout his life, Roy Wilkins faced the brick wall of racial discrimination. He did not choose to raze this wall, risking the possibility of entrenched opposition and failure. Instead, Roy Wilkins worked to dismantle the wall of racial discrimination, brick by brick, over the course of a lifetime. His accomplishments are many and great. We will, however, remember Roy Wilkins not only for his effectiveness, but also for his diligence.●

● Mr. DWYER. Mr. Speaker, it is a privilege for me to take part today in this tribute to Roy Wilkins, a man of tireless commitment and strength, who contributed so profoundly to the betterment of this Nation.

While his passing has surely left a void in our perennial quest for equality and justice for all, his imprint on society will endure.

In five tumultuous, critical decades, he effectively combined a policy of needed restraint with prudent activism in a manner that serves as a lesson to all of us who strive to continue his work.

We owe him that much. It is incumbent on those who practice in his stead to follow his example in full appreciation of his contribution and the deep devotion he had to his people and their cause.

Even-handed and thorough, Roy Wilkins held the trust and respect of the civil rights community and our Nation's leaders, who saw him as a tough man of quiet effectiveness who could and did get the job done.

He did it all without the self-seeking publicity that so often accompanies such efforts. For that, too, we owe him a debt of gratitude: he recognized the importance of substance over style. And, what better testament to the merit of that philosophy than the fruits of his labors?

The demise of "separate but equal" under Brown against Boar of Education. The landmark Civil Rights Act of 1964, and a host of other less visible, but nonetheless significant actions which led to the strides made by blacks in this century.

Most of all, we owe Roy Wilkins and his followers the assurance that that for which he worked so hard—real, measurable economic and social gains for those who were so long denied them—will not be undermined by any rigid, indifferent fiscal choices which may threaten his accomplishments.

That is a danger the Wilkins legacy poses a powerful reminder to all of us to avert.●

● Mr. EDWARDS of California. Mr. Speaker, when I read of Roy Wilkins' death last week, I felt, and still feel, as if a friend and a mentor had departed. While working on the extension of the Voting Rights Act, I cannot help but be proud of, and humbled by, the accomplishments of this great American. For it is because of his work that we are now working on this legislation.

When I contemplate the life of Mr. Wilkins, I recognize I cannot truly understand the world which faced him when he joined the NAACP some 50 years ago. We had lynchings; we had Grandfather clauses. One hundred years after the Civil War, American society as a whole still refused to recognize the existence of a culture of people who lived in the country's midst.

But even without this recognition, Mr. Wilkins believed in our Constitu-

tion. He believed we could have justice without overthrowing the system. He was one of the few people who recognized the need to initiate action, and instill confidence in the people as well as the need to lobby the Hill for better laws. And it is largely because of Mr. Wilkins that we have the Brown against Topeka Board of Education decision, the Civil Rights Act of 1964, and the Voting Rights Act of 1965.

In few other people have I seen such a dedication to the Constitution, and I shall miss this example. There have been times when I have been frustrated, tired of the slow advances, and of the retreats which accompany legislation. At such times, we all gained strength and patience from his example.●

● Mr. FORD of Michigan. Mr. Speaker, one of the best has gone. Roy Wilkins was a master in shaping civil rights laws in this country and a great leader who very competently guided the NAACP through its days of greatest growth and prominence.

Roy Wilkins was a skilled and determined leader who worked behind the scenes to bring about legislation and legal rulings that benefited blacks. I watched him in action as he ably lined up support and strength for the Voting Rights Act of 1965 and the Fair Housing Act of 1968. He translated his convictions of guaranteed equality and opportunity for all Americans into Federal laws—one of which we will be considering during the current session of Congress.

I can think of no finer tribute to this brilliant man than to pass legislation to extend the Voting Rights Act. Reauthorization is essential if all Americans are to be assured their most fundamental right, the right to vote. Roy Wilkins played a major role in the passage of the original legislation. Let us extend it in memory of this hero.●

● Mr. SHAMANSKY. Mr. Speaker, it is most appropriate that Congress has taken a special order in memory of Roy Wilkins, the veteran executive director of the National Association for the Advancement of Colored People, who died last week at the age of 80.

It is appropriate because Mr. Wilkins' career exemplified what one person can accomplish through the conscious combination of a passionate desire for change and the intellectual recognition that social progress requires the simultaneous reform, and upholding of the Nation's laws.

Roy Wilkins was the grandson of a slave, and he spent his life working—mostly successfully—to cut away the vestiges of slavery which still clung to his people. His civil rights career really began when, as a college student in the 1920's, he undertook an antilynching crusade which eventually helped turn the national climate against such barbarity. In the 1930's he carried out a dangerous investigation of the working conditions of blacks rebuilding the Mississippi River levees.

Perhaps Roy Wilkins' greatest accomplishment was masterminding the NAACP's legal challenge to unconstitutional school segregation which culminated in the historic 1954 U.S. Supreme Court decision overturning "separate but equal" public education, which in reality was discriminatory and unequal.

He became counsel to Presidents and, retaining the integrity of his beliefs, and his individualism, rebuked the implicit separatism of black power extremists in the 1960's.

Roy Wilkins' example transcends his achievements. He was honest and understanding, diplomatic in method yet implacable in his opposition to racial hatred, bigotry, and unconstitutional segregation. He was a man of both change and law, thus helping America become a better nation. We will all miss him.

Thank you.●

● Mr. RANGEL. Mr. Speaker, last Tuesday, this Nation lost one of the most dedicated and influential freedom fighters. With the passing of Roy Wilkins, an era of struggle for black people passed. It is with great sadness that I mourn his passing, for he truly was one of the great figures in the struggle for human rights and dignity in this Nation. The greatness of Roy Wilkins was his undying, single-minded commitment to racial justice. No man has done more to eliminate racial discrimination, and to improve the lives of black people in this country than Roy Wilkins. From an early age he dedicated his life to the cause of equality. As a young man, fresh out of college, he used the pen to denounce Jim Crow laws and racism in Kansas City, where he worked for a local black newspaper. From there he went to the NAACP, where he was to work for most of the rest of his life, first as a writer for the NAACP newspaper, and later as the executive director of the organization, a post he held for 22 years. Those 22 years were the most important in terms of civil rights for blacks since Reconstruction, and it was under his leadership and direction that the movement was most effective.

In the 1950's, when he assumed leadership of the NAACP, segregation and racial discrimination were the American way of life. The specter of lynching still was in the minds of many blacks. Blacks were summarily denied access to decent housing, decent schools, public accommodations, restaurants, movie houses, and so forth. For many the right to vote was a dream. While many people worked hard, and gave their lives, their time, and their energies to the cause of civil rights, none was more effective than the soft-spoken Roy Wilkins, who parlayed his commitment to the ideal of equality with his compassion for his fellow man and his unique intelligence into the skills that made him the most effective lobbyist for the legislation that was to change the social and political history of the Nation. His name must be invoked when we discuss passage of the hallmark civil rights legislation of the 1960's: The Voting Rights Act and the Civil Rights Act, since it was his efforts that were in many ways responsible for these acts becoming law. His persistence and determination helped move the Congress and the President, and also led the NAACP as they successfully challenged discrimination through court suits against racial discrimination in jobs, in housing, and in employment. He left a record of achievement and leadership that will be hard to match by his successors.

This Nation will have to remember Roy Wilkins. In a time of rapid change, he unceasingly pressed to bring this country closer to the ideal that he believed so deeply we could achieve—equal opportunity and justice for all. He left a legacy of progress in social justice that we must continue to improve upon in his absence. His struggle, his commitment, and his dream was for an America free from the racial prejudice that so enraged him as a young man, and that shaped the career that spanned nearly a half-century of dedication to the cause of civil rights. Now that we have desegregated schools in many places, and hotels and rest rooms are integrated, and blacks sit on the Federal bench and the Supreme Court, we must not forget one who made it possible. Roy Wilkins was one of the giants of the century, who saw an opportunity for change, and used his unique talents to make sure that dreams did become real. I will miss him, the Nation will miss him, and our children will live better because of him.●

● Mr. WYDEN. Mr. Speaker, the death of Roy Wilkins, former executive director of the National Association for the Advancement of Colored People witnessed the passing of one of the most important men in the history of the civil rights movement in the United States.

Mr. Wilkins guided the NAACP, the Nation's oldest and largest civil rights organization through a period of its greatest growth and prestige. In so doing, Mr. Wilkins' relationship with the NAACP and the civil rights movement continued for a half-century. His tenure bears witness to Mr. Wilkins' perseverance in the struggle to insure equality of opportunity for all Americans.

In carrying out this mission, many have characterized Mr. Wilkins' style as that of a quiet crusader, not one to play upon the emotions of the moment or seek media attention for his sake. He was a quiet crusader whose dedication to solid facts and research addressed the problem at issue. This dedication to facts combined with eloquent and powerful persuasion won many civil rights victories.

If a civil rights hall of fame existed, I am sure Mr. Wilkins would have been inducted many years ago. His ac-

complishments in the area of civil rights span two generations.

Mr. Wilkins led the NAACP during its drive to establish antilynching laws. Mr. Wilkins was administrator for the NAACP when it won the historic Brown against Board of Education decision rendered by the U.S. Supreme Court. Thus overturning the "seperate but equal" doctrine which provided the legal basis for racial segregation in the United States.

Mr. Wilkins was a key supporter and organizer of the March on Washington on August 28, 1963. The march was a dynamic lobbying effort which brought 250,000 people to the Nation's Capital in support of the Civil Rights Act. This effort was key in the establishment of the Civil Rights Act in 1964 establishing voting rights, equal employment and access to public accommodations as a matter of Federal law.

The 97th Congress can commemorate the accomplishments of Mr. Wilkins by extending the Voting Rights Act during this session of Congress. I am sure Mr. Wilkins will look upon Congress and be well pleased by congressional action to extend this act and to assist those who now find themselves outside of our Nation's economic mainstream.●

● Mr. GUARINI. Mr. Speaker, yesterday our Nation was saddened by the news that Roy Wilkins, former director of the National Association for the Advancement of Colored People, died at the age of 80. The annals of history will show that Roy Wilkins was perhaps the most articulate, conscientious, and able spokesman of the world's black population.

The grandson of a Mississippi slave, Mr. Wilkins became dedicated to the cause of civil rights needs while a student at the University of Minnesota, from which he was graduated in 1923, majoring in sociology and minoring in journalism. While attending college he supported himself by working in a slaughterhouse, as a pullman car waiter, and as a redcap. His public speaking skills won him first prize for his deliverance of an impassioned antilynching speech.

Realizing the need for an expression of views, he took a job with the Kansas City Call urging black voter registration and political action. It was because of his work as a newspaperman that he came to the attention of the executive director of the NAACP, Walter White.

His newspaper experience enabled him to succeed W. E. DuBois as editor of the NAACP magazine. In 1949 he became acting executive secretary, a post he held until 1955 when the NAACP national board unanimously elevated him to their executive director's position. Considered by many within his own ranks as a moderate, he advocated the use of constitutional means rather than demonstrations to achieve black civil rights.

He often counseled blacks to be proud of their American status, noting:

> This is our land. This is our Nation. We helped to build it. We have defended it from Boston Common to Iwo Jima.

Wilkins bluntly cautioned America while testifying in support of President Kennedy's civil rights bill that:

> The players in this drama of frustration and indignity are not commas or semicolons in a legislative thesis. They are people, human beings, citizens. They are in a mood to wait no longer, at least not to wait patiently and silently and inactively.

Mr. Wilkins' great leadership resulted in invitation from every President of the United States who sought information and guidance on one of America's greatest problems, that of racial segregation.

His leadership saw the NAACP rise from 25,000 members in 1931 to more than 400,000 individuals in 1977 when he retired.

A tenacious individual with remarkable stamina, he underwent surgery for cancer of the stomach in 1946 and enjoyed a full recovery.

In 1969 he was awarded the Nation's highest civil honor, the Medal of Freedom, by President Lyndon B. Johnson. A man of high integrity and outstanding decency, he has been called one of the 10 greatest persons having an impact on America over the last 50 years by Mayor Edward Koch.

President Reagan yesterday eulogized Roy Wilkins for working for equality, speaking for freedom, and marching for justice.

Community leaders of Hudson County, New Jersey's 14th District, which I represent, vividly recall Roy Wilkins' visit at a dinner about 10 years ago where he told the group that "those who have the wider vision have a responsibility of tolerance." He warned the group that "a thin skin is a poor asset," and spoke of the many broken promises made to America's black population. He told the group that "the more significant tragedy of things that are broken is that they may not be mended again."

I extend condolences to Mrs. Aminda Wilkins, his widow. Residents of Jamaica, Queens, they would have celebrated their 52d wedding anniversary next Tuesday.

Roy Wilkins championed the cause of school desegregation which, no doubt, has been "the finest hour for America's black population." Roy Wilkins has served his nation well. Echoing the words of Daniel Webster:

> Let our object be our country, our whole country, and nothing but our country. And, by the blessing of God, may that country itself become a vast and splendid monument, not of oppression and terror, but of wisdom, of peace and of liberty, upon which the world may gaze with admiration forever.

Roy Wilkins, in his lifetime, has reached immortality. His leadership proves that immortality is not a gift but one of achievement, and those of us who have deep courage and strive valiantly shall possess it.●

● Mr. WINN. Mr. Speaker, I, like many Americans, was saddened at the news of the death of Roy Wilkins last week. Mr. Wilkins spent many prosperous years in the Kansas City area, first as the managing editor of the Kansas City Call and then as a staff aid in the local office of the NAACP. Of course, Mr. Wilkins went on to become executive director of this great organization for 22 years—an organization that was largely responsible for gains of black Americans during the racially turbulent 1950's and 1960's.

While working in Kansas City, Mr. Wilkins saw and experienced firsthand the inequities of segregation. This appalled the quiet Marshall, Tex., native who grew up in St. Paul, Minn. But through his efforts on the Call, local blacks were able to raise their hopes for a better life. Many young blacks are productive parts of the local economic scene in Kansas City because of the work of Roy Wilkins. Mr. Wilkins' nephew Roger grew up in Kansas City and has many fond memories of his hard-working uncle. He looked up to his uncle as many of us did. Roger Wilkins remembers the inspiration he received when his father, Mr. Wilkins' brother, passed away at an early age. It was a quiet inspiration, but one that was indelibly imprinted in the mind of young Roger.

Roy Wilkins was a quiet man. He was quiet when American schools were segregated as a rule and when lynchings occurred regularly. He was quiet yet he was effective in correcting these inequities. Long before the well-publicized civil rights marches of the 1960's, Roy Wilkins worked feverishly behind the scenes with government leaders to correct injustices against blacks. Mr. Wilkins played a big part in the massive civil rights march on Washington in 1963 which attracted 250,000 peaceful marchers. He also was a pillar of strength during the distressing innercity riots of the late 1960's and later urged restraint when antibusing demonstrations became violent in Boston in the mid-1970's.

Roy Wilkins will be missed greatly. He was a man I admired and respected. Hopefully, his work will motivate us all to better our lives as free Americans.●

● Mr. ROSENTHAL. Mr. Speaker, I rise to express my deep sorrow over the death of Roy Wilkins at the age of 80 years old.

Mr. Wilkins will always be remembered for his intense devotion to the cause of civil rights and for his work as executive director of the National Association for the Advancement of Colored People. Mr. Wilkins' unrelenting efforts helped to bring about the significant achievements made by black Americans in the last three decades. However Mr. Wilkins' work touched upon all Americans, each of us has gained from his presence and leadership. He stood as a symbol of rationality during an era of emotional

upheaval, as a voice of reason rising above the din of rhetoric, as a man of peace tempering the violence of the times. The loss of Mr. Wilkins will be felt by all of us.●

● Mr. GILMAN. Mr. Speaker, I was deeply saddened to learn of the passing of one of our Nation's leading civil rights leader, Roy Wilkins.

Under Roy Wilkins, the NAACP grew in stature, power, and pride. When he first joined the NAACP in 1931, that organization's income was slightly more than $50,000. After assuming leadership in 1955, the income of the group rose to over $2 million.

The life of Roy Wilkins is parallel to the black movement in our Nation: Hard work, some discouragement, but eventual triumph. Born in St. Louis in 1901, Wilkins worked his way through college, obtaining reporters jobs at papers in Kansas City.

The NAACP, under Roy Wilkins' leadership, undertook some particularly courageous missions, leading to the eventual desegregation of schools, betterment of work opportunities and conditions, and the elimination of racial bias.

Wilkins was an esteemed adviser to President Johnson and continued as an outspoken critic of policies which were detrimental to the black population. His inspiring presence and voice of moderation will be sorely missed.●

● Mr. YOUNG of Florida. Mr. Speaker, on July 21, 1868, in the midst of a civil war, the Constitution of the United States was amended to include the following well-known words:

> • • • [no State shall] deprive any person of life, liberty or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

And, on March 30, 1870, the U.S. Constitution was again amended to state that:

> The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

For at least 100 years, these words held little meaning. Yet, they gained strength and conviction through the courage, honesty, and dedication of a few men and women. One of those men was Roy Wilkins.

As head of the National Association for the Advancement of Colored People for 22 years, Roy made friends out of enemies and success out of what had been past failures. When others were demanding radical action, Roy Wilkins was a moderating voice. Yet, he commanded both attention and respect.

On Friday, September 11, 1981, we marked the passing of, not only a great leader, but a great American as well. Let us insure that his achievements are not forgotten. Let his dedication and ideals live on in the hearts and minds of others. Only then can we be certain that those precious words added to the Constitution at the price of human life shall, indeed, gain strength in the years ahead.●

● Mr. GREEN. Mr. Speaker, I would like a moment to express my deep sadness and sense of loss at the death last week of Roy Wilkins, a man who helped shape many of the most important moments in U.S. civil rights history as executive director of the National Association for the Advancement of Colored People.

Mr. Wilkins guided the NAACP, the Nation's largest and oldest civil rights group, through its times of greatest growth and prestige. Through his dedication and unmatched leadership, Mr. Wilkins brought unprecedented economic and human justice to black Americans in this country.

From 1931, when he joined the organization's staff as assistant secretary, until 1977, when he retired as executive director after 22 years in that post, Mr. Wilkins and the NAACP were united in their efforts for equity and freedom. He and the association were at the forefront of the drive for antilynching laws in the 1930's, when lynching was a "common and acceptable occurrence in regions of the South and Midwest.

Mr. Wilkins was the administrator of the association in 1954 when it won the historic Brown against Board of Education decision in the U.S. Supreme Court, which reversed the Court's previous decision of 1896 in Plessy against Fergurson that provided legal justification for racial segregation in the United States.

Throughout Mr. Wilkins' 80 years of life, he was moved to defend the poor and the victims of discrimination by his conviction that every American should be guaranteed justice.

Roy Wilkins was and will continue to be a prominent figure in the history of all American citizens, hailed not only for what he did during his lifetime but for the persistent and enthusiastic commitment he made to the numerous challenges he undertook.●

## GENERAL LEAVE

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks on the passing of our dear friend Roy Wilkins.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

## TRIBUTE TO CATHERINE DORRIS NORRELL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 60 minutes.

● Mr. ALEXANDER. Mr. Speaker, on August 27, death closed a lifetime of public, community, and religious service by Catherine Dorris Norrell.

In an editorial, August 28, the Pine Bluff Commercial said:

> Catherine Dorris Norrell was in Congress much longer than she was a Congresswoman from this State's old Sixth District.

Catherine Norrell was one of that honorable, courageous, generous legion of women who have served their States and their Nation as wives and helpmates to their Congressmen husbands. While he was in Congress, Catherine Norrell worked as staff assistant to her husband, William Frank Norrell. And, after his death Arkansans recognized her 22 years of experience and qualifications by electing her to Congress.

Although she was a Member of the House for just one term, from April 1961 through 1962, Mrs. Norrell's congressional service actually spanned 24 years.

Both Norrells served Arkansas' old Sixth District, our State, and our Nation with intelligence, compassion, grace, and dignity.

In her first election, Catherine Norrell won a hard-fought campaign over four other candidates, by a 2-to-1 margin over her closest opposition. Although political forecasters gave her a strong chance for reelection, she decided 4 days before the 1962 candidate filing deadline not to seek another term. But, her service to the Nation was to continue throughout the decade of the 1960's.

President John F. Kennedy appointed her Deputy Assistant Secretary of State for Cultural Affairs, where her training and experience as a musician, educator, leader, and public official could stay in service to America. She held that post from 1963 to June 1965, when President Lyndon B. Johnson named her Director of the U.S. Department of State Reception Center in Honolulu. Mrs. Norrell retired from that post in 1969.

Mrs. Norrell's leadership talents were put to use in a wide array of community and church activities. Daughter of a Baptist minister, she gave many years of work to church music programs.

While living in Honolulu she became the first woman to be elected a deacon in a Baptist Church in Hawaii. She had been president of the Congressional Club, past worthy grand matron of the Order of the Eastern Star in Arkansas, and a member of the Honolulu board of directors of the Salvation Army. Mrs. Norrell had been active in the Women's National Democratic Club, the Business & Professional Women's Club, the Former Members of Congress Club, the Soroptimist Club, and the Foreign Service Officers Association.

Mrs. Norrell was educated in Arkansas public schools and at Quachita Baptist College and the University of Arkansas. She taught in Arkansas public schols and had been director of the Department of Music at Arkansas A. & M. College, now the University of Arkansas at Monticello.

Born in Camden, Ark., she was the daughter of the late Rev. William Frank Dorris and the late Mrs. Rose Catherine Dorris. She leaves a daughter, Julia J. "Judy" Norrell, of Washington.

Mr. Speaker, I believe our colleagues would be interested in some of the public comment in Arkansas on Catherine Norrell's life of service; therefore I would like to include at this point editorials and a news article that appeared at the time of her death.

Editorials and news article follow:

[From the Pine Bluff Commercial, Aug. 28, 1981]

CATHERINE NORRELL

Catherine Dorris Norrell was in Congress much longer than she was a congresswoman from this state's old Sixth Congressional District. She had served as a staff assistant to her husband—Congressman William Frank Norrell—for years before being elected to Congress in her own right after his death. That special election in 1961 was a spirited race, with the widow Norrell pitted against four opponents—two from Pine Bluff and one each from Benton and Hot Springs—but the outcome was not much in doubt with Mrs. Norrell outpolling her nearest competitor almost 2-to-1.

The new congresswoman had more going for her than the good Norrell name. She had all that experience in Washington, a network of friends back home that she and her husband had built over the years, and a reputation for charm and, yes, competence. Mrs. Norrell spoke her views freely to the press, but carefully off the record. And got away with it, politics and woman's place in it being more sedate in 1961. One subject she did not hold back on was her support for the Equal Rights Amendment, which was fighting for its life back then as it is now. Mrs. Norrell co-sponsored it early on in the House of Representatives.

When the state's congressional districts were remapped for the 1962 election, Mrs. Norrell chose to step down rather than contest the issue with Congressman Oren Harris of El Dorado—but she didn't return to live at Monticello. Genteel, outgoing, a joiner, and very much into political life, she would have made a fine choice as a deputy under secretary for cultural and educational affairs—and that is what the still new President, John F. Kennedy, appointed her. Later, Lyndon Johnson would put her in charge of the State Department's Reception Center at Honolulu. An unflappable gentlewoman, and an accomplished musician to boot, she lent a Southern grace to international gatherings, as she had to a rough-and-tumble Congress.

Mrs. Norrell once described her politics as "middle-of-the-road conservative," but her political views were seldom as distinct as her personality and courtesy. At her death at the age of 80, many people throughout the old Sixth District, and around the world, will pause to remember an old friend and an always obliging public servant.

---

[From the Advance Monticellonian, Sept. 3, 1981]

THE HONORABLE CATHERINE NORRELL

One after another, they walked to the podium at First Baptist Church last Sunday to pay tribute to former Congresswoman Catherine Norrell of Monticello.

One distinguished public servant after another . . . Judge Oren Harris, former Congressman Ray Thornton, now president of Arkansas State University, former Congressman Jim Guy Tucker, Fourth District Congressman Beryl Anthony, Congresswoman Cardis Collins of Illinois . . . each with the mainstream thought expressing admiration for the courage, dignity and human service delivered over the years by Mrs. Norrell, before and after the death of her husband.

A woman, no . . . better, a PERSON such as Catherine Norrell walks with us during a period of our fleeting lifetime . . . and strongly influences the roads we choose. She never had to worry about leading anyone down the "wrong" one because she lived, worked and played this worldly time in such a manner that said: "You're a person . . . you must choose your own way . . . and in the end you must be willing to stand on your choice."

The philosophy above seemed to express her to many of us. Her daughter Judy, now a Washington lawyer, appears to be the epitome of that philosophy. An outstanding woman of high intelligence. A person who has walked and worked with the powerful business and political leaders of the world . . . and yet, in delivering the eulogy for her mother, who lay directly in front of her in that church service . . . Judy Norrell THANKED the mourners who came, the people of Drew County and the congressional district for giving the Norrell Family the opportunity to serve human needs.

She told us that it was not a day of sorrow, but of joy. Her type of faith and strength seemed exceptionally appropriate for the occasion, because Catherine Norrell had not left us . . . and everyone who brushed her hand in life knew very well she hadn't.

---

[From the Advance Monticellonian, Sept. 3, 1981]

FORMER CONGRESSWOMAN, RESIDENT, DIES AT 80

Catherine Dorris Norrell, 80, a former Arkansas member of Congress, ex-State Department official, educator and musician, died Aug. 26 in Warren following a brief illness.

Funeral services were at 2 p.m. Sunday afternoon at First Baptist Church in Monticello by Dr. Harry Trulove with comments by United States Rep. Cardiss Collins (Dem., Ill.), Rep. Beryl Anthony (Dem., Ark.) former Democratic representatives Ray Thorton and Jim Guy Tucker and federal Judge Oren Harris. The eulogy was given by her daughter, Judy Norrell. Burial was in Oakland Cemetery in Monticello by Stephenson Funeral Home.

Pallbearers were Zach McClendon Jr., Bennie Pierce, Billy Hartness, Frank Jackson, Adrian Williamson Jr. and David Taylor Hyatt Jr.

In a hotly-contested special election April 1, 1961, Arkansans chose Mrs. Norrell from a field of five candidates to fill the vacancy created in the U.S. House of Representatives by the death of her husband, William Frank Norrell. Mr. Norrell was a member of the House from 1939 to February 1961.

During that period, the election of a congressional widow to fill out a term was normally a low-keyed process. This one was different. Population shifts were costing Arkansas two congressional districts. The realignment of the districts was a hard-fought issue. And, Arkansas had already demonstrated its willingness to elect and re-elect a woman, Sen. Hattie Caraway, to Congress.

Mrs. Norrell used her years of experience as staff assistant to her Congressman husband to increase her voter appeal. She won her election with almost twice the votes of her closest competitor.

As a member of the House, Mrs. Norrell was an early cosponsor of the Equal Rights Amendment to the U.S. Constitution. She was a member of the House Committee on the Post Office and Civil Service.

In its 1962 New Year's predictions, the Dumas Clarion, a newspaper serving part of her district, said, "Catherine D. Norrell and Oren Harris (whose congressional district had joined with most of Mrs. Norrell's) will run against each other, with Mrs. Norrell carrying the vote in her district counties and Mr. Harris taking his district counties. How heavy the vote will determine the outcome."

But, four days before the 1962 candidate filing deadline, Mrs. Norrell announced she would not seek reelection. Although she did not make her reasons public at the time, she was quoted in Hope Chamberlin's 1973 book, A Minority of Members: Women in the U.S. Congress, as citing the growing dominance of television in political campaigns and saying that politics had become "a rich person's game."

In 1963, President John F. Kennedy appointed Mrs. Norrell Deputy Assistant Secretary of State for Cultural Affairs. She served in this post until June 1965, when President Lyndon B. Johnson named her director of the U.S. Department of State Reception Center in Honolulu, Hawaii. Mrs. Norrell retired from this post in 1969.

While living in Honolulu, Mrs. Norrell became the first woman to be elected a deacon in a Baptist church in Hawaii. She had been president of the Congressional Club, past Worthy Grand Matron of the Order of the Eastern Star in Arkansas and a member of the Honolulu board of directors of the Salvation Army. Mrs. Norrell had been active in the Women's National Democratic Club, the Democratic Wives Forum, the Soroptimist Club, the Business and Professional Women's Club, the Former Members of Congress Club and the Foreign Service Officers Association.

Mrs. Norrell was educated in Arkansas public schools and at Ouachita Baptist College and the University of Arkansas. She taught in Arkansas public schools and had been director of the Department of Music at Arkansas A&M College (now the University of Arkansas at Monticello).

Born in Camden, Mrs. Norrell was the daughter of the late Rev. William Frank Dorris and the late Mrs. Rose Catherine Dorris.

She is survived by one daughter, Julia J. (Judy) Norrell of Washington, D.C., and Monticello, associate counsel of the American Council of Life Insurance, and one brother, William Franklin Dorris of Tucson, Ariz.

The family requests that memorials take the form of gifts for student financial aid to the Department of Music at UAM, or to Rust College in Holly Springs, Miss.●

● Mr. O'NEILL. Mr. Speaker, I am saddened by news of the death of my friend and former colleague, Hon. Catherine Dorris Norrell, of Arkansas.

I had the privilege of knowing Catherine both as the wife of a Member (William Frank Norrell) and as a colleague. She was a lovely and talented woman who made significant contributions in both capacities. She worked closely with Bill throughout the more than 20 years he served here in the House. Upon his death, the people of Arkansas elected Catherine Norrell to serve the remainder of his term. Her service was marked by dedication and skill.

I admired her grace and dignity, and I appreciated her professionalism and sense of purpose.

My wife, Millie, joins me in extending our deepest sympathy to Catherine's daughter, Julia Norrell, in this time of great personal loss and sadness.●

● Mr. BOLAND. Mr. Speaker, I appreciate the opportunity afforded by the gentleman from Arkansas, Mr. ALEXANDER, to pay tribute to our former colleague, Catherine Dorris Norrell.

Catherine Norrell was a Member of the House for a relatively short period of time. Her service in the Congress, however, was only a small part of a lifetime of service to the residents of Arkansas and the people of the United States. Prior to her election, she spent more than two decades as her husband's staff assistant and confidante during his tenure as a Representative of the people of Arkansas. After she left Congress she served with distinction in varied posts in the State Department. In addition, she held a number of important positions in civic and fraternal organizations.

Mr. Speaker, Catherine Norrell took an active interest in the promotion of equal rights for women as a Member of this House. She was an early cosponsor of the equal rights amendment and an effective member of the Post Office and Civil Service Committee. She cared deeply for the people of Arkansas and sought to speak for them to the best of her ability. I believe that she succeeded.

I want to extend my deepest sympathy to Catherine Norrell's daughter, Judy.●

● Mr. DINGELL. Mr. Speaker, Catherine Dorris Norrell will always be remembered by those of us in the House of Representatives who were fortunate to serve with her and with her late husband, William Frank Norrell, who was a Member of the House from 1939 to February 1961.

Upon her husband's death, former Congresswoman Norrell competed in a special election and was selected out of a field of five to continue to represent his district in Arkansas. She was a woman of courage, a woman of fortitude.

While she served in the House of Representatives, she was one of the original sponsors of the equal rights amendment and she served as a member of the Post Office and Civil Service Committee.

In 1962, Catherine Norrell decided not to seek election to her Arkansas seat but continued to be active in party politics. In 1963, President John F. Kennedy appointed Mrs. Norrell as Deputy Assistant Secretary of State for Cultural Affairs, where she served in this capacity until 1965 when President Johnson named her Director of the U.S. Department of State Reception Chapter, Honolulu. Mrs. Norrell retired from this post in 1969.

While living in Honolulu, Catherine Norrell was active in religious, civic, and political affairs and was a leader in her community.

Catherine Norrell was an extraordinary person as a Member of Congress, State Department official, educator, civic leader, musician, and innovator. Her passing will be a loss to our society. But her contributions will not be forgotten.●

● Mr. ADDABBO. Mr. Speaker, I would like to join in today's commemoration of Catherine Dorris Norrell. Mrs. Norrell filled the congressional seat made vacant by her husband's death during my first term in Congress. I remember her willingness to offer friendship and advice, her agility in the ways of the House of Representatives, and her devotion to the constituents she served. I take this opportunity to commemorate her service to the people of Arkansas and to this body.

As a staff assistant, Mrs. Norrell was an important part of her husband's congressional service. After his death in 1961, she was able to fulfill the commitment of his term, establish recognition in her own right and retain ties with her home State. In one of her own statements in the RECORD, Mrs. Norrell cited May 1961 as a "milestone in history * * * when the largest number of women ever to serve in the House and Senate became Members of the Congress." She was an early supporter of the equal rights amendment, and went on to serve as Deputy Secretary of State for Cultural Affairs under John F. Kennedy. Mrs. Norrell returned to Arkansas to chair the music department at Arkansas A. & M. College.

I applaud Mrs. Norrell's achievements in politics and the arts, and express my deepest sympathy to her family. As her colleague, I will not forget her perseverance and valuable insight.●

● Mr. BROOMFIELD. Mr. Speaker, I wish to join my colleagues in paying a well-deserved tribute to our former colleague, the late Catherine Dorris Norrell, who passed away on August 30, 1981.

In April 1961, Mrs. Norrell filled the congressional seat left vacant by the death of her husband, Hon. William Frank Norrell. She served the people of her district with great diligence and care, and brought honor to this body with her presence. However, in 1962, Mrs. Norrell chose not to run for reelection.

While her stay as a Member of the House of Representatives was far too brief, she had a long and distinguished record of actively serving our Nation both before and after her years as a Member of the House.

Prior to her own election to the House, Mrs. Norrell worked throughout her husband's term from 1939 to 1961 as his staff assistant. In fact, she was so well known throughout Arkansas because of her work with her husband that she won almost twice the votes of her closest competitor.

From 1963, when she left the Congress, to 1969 when she retired from public service, Mrs. Norrell continued to serve our country at the State Department—first as Deputy Assistant Secretary of State for Cultural Affairs and later as the Director of the U.S. Department of State Reception Center in Honolulu, Hawaii.

Mr. Speaker, Catherine Norrell served her country and its people with intelligence, dignity, and a great caring for many years. It was an honor and a privilege to know her, and I wish to extend my deepest sympathy to her daughter, Judy.●

● Mr. FINDLEY. Mr. Speaker, Catherine Norrell was no stranger to us in Washington when she was elected to fill out her husband's term in 1961. She had served as his staff assistant and worked throughout his 22 years of service in Congress. Her 2-to-1 victory in the special election was a tribute to how the people of Arkansas felt about her and her decision not to seek reelection in 1962 was a loss to both the House and the people of Arkansas. She continued to serve the Government until 1969 and will be remembered for her contributions long into the future. Catherine Norrell will be missed by all her friends in Congress as well as in her home State.●

● Mr. CONTE. Mr. Speaker, I would like to thank my colleague, the gentleman from Arkansas, for reserving this time to pay tribute to former Congresswoman Catherine Dorris Norrell, of Arkansas, who passed away on August 30.

I had the opportunity to serve with both Mrs. Norrell and her husband in the 87th Congress. Following her husband's death after a long and successful tenure in the House, Mrs. Norrell won a decisive victory over her opponents and assumed her husband's seat for the remainder of the term in 1962. While in Congress, Mrs. Norrell served her district in a competent and compassionate manner; many of us were disappointed when she opted against seeking reelection.

Aside from her congressional achievements, Mrs. Norrell made her mark at the State Department as Deputy Assistant Secretary of State for Cultural Affairs, and was also a noted musician and educator. I would like to express my deepest sympathy to her family and friends on her untimely passing.●

● Mr. RHODES. Mr. Speaker, I want to thank the gentleman from Arkansas, Mr. ALEXANDER, for inviting me to participate in this special order honoring a former colleague—Catherine D. Norrell.

It was my privilege to have served with this charming lady in the 87th Congress when she was sent to Washington by the residents of her congressional district to fill the vacancy created by the death of her husband. In this regard, it is pertinent to note that she was elected from a field of five

candidates by nearly twice the number of votes of her nearest competitor. This margin of victory attests to the high regard in which she was held by her constituency.

During her term of service in this body, she was not only very popular with her colleagues, but also highly respected. She was a tireless worker who dedicated herself to serving her district and country.

Quite frankly, I remember my surprise in 1962 in learning that she would not seek reelection. That decision cost the House of Representatives an outstanding legislator.

Mr. Speaker, I would like to extend my heartfelt condolences to Mrs. Norrell's daughter, Ms. Judy Norrell, of Washington, D.C., who many of us have come to know over the years.●

● Mrs. BOGGS. Mr. Speaker, it is with deep sympathy that I mourn the death of Catherine Norrell. I am among those who had the good fortune to enjoy her friendship as well as that of her husband, the late William Norrell. Both were Members of this House, and both did a superb job of service to the people of Arkansas and the people of the United States.

I greatly admired Catherine's own spirit of enthusiasm and her unending support of Bill during his 22 years in office. She was behind him all the way, with an ear to listen and a hand to help. So strong was her desire to see the people of Arkansas grow and prosper and so deep was her conviction in Bill's plans to make this happen that upon Bill's death she ran in a hotly contested race to represent the Sixth District of Arkansas.

Catherine was also a leader among congressional wives and at the time of Bill's death she was president of the Congressional Club. I enjoyed working with her in the Women's National Democratic Club, the Democratic Congressional Wives' Forum, and the Congressional Club.

We in this Congress would do well to emulate Catherine Norrell. Her dedication to cause and belief in her people and their ideas, are the fundamentals upon which this great Nation was founded—they are the groundwork for all relationships of mutual respect and cooperation.

My special expressions of affection and condolence reach out to Judy, the Norrells' dear and accomplished daughter, who has inherited her parents' love for our Nation and respect for this House.●

## MORE SUGGESTIONS FOR BUDGET CUTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 30 minutes.

Mr. DANNEMEYER. Mr. Speaker, in my continuing saga of rattling off prospective budget cuts, it is indeed interesting to note recent revelations in the September 21 issue of Newsweek by a diverse crew of instant analysts (brokers, economists, news writers) offering divergent reasons for the monetary malaise which infests our economy and threatens the President's economic recovery program. Although disagreeing on a number of factors, the prevailing common ground which most of them shared was that the Federal budget deficit is way out of sync. More so inasmuch as a great share of Wall Street runs on psychology. So, what better way for the Federal Government to show its faith than to trim its deficit even further, thereby lessening its grip on the credit markets.

By now we have all become acquainted with the latest in constituent jargon as they barrage us with letters and besiege us at district meetings—"interest rates, bring down the interest rates." Well, my friends, controlling money supply is only one part of that battle and there has been looser control than we have been led to believe. Whereas M1-B, the measure most commonly used, has been steadily declining to the point where it is about half of the rate of increase at the beginning of the year, M2, a far more reliable barometer—since it includes moneymarket funds—has been galloping along at a 10-percent clip. The other, and I believe more important, factor is to further reduce the size of the Federal budget deficit, a view shared by Murray Rothbard—no fan of Reaganomics—in a September economic newsletter.

Furthermore, the President has acknowledged the harsh reality that more must be cut. And Members of this House and our brethren in the Senate are quickly coming to the same conclusion. Clearly then, we must find additional targets for trimming, and the question becomes not why but where.

The Members will recall that over the last few days I have taken this opportunity at the close of business to bring to the Members' attention a brief summary of those items contained in the work product of the Budget Reduction Subcommittee of the House Republican Research Committee's Economic Task Force. In July of this year the committee published a report enumerating 272 items where we believe, in good conscience, we can make reductions in Federal spending for fiscal year 1982 of some $52 billion. I shall begin reading today from this list under the category of agriculture.

The Members will recall that agriculture is one of the 20-odd functional categories of spending in the Federal budget for 1982, and this particular section of the study contains 27 items suggesting cuts totaling some $2,387,856,600.

Again I would request the Members, when they hear these suggestions for cuts, to ask themselves a question: Will this cut, if implemented by the Congress, adversely impact on the poor, the downtrodden, the deprived, or the handicapped of our society?

I would submit that is a very humanitarian question and I would also observe to the Members that in my judgment the answer in each instance is "no." The accomplishment of these cuts would not do that.

Beginning then with those items categorized under agriculture, Office of International Cooperation and Development, salaries and expenses, we propose to allow 20 percent over that was spent in 1980. The proposed outlay represents a 62.1-percent increase since 1980, which we believe is excessive.

□ 1740

This cut would save $1,070,400.

Agriculture Stabilization and Conservation Service, dairy and beekeeper indemnities. We eliminate this program and phase it out because, in our judgment, it is no longer needed. This would save $200,000.

Federal Crop Insurance Corporation, administrative and operating expenses. We would allow expenditures for this item to increase by 20 percent over 1980. The proposed outlays are 1,025.8 percent higher than 1980, while the insurance fund declines from 1981. Administrative costs are three times higher than the fund, which we believe is excessive. This item would save the taxpayers $121,394,200.

Commodity Credit Corporation, price supports. We would cut 10 percent from the proposed spending of 1982. We would eliminate the tobacco subsidies. It seems a little ironic that the Surgeon General of the United States has caused to be printed on cigarettes sold in this country the warning that smoking is hazardous to your health and, at the same time, we have the taxpayers subsidize tobacco production. Elimination of this subsidy would save the taxpayers $180,024,900.

Farmers Home Administration, salaries and expenses. We would allow 10 percent above what was spent in 1981, for a savings of $7,968,900.

Farmers Home Administration, rural housing for domestic farm labor. We would allow expenditures for 1982 to increase 10 percent above 1981, for a savings of $5,128,700.

Farmers Home Administration, mutual and self-help housing. We would allow growth in 1982 to rise by 10 percent above 1981 spending. This would save $552,500.

Farmers Home Administration, rural housing supervisory assistance grants. We would allow 20 percent above 1980. The proposed outlays for 1982 represent a 141.5-percent increase since 1980, which, in our judgment, is excessive. This would save $1,006,400.

Farmers Home Administration, agricultural credit insurance fund. We would allow 10 percent above 1980. We would restrict the funding to corporate agribusiness and reemphasize

emergency loans to small farmers. This would save $87,291,400.

Farmers Home Administration, rural development insurance fund. We would allow expenditures to grow 20 percent above 1980. The proposed outlays represent a 62.8-percent increase for this activity since 1980, which we consider to be excessive. This would save $92,540,400.

Office of Transportation. We would eliminate this function of the Department of Agriculture because we think that the farmers can figure out how to get their goods to market without it. This would save $2,923,000.

Food and Nutrition Service, food stamp program. I will say to the Members that this, perhaps, is the most controversial of the items, that I shall mention briefly this afternoon. The Members should be aware that we are spending roughly some $12 billion on this program in 1982. It is the suggestion of our subcommittee that we reinstate the purchase requirements for this program which, if they had been in existence in 1980, would have saved at least $800,000,000. The savings for the reimposition of the purchase requirement would be $1 billion, 48 million in 1982.

I would like to bring to the Members' attention just a brief history of the food stamp program in our country. It was enacted in 1964 as a part subsidy-part welfare program, to allow low-income families to increase their food purchasing power with stamps purchased at less than redemptive value. The program has been amended several times to expand eligibility, reduce the purchase cost to recipients, and increase the bonus value of the stamps.

In 1977, the requirement that recipients pay for a portion of the value of the stamps was dropped altogether, thereby reducing recipient participation costs to zero.

The easy negotiability of the stamps and restriction of their use to food products has fostered an extensive black market. In the last 10 years, annual food stamp outlays have increased from $1.6 billion to $9.7 billion, an average annual growth rate of 19.8 percent, 2.3 times the average annual cost-of-living increase and twice the average annual GNP increase.

The food stamp program has been out of control since its inception. Its benefits are totally duplicative of the food benefit allowances in AFDC and SSI, which assist three-fourths of food stamp recipients.

In 1977, Congress eliminated the purchase requirement, which made all but the very poorest recipients pay a portion of the value of the food stamps. The arguments to restore the purchase requirement are both philosophic and economic. Former Congresswoman Leonor Sullivan, one of the early proponents of the food stamp program, stated the philosophical argument in her congressional retirement speech:

> No one—no one—should receive food stamps free, no matter how small their income. They should be required to pay something for the food stamps, whatever they can afford to spend for food out of their limited income, even if it is only 50 cents or $1.00 for a month's food. Otherwise, the stamps are considered a kind of funny money which are merely handed over as a gift from some mysterious source and do not have to be regarded as something you work for and buy. Anything handed over free in that fashion, whether it be food stamps or anything else, invites cheating and abuse. The economic consequence of removing the purchase requirement has been rapidly increasing case loads and escalating costs. The lure of free income was largely responsible for a 42-percent caseload increase in one 18-month period. Restoring the purchase requirement as it existed prior to 1977 would turn case load growth rates around and prevent the costs of the food stamp program from reaching a projected $10.3 billion in fiscal year 1981.

And so it goes. There have been recent accounts in the press of investigations that have been made by various agencies, citing fraud and abuse in the food stamp program, and it is the suggestion of our committee, as indicated earlier, that we reinstate the purchase requirement as it existed in 1977 which would reduce expenditures in 1982 by $1.048 billion.

□ 1750

Food and Nutrition Services, food stamp program. We would institute a personal consumption index instead of the CPI to determine benefit increases. We would employ the same General Accounting Office and Congressional Budget Office formula as is used for social security. This would save $233,489,000 in fiscal year 1982.

Forest Service, construction and land acquisitions. We would allow a 20-percent increase above 1980. The proposed outlays represent an 80.7-percent increase since 1980, which is excessive when the Federal Government is supposed to be backing away from further acquisitions. This would save $161,843,800 in 1982.

Forest Service, acquisitions of land for national forests, special acts. We would eliminate this because we do not believe that there is any further reason for the Federal Government to be acquiring yet more land in this country; $754,000 would be saved by adopting this item.

Forest Service, acquisition of land to complete land exchange. We would eliminate this. We believe it is unnecessary in this time of tight budgetary restrictions to be adding further land to the Federal Government's inventory. This would save $327,000.

Forest Service permanent appropriation, 302 account. We would allow 10 percent growth above 1981 levels. The proposed staff increase for this program of 40 percent from 1981 is excessive and should be rescinded. This would save $77,687,100.

Forest Service, permanent appropriations, 852 account. We would allow 10 percent above 1981. This would save $29,073,500 departmentwide in the Department of Agriculture. By correcting their accounting procedures, as a result, and in response to, the recommendations of the General Accounting Office, would save $211 million in fiscal year 1982.

Office of Governmental and Public Affairs in the Department of Agriculture, newly established in 1981, could be eliminated as unnecessary. This would save the taxpayers $10,799,000.

Office of the General Counsel. We would restrict spending for 1982 to an amount not in excess of 10 percent above what was spent in 1981, saving $255,900.

Science and Education Administration, Agricultural Research, we would allow 20 percent above what was spent in 1980. The proposed outlays represent a 26.5-percent increase over 1980, which we consider to be excessive. This would save $23,409,000.

Science and Education Administration, cooperative research. Here again we would allow 20 percent above what was spent in 1980. The proposed outlays represent a 34.6-percent increase since 1980, which we consider to be excessive. This would save $25,507,000.

Science and Education Administration, extension activities. We would cut 10 percent from 1980. The program has outlived its usefulness. It no longer serves farmers as much as it does urban gardeners, and we believe it needs to be reevaluated and restructured. This would save $56,294,300.

Agriculture Cooperative Service. We would eliminate this office, which was newly established in 1981. This office provides research which can be handled by the Economy and Statistics Service, a savings of $4,821,000.

Foreign Agricultural Service. We would allow spending for 1982 in an amount not in excess of 10 percent over what was spent in 1981. We do not believe it is necessary to spend more on offices in Warsaw, Peking, and Moscow. If those functions are to be performed they can well be performed in the offices of the Department of State in those specific foreign capitals. This would save $3,595,000.

Members, this completes the itemization and enumeration of those portions of the 272 items that are contained in the agriculture category and, to repeat, these total some $2,387,856,600.

Members may well ask, well, why do we not adopt these suggestions? Some Members may say, well, I cannot vote for the elimination of some of those programs because I do not agree philosophically with the thrust behind some of the suggestions. But, please bear in mind, Members, the projected deficit for this next fiscal year, scheduled to begin in about 3 weeks, has been estimated to range anywhere from $42 billion to $80 billion.

If they do not like these suggestions, I might request of the Members in a very sincere way, "What are yours?"

Does anybody serving in this Chamber seriously believe that we can continue to go on as we have over the past 5 years, during which this Congress has created in excess of 30 percent of the outstanding Federal debt of close to $1 trillion.

The interest expense in servicing that debt is approaching $100 billion for fiscal year 1982 and may be substantially higher than that.

If we are going to restore vitality to the housing industry and to the automobile industry in this country, and the ability of numerous small businesses and indeed large businesses around this Nation to survive, we must drive down the cost of credit. The answer is to get the snout of the Federal Government out of the credit markets so that our beloved Federal Government is not competing with every would-be borrower for the available credit supply.

It is estimated that the Federal Government is consuming about 38 percent of the available credit supply in this fiscal year, and that it is close to a historic high in the history of the last several decades.

We cannot go on this way.

Tomorrow, and as the days continue, it is the intention of this Member from California to enumerate the remaining items of this list totaling some 272, with the idea of developing a consensus in these closing months of the 97th Congress of finding a way to restore fiscal sanity to the U.S. Government.

## MISS ARKANSAS NAMED MISS AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. HAMMERSCHMIDT) is recognized for 10 minutes.

● Mr. HAMMERSCHMIDT. Mr. Speaker, the annual selection of a Miss America has become a fall tradition.

The young woman chosen to wear the 1982 crown is Miss Elizabeth Ward, 20-year-old daughter of Patricia Hampe and Jim Ward, of Russellville, Ark.

A stunning beauty, Miss Ward demonstrates not only the poise and presence this honor requires, but also the extra dimensions of character and talent to bring added distinction to the title.

Miss Ward is completing her junior year of study in accounting at Arkansas Tech University, and looks toward a career in corporate law. Her musical training includes both piano and voice. She held several beauty titles prior to being named Miss Arkansas.

Miss Ward is the only Arkansas Miss America since 1963, when the title was held by Donna Axum, now a television personality in Little Rock.

The duties and requirements of the Miss America position are many and demanding, but it is certain Miss Ward's vitality and determination will be equal to the task.

When her travels bring her to this Capitol, I am hopeful all of you will join me in welcome. I have every confidence that all of us will take pride in our new Miss America and her stewardship of the national title.●

## LEONARD-HEARNS FIGHT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 60 minutes.

Mr. CONYERS. Mr. Speaker, I come to the well of the House this evening to serve as an advisory for activities that are to occur in Las Vegas tomorrow night, about 24 hours from now, and this event is one of the greatest interstate commerce activities to occur in many years. Tommy Hearns and Ray Leonard have stimulated and excited the interest of many Members of the House who not only serve on the Judiciary Committee and the Commerce Committee, who have jurisdiction over interstate affairs and business activities, but, indeed, from what I can tell, nearly every Member of the House has been duly stimulated, even, yes, excited by the prospect of a classic showdown between two first-rate pugilists who join in final depository combat tomorrow night.

So, as one who comes from Detroit and knows Thomas Hearns and his incredible coach and manager, Emanuel Stewart, who is intimately familiar with the stable of fighters who have trained and grown under this incredible coach-trainer, who is familiar with the community training center where these boxers have amazed and startled the entire sports profession, I offer a few kindly and well-intentioned remarks in an attempt to make sure that none of our colleagues makes a serious mistake of predictive judgment about the outcome of this great contest.

□ 1800

You should know that Thomas Hearns is younger, bigger, tougher and has one more victory than his worthy opponent. It is very important, it seems to me, that we take into consideration that our Detroit champion is a little bit hungrier than this tremendous athletic machine, a beautiful face, wonderful family; I love his little kid as millions of people do who have seen him on television; but the suggestion has been made, and perhaps appropriately, that he has grown a little bit soft.

So I would wish to caution all of my colleagues to be careful in terms of how they might view the outcome of this great classic pugilistic contest.

Now, in great matches like this, it is always a pity that there has to be a winner and a loser. Even magazines as reputable as Sports Illustrated, which I follow carefully, while it praises both fighters, makes a very important and classic error. I would like to quote this for the record, so that we may all the morning afterward make our postfight assessments; but here is this great athletic documentary saying:

> Hearns, who fancies himself as a boxer, is a pure slugger about as scientific as a wrecking ball.

Now, this does great hurt. It demeans one of the classic, fastest, toughest, punchers in the business. To consider that he is merely a fighting machine, a slugger, and I hope that Leonard's camp does not take this too hard, because it will only aggravate the error that probably will be unwittingly committed in his camp, but this man Hearns is a puncher, a boxer, fast as the speed of light and probably in this misconception will lie the difference in the outcome of this fight.

I would like to say that in the vernacular, and I have watched Thomas Hearns, I have seen him in workouts, I have carefully tried to appraise the great skills that both of these pugilists would bring into this contest and I am only sorry to say I have not been able to run them through a computer in the finest scientific methodology; but in the vernacular, the saying is that, "Leonard couldn't hit Hearns with a bucket of rice."

Now, I would not, of course, go that far. Of course, Sugar Ray Leonard is a fast, awesome and powerful hitter; but you know, when you are dealing with a quiet, hungry, sober young fellow, who has got to make it or break it; he has no television ads, he has no movie contract, he has no beautiful family to bring to America's attention. He has only got those two dynamite-laden hands, a right and a left, to bring into the ring.

So I would caution my good brother Leonard that his ads will not help him. His television status will not help him. His little kid will not help him, as beautiful and as attractive as he is. All of the contracts that he has to do other products will not help him. His good looks will not help him.

I have just a little something I should relay that I heard Thomas Hearns say in Washington when he was here recently, winning many friends from the Leonard camp. One young lady, and I was standing right next to him, came up and she said to him, "Please, please, don't hurt Mr. Leonard's face. Don't hit him in the face."

Tommy Hearns, as sober as a judge said, "Well, it's nothing personal, lady, but I can't guarantee that in a fight."

I think that underscores the nature of the contest. There is nothing personal about this. There is no grudge. This is not a grudge match. It is not vindictive, but it is in the highest nature of this art, a skill of the two classic giants of our time and the best man, it seems to me, will win.

So I say, "You better pray, Sugar Ray."

You better understand that when Thomas Hearns said on the Johnny Carson Show when asked what it was all about, "I'm just simply going to annihilate him."

So as the odds now move down to about even, there are about 24 hours left, I urge upon my colleagues not to do anything rash or impulsive in the remaining hours before the fight. Guard your hard-earned income and your purse with all your might. Do not succumb to any of the temptations that those who may be lurking in the hallways of our great Capitol to lure you down unsuspecting paths. Do not yield to temptation, but study the words of your colleague from Michigan, who carefully and confidently predicts that Leonard will fall to Hearns.

## TRIBUTE TO THE HONORABLE JAMES A. HALEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. UDALL) is recognized for 10 minutes.

Mr. UDALL. Mr. Speaker, I want to say a few words today about our late colleague, James A. Haley, who died August 6. Prior to his retirement from the House in 1976, Jim preceded me as chairman of the Committee on Interior and Insular Affairs.

Coming to the Congress in 1953, Jim Haley served the people of Florida and the Nation with distinction. For almost a quarter century, he dedicated himself to outstanding public service, bringing to his office conscientiousness, integrity, and judgment tempered with commonsense. It became apparent early in his career on Capitol Hill that he genuinely cared for his constituents and truly believed in the political and moral traditions that have contributed to the greatness of this Nation.

Although his political philosophy was more conservative than my own, we did find ourselves in agreement on many issues. I admired his individualism and his concern for the preservation of human dignity. I also respected his sense of fiscal responsibility.

His strong fiscal views were well known by those of us serving on the House Interior Committee. The so-called Haley amendment to eliminate open-ended funding in Interior Department programs was a precursor of a trend in Congress to require greater accountability of Federal agencies carrying out Federal projects and programs. He supported legislation to require balancing the national budget long before it was in vogue to do so.

And, there was Jim Haley's compassion for the plight of the American Indian and other aboriginal Americans, including the Alaska Natives—Eskimo, Aleut, and Indian peoples. This compassion was well illustrated during his 18-year tenure as chairman of the Subcommittee on Indian Affairs and his 4 years as chairman of the full Committee on Interior and Insular Affairs. Under his guidance the Alaska Native Claims Settlement Act was developed. This landmark measure provided for the settlement of aboriginal claims of Alaskan Native people and established the foundation for the ultimate resolution of the issue of how Federal lands in Alaska would be managed. Also while he served as subcommittee chairman, he directed legislation through Congress which resulted in the return of the sacred Blue Lake area to the Taos Pueblo Indians. As full committee chairman, Jim Haley fought hard to win passage of the Menominee Restoration Act, the Indian Financing Act, and the Indian Self-Determination Act—all measures of great importance to the Indian people.

Jim Haley made many contributions to the Nation as a conservationist. Always a friend of the Everglades National Park, he led the effort to protect an area of southern Florida called the Big Cypress Swamp. This area—three-fourths the size of Rhode Island—has proven to be a significant factor in the protection of the ecology of a portion of the Everglades and of the environment of south Florida in general. I supported him in this effort because, together, we knew the investment of $116 million of the Land and Water Conservation Fund moneys would make it possible to preserve this fragile area so that future generations could continue to enjoy the Everglades National Park. As time has passed, the benefits gained from protecting the Big Cypress have become more and more apparent—as have Jim Haley's legislative wisdom and foresight. He also was instrumental in helping to establish the Canaveral National Seashore in Florida, an effort which has contributed to the preservation of one of the last large undeveloped stretches of pristine shoreline in that State.

Jim Haley was a conservative who defied stereotyping. This man who won three Watchdog of the Treasury Awards for fiscal conservatism and was a traditionalist in his political habits, never lost sight of the need for compassion and human dignity within Government. His strongly held views of this need led him not only to doing much for the American Indian people—examples of which have been cited earlier—but also to being an original and outspoken sponsor of the Equal Rights Amendment, to supporting the right to vote for 18-year-olds, and to championing the rights of the elderly and disadvantaged.

As a powerful advocate for the veterans of our Nation, he served on the Veterans' Affairs Committee for many years, and, as chairman of the Subcommittee on Hospitals, contributed substantially to the improvement of the VA hospital system.

Jim Haley had a great sense of humor. Prior to serving in Congress, Jim had been president of the Ringling Brothers, Barnum and Bailey Circus. He used to poke a little fun at the Congress by saying that he was one of the most eminently qualified people to serve in the U.S. House of Representatives—having already presided over the largest circus in the world, he had simply moved from one circus to another.

Jim Haley could be described as a man for all seasons who, beyond his career of public service on the State and national levels, enjoyed a rich and full life, which included lifelong service to his community and devotion to family and friends. His record of good works left a lasting impression on his colleagues, his employees, his community, friends, and loved ones. The gentle dignity of the man, his goodness, his sense of fair play will not be forgotten.

He was a good man who was my friend, and I'm sad that he is gone.

Mr. Speaker, I ask unanimous consent to insert in the RECORD at this time the funeral eulogy for Jim Haley delivered by Dr. Paul F. Andrus, pastor of Trinity United Methodist Church in Sarasota, Fla., which is a tribute to the man who indeed, as Dr. Andrus remarked, "fought the good fight" and won.

FUNERAL SERMON FOR THE HONORABLE JAMES A. HALEY, TRINITY UNITED METHODIST CHURCH, AUGUST 10, 1981, BY DR. PAUL F. ANDRUS

SERMON TEXT: II TIMOTHY 4: 6–8

St. Paul must have come to the end of his life with a sense of fulfillment. Clearly it shows in his words: "I have fought the good fight, I have finished the race, I have kept the faith."

Few men of our time and acquaintance have lived to these words as has James A. Haley. It can well be said of him: He fought the good fight.

Born in 1899 in Jacksonville, Alabama, he

Enlisted in the United States Army in 1917, and as a member of the First Division, fought in every major battle of the Army Expeditionary Force in World War I. Then he

Became a Certified Public Accountant, establishing his own accounting firm in Sarasota in 1925.

In 1933 he became General Manager of the John and Mable Ringling Museum of Art as a Florida State Museum.

Later he became the First Vice President of Ringling Circus, and

Still later was made President and Director of Ringling Bros., Barnum & Bailey Combined Shows, a responsibility he fulfilled until 1948.

It was in that year (1948) that he turned to public service, being elected to the Florida House of Representatives and serving two terms. While there he was voted "Most Outstanding Member," and was known as "Mr. Economy."

In 1952 he was elected to the 83rd Congress of the United States, and was subsequently elected to Congress for the next 24 years!

James A. Haley was never defeated in any election he chose to enter!

While in Congress he chaired several influential Committees, including:

The Indian Affairs subcommittee during the 84th to the 92nd Congresses. While there he earned the title of "Big Chief" be-

cause of his concern for our native Americans.

The House Committee on Interior and Insular Affairs during the 93rd and 94th Congresses, and

The Hospitals Subcommittee of the House Committee on Veteran Affairs, where he was instrumental in establishing Veterans hospital in Gainesville, Tampa and Miami.

In 1976, upon his announced retirement, his portrait was hung in the Hearing Room of the House Committee on Interior and Insular Affairs.

Truly, James A. Haley Fought the Good Fight!

But he also Kept the Faith!

There was never a question as to Jim Haley's love of God and the Church. The very land upon which this church sits was donated by him. And every time he was home from his duties in Tallahassee or Washington he would be in church on Sunday morning. In recent years his health and failing strength would not permit him this pleasure. The Fellowship Hall of this church bears Jim Haley's name.

But his Christianity had a practical side beyond donating land to his church. Before our parking lot was paved it was an area distinguished mostly for its sugar sand and sand spurs. On more than one occasion, Jim Haley could be seen after church helping push some poor motorist out of the sand. . . . probably a tourist who just did not know the problem sand can be while driving.

And the testimony of those with whom he served in Congress is consistant: James A. Haley was a man of the highest integrity. As the Honorable Carl Albert, former Speaker of the House of Representatives said about him, "Jim Haley did not always vote like I voted, but Jim Haley always voted as he thought he should vote. He is a man of integrity and character, and beyond that, as far as I am concerned, he will always be a friend."[1]

James A. Haley lived his religion in many very real ways. Truly, he Kept the Faith!

But perhaps best of all, like St. Paul, James Haley Finished the Race!

To have lived long and well is a goal all of us want to reach in our lives.

To have laughed with friends . . . to have known the dignity of serving one's fellow human beings . . . and to have come to the end with a sense of completion . . . this is truly finishing the Race.

And for James A. Haley, the race was well run.

Doing more in one life than many men could do in several . . .

Becoming honored and respected for work close to home and in our nation's capital . . .

These are just a few of the signs of a Course well run!

Truly, James A. Haley Finished the Race!

So I have come today to join with you in honoring one who honored us with his selfless life and his sterling example . . . and to join with you in the sorrow that we feel, for we are diminished by his death.

But I also come to thank God for giving us James A. Haley for these years. For our lives have been touched and made the better because he was with us in these days. He will not be forgotten. Thank God for James A. Haley.●

[1] Speaker Carl Albert, July 27, 1976, upon the occasion of the unveiling of a portrait of the Honorable James A. Haley in the Hearing Room of the Committee on Interior and Insular Affairs, Washington, D.C.

## INTRODUCTION OF LEGISLATION TO REFORM THE REGULATION OF OIL AND OIL PRODUCT PIPELINES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. SYNAR) is recognized for 5 minutes.

● Mr. SYNAR. Mr. Speaker, I am today introducing along with my colleague from Illinois (Mr. CORCORAN) legislation to reform the regulation of petroleum and petroleum product pipelines. A section-by-section analysis of the bill is included at the end of my statement for the convenience of Members in reviewing this proposal.

My colleagues will recall that prior to adjournment in August I announced my intention to introduce legislation to reform oil and product pipeline rate regulation. Since that time, several Members of the House have indicated their interest in this proposal, and I look forward to working with them.

The legislation which we are introducing reforms oil and product pipeline regulation by repealing the jurisdiction of the Federal Energy Regulatory Commission to determine and prescribe rates and charges. Under our bill, FERC will continue to regulate common carrier obligations and will continue enforcement of legal proscriptions against any possible discriminatory or preferential treatment of shippers by pipeline companies. And, of course, all Federal antitrust laws will continue to apply to oil and product pipelines. It is only rate regulation that is unnecessary and therefore repealed by this legislation.

I would emphasize at this point that our legislation deals only with oil and oil product pipelines—pipelines which are not franchised by the Federal Government and which are not, in any sense of the term, a legally protected monopoly.

Before going on, Mr. Speaker, I would like to provide a short history of oil and oil product pipeline rate regulation by the Federal Government.

Since 1906 petroleum pipelines have been subject to regulation under the Interstate Commerce Act which imposes common carrier obligations on those pipelines, requires that their rates be just and reasonable, and prohibits any discriminatory or preferential treatment of shippers by any pipeline.

Until 1977, the Interstate Commerce Commission administered the provisions of the Interstate Commerce Act as they apply to oil and oil product pipelines. Profits of oil pipeline companies have been regulated by two rate-of-return standards and, in some cases since 1941, by a negotiated consent decree. One standard sets maximum rates of return for crude oil pipelines, the second for petroleum product pipelines. On October 1, 1977, with enactment of the Department of Energy Organization Act, regulatory jurisdiction over petroleum pipelines was transferred from ICC to the Federal Energy Regulatory Commission within DOE.

Just prior to this transfer of jurisdiction, the ICC had begun a reexamination of its approach to pipeline rate regulation, and this review has continued under FERC without resolution for almost 4 years now. In the meantime, the Federal Energy Regulatory Commission has suspended and set for administrative proceeding every single rate increase proposed by an oil pipeline company. Needless to say, the backlog of pending pipeline rate cases continues to grow as FERC reviews the basic methodology used by ICC for regulating industry rates.

Since coming to Congress almost 3 years ago, I have been actively involved in efforts to effect regulatory reform in two ways: by changes in the regulatory process itself, and by relieving industry of regulation where it is unnecessary and counterproductive.

From this work, I know that many of my colleagues share my view that we should avoid regulatory interference in the marketplace where it can be shown that competition exists within a particular industry and that competition will continue to be the driving force behind the setting of reasonable rates for services of that industry. In any industry where competition can and should work, the Nation is ill-served by unnecessary regulation. The Congress has already found this to be the case in many other industries and accordingly moved to relieve them of Federal regulations.

Back in 1906 when rate regulation of oil and product pipelines was first instituted there was some justification for it, since shippers had relatively few options available to them for transporting their crude oil and products. However, that situation no longer exists as it did 75 years ago. Today, shippers enjoy a great variety of options which include transport by different pipelines, by other modes of crude and product transportation and by shipper exchanges. Evidence reveals that shippers benefit from this intramodal and intermodal competition, since it results in competitive rates for shippers. I believe that evidence also shows that it is this competition, and not Federal rate regulation, which continues to provide shippers with reasonable transportation rates.

There is yet another aspect of pipeline industry competition which I want to address for a moment. Since the ICC began its reexamination of pipeline ratemaking methodology several years ago, which has continued under FERC, the issue of how to set appropriate rates for this industry has been the topic of much discussion and disagreement. It is clear to me that this lack of agreement results in very large measure from the fact that there simply is no satisfactory way to establish an appropriate ratemaking methodology for a competitive industry.

Where there is no need to regulate, there is no effective and appropriate method for regulating.

In addition, this regulatory state of flux has resulted in considerable uncertainty for an industry which can ill afford it, by making new investment planning difficult at best and impossible in some cases. Without some direction from Congress, this unnecessary review of ratemaking methodology could go on for several more years. It would continue to impose upon the industry the regulatory uncertainty which hampers effective planning necessary to meet the changing dynamics of the industry and the changing demands of shippers and consumers. Without the ability to plan and invest with reasonable certainty of Federal regulation, the industry cannot meet the needs of our consumers.

While the state of the industry as a whole may be relatively sound, many believe it will not remain so under current unpredictable conditions or under a radical departure from traditional methods of rate regulation.

Mr. Speaker, this is clearly an appropriate time for Congress to explore fully the issue of oil pipeline rate deregulation for the many reasons I have outlined above. I look forward to working on this issue with other Members of the House and members of the Energy and Commerce Committee who have expressed an interest in our proposal.

Following is a section-by-section analysis of the bill:

SECTION-BY-SECTION ANALYSIS OF H.R. 4488 BY MR. SYNAR AND MR. CORCORAN

Section 1. Title of the Act. This Act may be cited as the Department of Energy Organization Act Amendments of 1981.

Section 2. Statement of purpose: to foster a competitive oil pipeline industry, induce investment in new oil pipelines, and eliminate unnecessary regulations.

Section 3(a). Repeals Section 306 of the Department of Energy Organization Act of 1977 which transferred from ICC to the Secretary of Energy those functions which relate to the transportation of oil by pipeline.

Section 3(b). Repeals Section 402(b) of the Department of Energy Organization Act of 1977 which transferred to FERC the functions and authority of ICC to establish rates and charges for the transportation of oil by pipeline.

Section 3(c). Amends Section 402 of the Department of Energy Organization Act of 1977 by adding a new Subsection to transfer to FERC all functions related to the transportation of oil by pipeline (formerly transferred to the Secretary of Energy and FERC under Sections 306 and 402(b) of the Department of Energy Organization Act of 1977 as originally enacted), subject to the provisions of Section 4 of this bill.

Section 4(a). Repeals those laws which vest jurisdiction and authority to suspend or determine or prescribe rates, fares or charges for the transportation of oil by pipeline, except as provided by Section 4(b).

Section 4(b). Provides that the repeal in Subsection 4(a) does not apply to the FERC's authority with respect to rates, fares or charges for the transportation of oil by the trans-Alaska pipeline system.

● Mr. SHARP. Mr. Speaker, I commend my colleague for identifying and suggesting action in this area. Congress has not looked at the question of oil pipeline regulation for many years, and I hope our Subcommittee on Fossil and Synthetic Fuels will be able to do so during this term. I look forward to working with the gentleman from Oklahoma.●

● Mr. CORCORAN. Mr. Speaker, the gentleman from Oklahoma (Mr. SYNAR) today introduced a bill to achieve regulatory reform in the area of petroleum and petroleum product pipeline rates. This bill, which I am pleased to cosponsor, will remove an unnecessary and burdensome rate regulation and will promote competition to the benefit of the consumer.

The bill is important to the Nation, because the country always benefits from the removal of regulation where it is unnecessary and counterproductive. It is also important, however, to the industries and consumers in my region of the country.

It is estimated that the 15th District of Illinois consumes some 4.7 million barrels per year of gasoline and distillate fuels. Of this amount, approximately 50 percent is delivered to the area via Refined Products Pipelines. The balance is sourced from area refineries or from river terminals. All the area refineries depend on pipeline as a source for the crude oil processed in their facilities.

Through this competitive network of crude oil and refined products pipelines, refineries, and river terminals, the district is able to access its petroleum needs from a wide variety of sources.

Crude oil from domestic production sources in Illinois, Oklahoma, Texas, and Louisiana are directly connected to the area and Alaskan oil is also available to the region from pipelines originating on the gulf coast. In addition, the connection to the gulf coast provides economic access to imported crude oil from the major world producing areas in South America, the North Sea, Africa, and the Persian Gulf. Canadian production is also tied directly into the area by the pipeline network from the North.

In addition to local refinery production, the area is served by refined products produced in the major midcontinent and gulf coast refining centers and delivered into the area by barge and pipeline. Much of the local refinery production is also distributed through the region via pipeline.

The ability to economically access both raw material and refined products which is provided by the extensive oil pipeline network serving this region provides a maximum measure of security for this area in this age of energy uncertainty. Periodic or intermittent interruption of supply from one area; that is, OPEC embargo, Canadian export cutback does not leave the region isolated as material from other sources can supplement these losses as long as adequate capacity exists on the various pipeline systems serving the area.

The willingness to take the risk to commit to such capacity levels is best assured by an economic and regulatory environment which recognizes the intensely competitive nature of the industry. With a healthy oil pipeline industry, this interior region of the country, located away from the major oil producing areas, is able to maintain parity of access to the available supplies of energy in a dynamic and rapidly changing energy environment. The obvious competition among various sources to supply the area during normal times assures energy supply at the least possible cost. Without such a healthy system, this region could suffer both severe economic penalties and physical limitations in accessing its needed energy supplies.

For these reasons, the bill to foster competition by ending petroleum pipeline rate regulation is of vital importance to my district and the mid-West. It deserves our support and I look forward to working for its passage.●

## EXODUS OF EXECUTIVES FROM THE FEDERAL GOVERNMENT REACHES ALARMING PROPORTIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 5 minutes.

● Mr. FORD of Michigan. Mr. Speaker, the exodus of executives in the Federal Government has reached alarming proportions. More and more we are reading and hearing about the Federal brain drain as a result of the $50,112 pay ceiling. Our best and brightest people are fleeing to private industry where in many cases they double or triple their annual earnings.

Just last week Newsweek magazine warned that the drain could turn into a flood.

Within the last 3 years retirement or resignation of top Federal employees has risen alarmingly.

Early this year the Post Office and Civil Service Committee held hearings to determine the seriousness of the problem. What we heard was frightening. Managers of several Government departments and agencies painted a disquieting picture of what is taking place.

The Reagan administration is not unaware of the problem. But OMB Director David Stockman told us last winter and spring that this would not be an appropriate time to attempt to remedy the problem. We would have to wait, he said, until there was improvement in the economy.

Yesterday Donald J. Devine, Director of the Office of Personnel Management, testified before the Senate Committee on Governmental Affairs on this very subject.

After acknowledging that people are leaving the Senior Executive Service at the prime of their careers and warning of a serious morale problem, Mr. Devine urged Congress to pass legislation that would permit the pay cap to increase by 4.8-percent, the same amount the administration has recommended for all Federal employees.

In light of what Mr. Stockman told us earlier, I am not sure how to read this proposal. Does it mean that the economy has improved by 4.8 percent using supply side arithmetic? Or does it mean the administration projects a 4.8-percent improvement?

I don't think it means the administration has decided to face up to the problem. The people who are leaving the Government are doing so because the offers in the private sector are substantially more than they are earning. I don't think this proposal, which Mr. Devine calls symbolic, can be regarded as a serious gesture. I would hope that the President in this instance recognizes that this is far from an adequate solution.●

## MONTHLY LIST OF GAO REPORTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. BROOKS) is recognized for 5 minutes.

Mr. BROOKS. Mr. Speaker, the monthly list of GAO reports includes summaries of reports which were prepared by the staff of the General Accounting Office. The June 1981 list includes:

NATIONAL DEFENSE

Adjustments Recommended in fiscal year 1982 Ammunition Procurement and Modernization Programs. PLRD-81-35, June 30.

Improved Work Measurement Program Would Increase DOD Productivity. Acc. No. 115468, PLRD-81-20, June 8.

Will There Be Enough Trained Medical Personnel in Case of War? Acc. No. 115603, HRD-81-67, June 24.

*Letter reports*

Update concerning proposed reactivation of the Iowa class battleships and the aircraft carrier *Oriskany*. Acc. No. 115403, PLRD-81-21, April 20.

Navy is not adequately protecting the government's investment in materials furnished to contractors for ship construction and repair. Acc. No. 115426, PLRD-81-36, June 9.

## BOSSES, UNIONS, WANT FEDERAL HELP IN CLOSING BRAINPOWER GAP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Louisiana (Mr. LONG) is recognized for 5 minutes.

● Mr. LONG of Louisiana. Mr. Speaker, in each of its economic reports to the Congress over the past few years, the Joint Economic Committee has pressed for a comprehensive supply-side approach to the economy. Many of our recommendations have been enacted into law.

However, just as we have emphasized the importance of putting the most modern equipment into up-to-date factories, I believe we must now be equally concerned with making sure that our work force is prepared to make the most of the opportunities that technological change and high rates of investment will make possible.

The following article appeared recently in the Washington Post. I believe many of the points made in the article by Mr. Morgan are worthy of consideration of my colleagues. I commend it to their attention.

[From the Washington Post, Aug. 7, 1981]

BOSSES, UNIONS WANT FEDERAL HELP IN CLOSING BRAINPOWER GAP

(By Dan Morgan)

The Reagan administration's formula for licking unemployment calls mainly for the government to stand aside while an unleashed American industral machine puts the jobless back to work.

That formula fits neatly with President Reagan's philosophy of reducing the government's role. It moves decisively away from the Carter administration's concept of "reindustrialization," which envisioned government, business and labor tackling economic problems together.

But now, as Reaganomics is about to get its first actual test, some businessmen are warning that the economy could face serious difficulties if the government reduces its responsibility for educating, training and improving the quality of the work force.

The Business Roundtable, representing a blue-chip roster of corporate America, has called for a national policy to deal with a "growing imbalance between the supply of workers and the skills demanded" because of the aging of the labor force, the continued movement of women into jobs and an increase in the number of young, unskilled blacks and Hispanics.

Testifying before the Senate subcommittee on employment and productivity in June, the chairman of TRW, Inc., R. F. Metler, called for a "public-private effort to address the problems of structural unemployment." Metler, who heads a Business Roundtable task force, acknowledged that the nation has skimped on its investments in training and educating workers.

Echoing these concerns, labor representatives such as United Auto Workers consultant Harley Shaiken have called for a "national debate on the social consequences of micro-electronics."

While business groups are increasingly concened about shortages of trainable workers in the mid-1980s, labor organizations are increasingly worried about the loss of jobs. Both sides share a fear that the administration's economic visions may not square with the kind of American economy and work force that is emerging in the 1980s.

Doubters say that Americans are out of work today not only because the economy is slack, but also because of barriers posed by racial discrimination, age, education and the places they have chosen to live.

The role that race plays in employment can be judged in a single statistic gleaned from former vice president Mondale's task force on youth unemployment: the jobless rate for black high school graduates under 24 is higher than that for white high school dropouts in the same age bracket.

Of the nation's 8 million unemployed, 4 million to 6 million are estimated by Labor Department analysts to lack the basic skills of communication, personal relations, motivation, self-confidence, reading and calculating that would enable employers to train them for the jobs that will open up in the next few years.

Labor projections suggest that the number of unskilled and semi-skilled jobs will shrink in the next few years as computers take their places in factories and offices.

Even skilled workers might not benefit from a new business boom if the jobs created are in the wrong places. While thousands of good jobs are going begging in the booming electronics centers in California and Texas, thousands of skilled workers are jobless in the Northeast, and many of them are unwilling to move. Machinists can earn more than $30,000 a year, yet a trade association reports a shortage of 60,000 machinists.

Lurking behind these odd statistics is the expected speedup of automation in the 1980s, which Business Week magazine said could affect 45 million jobs out of the 103 million jobs in the economy now. The magazine said that while the "unprecedented" changes may not cause widespread unemployment, they will "result in a fundamental change in most workplaces and a painful adjustment for the workers involved."

The main factor will be the widespread introduction of silicon integrated circuits with 64,000 transistors on a single chip a quarter-inch square.

Already microprocessors are replacing secretaries, and electronic sensing devices are substituting for assembly line workers. Industrialists talk of "paperless offices" and "peopleless factories." General Motors vice president Richard Beecher predicts that by 1990 there will be 50,000 computer-controlled robots working in the world automotive industry.

Ever since the Luddite movement attempted unsuccessfully to prevent the introduction of industrial machinery in England in the early 19th century, pessimists have predicted that new technology would wipe out jobs. Yet each new step up the technological ladder has created new productivity, new wealth, new jobs.

In the 1950s, there was wide concern about the impact of automation. Yet between 1960 and 1980, the U.S. economy added 30 million jobs and the labor force grew by 50 percent.

Whole new industries, producing energy, electronics and environmental equipment, have arisen to confound the prophecies of the pessimists. The 1980s may also see the creation of industries built around such new technologies as gene-splicing. And the computer industry, a $10-billion-a-year global enterprise that could be $25 billion by 1985, will employ millions of people.

To the extent that the new electronic technology sharpens the competitive edge of U.S. industry, computers can help slow the job loss resulting from imports. Automation could benefit the industrial nations by "eroding the comparative advantage that developing countries, with their lower labor costs, now hold," according to Colin Norman of Worldwatch Institute. Some predict that as American multinational companies switch to the new technology, they might close their overseas plants and once again manufacture most of their products in highly automated plants in this country.

But the jobs won't be the same. Norman notes that the textile industry plans to spend $2 billion a year on new equipment, some of it computer-controlled. "As a result, as many as 300,000 relatively low-paid jobs could disappear from American textile plants by 1990," he writes in a Worldwatch report. Norman says a British spinning mill

using the new technology will produce as much with 95 employes as three mills employing 435 formerly did.

Many of the jobs that the new technology will supplant, such as those in hazardous textile mills, are low-paid, dangerous and difficult.

Just as agricultural productivity has risen over the decades while the number of farm workers has steadily declined, manufacturing may be in a natural phase of evolution toward increased productivity and declining employment, say the optimists. Manufacturing jobs have stayed constant at about 20 million since 1969, but these jobs' share of the total work force has fallen from one third to one fifth.

Yet even the strongest enthusiasts of the new technology acknowledge that the adjustment will be extremely bumpy, with new industries and jobs arising in some parts of the economy while skills rapidly fall into disuse in others.

Juan Rada, a consultant for the International Labor Office whose detailed study of the microelectronics industry was published in 1980, concludes that "we may be facing a transition to a society that no longer needs to make full-time use of its entire potential labor force."

Until now the United States has been able to make this transition by absorbing steadily increasing unemployment rates and by adding a vast number of relatively low-paid jobs in the service sector.

While employment in manufacturing and mining has remained almost constant since 1970, some 14 million new jobs have been created in retailing, finance, state and local government and other services. There has been a sharp increase in the number of people producing memos, guarding buildings, caring for the sick, working on city garbage crews, and waiting on table, but not in the number digging for coal or turning out refrigerators, computers, planes, missiles and automobiles. Today, the number of people working in restaurants, bars and fast food establishments (where pay averages $3.91 an hour) is about the same as the number in the construction industry (where pay averages $10.50 an hour).

"Most of the growth in the American economy is leading toward an economic structure which creates badly paid and unproductive work for a large segment of the work force," writes economist Anthony Carnevale, a former aide to the Senate Budget Committee who is now a consultant to the American Society for Development and Training.

Some of the semi-skilled jobs appear to be likely targets for automation. While employment in banking rose rapidly in Europe and the United States in the 1970s, some European studies predict a 20 percent to 30 percent decline in the 1980s, as human tellers are replaced with automatic money machines.

Business Week predicts that some 38 million of the 50 million white-collar jobs in the United States eventually will be automated.

Electronic mail could displace millions of postal workers in Japan, Europe and the United States. Rada's report to the ILO says that private communications satellites using electroic mail techniques could take over 30 percent of the Post Office's volume of correspondence by 1986.

Skeptics in business and labor say they doubt that the adjustments likely to occur in the 1980s can take place smoothly without national manpower policies that provide incentives for retraining and financing to educate and train the millions of people who are badly prepared to find work in the new industries.

Many liberals now acknowledge that the manpower programs of the 1970s would not be well suited to the 1980s. In the decade past, children of the "baby boom" matured and began looking for jobs. To deal with this demographic bulge, federal economic policies were aimed at creating more jobs, even at the risk of inflation. Government programs, such as the Comprehensive Employment Training Act, provided temporary employment but little permanent training.

In Congress, liberals joined conservatives this year in cutting $2.3 billion from CETA, largely in recognition of changing times, and changing needs.

However, neither business-minded conservatives nor liberals appear to want the federal government to opt out of a role in making manpower policy.

Corporate executives are eyeing declining high school enrollments and low academic performances and wondering if there will be enough qualified young people available for the new jobs. They have been urging the Reagan administration to support regional or state "customized training" that would provide remedial and basic education for the unemployed followed by technical training for specific jobs available in those areas.

Employers' belated concern about the quality of the labor force comes after some 20 years in which industry has enjoyed the luxury of a large surplus of unemployed workers, as well as too many college graduates for the professional and technical jobs available.

Some labor officials and economists suggest that corporations are mainly interested in increasing the size of the pool of qualified workers to hold down wages. Others say the talk of unproductive labor is a smokescreen to cover a more serious problem: unproductivity and incompetence of management.

"Industry has to find something to blame," said a government expert who believes the number one problem is unemployment due to automation, not a shortage of skilled workers. "First it was government regulation, then it was the high cost of capital, and foreign imports, now it's labor unproductivity."

Consultant Carnevale feels that corporate leaders are sincere in their new interest in the fashionable subject of "human capital"

"In the past we had unemployment off to the side and an economic system that was working well. Now the system itself is at stake. It's no longer a well-functioning economy in which some pieces are left out."

In West Germany about 2 percent of all workers are being retrained at any one time, compared with .1 to .5 percent in the United States. This intensive training is mandated in West German law.

If millions remain unemployed, and millions of other productive women who would like to work are unable to do so because good jobs are not there, Reagan's policies could end in unrest even if they succeed in putting millions to work.

Unanswered by the Reagan policies are questions with a profound significance for the country in the computer age: Is maximum productivity the single goal? Or is the objective a society in which all persons have an opportunity to work? Without a balance, says Carnevale, there is a real danger that the aspirations of a "bottomless pit" of people will go unfulfilled. The consequence of that, he warns, would be a country full of "frustration and anger."●

## SUBCOMMITTEE ON CRIME TO HOLD HEARINGS ON H.R. 2646, H.R. 2910, AND H.R. 4110 IN REGARD TO GENERAL QUESTIONS OF FORFEITURE STATUTES AND THEIR IMPLEMENTATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. HUGHES) is recognized for 5 minutes.

● Mr. HUGHES. Mr. Speaker, on September 6, 1981, at 1 p.m., in room 2237, Rayburn House Office Building, the Subcommittee on Crime of the House Judiciary Committee will begin hearings on H.R. 2646, H.R. 2910, and H.R. 4110 to address the general question of forfeiture statutes and their implementation.

Appearing before the subcommittee to give testimony will be the Honorable JOSEPH R. BIDEN, Senator from Delaware; the Honorable LEO C. ZEFERETTI of the 15th District of New York; the Honorable BENJAMIN A. GILMAN of the 26th District of New York; William J. Anderson, Director, General Accounting Office; Steven Horn, Esq., of Washington, D.C.; Edward Dennis, Chief of Narcotics Section, Criminal Division, U.S. Department of Justice; and Paul Rothstein, Esq., of Chevy Chase, Md.

All interested persons or organizations wishing to submit testimony for the record of the hearings or desiring further information should address their communications to the Subcommittee on Crime, Committee on the Judiciary, 207 Cannon House Office Building, Washington, D.C. 20515. Telephone: (202) 225-1695.●

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CROCKETT (at the request of Mr. DINGELL), on account of official business, from September 14 through September 18, 1981.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BOLLING, for 60 minutes, on September 29.

(The following Members (at the request of Mr. BENEDICT) to revise and extend their remarks and include extraneous material:)

Mr. LEACH of Iowa, for 60 minutes, today.

Mr. HAMMERSCHMIDT, for 10 minutes, today.

(The following Members (at the request of Mr. KOGOVSEK) to revise and extend their remarks and include extraneous material:)

Mr. SHAMANSKY, for 5 minutes today.

Mr. CONYERS, for 60 minutes today.

Mr. LAFALCE, for 15 minutes today.

Mr. ROEMER, for 10 minutes today.
Mr. GONZALEZ, for 15 minutes today.
Mr. ANNUNZIO, for 5 minutes today.
Mr. UDALL, for 10 minutes today.
Mr. SYNAR, for 5 minutes today.
Mr. FORD of Michigan, for 5 minutes today.
Mr. BROOKS, for 5 minutes today.
Mr. LONG of Louisiana, for 5 minutes today.
Mr. HUGHES, for 5 minutes today.
Mr. FORD of Michigan, for 5 minutes September 16, 1981.
Mr. CONYERS, for 60 minutes each day on September 16, 17, and 18, 1981.

## EXTENSIONS OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. BENEDICT) and to include extraneous matter:)
Mr. BROOMFIELD.
Mr. FISH.
Mr. WEBER of Ohio.
Mr. COLLINS of Texas in three instances.
Mr. DERWINSKI in two instances.
Mr. SAWYER.
Mr. MARRIOTT.
Mr. PORTER.
Mr. FINDLEY in two instances.
Mr. HYDE.
Mr. EVANS of Delaware.
Mr. LEBOUTILLIER in two instances.
Mr. SNYDER.
Mr. LEACH of Iowa.
Mr. MCGRATH.
Mr. BROWN of Ohio.

(The following Members (at the request of Mr. KOGOVSEK) and to include extraneous matter:)
Mr. MAZZOLI.
Mr. PEASE.
Mr. D'AMOURS.
Mr. MATTOX.
Mr. ECKART.
Mr. EDGAR.
Mr. JOHN L. BURTON.
Mr. LEHMAN in two instances.
Mr. FROST.
Mrs. BOUQUARD.
Mr. GINN.
Mr. SHELBY.
Mr. AUCOIN.
Mr. ZABLOCKI.
Mr. BRODHEAD.
Mr. BONER of Tennessee.
Mr. MOAKLEY.
Mr. COELHO.
Mr. FRANK.
Mr. SANTINI.
Mr. ROE.
Mr. OBERSTAR.
Mrs. BOGGS.
Mr. GEPHARDT.
Mr. TRAXLER.
Mr. KASTENMEIER.
Mr. DAN DANIEL.
Mr. SIMON.
Mrs. SCHROEDER.
Mr. SCHUMER.

## BILLS PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on September 14, 1981, present to the President, for his approval, bills of the House of the following title:

H.R. 2120. An act to facilitate the ability of product sellers to establish product liability risk retention groups, to facilitate the ability of such sellers to purchase product liability insurance on a group basis, and for other purposes; and

H.R. 4416. An act to enable the Secretary of Agriculture to assist, on an emergency basis, in the eradication of plant pests and contagious or infectious animal and poultry diseases.

## ADJOURNMENT

Mr. CONYERS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 8 minutes p.m.), under its previous order, the House adjourned until Wednesday, September 16, 1981, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2182. A letter from the Acting Chairman, Federal Trade Commission, transmitting the second and third annual line of business reports prepared by the Commission's Bureau of Economics; to the Committee on Energy and Commerce.

2183. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2184. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C 112b(a); to the Committee on Foreign Affairs.

2185. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of proposed changes in an existing Navy records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2186. A letter from the Acting Secretary of the Interior, transmitting notice of the proposed refund of $303,553.83 in excess oil or gas royalties to Ocean Production Co., Shell Oil Co., Gulf Oil Corp., ARCO Oil & Gas Co., and Hamilton Bros. Oil Co., pursuant to section 10(b) of the Outer Continental Shelf Lands Act, as amended; to the Committee on Interior and Insular Affairs.

2187. A letter from the Acting Secretary of the Interior, transmitting notice of the proposed refund of $775,392.39 in excess gas royalties to Getty Oil Co., pursuant to section 10(b) of the Outer Continental Shelf Lands Act, as amended; to the Committee on Interior and Insular Affairs.

2188. A letter from the Office of the Secretary of Defense, transmitting a report on Department of Defense procurement from small and other business firms for October 1980 to May 1981, pursuant to section 10(d) of the Small Business Act, as amended; to the Committee on Small Business.

2189. A letter from the Chairman, National Transportation Safety Board, transmitting the Board's 1983 budget submission, pursuant to section 304(b)(7) of Public Law 93-633; jointly, to the Committees on Energy and Commerce, Public Works and Transportation, and Appropriations.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FROST: Committee on Rules. House Resolution 215. Resolution waiving certain points of order against H.R. 4241, a bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97-224). Referred to the House Calendar.

Mr. HALL of Ohio: Committee on Rules. House Resolution 216. Resolution providing for the consideration of H.R. 3136, a bill to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation (Rept. No. 97-225). Referred to the House Calendar.

Mr. DERRICK: Committee on Rules. House Resolution 217. Resolution providing for the consideration of H.R. 2330, a bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes (Rept. No. 97-226). Referred to the House Calendar.

Mr. EDWARDS of California: Committee on the Judiciary. H.R. 3112. A bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other provisions for an additional 7 years, and for other purposes; with amendments (Rept. No. 97-227). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. SNYDER (for himself, Mr. PERKINS, Mr. TAYLOR, Mr. HUBBARD, Mr. STOKES, Mr. EVANS of Georgia, Mr. ROE, Mr. LATTA, Mr. GONZALEZ, Mr. STANGELAND, and Mr. MOTTL):

H.R. 4471. A bill to provide that no person may charge interest at a rate which is greater than 10 percent per annum on loans exceeding $300, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BONER of Tennessee:

H.R. 4472. A bill to amend the Social Security Act to provide for improved management of the social security trust funds and increase the return on investment to those funds; to the Committee on Ways and Means.

By Mr. BRODHEAD:

H.R. 4473. A bill to amend the Internal Revenue Code of 1954 to permit the rollover to individual retirement plans of certain partial distributions received by employees; to the Committee on Ways and Means.

By Mr. CHAPPELL:

H.R. 4474. A bill to provide for the wilderness designation of certain lands within the Ocala National Forest, and for other pur-

poses; to the Committee on Interior and Insular Affairs.

By Mr. COELHO (for himself, Mr. AKAKA, Mr. BAFALIS, Mr. BOWEN, Mr. BROWN of Colorado, Mr. CHAPPELL, Mr. DIXON, Mr. FAZIO, Mr. FISH, Mr. FOLEY, Mr. HEFTEL, Mr. HILLIS, Mr. HORTON, Mr. IRELAND, Mr. JONES of Tennessee, Mr. LEHMAN, Mr. LOWERY of California, Mr. LOWRY of Washington, Mr. MATSUI, Mr. MINETA, Mr. WAXMAN, Mr. WIRTH, Mr. BURGENER, Mr. EDWARDS of California, Mr. PANETTA, and Mr. QUILLEN):

H.R. 4475. A bill to enable producers and importers of flowers and plants to establish, finance, and carry out a coordinated program of research, producer and consumer information, and promotion to improve, maintain, and develop markets for flowers and plants; to the Committee on Agriculture.

By Mr. DANIELSON:

H.R. 4476. A bill to amend the Administrative Conference Act, by authorizing appropriations therefor; to the Committee on the Judiciary.

By Mr. DERRICK:

H.R. 4477. A bill to amend the Internal Revenue Code of 1954 to permit the cost of property installed to meet the requirements of occupational safety standards relating to cotton dust to be treated as an expense; to the Committee on Ways and Means.

By Mr. FAUNTROY (for himself and Mr. HANSEN of Idaho):

H.R. 4478. A bill to amend the Federal Reserve Act to require that detailed minutes of Federal Open Market Committee meetings shall be published on a deferred basis; to the Committee on Banking, Finance and Urban Affairs.

By Mr. HANCE:

H.R. 4479. A bill to provide that sales of agricultural commodities may not be made at prices which are less than 90 percent of the parity prices therefor; to the Committee on Agriculture.

Mr. HOWARD:

H.R. 4480. A bill to extend through June 30, 1985, the suspension of import duties on synthetic rutile; to the Committee on Ways and Means.

By Mr. HUGHES (for himself, Mr. RODINO, Mr. MCCLORY, Mr. SAWYER, Mr. SAM B. HALL, Jr., Mr. FISH, Mr. BIAGGI, Mr. HOWARD, Ms. OAKAR, Mr. ROE, and Mr. SOLARZ):

H.R. 4481. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes; to the Committee on the Judiciary.

By Mr. KASTENMEIER (for himself, Mr. RODINO, Mr. DANIELSON, Mr. RAILSBACK, Mr. MCCLORY, Mr. BUTLER, and Mr. SAWYER):

H.R. 4482. A bill to establish a U.S. Court of Appeals for the Federal Circuit, to establish a U.S. Claims Court, and for other purposes; to the Committee on the Judiciary.

By Mr. KOGOVSEK:

H.R. 4483. A bill to provide for confirmation of the repayment contract of the Dallas Creek participating project of the Upper Colorado River storage project; to the Committee on Interior and Insular Affairs.

By Mr. MOORHEAD:

H.R. 4484. A bill to direct the President to provide for the award of the Purple Heart to prisoners of war held during World War I, World War II, and the Korean conflict under the same criteria applicable to prisoners of war held during the Vietnam era; to the Committee on Armed Services.

H.R. 4485. A bill to reform the Federal Power Act to encourage conduit hydroelectric facilities; to the Committee on Energy and Commerce.

By Mr. NELLIGAN:

H.R. 4486. A bill to amend the Social Security Act to appropriate to the Federal old-age and survivors insurance trust fund the amount of certain rents, royalties, and other sums deposited in the Treasury of the United States pursuant to the Outer Continental Shelf Lands Act; to the Committee on Ways and Means.

By Mr. STRATTON:

H.R. 4487. A bill to amend the Internal Revenue Code of 1954 to repeal the 25-percent reduction in individual income tax rates and to substitute a 15-percent reduction in such rates consisting of a 7½-percent reduction for 1982, a 5-percent reduction for 1983, and a 2½-percent reduction for 1984, to result in a projected revenue recovery of over $65 billion by 1984; to the Committee on Ways and Means.

By Mr. SYNAR (for himself and Mr. CORCORAN):

H.R. 4488. A bill to amend the Department of Energy Organization Act to clarify the jurisdiction of the Federal Energy Regulatory Commission, to reform and improve the regulation of oil pipelines, and for other purposes; to the Committee on Energy and Commerce.

By Mr. COLLINS of Texas:

H.J. Res. 327. Joint resolution authorizing the President to proclaim the first Saturday in October of each year as "Children's Day"; to the Committee on Post Office and Civil Service.

By Mr. FAUNTROY (for himself, Mrs. CHISHOLM, Mr. CLAY, Mrs. COLLINS of Illinois, Mr. CONYERS, Mr. CROCKETT, Mr. DELLUMS, Mr. DIXON, Mr. DYMALLY, Mr. FORD of Tennessee, Mr. GRAY, Mr. HAWKINS, Mr. LELAND, Mr. MITCHELL of Maryland, Mr. RANGEL, Mr. SAVAGE, Mr. STOKES, and Mr. WASHINGTON):

H.J. Res. 328. Joint resolution designating August 30, 1982, as "Roy Wilkins Day"; to the Committee on Post Office and Civil Service.

By Mr. GEPHARDT:

H.J. Res. 329. Joint resolution proposing an amendment to the Constitution to preserve the neighborhood school; to the Committee on the Judiciary.

By Mr. FISH:

H. Con. Res. 180. Concurrent resolution to commend the Attorney General's Task Force on Violent Crime for drawing national attention to the plight of victims of crime and to urge the Attorney General to promulgate within the Department of Justice standards for the fair treatment of victims of serious crime; to the Committee on the Judiciary.

By Mr. GRAY:

H. Con. Res. 181. Concurrent resolution expressing the sense of the Congress that the National Rugby Team of South Africa should not play in the United States; to the Committee on Foreign Affairs.

By Mr. WOLPE (for himself, Mr. GOODLING, Mr. BONKER, Mr. GRAY, Mr. ERDAHL, Mr. DOWNEY, Mr. WEISS, Mr. STUDDS, Mr. SOLARZ, Mr. SIMON, Mr. DIXON, Mr. MOFFETT, Mr. FAUNTROY, and Mr. ECKART):

H. Res. 214. Resolution condemning South Africa's recent invasion of Angola and the resulting unnecessary loss of lives and destruction of property, and calling upon all parties to the Namibian conflict to cooperate in the implementation of United Nations Security Council Resolution 435; to the Committee on Foreign Affairs.

By Mr. MOFFETT:

H. Res. 218. Resolution to provide authority for the creation of an experimental 21-day period commencing in January 1982 during which standing committees of the House of Representatives would engage in the oversight of programs and laws within their jurisdiction in lieu of the consideration of legislation; to the Committee on Rules.

By Mr. OBERSTAR:

H. Res. 219. Resolution urging the President to rescind the agreement to sell butter to the New Zealand Dairy Board; to the Committee on Foreign Affairs.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. PATTERSON:

H.R. 4489. A bill for the relief of Kha Duc Mai; to the Committee on the Judiciary.

H.R. 4490. A bill for the relief of Lehi L. Pitchforth, Jr.; to the Committee on the Judiciary.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 25: Mrs. BOGGS, Mr. BREAUX, Mr. HUTTO, and Mr. TAUZIN.

H.R. 52: Mr. BENJAMIN, Mr. CARNEY, Mr. FORSYTHE, and Mr. SABO.

H.R. 248: Mr. MATSUI.

H.R. 894: Mr. GIBBONS, Mr. PORTER, Mr. DAVIS, Mr. ERDAHL, Mr. BURGENER, Mr. STANGELAND, Mr. FRENZEL, Mr. MCDADE, Mrs. SNOWE, and Mr. SABO.

H.R. 992: Mr. SILJANDER.

H.R. 1297: Mr. EMERY.

H.R. 1300: Mr. BAILEY of Missouri and Mr. GUNDERSON.

H.R. 1376: Mr. GILMAN.

H.R. 1603: Mr. NICHOLS, Mr. ERTEL, Mr. UDALL, Mr. FISH, Mr. ENGLISH, Mr. LONG of Louisiana, Mr. WAMPLER, Mr. FINDLEY, Mr. BAFALIS, Mr. DANNEMEYER, Mrs. SMITH of Nebraska, and Mr. BLILEY.

H.R. 1919: Mr. BINGHAM.

H.R. 2439: Mr. FAZIO, Mr. HOLLENBECK, and Mr. SIMON.

H.R. 2488: Mr. RAHALL.

H.R. 2543: Mr. ROE, Mr. MCCOLLUM, and Mr. LEBOUTILLIER.

H.R. 2832: Mr. MURPHY.

H.R. 3048: Mr. BENNETT, Mr. JAMES K. COYNE, Mr. HARKIN, Mr. OBERSTAR, Mr. PETRI, and Mr. SOLARZ.

H.R. 3083: Mr. MILLER of Ohio.

H.R. 3122: Mr. HUGHES.

H.R. 3274: Mr. WEBER of Minnesota and Mr. DREIER.

H.R. 3364: Mr. HANSEN of Utah.

H.R. 3441: Mr. FORSYTHE, Mr. BROWN of Ohio, and Mr. EVANS of Iowa.

H.R. 3496: Mr. BONKER, Mr. DASCHLE, Mr. DYMALLY, Mr. MILLER of California, Mr. MILLER of Ohio, Mr. ROYBAL, Mr. SHUMWAY, and Mr. WORTLEY.

H.R. 3526: Mr. BAILEY of Pennsylvania, Mr. CORCORAN, Mr. DOWNEY, Mr. DWYER, Mr. HIGHTOWER, Mr. MATTOX, and Mr. ROBINSON.

H.R. 3575: Mr. COLEMAN, Mr. LOTT, and Mr. MINETA.

H.R. 3614: Mr. EMERSON, Mr. KRAMER, Mr. WEAVER, Mr. ROBERT W. DANIEL, Jr., Mr. BAFALIS, Mr. TRAXLER, Mr. BAILEY of Missouri, Mr. WHITTEN, Mr. DOWDY, Mr. DAN DANIEL, Mr. HOWARD, Mr. PARRIS, and Mr. RODINO.

H.R. 3656: Mr. STOKES, Mr. YOUNG of Missouri, and Mr. MINETA.

H.R. 3721: Mr. FAZIO and Mr. AKAKA.

H.R. 3907: Mr. SAVAGE and Mr. HOWARD.

H.R. 3958: Mr. WYLIE, Mr. YATRON, Mr. ST GERMAIN, Mrs. ROUKEMA, Mr. HYDE, Mr. GEPHARDT, Mr. BETHUNE, Mr. HORTON, Mrs. HOLT, Mr. LEE, Mr. CORRADA, Mr. LEBOUTILLIER, Mr. MORRISON, Mr. FORSYTHE, and Mr. SMITH of Pennsylvania.

H.R. 4002: Mr. CARNEY.

H.R. 4015: Mr. WOLPE, Mr. MITCHELL of Maryland, and Mr. FISH.

H.R. 4049: Mr. DAN DANIEL, Mr. MCDONALD, Mr. PARRIS, Mrs. HOLT, Mr. SILJANDER, Mr. SMITH of Alabama, Mr. CORCORAN, Mr. MCCOLLUM, Mr. EVANS of Iowa, Mr. MARTIN of North Carolina, Mr. BLILEY, Mr. SMITH of Oregon, and Mr. HANSEN of Utah.

H.R. 4332: Mr. FAUNTROY.

H.R. 4343: Mr. CROCKETT, Mr. NOWAK. Mr. WYDEN, Mr. GONZALEZ, Mr. MAVROULES, Mr. WILLIAMS of Ohio, Mr. SAVAGE, and Mr. ECKART.

H.R. 4346: Mr. CONABLE, Mr. PICKLE, Mr. DUNCAN, Mr. LAFALCE, Mr. ROUSSELOT, and Mr. COUGHLIN.

H.R. 4404: Mr. BLILEY, Mr. BENEDICT, Mr. MADIGAN, and Mr. LEE.

H.R. 4461: Mr. APPLEGATE, Mr. WILSON, Mr. KOGOVSEK, Mr. MURTHA, Mr. MURPHY, and Mr. COELHO.

H.J. Res. 81: Mr. BRODHEAD and Mr. GARCIA.

H.J. Res. 144: Mr. RINALDO, Mr. ROE, Mr. FORSYTHE, Mr. FLORIO, Mr. GUARINI, Mr. HORTON, Mr. PEPPER, Mr. SCHUMER, Mr. RICHMOND, Mr. FOGLIETTA, Mr. SIMON, Mr. ADDABBO, Mr. COURTER, Mr. SMITH of New Jersey, Mr. BREAUX, Mr. DWYER, Mr. HOWARD, Mr. MADIGAN, Mr. HEFTEL, Mr. KRAMER, Mr. CLAY, Mr. KILDEE, and Mr. BARNARD.

H.J. Res. 214: Mr. AKAKA, Mr. ASPIN, Mr. BENJAMIN, Mr. JOHN L. BURTON, Mr. DANNEMEYER, Mr. DAUB, Mr. DERWINSKI, Mr. DONNELLY, Mr. DREIER, Mr. DUNN, Mr. DWYER, Mr. EVANS of Indiana, Mr. EVANS of Delaware, Ms. FERRARO, Ms. FIEDLER, Mr. FITHIAN, Mr. GILMAN, Mr. GINGRICH, Mr. HAMILTON, Mr. HEFNER, Mr. HOPKINS, Mr. LEVITAS, Mr. MARKEY, Mr. MARTIN of New York, Mr. MCCURDY, Mr. MCDADE, Mr. MCEWEN, Mr. PASHAYAN, Mr. REGULA, Mr. ROBERTS of South Dakota, Mr. ROEMER, Mr. ROTH, Mrs. ROUKEMA, Mr. SCHUMER, MR. SKEEN, Mr. SOLARZ, Mr. STATON of West Virginia, Mr. TAUZIN, Mr. WAMPLER, Mr. WEBER of Ohio, Mr. WORTLEY, Mr. YOUNG of Florida, and Mr. EMERSON.

H.J. Res. 241: Mr. GILMAN.

H.J. Res. 243: Mr. AKAKA, Mr. AUCOIN, Mr. BAILEY of Missouri, Mr. BARNES, Mr. BENJAMIN, Mr. BOLAND, Mr. BONIOR of Michigan, Mr. BRODHEAD, Mr. CARMAN, Mr. CLAY, Mr. CONTE, Mr. CONYERS, Mr. COURTER, Mr. DASCHLE, Mr. DENARDIS, Mr. DERWINSKI, Mr. DOWNEY, Mr. DREIER, Mr. DWYER, Mr. EDGAR, Mr. EMERY, Ms. FERRARO, Mr. FINDLEY, Mr. FISH, Mr. FOLEY, Mr. FORSYTHE, Mr. GLICKMAN, Mr. GREEN, Mr. HARKIN, Mrs. HECKLER, Mr. HORTON, Mr. HYDE, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LEACH of Iowa, Mr. LEE, Mr. LIVINGSTON, Mr. LOTT, Mr. LOWRY of Washington, Mr. LUJAN, Mr. MCCLORY, Mr. MCCOLLUM, Mr. MCCURDY, Mr. MCGRATH, Mr. MCHUGH, Mr. MARKS, Mr. MARRIOTT, Mr. MITCHELL of Maryland, Mr. MOFFETT, Mr. MOLINARI, Mr. MONTGOMERY, Mr. MYERS, Mr. O'BRIEN, Mr. OTTINGER, Mr. PEPPER, Mr. PERKINS, Mr. PEYSER, Mr. PRITCHARD, Mr. PURSELL, Mr. RAILSBACK, Mr. RATCHFORD, Mr. REUSS, Mr. RINALDO, Mr. ROSENTHAL, Mr. SABO, Mr. SAWYER, Mr. ST GERMAIN, Mr. SOLARZ, Mr. VENTO, Mr. WAMPLER, Mr. WEAVER, Mr. WHITEHURST, Mr. WIRTH, and Mr. WORTLEY.

H.J. Res. 268: Mr. ANNUNZIO, Mr. ATKINSON, Mr. BONER of Tennessee, Mr. CLINGER, Mr. DOWNEY, Ms. FERRARO, Mrs. HECKLER, Mr. KRAMER, Mr. LENT, Mr. LUNDINE, Mr. MINETA, Mr. PRITCHARD, Mr. REGULA, Mr. SEIBERLING, Mrs. SNOWE, Mr. SNYDER, Mr. WALGREN, Mr. WILSON, Mr. YATRON, Mr. YOUNG of Alaska, Mr. ERDAHL, Mr. EMERY, Mr. FAZIO, Mr. RODINO, Mr. ASHBROOK, Mr. WAMPLER, Mr. CORCORAN, Mr. DANNEMEYER, Mr. FASCELL, Mr. BONKER, Mr. PERKINS, Mr. VANDER JAGT, and Mr. JONES of North Carolina.

H.J. Res. 273: Mr. FORSYTHE, Mr. BENJAMIN, Mr. HYDE, Mr. MCDONALD, Mr. PEPPER, Mr. LAGOMARSINO, Mr. MORRISON, Mr. YOUNG of Florida, Mr. WOLF, and Mr. BARNARD.

H.J. Res. 296: Mr. KEMP, Mr. SMITH of New Jersey, and Mr. WHITTEN.

H.J. Res. 303: Mr. STRATTON, Mr. RITTER, Mr. STUMP, Mr. HORTON, Mr. FORSYTHE, Mr. ADDABBO, Mr. LEE, Mr. LOEFFLER, Mr. WEBER of Ohio, Mr. SCHEUER, Mr. MONTGOMERY, Mrs. HOLT, Mr. CHENEY, Mr. EDGAR, Mr. WALGREN, Mr. DE LA GARZA, Mr. WOLF, Mr. MCCLOSKEY, Mr. JEFFORDS, Mr. MCCLORY, Mr. MATSUI, Mr. RAHALL, Mr. NEAL, Mr. STENHOLM, Mr. FOGLIETTA, Mr. PORTER, Mr. MORRISON, Mr. MURPHY, Mr. WEAVER, Ms. MIKULSKI, Mrs. BOUQUARD, Mr. BEARD, Mr. BARNES, Mr. BROWN of Ohio, Mr. BURGENER, Mr. BENEDICT, and Mr. BROWN of Colorado.

H.J. Res. 323: Mr. FINDLEY, Mr. YOUNG of Florida, Ms. MIKULSKI, Mr. FORSYTHE, Mr. SIMON, and Mr. JEFFRIES.

H. Con. Res. 17: Mr. DERRICK.

H. Con. Res. 112: Mr. FORD of Michigan, Mr. SILJANDER, and Mr. WEISS.

H. Con. Res. 139: Mr. GILMAN.

H. Con. Res. 151: Mr. WYDEN, Mr. KILDEE, Mr. BEDELL, Mr. GRAY, and Ms. MIKULSKI.

H. Con. Res. 157: Mr. PHILIP M. CRANE and Mr. MILLER of Ohio.

H. Res. 200: Mr. MOAKLEY, Mr. ATKINSON, Mr. ARCHER, Mr. LOWERY of California, Mr. FARY, Mr. LAGOMARSINO, Mr. RITTER, Mr. MCDONALD, Mr. SCHEUER, Mr. HOLLENBECK, Mr. FORSYTHE, Mr. FRENZEL, Mr. SMITH of New Jersey, Mr. FRANK, Mr. LAFALCE, Mr. WYDEN, Mr. SABO, Mr. GARCIA, Mr. SOLOMON, Mr. MURPHY, Mr. BRODHEAD, Mr. YATES, Mr. DWYER, Mr. WAXMAN, Mr. EDWARDS of California, Mrs. HOLT, Mr. OTTINGER, Mr. MAVROULES, Mr. MARKEY, Mr. KEMP, Mr. WORTLEY, Mr. BENJAMIN, Mr. YATRON, Mr. FROST, Mr. PORTER, Mrs. CHISHOLM, Mr. GRAY, Mr. EDGAR, Mr. NELLIGAN, Mr. BONIOR of Michigan, Mr. O'BRIEN, Mr. SMITH of Pennsylvania, Mr. MARKS, Mr. MCDADE, Mr. FOGLIETTA, Ms. MIKULSKI, Mr. HORTON, Mr. RUSSO, Mr. WEBER of Ohio, Mr. BLANCHARD, Mr. FISH, Ms. FIEDLER, Mr. HAMMERSCHMIDT, Mr. RATCHFORD, Mr. CORCORAN, Mr. FORD of Michigan, Mr. CONYERS, Mr. LEACH of Iowa, Mr. HYDE, Mr. GREEN, Mr. LEBOUTILLIER, Mr. BENJAMIN, and Mr. STARK.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

197. By the SPEAKER: Petition of the council of the District of Columbia, Washington, relative to funding for education of handicapped children; to the Committee on Education and Labor.

198. Also, petition of the 23d annual covention, National Association of the Physically Handicapped, Inc., Fort Collins, Colo., relative to programs for the disabled; to the Committee on Education and Labor.

199. Also, petition of the American Library Association Council, Chicago, Ill., relative to public access to Federal information; to the Committee on Government Operations.

200. Also, petition of the Synod of Southern California and Hawaii, United Presbyterian Church in the U.S.A., Los Angeles, Calif., relative to legal services; to the Committee on the Judiciary.

# EXTENSIONS OF REMARKS

## THE THREAT OF WATERWAY USER CHARGES

**HON. LES AuCOIN**

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. AuCOIN. Mr. Speaker, Congress is now reviewing legislation that would impose certain user charges on our Nation's ports and waterways as a way of recovering the Federal Government's cost of building and maintaining these important commercial facilities.

Few will dispute the need to look at the way we finance these projects. But as we do so, we must be mindful of the real impact cost recovery will have on our waterways and ports—especially in the West.

Mr. Speaker, I am seriously concerned that proposals now being considered will cripple shipping commerce and international trade on the west coast and in my own State of Oregon. As evidence of this crippling impact, I want to call to my colleagues' attention an article that recently appeared in Oregon Business magazine by Dan Poush. His analysis and commentary clearly shows what this legislation means for Oregon. I ask unanimous consent to insert the article at this point in the RECORD.

THE THREAT OF WATERWAY USER CHARGES

(By Dan Poush)

President Reagan's proposed waterway user charge (the so-called cost recovery proposal) may very well deal a deadly blow to barge shipping in the Pacific Northwest. If approved, the Reagan plan would strap those who ship freight by barge with higher barge fuel taxes, thus reducing the competitive edge they have over other modes of transportation.

The economic impact of this proposal would have a crippling effect, not only on barge traffic on the Columbia and Snake Rivers, but on the Port of Portland as well.

"There has never been a more serious and negative impact" looming for the Port, according to Lloyd Anderson, Executive Director, Port of Portland. "One out of every ten jobs is affected by the system," he says. "This would have a paralytic effect on growth."

Growth is an important factor affecting the entire river system, with huge investments being risked on future business. The Port of Portland is planning a $300 million investment in new facilities at one port, but investments of this magnitude will not occur if the proposed legislation is implemented.

The Reagan plan is a simple formula to have the users of the waterway systems pay for the recovery of federal expenditures for deep-draft navigation projects—anything over 14 feet in depth. The second aspect of the proposal is to promote a user-pays concept for the operation and maintenance of the waterways. But according to Port of Portland officials, this proposed plan will have a severe impact on the national waterways system, the Columbia/Snake system, the national economy, and affect 15,000 jobs in the Northwest alone.

Garry J. Whyte, Executive Secretary of the Columbia River Towboat Association, monitors activities which affect the eight companies belonging to the association. The issue is "vital to our life support system," he says, "but it is coming too fast."

"Deep-draft steam ship operators don't seem to be aware of the ramifications," Whyte notes. For example, cargo being shipped from Lewiston by barge will cost more due to the fuel tax being charged the towboat operators. When the shipment gets to Portland and is loaded, the steam ship will pay the deep draft fees. This system amounts to double taxation according to Whyte.

The towboat operators began paying a user fuel tax of $.04 per gallon of diesel fuel last October. Operators are facing an additional $.02 this October. President Reagan's plan would add additional charges on top of that. As transportation charges increase Northwest shippers may seek alternate methods perhaps causing cargo shifts to Canadian ports, where fees are less. This would cause cargo volume on the waterways to decline, leaving the remaining users to shoulder the burden for maintenance and operation. Add to that any new construction, and the fees could drive even the strongest out of business.

An analysis of the impacts of the user charge produced by the Port of Portland points out that some waterway segments may eventually be closed. Parts of the system which require higher maintenance or have a low volume, may be closed purely for ecomomic reasons. Only those segments that can afford to pay for operation and maintenance themselves will survive. The rippling effect will then be felt by ports downstream, with the result that only the largest volume ports will be able to cover their costs. The biggest ports will get bigger at the expense of small and mid-size ports.

The Columbia/Snake River system is the fourth largest system in the U.S. for tons carried by barges, and the only system west of the Rockies. The economic impact on a single 50,000-ton shipload of export grain calling on Portland could be as high as $23,750. That would be the combined total user taxes paid for shallow draft (the river system) and deep-draft operation and maintenance. Adding new construction costs of enlarging Bonneville Lock and deepening the mouth of the Columbia would bring the total taxes for each 50,000-ton grain ship call to $63,750, according to Port of Portland researchers Glenn Vanselow and Mary Brugo. Conservatively, the report stated, the immediate oceangoing cargo loss is estimated at four to five million tons, or 15 percent of the total volume of cargo in 1980. Containers, logs/lumber/plywood, autos, dry bulks and grain are particularly vulnerable. The impact on the upper river system would be even more dramatic because it would not only lose its share of the lower Columbia cargo, but other barge cargo would be diverted to other carriers.

IMPACT

The loss of four to five million tons of cargo on the lower Columbia River will have a severe impact on the economy of the entire region. Handling this volume of cargo adds a total of about $750 million to the region's economy and creates over 15,000 jobs, according to Port officials. Any drop in cargo volume along the navigable shallow-draft system would affect 19 port districts.

The administration's proposal would obtain money from the local users, who in turn will try to pass along the extra charges to the customer. User charges cannot be passed on to foreign consumers, and since 43 percent of U.S. exports are farm products, the U.S. farmer will be forced to absorb the bulk of the increased costs.

Farmers who rely on the Columbia/Snake River system would be handed a double bill. First they must pay a higher price to receive fuel and fertilizer; then, after harvest, they must absorb the extra user fees to get their products to market. Some raw material being shipped may allow the producers to pass on the higher costs, but farm products such as grain are traded on the world market where competition sets the price. Foreign buyers will seek alternative suppliers or products rather than pay increased prices. Over the long run, full-recovery user charges will reduce the ability of farmers and suppliers to compete on the world market.

James Q. Johnson, Executive Vice-President and General Manager of Interior Elevator Co., The Dalles, calls himself "a middle man". His purpose is to store, sort, and ship grain to the Portland market. He said he agrees with President Reagan, that users of the river should pay, but added, "the dam across the river allows many users. Irrigation is a user, and flood control serves many people. How in the world can you proportion that out? Hydro-electric power benefits too."

Johnson claims that because of the dams and flood control, thousands of acres of land in low areas have become productive farms and the additional taxes and fees received from products passing through the locks have more than paid for its maintenance and operation.

Johnson is also very sympathetic to the farmers' plight, but said "even the farmer with 1000 bushels will have to pay more. Of course the tax is going to be passed on. Any cost that comes to us will be passed on to the farmer. In many cases the user fee is the cream."

WIDE OPPOSITION

Opposition to the proposed cost recovery proposal is being felt throughout the nation. Members of the Pacific Northwest Congressional delegation have joined together in writing a three-page letter to President Reagan dated June 18, 1981, in which they recognize that the objective of the proposal is to raise additional revenues, but ask the President to take into account a broader range of objectives, including the improvement of the overall transportation system and our position in world markets.

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

The delegation stressed that the proposal, while raising additional funds, would do so at a significant cost. They said that:

Development of a mature, energy-efficient waterway system will be retarded; Cargo movements will be diverted to foreign ports, hurting regional economies that rely on waterborne commerce; Inflation will be refueled as the price of domestic goods and imports transported by waterway are pushed higher; and Exports, especially bulk commodities such as grain and coal, will be reduced because higher transportation costs make them less competitive in world markets, thus adversely affecting U.S. balance of payments.

The congressional delegation is not the only official body to be fired into action. The Coordinating Committee of the American Association of Port Authorities (AAPA) has drawn a position paper which will be offered to all affected deep-draft ports in the nation. A conference telephone call was held July 6 to muster support for the proposal, which was then presented to the U.S. Senate Subcommittee on Water Resources in Washington, D.C. by Lloyd Anderson. Anderson serves as president of the Coordinating Committee, as well as being executive director of the Port of Portland.

The position paper has nine aims meant to meet the administration's objectives of full recovery of federal expenditures, while at the same time safeguarding the interests of all who use the waterways. The paper concludes with several possible procedures for uniform federal user charges, including but not limited to:

1. Expansion of current vessel tonnage taxes collected by the Customs Service.
2. Surcharge of customs levies.
3. Allocation of customs receipts.
4. Flat tonnage rate on cargo.
5. Variable rate tonnage assessment on cargo scaled according to commodity types.
6. Deep-draft vessel licensing.
7. Establishment of a quasi-independent group who will study the level of user charge and analyze the impact.

This report will be delivered in Washington, D.C. to the House Merchant Marine and Fisheries Committee by Anderson and others from the AAPA committee. The position has received 100% backing from all the ports who are members of AAPA. The U.S. ports fall into regions categorized as follows: Northeast Atlantic, Southeast Atlantic, Gulf, Southwest Pacific, North Pacific, and Great Lakes region.

"There is a variety of legislation before the Congress and they all have a possibility of getting through," Anderson says.

It is Anderson's hope that with the position paper and written concern from the Northwest Congressional delegation, President Reagan will delay any decision on the plan until after the close of this fiscal year. The big question for many port authorities is the ultimate impact. "Nobody knows," Anderson says. The first hearing was held in June, another on July 22 and field hearings are scheduled in Seattle on August 21st. "We want nothing done before September 30—the close of the fiscal year," Anderson emphasizes. That way everyone would have at least another year to research the potential problems and solutions to problems before any charges could go into effect.

THE VILLAIN?

A few people feel this entire situation was brought on by the railroads. Higher barge costs would cause more customers to use rail for transporting goods. Tom Zelenka, Manager, Government Relations, for the Port of Portland, strongly feels that three pressure groups have caused President Reagan to use this proposed method to raise money. The railroad tops his list of pressure groups who would gain the most from a user fee for the waterways. The environmental movement is basically after "no growth", according to Zelenka, and is using the user charge as a mechanism to slow down all use of the waterways. "The third pressure group is the bureaucrats who count paperclips," Zelenka says, noting that they are looking only at a financial ledger.

A nation which is being held in the grip of the oil-producing nations of the world should, whenever possible, resort to the most energy efficient means of transporting its goods and material. A large diesel truck can move one ton of goods 59 miles on one gallon of fuel. The railroad will move the same ton 202 miles on only one gallon. But the inland barge will transport a ton of goods 514 miles on a single gallon of fuel (Source: Fuel Efficiency in Freight Transportation, S. E. Eastman, 1980).

The railroads are just "sitting back and watching," according to James Johnson. The cost of shipping grain from The Dalles to Portland, when broken down to cost per bushel, clearly shows that barge transportation is nearly half of what rail is, Johnson says. "The average truck will carry approximately 900 bushels of grain. It's about 190 miles round trip and costs about $1.25 per running mile," Johnson explains. "That breaks down to about $.25 per bushel. Truck rate cannot compare to rail or barge."

The Union Pacific rate office reported a rate which equals $.185 per bushel for export grain from The Dalles to Portland. Johnson claims existing rates for barge shipping, which have been in effect since February, are $.104 per bushel. "Even though cost per bushel may only be $.01, it adds up," he says.

By applying Johnson's calculations to the Port of Portland's figures on the possible cost which could be levied on a single 50,000 ton export grain ship ($23,750) the cost works out to $.014 per bushel, or an increase of 13.3%. But figuring what could happen if construction of a new Bonneville Lock and dredging the mouth of the Columbia were added ($63,750 total) the cost jumps to $.038 per bushel, or a 36.2% increase in freight charges.

George Shaver, president of the 101-year-old Shaver Transportation Co. in Portland, also feels the user fee is a "railroad ploy." He is also upset at government funding of railroad pension funds, among other things.

"My father (the late Capt. Homer Shaver) used to tell me, 'I wouldn't mind paying a user tax if the government had given us every other section on the river when we started,' " Shaver says.

Shaver claims that the railroad itself may not show a profit, although all their other assets, such as pipelines and forest land, are held under other corporations that are making profits.

Shaver claims to be paying $170 per man, per month, into a pension plan for his employees, and calls the railroad's pension plan "an inequity." "The railroad retirement program is the only federally administered pension plan for a private industry," according to Shaver. That fact is confirmed in a report from the General Accounting Office. The GAO study addresses what the federal role should be in providing such financial assistance and what funding alternatives are available.

At Shaver Transportation, as elsewhere, any tax levied will be passed on. "There is no way we can absorb the tax," Shaver says.

This nation has 25,543 miles of waterways serving 87 percent of major U.S. cities and is generating over $1 billion annually in onboard employee payrolls for the barge industry alone. The ramifications of the waterway user tax will surely be felt throughout the nation in many related industries—none more than at the farm level. But if the research and testimony prepared by the Port of Portland and the written concerns of the members of the Northwest Congressional delegation do nothing more than delay a decision until alternatives can be found, the Northwest may be able to avert a disastrous, unrepairable business collapse.●

## AL PARKER DAY

### HON. BO GINN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. GINN. Mr. Speaker, it is with great pleasure that I recognize 12-year-old Al Parker of Claxton, Ga., who last month completed the Grand Slam in winning both the singles and doubles in the National Amateur Tennis Tournament. This is the first time in the history of these tournaments that this feat has been achieved in junior tennis play.

Al has been recognized for this achievement by Sports Illustrated magazine, and his hometown of Claxton, Ga., was so proud of his accomplishments that they designated Sunday, August 30, 1981, as "Al Parker Day in Claxton." For the benefit of the Members, I would like to insert the community's proclamation honoring Al Parker, a superachiever in amateur athletics. I include the proclamation in the RECORD at this point:

PROCLAMATION HONORING AL PARKER

Whereas, Al Parker was born in Chatham County, Savannah, Georgia, December 22, 1968, and is presently a student at Pinewood Christian Academy; and,

Whereas, he has excelled in the field of tennis since the age of six; and,

Whereas, Al Parker has constantly played and practiced the game of tennis until he has reached the point of perfection; and,

Whereas, Al Parker has played tennis throughout America taking one challenger after another with victory always on his side; and,

Whereas, Al Parker played in the National Indoor Tournaments, winning both the singles and doubles; and,

Whereas, Al Parker defeated all competition in the Clay Court Tournament winning the National Championship in both the singles and doubles; and,

Whereas, Al Parker moved on to the next area of competition at the Hardcourt and there he defeated all competition winning the National Championship in both singles and doubles; and,

Whereas, Al Parker moved on to the "Nationals" in singles and doubles winning both divisions and becoming the first person in history to do so in the National Tennis Tournament; and,

Whereas, Al Parker has become the unquestionable National Champion Tennis Player in the Junior Division of the twelve years olds.

Now therefore, we the Governing Bodies of the Cities of Claxton, Daisy, Bellville, Hagan, and the Evans County Commissioners do hereby recognize the many accomplishments of Al Parker and honor him for his many achievements by proclaiming Sunday, August 30, as Al Parker Day in Evans County and urge all citizens to join hands in honoring Al Parker; and,

Therefore, let it be known that we as elected officials on behalf of all citizens that we represent are very proud of Al Parker and extend to him our sincere congratulations and wish for him in the months and years ahead continued success.

This the 17th day of August 1981.

Claxton: Perry Lee DeLoach, Mayor, W. T. Palmer, Elton Todd, Jimmy Lanier, Tommy Flanigan, Luther Royal.

Daisy: Carson Sands, Sr., Mayor, Carson Sands, Jr., Barney Joe Durrence, Sr., Barney Joe Durrence, Jr., Cecile Jarriel, Johnny Smith.

Hagan: Aden Massey, Mayor, Johnny Massey, Zeke Perkins, Larry Sikes, B. A. Hammock, Vernon Owens.

Bellville: Jerry Coleman, Mayor; Alvin Blalock, O. H. Daniel III, Inman Hearn.

Evans County Commissioners: Norman DeLoach, Chairman, Bill DeLoach, Carlon Lewis, Wayne Massey, David Tippins.●

## FOR BAHA'IS IN IRAN, A THREAT OF EXTINCTION

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. DERWINSKI. Mr. Speaker, in late June, my distinguished colleague, DAN MICA, and I wrote to U.N. Secretary General Kurt Waldheim, to appeal on behalf of the Baha'is in Iran. "Baha'is in Iran have long suffered tremendous pressure and persecution," as we reminded the Secretary General in our letter. We appealed to him to do everything in his power to alleviate their suffering at the hands of the Iranian Government.

Firuz Kazemzadeh, professor of history and chairman of the Committee on Middle Eastern Studies at Yale, and a member of the national governing body of the American Baha'i organization, wrote a moving column in the New York Times on August 6 describing the treatment of Baha'is in Iran. It is reprinted here for the benefit of the Members.

FOR BAHAIS IN IRAN, A THREAT OF EXTINCTION

(By Firuz Kazemzadeh)

NEW HAVEN.—The Bahais in Iran are in danger of extermination. Not a week passes without a sinister incident. Already more than 60 people—storekeepers, artisans, teachers, Government employees, doctors and a distinguished university professor—have been lynched by mobs or executed by revolutionary firing squads. Hundreds have been dismissed from jobs; thousands have lost their homes and possessions.

From every province pour in accounts of atrocities. Two men are burned alive in Shahmirzad; a clinic is dynamited in Kata; a community center is burned to the ground in Tavil; graves are desecrated at Hoseynabad; houses and shops are set on fire in Zenjan; mobs attack Bahais in Ardistan; families that refuse to recant their faith are driven out of several villages near Hamadan; a man, his wife, their 7-year-old child and 4-year-old grandchild are beaten nearly to death with iron-tipped staves near Birjand; the Bahais are forbidden to bury their dead in the cemetery at Chahbahar; the Bahai hospital is confiscated in Teheran; seven Bahais are executed in Yezd. . . .

Authorities conduct sham trials of Bahais that invariably result in their conviction. The charges hurled at Bahais by prosecutors, shouted by crowds in the streets, spread by the press, radio and television and glossed from the pulpit by the Shiite clergy are always the same. They include the promotion of prostitution, cooperation with Zionism, spying for imperialist powers, corruption on earth and warring against God.

This assault against the approximately 400,000 Bahais is not confined to individuals nor is it a mere outburst of religious passion. It is a case of well-planned genocide. The scope of the attack became clear a year ago when the entire national governing body of the Bahais of Iran was kidnapped and disappeared without a trace.

Allegations that the Bahai faith is a political conspiracy serving the interests of foreign powers have been made by the Shiite clergy and the Government in Iran and by their representatives abroad. They contend that the Bahais were favored by the Shah's Government and that they ran both the infamous secret police, Savak, and the Government. Stories make it appear that all the ills of a rapidly changing society are directly attributable to the machinations of an accursed group of heretics.

The hatred that a large segment of the Shiite clergy and the more retrograde elements of Iranian society feel for the Bahai faith has nothing to do with politics. It is inspired by a primitive religious fanaticism. A century ago, before the modern notions of religious toleration penetrated Iran, the Islamic religious men did not bother to hide the true reasons for their hostility to the Bahai faith. They saw it as a dangerous heresy and its followers as apostates who deserved death. That the Bahais worshipped the same God and held the Koran to be divinely inspired scripture made matters worse. The Bahais also believe in progressive revelation. They repudiated the notion that non-Moslems are unclean. They taught principles that the clerics found either incomprehensible or odious: universal peace and the unity of mankind, the equality of sexes, the harmony of religion and science, universal education. That the Bahais have no clergy, trusting the leadership of their community instead to elective bodies, is an affront to the arrogant religious leaders.

Unlike Jews and Christians who belong to distinct ethnic groups and cultures, the Bahais were Persian- and Azerbaijani-speaking converts from Islam. They were an organic part of the Iranian nation and could not be confined to a physical or spiritual ghetto, they could only be exterminated. And the Shiite clergy have long been trying to achieve this.

As times change, so change rationalizations and slogans. In the 20th century the Bahai faith could no longer be attacked on purely theological grounds. Secularism has influenced the educated who embrace nationalism as a surrogate religion. To turn them against their Bahai fellow citizens it was necessary to show that the Bahais were unpatriotic. Their opponents resorted to lies, including the production of fake historical documents. During the revolution of 1906–1911, reactionary religious men in the Shah's camp charged that the Persian constitutional movement was a Bahai plot to take over the country. Simultaneously those clerics who led that revolution in an uneasy alliance with a handful of liberals accused the Bahais of supporting despotism. Neither side would acknowledge that the Bahais, adhering to the principle of noninvolvement in partisan politics, remained neutral.

During the anti-Communist 1930's, the Bahais were linked with Russia, Czarist and Soviet. When American influence in the Middle East increased after World War II, the Bahais were linked by their opponents to the United States. More recently they have been accused of supporting Zionism. One may expect that soon they will be linked to Iraq or some other hostile power.

In spite of a century of persecution, Iran's Bahais remain loyal to the country that is not only their homeland but also the land where their religion was born. However, their fate should not be hidden from the world by a veil of misrepresentation. Humanity should be aware of the plight of a peaceful, law-abiding community in the clutches of a relentless and unscrupulous foe.●

## FEAR AND NUCLEAR POWER

### HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mrs. BOUQUARD. Mr. Speaker, while the debate over nuclear power has more recently focused on economic issues, the vulverability of this technology to attack rests ultimately on public fear. I have found the economic arguments to be distorted and often self-fulfilling such as when antinuclear groups delay the completion of a nuclear plant for many years and then claim it is too expensive. My goal is to free nuclear power from the chains of unreasonable public fear, excessive and counterproductive regulation, and vacillating Government policies.

The most fundamental of these issues is, of course, fear and especially unrealistic or "phobic" fear. Mountains of material have been written on the cause of fear which is the risk of being injured in some way as perceived by the individual. Because of the complexity of risk, however, most people avoid reading about it, much less understanding it.

A recent article in Business Week, September 7, 1981, by Dr. Robert L. DuPont is an outstanding and rare example of a short discussion of fear, risk, and nuclear power which is both comprehensive and intelligible. The phobic fear that most people have of anything nuclear is put in perspective

and the reader is clearly shown its causes. I encourage my colleagues to spend a few minutes and read this informative and timely article.

[From Business Week, Sept. 7, 1981]

THE NUCLEAR POWER PHOBIA

(By Robert L. DuPont, M.D.)

The nuclear power industry has been virtually stopped in the U.S. because of fear. This is true despite the fact that for more than 20 years the commercial nuclear industry has operated under unprecedented public health scrutiny and that to date there have been no radiation-related injuries (let alone deaths) suffered by any member of the public. The accident at Three Mile Island was a financial disaster, but the health protections built into the plant worked. The independent presidential commission established to investigate the accident concluded that the only negative health effect was "mental stress," or fear.

My interest in the curious paradox of widespread fear of nuclear power despite credible evidence of safety was stimulated in part by my frustrations from more than 13 years of trying to encourage people to fear using illegal drugs such as heroin and marijuana. It has been as puzzling to me that 500,000 people shoot heroin into their veins voluntarily and that 23 million otherwise reasonably rational people regularly suck marijuana smoke into their lungs as it has been that nearly half of all Americans fear nuclear power so much they would rather import oil or suffer the consequences of burning more coal to make electricity.

THE PARADOXES

My professional experience with unconscious motivations for human behavior has helped me begin to understand these paradoxes. Before getting to the explanation, however, let me extend the paradox a bit further.

How is it possible to explain that despite massive public education, 50 million American cigarette smokers have not been scared out of their habit, which takes the lives of more than 350,000 smokers a year? Or that more than 80 percent of Americans do not wear seat belts although 50,000 U.S. highway deaths, more than 500,000 crippling injuries, and nearly 30 million traffic accidents occur on our roads each year?

Similar paradoxes exist in the public's feelings toward driving a car vs. flying in an airplane. Nearly 30 million Americans are afraid to fly while few fear the automobile—even though automobile accidents are the leading cause of death for every age group from 1 to 40 in the U.S., and commercial air travel in America took only 13 lives in 1980. The answer is found in our attitudes toward risk, which are rooted in three simple psychological perceptions—all irrational—that govern risk assessment.

The first and most important consideration is whether the individual thinks he controls the risk. Many recreational activities are quite dangerous. Skydiving, skiing, and skateboarding are obvious examples. And it is far more dangerous to ride a bicycle around the block once a week than it is to live next to a nuclear power plant. As anyone who has ever had an automobile accident knows, the driver does not control his risk—or he would not be in the accident. But this risk is denied by the person who anticipates driving a car or skiing down a slope because he thinks he does control his risk. The same illusion often protects the cigarette smoker from fear: He has been manipulated by peer and commercial pressures and by the pharmacology of nicotine addiction, but he thinks he can stop or cut down if he needs to. Therefore he is not fearful. This particular factor—the location of control of the risk—is exaggerated further for some people when the "they" who control the risk are big, impersonal, and often mistrusted institutions. Thus, fear of nuclear power is exaggerated in part because the risk is perceived to be controlled by "big utilities" and by "remote bureaucracies" such as the Nuclear Regulatory Commission.

The second major variable in risk assessment involves the question of whether the hazard shows up as one big event—an airplane crash, for example—or whether it occurs in separate, individual events scattered over time and space, such as automobile accidents or cigarette-related deaths. Single, big events are feared excessively. Multiple, separate dangers are more easily denied. Here the role of the media is particularly important. Compare the news value of 130 people dying in an airplane crash once a year with the news value of the 130 automobile-related deaths that now occur every day in the U.S. Imagine the public fear if all 350,000 American cigarette smokers who die each year died together in one place at one time.

The third element in risk assessment is whether the risk is familiar or unfamiliar. Familiar dangers, almost no matter what the relative danger involved, are hard to fear, while unfamiliar threats are almost impossible not to fear. For many people, cars and cigarettes are hard to fear, while airplanes and nuclear power plants are hard not to fear. The siting of nuclear power plants far from urban centers ensures this unfamiliarity, as do the regulations that restrict public visiting to nuclear installations.

When these three principles of risk assessment are put together, one realizes that the deck is stacked against nuclear power. The risk of nuclear power, as perceived in the public mind, is controlled by someone else; it is thought of as related to one massive accident, such as TMI; and it is unfamiliar.

"WHAT IS" VERSUS "WHAT IF"

It is not surprising, then, that many energy experts are paranoid about media coverage and political handling of nuclear power. By contrast, consider how those same three irrational psychological principles protect the alcohol, tobacco, and automobile industries from political and media outrage over the hundreds of thousands of preventable deaths caused each year by their products.

If these distortions in risk assessment were simply quirks of the public psyche, they would be interesting but hardly worthy of serious concern. But the facts are otherwise. These distortions are built into daily political and economic decisions, with far reaching implications for the nation's health and economy. Contrast the preoccupation with—and cost of—further improving the safety of nuclear power with the American inability either to require the wearing of seat belts or to develop mandatory passive restraints in cars. Or consider our unwillingness to discourage cigarette smoking in the light of our expensive and destructive preoccupation with nuclear waste management.

These same principles are affecting the national debate over many drugs and chemicals. Critics often point out that the risks involved have been identified in only a few cases and that an unknown danger of cancer and/or birth defects—the two most emotionally potent health fears of our generation—may be hanging over us.

There are several ways we can overcome our fears. The first is to separate the "what is" from the "what if." We need to recognize, for example, that we have more than 20 years of experience with nuclear power plants to study. Rather than being endlessly preoccupied with what could happen, let us talk about what has happened in terms of the public health effects of commercial nuclear power. We can also begin to think more clearly about what our overall health dangers are. We should indeed focus attention on cancer and birth defects, since with the information we have today many cases are preventable. The public should know that the U.S. has not experienced a rise in the rates of either cancer or birth defects in recent decades. Aside from the tragic rise in lung cancer rates (secondary, to cigarette smoking), cancer rates are generally level or headed slightly downward. When cancer and birth defects are discussed, let us consider all preventable causes and put each in proper perspective. When we do that, we will find that many risks are the result of lifestyle decisions that individuals make every day, particularly decisions related to diet and use of alcohol, tobacco, and illegal drugs.

LOOKING AT FACTS

We are likely to come to the uncomfortable conclusion, when we meet our health "enemies," that "they is us." This is not to say that industry should not have a role in improving health, but we need to put this into perspective. The number one cause of preventable cancer is not nuclear power; it is cigarette smoking.

Finally, it is vital that health agencies and the media reflect more clearly the full facts and not exploit, or simply reflect, the irrational fears of the public. This is particularly important when an industry (such as the nuclear industry or the chemical industry) is attacked as a health threat, since defenses from the involved industry tend to be dismissed as "biased" even when they are right. Public health agencies and the media have an affirmative responsibility to get the facts and educate the public about their fears.

Editors and reporters must become educated about what the dangers to public health really are, especially the dangers that are potentially controllable. If the media are to do more than reflect the common distortions in risk assessment, they will have to overcome their own limitations. Meanwhile, we should get off their backs. They do not cause nuclear fears; they are victims of the same irrationality as the rest of us.

CONFRONTING NECESSITY

During the last four years I have extended my study of fear to my clinical practice of psychiatry: I direct the Phobia Program of Washington to help people over the ultimate irrational fears. I have learned that only by repeated exposure to the feared situation can the phobic person overcome his fear. When considering fear of nuclear power, this principle leads to the conclusion that far more people need to visit nuclear power plants, see them in operation, and talk with their operators. People, especially young people, need to be able to measure radiation and learn about its effects through hands-on use of radiation detection devices. The new requirements for all nuclear power plants to have documented emer-

gency plans that include informing the public within 5 mi. of the plants can be used to educate millions of people.

I have also learned that phobic people, like most of the rest of us, can overcome their fears when confronted with necessity. The phobic woman who cannot drive will do so when her child needs to get to the emergency room. The phobic man who cannot speak at a business meeting will speak if he concludes that his job depends on it. This helps explain why France, which lacks oil, gas, and coal, has done such a good job in overcoming public fear of nuclear power: Most Frenchmen know they have no choice if the lights are to go on when they pull the switches. This principle also explains courage: The courageous person acts out of what he considers necessity. ("I carried the child out of the burning building because I couldn't see anything else to do.") And when we tell a friend how courageous he or she is in facing a serious illness or operation, the most common response is, "What choice did I have?"

Maybe necessity will provide the route through which nuclear fear will subside in the U.S. When most Americans conclude that they need nuclear generation of electricity, they will face their fear and overcome it. But, as I have also learned, phobic people will seldom face their fears unless they feel they must. This leads to the opposite conclusion: If a nation thinks it can get by without nuclear power, it may try simply to avoid facing the fear, however irrational or expensive the fear may be.●

## COTTON DUST STANDARDS

### HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. DERRICK. Mr. Speaker, I am today reintroducing legislation to assist the textile industry in its efforts to comply with the cotton dust standards issued by the Occupational Safety and Health Administration, and recently upheld by the U.S. Supreme Court.

While I agree with the Court that the health of the workers is of utmost importance, I have a sincere concern for the potential effect which this may have on the textile industry, in particular, those mills which do not have the capital to comply with the regulations by 1984.

My bill would allow the textile industry to fully expense any machinery and equipment placed in service after June 23, 1978, the date the standards were issued by OSHA. Machinery and equipment would be eligible for this tax treatment if used in connection with a facility in operation before this date.

I believe passage of this legislation to be crucial to the textile industry in this country. The industry has estimated that approximately 2,330 workers suffer some form of illness as a result of their work environment. However, the installation of the federally mandated equipment is a costly procedure. This legislation would alleviate the tremendous burden on the industry and have a beneficial impact upon those men and women who are employed in the textile mills of this country.

Mr. Speaker, I cannot underestimate the importance of this legislation and I believe that my colleagues will agree with me and we will see quick enactment of this measure.●

## VISIT TO ARGENTINA

### HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. LEHMAN. Mr. Speaker, I recently spent 5 days in Argentina and during that short visit met with Argentine officials and others concerned with improving United States-Argentine relations. I had hoped to gain a better understanding of the present state of affairs regarding the important issue of human rights as well as other issues of mutual concern. As a result of the trip, I was able to accomplish this largely due to the very useful and encouraging discussions held with Interior Minister Horacio Liendo and Foreign Minister Oscar Camilion.

I believe that Argentina is beginning to address some of the issues standing in the way of improved United States-Argentine relations. While much still remains to be done, the release this year of over 200 PEN prisoners should not go unnoticed. The willingness of the Argentine Government to move along a path of increased democratization will in itself be beneficial to Argentina's own people and to future relations between our two countries.

I would like to share with my colleagues a letter I have sent to Argentina's new Ambassador, His Excellency Esteban Takacs, in gratitude for the cooperation I received while in Argentina and to express my hopefulness for the future. The letter follows:

HOUSE OF REPRESENTATIVES,

*Washington, D.C., September 14, 1981.*

His Excellency ESTEBAN TAKACS,
*Ambassador of Argentina,*
*Washington, D.C.*

DEAR MR. AMBASSADOR: I wish to express my sincere appreciation to you and to your government for the many privileges extended to me during my recent visit to your country.

The meetings, especially with Interior Minister Horacio Liendo and Foreign Minister Oscar Camilion, were very constructive and gave me a positive impression regarding the future of United States-Argentine relations.

I am convinced that Argentine leadership is concerned about moving to a more progressive political posture and toward increased democratization. Furthermore, I am encouraged about the progress that is taking place and am hopeful that our two countries will continue to strengthen our ties.

Please convey my appreciation to President Viola.

With best wishes, I am

Sincerely,

WILLIAM LEHMAN,
*Member of Congress.*●

## SOCIAL SECURITY

### HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. SHELBY. Mr. Speaker, an item of concern to most Americans is the stability of social security. The system is in financial trouble, and Congress must give top priority to making changes that will reassure current and future beneficiaries that they will not be denied their benefits.

Social security was created in 1935 as a means to provide supplemental income for retired workers. It was originally intended to be a form of social insurance to protect against loss of income at retirement. The changes in coverage and scope of the program account for part of the system's revenue problems. They have combined with unfavorable economic conditions to upset the financial balance of the old age and survivors fund.

Congress must now develop a plan that will bring benefits and revenues into line. We must take steps to guarantee that the system will not run out of money. The challenge is to provide for long-term reforms without raising taxes, or changing the age-of-retirement features of the program.

The administration has shown great courage in bringing a complacent Nation to realize the severe financial crisis faced by the social security system. Congress should now accept this challenge and cooperate to find long-term solutions that protect existing benefits and enable Americans to count on this assistance.

I am absolutely committed to the fact that any changes in the social security system should be made to strengthen and insure that this viable retirement income source is continued for our senior citizens.

I am also confident that the administration can work with Congress to save the system because of the spirit of cooperation that has been shown through a proven willingness and ability to compromise.

We can overcome the crisis facing social security, but only if we work together, honestly and openly, and exercise the courage difficult decisions require.●

## LET THEM EAT CAKE

### HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. ECKART. Mr. Speaker, Ellen Goodman's article in today's Washington Post reveals the sad truth about the new guidelines for the school lunch program. While our high Government officials are dining lavishly at the taxpayer's expense, kids in school will be given a lunch which amounts to little more than a paltry snack.

REAGAN'S NOUVELLE CUISINE FOR KIDS

BOSTON.—The luncheon was arranged rather neatly. A discreet hamburger sat on half a roll. Six longish French fries lay beside it. Nine green grapes lolled nearby. To the side stood half a glass of milk.

It sounded to me like some forlorn menu for overweight executives. But it wasn't. It was, rather, a prototype of a school lunch, or what may remain of it, after the budget cuts.

We are about to see the full-fledged Nouvelle Reagan Cuisine for Kiddies. Higher costs and smaller portions. No stars, please.

As you may have heard, dinner with the Reagans in the While House has definitely improved these days. When the Reagans dine with the Anwar Sadats on the federal tab, they eat smoked filet of mountain trout, a roast supreme of duckling a l'orange, a touch of wild rice with raisins, a bit of Brie and chévre, followed by the palate-cleansing melon glacé and fresh raspberries.

But under Reagan, lunch in the school cafeteria is quite another affair: an ounce-and-a-half of meat or meat alternatives, a half-cup of fruit and vegetables, one serving of bread, six ounces of milk. Yummy in the empty tummy.

FRAC, the Food Research and Action Center, cooked up the lean-and-hungry lunch described above, by carefully following the new proposals that have come out of the Department of Agriculture.

According to FRAC's Nancy Amidei, the Agriculture people were assigned the task of cutting fat from the budget "without impairing the nutritional value of the meals." But they ended up cutting food.

Under the old requirements, more food was served to older grammar-school kids than younger ones. But under the proposed new rules, the 11-year-olds will get the same amount of meat and vegetables as the 5-year-olds. Even the bread and milk are cut, from eight pieces a week to five, from eight ounces a day to six.

The other changes in rules are even more curious. Ketchup and pickles now qualify as vegetables; tofu (try that on your second grader) now qualifies as a meat; and any school can put its eggs in a cake instead of on a plate.

According to Amidei, the lunches would supply less than one-third of the daily nutritional value and only 17 percent of the calories needed. "We feel this is compromising children's health," she says flatly.

The motto of the Nouvelle Reagan Cuisine—"Eat Light and Like It"—would be fine for the statesmen passing up the Brie. But the Department of Agriculture's own study shows that poor kids get anywhere from one-third to one-half of all their daily nutrients from school lunch.

Of the 27 million children who eat school lunches, 12.6 million get a free or reduced rate. If the meal shrinks just when food stamps are being cut and food prices are on the rise, these kids can't make up the difference at home.

There is also a social effect of the Nouvelle Reagan Cuisine. Middle-class parents, who pay the full amount for lunch, are going to balk at paying more for a snack. As a 10-year-old visitor to FRAC said when she spied the prototype meal, "Yuk! Where's the rest of it?"

In our house, after the price went up last week, the brown bags came back. But if these proposals are approved, there could be a national two-track lunchroom, with only the poorest students going through a highly stigmatized free-lunch line. The end result of that is higher costs, fewer schools in the system, and a program goes on the skids.

There is the taste of irony sprinkled over all this food talk. The lunch program started back in 1946 because of the military. During World War II, the draft board had to reject an enormous number of men suffering from poor nutrition. When the School Lunch Act was passed in 1946, they wrote: "It is declared to be the policy of Congress as a measure of national security to safeguard the health and well-being of the nation's children."

Today we have another administration that is worried about the Army, worried that an Army of illiterates will end up operating sophisticated multi-billion dollar military equipment. But as Amidei notes, "At this rate we'll have an Army of anemic illiterates."

If the Reagans will pass me a glass of their Domaine Chandon Blanc de Noir, I'll drink to that.●

## BALANCE THE BUDGET AND BRING DOWN INTEREST RATES

### HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. MATTOX. Mr. Speaker, reality destroys fantasies and scenarios more quickly than rhetoric can. The administration said interest rates would be 11.1 percent in 1981. Later, they revised this to 13.6 percent. In 1982, they promised, interest rates would be at 8.9 percent and later they revised this to 10.5 percent. Of course, all of these projections were wrong.

What is the reality?

This is an administration of double-digit interest rates. They cannot escape this economic fact; they cannot cover it up. They must address the issue.

When President Reagan presented his economic plan in detail in mid-March, interest rates for Treasury bills were 13.79 percent; when the key element in his program, the tax bill, passed in August, interest rates on Treasury bills were just around 15 percent. Today, interest rates on Treasury bills are 15.6 percent. Of course, the prime rate is much higher.

High interest rates cause inflation, slow down the economy, make it impossible to buy cars and homes, and devastate savings and loans and the construction industry. I agree with the chairman of the House Budget Committee that there is no pleasure in reminding people of earlier unheeded warnings. Frankly, I am afraid we must be prepared to take drastic action and postpone some of these unwise tax cuts until we can stop the incredible growth in deficit spending, which further fuels high interest rates.●

## LEGISLATION TO ELIMINATE RESTRICTIONS UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT

### HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. BRODHEAD. Mr. Speaker, today I am introducing legislation to permit a worker who makes a partial withdrawal of funds from a tax-qualified pension plan or tax-sheltered annuity program to transfer it to an individual retirement account (IRA) without paying tax on the withdrawal. Permitting partial rollovers will eliminate restrictions under the Employee Retirement Income Security Act of 1974 (ERISA). Time has shown them to be unnecessary and burdensome.

As originally enacted, ERISA permitted tax-free rollovers of benefits paid by tax-qualified plans only in those cases where the benefits could otherwise be subject to special 10-year income averaging treatment. Accordingly, rollovers are generally available only where an employee receives a distribution of the full balance of benefits under a plan in a single taxable year. Tax-free rollover treatment was later extended to employee benefits under tax-sheltered annuity programs.

The requirement that the full balance be received in a single year can be justified as a condition of eligibility for 10-year income averaging but it is an unnecessary restriction where the taxpayer is merely transferring benefits under a qualified plan or a tax-sheltered annuity program to an individual retirement account. This restriction interferes with a worker's ability to plan for retirement. For example, the rule may prevent a worker from diversifying investments to suit individual needs by leaving part of the funds in a plan and transferring a part to an IRA where earnings rates may be higher or where the funds will be more easily accessible.

While providing the flexibility to make a partial rollover, my bill also contains several safeguards to prevent it from being abused. First, partial rollovers could be made only in cases where an individual has left a job. This will assure that no one is encouraged to remove funds from a retire-

ment program earlier than they otherwise could. Second, partial rollovers could not be made using regular annuity payments which are part of a life annuity. If regular annuity payments could be rolled over, the tax on this retirement income would be changed from an income tax to a consumption tax. My bill will also prevent a compounding of tax benefits by barring 10-year income averaging, capital gains treatment, and deferral of tax on unrealized appreciation in employer stock where a partial rollover has been made.

Mr. Speaker, this bill provides workers with retirement planning flexibility which is both logical and fair. The bill is fully consistent with the principles incorporated in ERISA and the tax law. Its revenue effect is estimated to be negligible. I will be working to have it considered soon by the House Ways and Means Committee, of which I am a member.●

## POSITIVE ACTIONS TAKEN BY VIOLA ADMINISTRATION

### HON. DAN MICA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. MICA. Mr. Speaker, last March Argentine President Roberto Viola met with Members of Congress and emphasized his administration's intentions to lay the foundations for a stable and effective democracy. Those were encouraging words to we Members of Congress who wanted to improve our relationship with Argentina but who also had genuine concerns about reports of human rights violations there.

I think it is now appropriate some 6 months later to take this opportunity to note some positive actions taken by the Viola administration since his March declaration.

Mr. Speaker, I would like to submit for the RECORD and my colleagues' attention the following information with regard to Argentina:

PEN cases (cases under which individuals are under executive national power procedures), are being regularly reviewed and information has recently been received from the Argentine Embassy on more than 200 persons either released or paroled.

Freedom of the press appears to be expanding (i.e. lately several newspapers like "La Prensa" have been highly critical of the Government without censorship).

Argentina's Minister of Foreign Affairs, Oscar Camilion, during his September 1-4 visit to Washington, assured Secretary of State Haig that by August, 1982 all political parties will be allowed to participate in the political process in Argentina.

During his meeting with leaders of the American Jewish Community, Minister Camilion also confirmed that the Holocaust series, shown on national television in the United States, will be shown by the Argentine television network.

I welcome these positive signs that decisively contribute in improving the relations between our two countries. I encourage the Argentine Government to continue to make significant strides toward meeting the goals of a stable and effective democracy that President Viola declared was his administration's aim.

Thank you, Mr. Speaker.●

## TIME TO THINK ABOUT CLEMENCY

### HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. JOHN L. BURTON. Mr. Speaker, I would like to insert in the RECORD an editorial by William Randolph Hearst concerning air traffic safety and the PATCO strike. Mr. Hearst, who is not given to radical thought, has come up with what I believe to be a meaningful first step toward solving this unfortunate dispute and returning America—as soon as possible—to its position of having the safest air traffic control system in the world.

TIME TO THINK ABOUT CLEMENCY

Has anyone noticed that the air controllers' strike isn't part of the major news any more, on most days? It is gradually slipping from the public consciousness, as the planes fly and the replacement controllers are trained.

Clearly, the strike has been lost. The members of the Professional Air Traffic Controllers Organization (PATCO), of whom more than 11,000 are on strike illegally against the federal government, should recognize this. They should consider the futility of their action, which does not have the support of the American public.

And the Reagan administration, recognizing that it has won this historic domestic confrontation, should think now about a carefully measured offering of magnanimity in victory, which could be becoming and honorable, as well as practical.

The president and his advisers should think about an offer of clemency, for controllers who wish to abandon and foreswear the strike and return to work. Any such amnesty should apply only to individual workers and not to PATCO, nor should it be connected to any renewal of negotiations. It should be simply an offer of jobs returned, for those who are willing to come back within a fixed and rather narrow frame of time, with no favors given beyond the prior pay scale and working conditions.

Any thought of negotiations will have to be for well into the future; PATCO is, where the government is concerned, removed from the picture because of the illegality of the strike. President Reagan has made his point convincingly that lawless strikes by government workers will not be tolerated. It is as plain as daylight that he will not back down. The federal controllers' training academy has, by now, almost 80,000 applications from people who wish to replace the absent PATCO members, and classes are planned around the clock. Meanwhile, airline flights are running at about 75 percent of normal.

But normal operations probably cannot be achieved until next spring, at the earliest, and, while the inconvenience is fairly mild, the interim cost will be high—into the hundreds of millions. The airline industry will suffer. Its employees laid off temporarily because of the trimming of schedules will suffer. The jobless PATCO members will suffer.

Some of the latter doubtless went into this strike with misapprehensions, and to give them one more brief chance to return to work would be to cut the costs to the nation, and to demonstrate that winning is best sewed up with a thread of generosity.●

## LEGISLATION TO HELP OUR FEDERAL EMPLOYEES CHANGE THEIR SURVIVOR BENEFIT ELECTION

### HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. LEHMAN. Mr. Speaker, earlier this Congress, I introduced legislation to help our Federal retirees who did not elect survivor benefits at the time of their retirement. Although the response to this legislation, H.R. 1398, was positive, some Federal retirees who retired in accordance with current law have expressed their desire to have legislation introduced to assist them.

These Federal employees elected their survivor benefits at the time of their retirement, or if unmarried, and later remarried, elected survivor benefits within 1 year from the date of their marriage. However, their financial situation, in many cases because of our high inflation rate, has changed, and they are no longer satisfied with the decision that in most cases was made many years ago. Their current financial status is not what these retirees had anticipated when they retired, and they should not have to suffer and worry about the security of their loved ones because of this. If married, our elderly retirees should be able to have a 1-year opportunity to provide some additional security for their spouses. If unmarried, Federal retirees should be able to elect during this 1-year period additional benefits for a financially dependent individual.

The new bill that I have recently introduced would give all of our Federal retirees, those who elected survivor benefits at the time of retirement and those who did not make this election, a 1-year period to reassess their decision. Those who had already elected a reduced annuity in order to provide a survivor annuity could modify or revoke this election. Those Federal employees who did not elect survivor benefits at the time of retirement would now be able to do this.

I am hopeful that hearings will be held on this bill in the near future,

and that Congress will consider and pass this legislation to assist our deserving Federal retirees during this session of Congress.●

## VOLUNTEER DIXIE YOUTH BASEBALL

### HON. WILLIAM HILL BONER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. BONER of Tennessee. Mr. Speaker, I want to bring to the attention of the Members of Congress 16 outstanding young men from Nashville, Tenn.: Mike Hunt, Scott Green, Marsh Taylor, Jim Hupka, Chuck Pack, Larry Cheshire, Troy Allen, Chris Murray, Scott Hord, Robbie McNair, Trace Vaughn, Jeff Trull, Jonathan Watkins, Anthony Hager, Dickie Dixon, and Shawn Malone. These individuals, along with their manager, Eddie Allen, and coaches, Steve "Spike" Hupka and Phil Hord, recently won the 26th Annual Dixie Youth World Series played at Bartow, Fla., on August 22, 1981.

Approximately 150,000 youth participate in the Dixie youth baseball program over 12 Southeastern States. Just to win the championship is an outstanding event in itself. But it is particularly noteworthy because the Nashville team either tied or broke existing World Series records and have been in the record books 23 years. The accomplishments of several of the young men on the volunteer team are:

Marsh Taylor tied the record of 4 runs scored.

Robbie McNair got 5 hits in one game.

Scott Hord broke the record for bases on balls with 11. This record has been standing since 1958.

Larry Lee Cheshire had a grand slam home run.

And the team broke a tournament team batting record for homeruns with 22. They broke the record of 20 which has been standing since 1977.

Mr. Speaker, in these times when the press is filled with sensational stories about the misadventures of some of our young citizens, it is heartening to bring to your attention the accomplishments of these young men. Nashville is indeed fortunate to have such adults as Eddie Allen, "Spike" Hupka, and Phil Hord, who unselfishly give of their time to help these young men evolve into productive adults.●

## DILEMMA REMAINS IN ILLINOIS WORKERS COMPENSATION

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. DERWINSKI. Mr. Speaker, Douglas F. Stevenson, a senior partner of the Chicago law firm of Rooks, Pitts, Fullagar & Poust, has been litigating workers compensation cases for 31 years. His extensive knowledge of this subject is revealed in an article he authored in the August 17 edition of Crain's Chicago Business magazine. I wish to insert his in-depth look at the question of workers compensation in Illinois so that all Members may benefit from his insight.

The article follows:

DILEMMA REMAINS IN ILLINOIS WORK COMP

(By Douglas F. Stevenson)

The workers compensation turmoil in Illinois is a responsibility shared by the Legislature, the governor and the Illinois Industrial Commission.

Gov. Thompson and the Legislature bear the responsibility, and both stood still in 1981. The governor and the Industrial Commission bear the administrative responsibility, and in that area, significant improvements have been made in 1981, specifically in the decision-making process. It is a change that is certain to benefit workers and employers alike.

The improvement stems in part from one legislative change in 1980, and initiative of Sen. Aldo DeAngelis (R-Chicago Heights), requiring the commission to make specific findings of fact and conclusions of law that would demonstrate the reasons for its decisions in making awards. Previously, commission decisions said little more than "there was an accident, and you owe X dollars." The DeAngelis amendment also required that these decisions be published and that they be regarded as precedents in the future by the hearing officers (the arbitrators) and the commission itself.

The Industrial Commission deserves great credit for having embraced fully the new statutory directive. Its decisions since Jan. 1 are clear, understandable and consistent with each other. Whether one agrees with the bottom line of the award, there is no difficulty in understanding just how and why the commission arrived at its decision. A body of precedents is being created for the guidance of claimants, insurance companies, arbitrators and lawyers.

Along with this new format, commission decisions focus more accurately on the essential question in workers compensation: "Did the injury leave a permanent disability that will affect the earning capacity or the quality of life of the employee?"

This focus is the most important byproduct of the new decision-making process.

This new focus on whether there is a residual disability replaced the old system of "automatics," where awards were based upon the initial injury, not the final result after healing. The old system contained such shibboleths as "every fracture leaves a 25 percent disability," "you pay for disfigurement at the rate of $200 per inch of scar or $100 per stitch," "an operated knee cartilage always leaves 25 percent to 40 percent disability of the leg." (The orthopedic specialty society says that the standard operation, with usual recovery, leaves no more than 5 percent disability!)

Under the old system, it was not conceivable that any fracture could heal, leaving no disability whatsoever. (Fractures do heal in other states but never in Illinois.) And it was presumed that every scar, even a thin, white scar that could not be seen from more than three feet away, left some "permanent impairment of earning capacity." Many persons with very minor injuries that had no impact upon their earning capacity or the quality of life they could enjoy received hefty awards from the Illinois Industrial Commission.

At the same time, these "automatics" frequently operated as a ceiling on awards for individuals who made very poor recoveries from the initial injury, and many were undercompensated.

This new focus on the residual disability, rather the initial injury, is in accordance with the basic premises of workers compensation. It disturbs some lawyers, of course, whose stock in trade was familiarity with the "automatics" and with the propensities of individual arbitrators. Such knowledge was never published but was acquired by a process best described as "osmosis"—you picked it up just being around the commission.

This "inside knowledge" is no longer valuable; the arbitrators must now follow the precedents established in the commission's decisions, thus reducing diverse awards among the arbitrators on virtually identical facts. And instead of stating "there was a fracture" and demanding an award, lawyers now have to show in just what respect the employee is actually disabled.

Other partisans (and the diverse interests that must be reconciled at the Industrial Commission produce strident partisans) criticize the new decisions as "too high" or "too low." For some interests, this type of complaining is an organized, continuing lobbying effort to influence the commission in its decisions.

However, no one can show any statistic illustrating that more or less money is being awarded by the commission now than before.

It is apparent, however, that more money is going to the seriously injured and less to those with minor injuries that have healed. Injuries that heal, leaving little or no impact on the lives of the individuals, need no sustaining compensation.

This commendable improvement does not, of course, solve the workers compensation problem in Illinois. We still have a system that overcompensates, a system that makes it more financially rewarding for people who do not work than for those who do work.

The current weekly benefit level of two-thirds of wages on a tax-free basis is almost identical to the take-home pay of most workers. As a result, people can stay home longer following injuries than they used to, for there is no financial incentive to get back to work.

Further, because this tax-free benefit can go on for life, workers compensation benefits are a temptation for the unscrupulous.

Even greater benefits are often available. Workers compensation is only one of several benefits to be found in our society. I recently had a case of a 55-year-old bachelor with no clearly defined injury or disability who already was receiving $538 a month from Social Security and $413 a month from his employer's disability pension, a total of $951, mostly tax-free. He was trying for workers compensation benefits, which would give him an additional $800 per month. If successful, he will be receiving $1,751 a month, mostly tax-free. When he worked, he earned $1,200 a month gross, $875 net take-home pay.

The liberalization of Illinois' workers compensation system in 1975 was enacted with "tunnel vision," ignoring the other benefits available in our society. Most states, but not

Illinois, have simply guaranteed the two-thirds of earnings level and required that these other benefits, outside the workers compensation law, be credited against workers compensation benefits.

The burning question of Illinois workers public compensation remains: Is it sound public policy to make it more financially rewarding to stay home than to work? The governor and the Legislature must face this issue.

Too many persons believe that workers compensation is just a battle between employers and the unions. They forget that it is the consumer who eventually pays all the costs of the workers compensation system in the price of every product purchased. The employer may pay first, but the cost is passed on in everything he sells. Will consumers and other working people continue to pay people more for not working than for working?●

## H.R. 4416

### HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. DE LA GARZA. Mr. Speaker, I want to underline the importance of the action taken last week by the House and Senate in passing H.R. 4416, a bill which will make it possible to continue Federal support for the effort to eradicate the Mediterranean fruit fly in California. I am sure that President Reagan will quickly sign this bill into law so the eradication campaign can continue without any letup.

The legislation gives the Secretary of Agriculture permanent authority to transfer funds within his Department for use in combating plant pests. At present, the Secretary has authority for such transfers in fighting animal and poultry disease outbreaks under the terms of an appropriation law, but no authority exists for emergencies involving plant pests. H.R. 4416 covers both types of situations and will be in effect permanently.

The bill is desirable and useful policy to arm the Secretary with discretionary power to respond quickly and effectively to problems which may arise in the future. But it is particularly important that the bill be enacted now, because of the Medfly situation. Federal funds immediately available for the California eradication campaign have been exhausted or virtually exhausted, and the transfer authority is needed immediately to keep the campaign going.

I cannot put too much stress on the importance of stopping the Medfly outbreak before it makes any further inroads in California or moves on to invade other States. This destructive pest of fruits and vegetables has already caused serious problems. If it is not checked, it could devastate the Nation's multibillion-dollar fruit and vegetable industry. The cost to farmers and consumers, and the cost to the general economy in export disruptions, could be tremendous.

The need to put a stop to the Medfly outbreak is so clear and obvious that Congress—with strong support from the administration—passed H.R. 4416 last week with not a single voice raised in opposition. What we must do now is continue our vigilance and emphasize the importance of moving rapidly against pest outbreaks whenever they occur.●

## THE FLAG AND KERRI LYNN DIXON

### HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. EDGAR. Mr. Speaker, recently, sixth-grade student Kerri Lynn Dixon of Springfield, Pa., was awarded first place in the AMVETS national essay contest. The subject of this year's competition was, "What the American Flag Means to Me."

Kerri's essay was selected for the first-place award after receiving top honors among hundreds of entries in competitions at the post, district, State, and national level.

I would like to share Kerri's words and insight with my colleagues. But also, in congratulating her, I would like to commend her sponsors, including Mr. Robert Matts and the leadership and members of AMVETS Harold Paul Saks Post No. 118 of Morton, Pa., who continue to foster and encourage the basic principles of our country.

WHAT THE AMERICAN FLAG MEANS TO ME

(By Kerri Lynn Dixon)

Over two hundred years ago, millions of brave men fought to win this country's freedom from the British. Many gave their lives so that America may have liberty.

During the early years of America, many different flags were used to symbolize the United States, but on June 14, 1777, Congress stated that the flag should consist of thirteen stripes, seven being red and six being white, with a union of thirteen stars of white on a blue field.

To these Americans these thirteen stars and stripes represented thirteen colonies joined together under God in love and loyalty. Each color also had a special meaning. White signified Purity. Red signified Loyalty and blue signified Justice.

Over the many years our flag may have changed but the meaning of our flag never has.

The flag holds much meaning for me. This flag helps me realize what a great country America is.

In the Pledge of Allegiance each verse has a special meaning. In the words, "I pledge allegiance to the flag of the United States of America and to the Republic for which it stands," I am promising loyalty to America and to the American flag. In the words, "One nation under God, indivisible," I am saying that America is joined under God and that through good and bad times will never be divided again. In the words, "With liberty and justice for all," I am saying that in America a person has many freedoms and liberties and that there is fairness and justice within the government.

Still, the flag holds many other meanings for me. Hope in the future is one of these meanings. The flag helps me to have hope because I know the first Americans had hope in this country.

I think strength and courage are very important meanings because the flag represents that America has the strength and courage to conquer anything.

Another meaning is happiness. The flag helps me to realize all the joys and good times I have in this country.

Other meanings this flag holds are loyalty, responsibility, patience, consideration, love, justice, and understanding.

Although this flag has all these meanings for me, I feel the most important are unity and freedom. America is a great country where you have many opportunities and liberties. The fifty stars on this flag represent the bondage our fifty states have. America is lucky to be a country in which fifty different states are joined together to form a great nation.

I am very proud to be an American and I love the American Flag very much. Even though America has many things to be proud of, the Americans are very lucky to have such a beautiful flag with so many special meanings waving over their country.●

## SOLIDARITY DAY—A UNIFIED VOICE

### HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. PATTERSON. Mr. Speaker, on Saturday, September 19, thousands of citizens representing labor unions, civil rights, and women's groups will march on Washington to express their deep dissatisfaction with the policies of the Reagan administration. Solidarity Day will bring together grassroots, rank and file people of this Nation who support the goals of social and economic justice, and also will reaffirm the basic right guaranteed by the first amendment of free men and women to peaceably assemble, and to petition the Government for redress of grievances. It is ironic that another group of brave men and women in Poland have rallied under the banner of Solidarity to fight for the very freedom that allows our citizens to demonstrate here in Washington.

Solidarity Day will help send an important message to President Reagan and to the Congress, that working people want a just and decent America. An America that cares for its elderly and its poor. An America with full employment at decent wages for all those who want to work. An America that provides equal opportunities to all of its citizens. Solidarity Day is an expression of labor's longstanding commitment to jobs and justice for all Americans.

American workers, in the 8 months of this administration, have seen the consistent undermining of vital social programs that were painstakingly enacted over the last half century. Yet this administration wants us to believe that it speaks for the working people. An administration that threatens to cut back social security, weaken OSHA, and throw the leaders of a union in jail because of their willingness to stand up for what they believe in cannot claim that it speaks for the working people of America.

I believe that the labor movement in this country is well aware of the many problems that our Nation faces today. The American worker has been hit hard by inflation, high interest rates, and unemployment. But we will not solve our economic ills by weakening the laws that guarantee safe workplaces, equal employment opportunities, and the right of workers to organize and bargain collectively.

Mr. Speaker, I know that many of my colleagues join me in commending the AFL-CIO for organizing this historic event. Those attending the rally in Washington will be pleased to know that millions of others across the country will be joining them in Solidarity Day activities. I personally wish to recognize the members of the Orange County Central Labor Council who will be participating in the Solidarity Day rally at MacArthur Park in Los Angeles. Solidarity Day is more than just a demonstration against the Reagan administration policies. It is also a demonstration of the trade union movement's century of solidarity, of pride in our past, and of confidence in our future.●

## THE WHOLE TRUTH

### HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. FROST. Mr. Speaker, recently a newspaper from my part of Texas wrote an editorial which illustrates the way many voters in Texas feel about the National Conservative Political Action Committee. Known as NCPAC, this group has targeted several of my colleagues for defeat in 1982 through campaigns based on half-truths and distortions. As the editorial in the Fort Worth Star-Telegram points out, this irresponsible approach toward our electoral process is one we can do without.

I recommend this editorial be included in the RECORD and be brought to the attention of my colleagues.

[From the Fort Worth Star-Telegram, Sept. 14, 1981]

THE WHOLE TRUTH

A comment by the political director of the National Conservative Political Action Committee last week reveals the type of organization NCPAC is. Steve DeAngelo, speaking of the group's effort to oust Rep. Jim Wright from his 12th District seat, said: "We will be supporting whoever runs against Jim Wright—as long as they're conservative, of course."

Perhaps NCPAC would support a conservative chimpanzee.

Such negativism is not needed in American politics. NCPAC is against Jim Wright, and several other congressmen across the nation that it has marked as liberal targets. And NCPAC has made it obvious that it would rather be against than for. Wright does not even have an announced opponent and NCPAC is spreading its propaganda in opposition to Wright's re-election next fall.

Its tactics are irresponsible and we hope that voters of the 12th District recognize NCPAC for what it is—a high-powered, well-financed political hit group.

Earlier this year, NCPAC was caught in lies it had distributed about the voting records of Sens. John Melcher, D-Mont., Dennis DeConcini, D-Ariz., and Quentin Burdick, D-N.D. Last year, NCPAC had claimed credit for the defeat of several liberal senators in campaigns that got rather nasty.

Recently, television stations in the Fort Worth-Dallas area and in Oklahoma and Massachusetts have turned down political advertising from NCPAC. The ads were in opposition to Wright, Rep. Jim Jones, D-Okla., and Sen. Edward Kennedy, D-Mass., all NCPAC targets.

Thus, NCPAC sent 10,000 letters to 12th District residents urging them to contact the local television stations, which it claimed were "New York based," that had refused NCPAC ads. It said, "Instead of providing the public the truth, they are deliberately denying our group access to the people. . . ." Look who's talking about truth. The television stations that refused NCPAC ads are based in the Fort Worth/Dallas area. NCPAC, however, is based in suburban Washington.

In addition, the letter to 12th District residents distorts Wright's voting record on busing, tax cuts and other issues.

Voting records are such nebulous issues but they continue to be used by NCPAC and others to "prove" a point. In fact, voting records seldom prove anything except that someone has taken the trouble to tabulate them. For example, Wright continually has voted against forced busing, but the NCPAC letter cites one Wright vote on a flawed piece of legislation in saying that Wright was for busing.

NCPAC's lack of concern for who replaces the people it seeks to oust is the type of "tear-down" politics we can well do without here in the 12th District and elsewhere in our democracy. Criticism of government and government officials is part of democratic politics, and it is welcome. But the negative "killer" attitude of NCPAC is not.

NCPAC, go home.●

## THE LONGSHORE ACT AND SHIPBUILDING

### HON. LINDY (MRS. HALE) BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mrs. BOGGS. Mr. Speaker, this afternoon, after much study and thought, I have made the decision to join with our colleague from Illinois (Mr. ERLENBORN) as a cosponsor of H.R. 25, legislation to amend the Longshoremen's and Harborworkers' Compensation Act.

I have come to this decision neither easily nor quickly. I have been keenly aware of the problems that have been raised by many in the shipbuilding, maritime, stevedoring, and insurance industries regarding problems and shortcomings in the existing law. In order to learn more about these concerns I participated in hearings conducted by the Education and Labor Committee in 1978. I was particularly impressed by the arguments raised by the Shipbuilders Council of America and the American Waterway Operators.

At the same time, I fully accept the need for the Longshore Act. We must have a systematic approach to fairly, reasonably, and swiftly providing benefits for workers in maritime-related fields who are injured in the course and scope of their employment and who are not otherwise covered by State worker compensation laws. But in 1972 the act was amended to extend coverage from the water's edge to areas adjoining the navigable waters of the United States.

The result of this expansion has been considerable confusion. Not only are shipyard workers who never set foot aboard a vessel now covered by the act but so are employees of oil refineries, chemical plants, paper and steel mills, and many other heavy industries that operate along navigable waters. Quite arguably the workers in these industries should be covered by State worker compensation laws as they were prior to the 1972 amendments.

As it now stands, the Longshore Act is severely impaired as an insurance program. Because of its open-ended annual escalation of benefits, benefits are unpredictable and, from an insurance standpoint, uninsurable. The act has been converted from a wage replacement program to a life insurance program by the extension of death benefits in certain cases to dependents even when the death of the employee is unrelated to the industrial accident. Finally, the bureaucratic administration of the act by the Office of Workers' Compensation Programs and the Benefits Review Board has been alleged to be "nonuniform."

It is interesting to note that the council members of the District of Columbia whose worker compensation program falls within the parameters of the Longshore Act has passed legislation to establish instead its own worker compensation program.

Mr. Speaker, the act as it is presently written is unfair to the shipbuilding industry, the offshore service indus-

try, the Nation's stevedores and ports. I have long urged a thorough examination of possible revisions. I am cosponsoring H.R. 25 in hopes that the Committee on Education and Labor will now affirmatively act to take the necessary steps to make the Longshore Act workable, reasonable, and fair to both workers and their employers. This legislation is the vehicle needed to accomplish needed changes.

As a cosponsor of H.R. 25, I look forward to working with the gentleman from Illinois (Mr. ERLENBORN) as well as the chairman of the Subcommittee on Labor Standards and representatives of industry and labor to revise and improve the act.

At this point, I would like to share with my colleagues a factsheet prepared by the Shipyard Council of America that briefly outlines the problems shipyards have experienced with the act:

SHIPYARDS IN CRISIS

The United States Longshoremen's and Harbor Workers' Compensation Act was conceived and enacted for longshoremen. With respect to shipyards and other non-longshoring interests, it was originally intended that only a small portion of those operations would be covered by the Longshore Act. However, in 1972, shipyards and other non-longshoring interests were inadvertently swept into the coverage of the Act. The results have been devastating.

Approximately 180,000 workers are employed by shipyards in the private sector. Most are employed by the 27 major shipyards which compose the U.S. shipbuilding resource base and about 40,000 to 50,000 are employed by approximately 300 small to medium sized shipyards which build towboats, tugboats, barges, fishing boats and other types of small commercial vessels.

Considering present and projected workloads in the 27 major shipyards, an overall decline in employment of 45,000 to 50,000 persons, about 30,000 of which will be production workers, is very probable starting at the end of 1978.

Companies had to withdraw from nonmaritime production because they became non competitive with those companies who did not have to carry Longshoremen's insurance.

Surveys of the industry show that over 80 small to medium sized shipyards have gone out of business since 1972. There is no doubt that many factors were present in their demise, however, the conclusion cannot be avoided that the cost of the Longshoremen's Act had to be a significant factor.

Approximately 50 percent of the cost of a U.S. built ship consists of purchased materials and components which come from every state in the Union. Also, it takes approximately 3 workers in other industries to keep one shipyard worker employed. Thus, a loss of 50,000 shipyard workers would equate to a loss of about 150,000 jobs in the private sector.

The Longshoremen's Act is inherently uninsurable. The risks cannot be determined and quantified. As a result, the number of insurance companies willing to write policies for Longshoremen's Act coverage have dwindled to three, and they will only do so on a selective basis. Insurance premiums have risen over 400% since 1972 with some companies spending more than $40.00 per $100.00 of payroll for the coverage. Several of the large shipyards have become self insured, an alternative which is not possible for the small to medium sized shipyards. In reality, though, "self-insurance" is a misnomer because it is no insurance at all.

Many companies have been forced to become partially self insured because their deductibles have been increased up to a half million to one million dollars per claim.

The cumbersome procedures compounded by the lack of administrative prowess on the part of the agency charged with administering the Longshoremen's Act have compounded the entire problem. In fact, the Office of Worker's Compensation Programs of the United States Department of Labor has recently received the ". . . dubious distinction of producing the greatest volume of complaints from the public to congressional offices about slow and shoddy service . . ." Washington Post, August 15, 1977.

A thorough review of the Hearings on the 1972 Amendments fails to reveal any testimony assisting House or Senate deliberations in establishing reasonable jurisdictional parameters for shipyards. In fact, extension of coverage and jurisdiction for shipyards is not reflected in any of the committee or staff bills of the 1972 Amendments. To the contrary, the evolution of the 1972 Amendments reveals that extended coverage for shipyards was a product of a Staff Conference between House and Senate committees. Shipyards were not a part of the conferences. These conferences, commonly referred to as the "midnight meeting", concerned stevedores, ship owners and longshoremen. In a negotiated agreement between those parties, jurisdiction and coverage for longshoremen was extended over land. Unwittingly, the compromise language between those parties also extended jurisdiction for shipyards and other non-longshoring interests. Inadvertently, shipyards and other non-longshoring interests were swept into the 1972 Amendments.

Indeed, the Longshore Act was originally created for longshoremen. The problem first arose with the longshoremen in 1917, when the United States Supreme Court held that a longshoreman injured over the navigable waters of the United States could not receive a remedy under a State's worker's compensation statute. Between 1917, and 1927, Congress twice attempted to empower the states to provide such remedy. Twice, the United States Supreme Court disallowed such legislation as unlawful delegations of congressional power. In 1927, Congress enacted the Longshore Act. The purpose of the Act was to provide a compensation remedy to longshoremen injured over navigable water and employees of maritime interests who could not be covered by State worker's compensation statutes. For thirty-five (35) years after enactment, the Longshore Act applied to only a limited class of employees in the shipbuilding industry—namely, shiprepairmen engaged in the performance of maritime contracts of repair and injured over the navigable waters of the United States. In 1962, the United States Supreme Court expanded the coverage of the Longshoremen's Act to embrace shipyard workers engaged in the new construction of vessels over navigable water. Hence, subsequent to 1962, all shipyard workers injured over navigable water could obtain their workmen's compensation remedy under the Longshoremen's Act. All confusion and inequity regarding the issue of jurisdiction and coverage were ended.

The 1972 Amendments expanding jurisdictional coverage for shipyards has been a nightmare. Employers and employees have been unable to determine which injuries are covered. In attempting to determine which workmen are covered under the Longshoremen's Act, the courts have been compelled to employ far reaching efforts to interpret congressional intent. For example, in one case, the United States Third Circuit Court of Appeals was required to rely upon the Encyclopaedia Britannica description of "shipbuilding".

Moreover, a rational justification for expansion of jurisdiction and coverage in the shipyard does not exist. Traditionally, shipyard workers, other than shiprepairmen injured over navigable water, have received their workmen's compensation remedy under the remedies provided by the several states. Workers engaged on land in shipyards perform work similar to work performed in heavy industry throughout the United States. For example:

Welders perform work in shipyards which is comparable to work on an automobile assembly line, the aerospace industry, the fabrication of railroad cars, pipeline work and other industries which join metal together.

Pipefitters perform work comparable to that in boiler construction, chemical plant construction and refinery construction.

Crane operators are used in virtually all manufacturing and heavy commercial plants.

Carpenters perform the same type of work found in home and commercial construction.

Fitters perform the same type of work done in the construction of mobile homes, trailers, heating and air conditioning systems and steel product fabrication.

Grinders perform work which is found in any sheet metal fabrication operation.

Clearly, the work performed by shipyard employees is the same as the work performed in heavy industry, on assembly lines, and in fabricating plants throughout the United States.

Since extension of jurisdiction for shipyards in 1972 was inadvertent, since rational justification for such extension of jurisdiction is non-existent, and since extension of jurisdiction has caused economic chaos, jurisdiction and coverage under the Longshoremen's Act for shipyards and other non-longshoring interests should be returned to the water's edge. This test provides a clear line of demarcation and conforms with the original congressional and jurisprudential intent and interpretation.

The shipyards are in a crisis and the need for essential jurisdictional relief from the Longshoremen's Act is urgent!●

## SOMETHING MUST BE DONE ABOUT HIGH INTEREST RATES

HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. SNYDER. Mr. Speaker, earlier this year, we accomplished something that many people thought was impossible—we passed a massive budget cutting bill which will pare down Federal spending in fiscal year 1982 by the amazing amount of $35 billion. It was not an easy task. Doing the impossible never is.

Now they say that doing the impossible was not enough—not enough because interest rates are stubbornly hanging up at stratospheric levels, driving the estimates of Federal spending and Federal deficits higher every day.

What then have we gained by doing the impossible? If we cut spending $35 billion only to see the deficit climb back up to $20 or $30 or even $40 billion because of interest rates, what have we gained?

As far as I can see we have three options. We can go along as we are—trying to cut more each time interest rates knock the estimates up another notch. Or we can sit back and carp at the Federal Reserve Board and its tight money policy.

Or we can do something about high interest rates before they undo everything we have worked so hard to accomplish this year.

I personally think it is time to do something, and today I am introducing the National Usury Act (H.R. 4471) which would limit the interest rates on most loans to 10 percent.

I urge my colleagues to join me in doing something to stop high interest rates before they put an end to our hopes for an economic recovery and our dreams of a balanced budget.●

## NO PEACE CORPS—CIA CONNECTION

### HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. LEACH of Iowa. Mr. Speaker, the Peace Corps has for years fended off periodic charges that its volunteers have engaged in intelligence activities and has, in its own written policies prohibited any such connection.

There is no agency of the U.S. Government which has a mission so explicitly committed to nonpolitical, global goodwill and to the improvement of the lives of millions in the poorest nations of the world. And there is no agency of Government to which greater damage could be done by erroneously associating it with our intelligence services.

For that reason, the suggestion in an August 10, 1981, article in Time magazine about CIA Director Casey that Peace Corps volunteers are under consideration for use as intelligence agents deserves prompt, public rebuttal. Accordingly, Mr. Speaker, I would like to submit a letter, written by the Director of the Peace Corps Loret Miller Ruppe, making crystal clear the Peace Corps' policy that no volunteer will ever be used for such purposes and providing, for the record, the assurances she received from the CIA Director that no effort will be made to draw the Peace Corps into intelligence gathering activities. The letter follows:

PEACE CORPS,
*Washington, D.C., August 18, 1981.*

EDITORS,
*Time magazine,*
*New York, N.Y.*

GENTLEMEN: In your August 10 issue, your story on William Casey stated that pursuant to a draft, Executive Order, "The CIA * * * might be able to use the Peace Corps * * * as undercover agents."

During the twenty years of the existence of the Peace Corps, throughout each Administration, it has been policy, strictly adhered to, of keeping the Peace Corps totally separate from any intelligence-gathering activities. The present CIA Director has indicated to me that he does not intend to change this long-standing policy.

Peace Corps volunteers are struggling in the remotest parts of the world to help the peoples of the third world meet basic human needs and achieve economic self-sufficiency. I pledge that I will not permit their outstanding efforts to be jeopardized by any involvement in intelligence work during my service as Peace Corps Director.

Sincerely,

LORET MILLER RUPPE,
*Director.*●

## AN OPEN LETTER TO PRESIDENT REAGAN

### HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. GARCIA. Mr. Speaker, during this week of National Hispanic Heritage Week, Hispanics are acutely aware of their cultural, social, and political existence. However, Hispanics are also acutely aware of the sacrifices the Reagan administration is attempting to impose on us.

We find it disheartening that the administration is dismantling and discontinuing programs for the poor, women, the disadvantaged and minorities that we have struggled to obtain. If struggle again we must, then rest assured that Hispanics and other minorities throughout the country will rise to the call to maintain our hard fought battles to achieve equality.

National Hispanic organizations have sent the following open letter to President Reagan indicating our willingness to work for Federal policies of national interest, but we will not sit idly by and allow the Reagan administration to disproportionately affect the poor, women, the disadvantaged, Hispanics and other minorities:

AN OPEN LETTER TO PRESIDENT RONALD REAGAN

Senor Presidente:

Once again, the Nation is commemorating National Hispanic Heritage Week, September 13–18, 1981, to show appreciation for the many fine contributions which Americans of Hispanic ancestry have made to the United States.

One important difference is taking place in 1981 which makes the observance of this occasion a particularly distasteful and onerous act this year for a majority of Hispanics. Your Administration has embarked on a course of action which assumes a "broad national mandate" from all Americans to have you dismantle, disembowel, or otherwise discontinue programs for the poor, women, the disadvantaged and minorities.

We Hispanics do not support your current course of actions. We find them ironic, patronizing, insensitive and highly contradictory to the spirit of the National Hispanic Heritage proclamation for 1981, which you have just signed. How can we observe National Hispanic Heritage Week in good conscience when:

Hispanic Federal employees in unprecedented numbers are being given their last pay checks this month and told that the Federal Government no longer needs them.

Essential programs in key areas of health, education, employment, housing, energy, civil rights and transportation will no longer be available to a large segment of the Hispanic population beginning October 1.

Vital public information programs designed to reach Hispanics in the language of their choice are being terminated at agencies such as the Departments of Energy, Education, Housing and the Community Services Administration.

Appointees of Hispanic ancestry to your Administration, who could speak out on behalf of the community, have been few and largely relegated to lower level positions.

We are a coalition of organizations representing the majority of Hispanic Americans in the United States. This letter brings to your attention those areas of most concern to us, which if left to the current course of action of your Administration will set back the many advances our people have worked so hard to achieve.

We fully support the principles of your economic recovery plan for the Nation and are willing to sacrifice our fair share, but not at the expense of the few hard-fought gains Hispanics have made in the last few years. We recommend that you take immediate and decisive action to alter the following aspects of your Administration, which we find troublesome:

1. Instruct your Cabinet Secretaries and other top agency officials to work at reducing the negative impact of you policies and programs on Hispanic Americans by consulting with the community before such actions are proposed.

2. Reorient your budget cuts to minimize the destruction of special emphasis programs of vital necessity to Hispanics in the areas of Civil Rights, education, energy, health, housing, labor and transportation.

3. Alter the make-up of the Federal workforce in policy-making positions to assure that Hispanics and other minorities are fully represented in the decision-making processes of your Administration at the GS-15, Senior Executive Service and appointee levels.

4. Take a stronger affirmative action position to insure that "the last hired—first fired" rule presently being applied in the current "reduction-in-force" actions does not destroy ten years of progress made by Hispanics in public service. The majority of Hispanics employed in the Federal government are non-career, excepted term appointment, part-time temporary positions with limited time in service. Consequently, they are likely to be the first and most unfairly affected group of "reduction-in-force" actions.

5. Through business tax incentives and other economic means, similar to what you are proposing for the arts and humanities, involve the private sector in filling the voids in Hispanic employment opportunities and community development needs, which you are creating with your budget reduction measures in the Federal sector.

Mr. President, do not brush these concerns aside as idle, emotional, rhetoric from a small segment of the community. Behind these concerns are stark realities of a duality in American life that could blunt the impact of your Administration on the economic and social well-being of the United States.

We are not asking for charity nor for pity. We only want a fair share of our Federal tax dollar and the right to have equal representation of our interests in your Administration.

We have been recently described in the national media as "a people on the move—young, aggressive and hungry for (our) rightful share of the American dream." You can add significant meaning to this dream and to the observance of National Hispanic Heritage Week this year by reconsidering your harsh budgetary measures and noticeable absence of Hispanic representation in your Administration and throughout the Federal system. Your actions are affecting disproportionately the poor, women, the disadvantaged, Hispanics and other minorities.

What good is a balanced budget to a nation of disenfranchised citizens?●

## ROLE OF EXIMBANK

### HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. EVANS of Delaware. Mr. Speaker, the following article was recently brought to my attention by the American Legal Foundation. Its authors, Mr. John Sununu and Mr. Dan Popeo, address the important role played by the Export-Import Bank. I have spoken on numerous occasions in support of the Eximbank, and believe the following article is worthy of serious study.

President Reagan's drive to turn our nation's economy around—to "begin an era of national renewal"—deserves our unqualified support, but our commitment of overall support should not tie us to a policy, advocated by some within the Administration, which would gut the Export-Import Bank and thus inadvertently allow foreign governments to shut out American industries from major export markets by creating an unfair, unfree international market.

The economies of the world's nations are interlocked. High interest rates in one country will affect exports and profits in another; and nowhere is this interrelationship more apparent than in high technology industries where employment and continuing scientific development depend on regular sales within the international marketplace.

In 1934, the Export-Import Bank was created to ensure that American producers of capital intensive products might compete for sales with foreign producers of similar goods. Through favorable interest loans made to foreign purchasers of American technology, the Bank enabled prospective foreign consumers to base purchasing decisions not on the cost of borrowing dollars, yen, or francs, but on a required product's quality, suitability and factory price.

Until 1973, when the oil embargo sent shocks through most of the world's economies, the interest charged on ExIm loans was never more than one or two percent below the prevailing prime rates in the United States. With no wide disparity between the cost of its money and the cost of money elsewhere, ExIm operated profitably and helped establish the United States as the premier producer and distributor of quality products ranging from airplanes to factories and power plants.

Today, with a relative general decline in the strength of the national economy, the disparity between ExIm interest rates and the prime rate is no longer slight, and the Bank finds itself with more critics than friends. Ironically, the recent mounting public pressure for decreased federal authorization levels in ExIm borrowing comes at a time when American productivity is at a relative disadvantage and inflationary costs are closing foreign markets to American goods.

Some conservative economic opinions offered from within and outside the new Administration in Washington argue that further support of the ExIm Bank is tantamount to recognizing one more special interest group at the expense of the American taxpayer—a step they feel is inconsistent with the free market philosophy endorsed by the Reagan government. From a purely philosophical stance, these critics may be right, but their philosophy neglects the exigencies of an international marketplace in which the United States is only one party.

The international marketplace is neither fair, equitable, nor free. Extensive foreign government subsidization of domestic industries interferes with the market and influences market decision on the basis of credit terms rather than product quality or price. Within this environment, ExIm provides American exports a parity with foreign goods they would not otherwise have. It also provides an international disincentive for continuing such practices and sets the mood for changes through diplomatic agreements.

Since 1978, the United States has been negotiating for an international agreement to end nationally supported export credits. Were it not for the unexpected and unprecedented increase in this country's prime lending rate and the subsequent reaction to this increase in capitals abroad, these negotiations would have succeeded late last year. Unfortunately, however, in Paris and Tokyo, for example, immediate action was taken to further support the exports of products with subsidized credits in certain areas where sales were perceived to be within each nation's own interest.

This reaction is neither surprising nor an unlikely outcome. Politics and nationalism play a role in markets which economists too frequently overlook. France is challenging Japan as the world's third largest exporter after the United States and West Germany. Its international profits stem from the aggressive marketing of its aircraft, electronics, and electric power industries and a national willingness to promote these products as part of a large and economically attractive package that frequently has political strings attached.

Even in the United States, evidence of the French success is apparent. French helicopter sales account for 20 percent of domestic U.S. helicopter sales and the French Airbus consortium has made France the second largest manufacturer of airplanes in the world.

Nowhere are the economic fruits of France's discount financing more visible than in its exports of nuclear power plants. Already the French have won contracts to build plants in Belgium, Iraq, South Korea and South Africa, with negotiations in progress for future sales to Egypt, China, Taiwan, Yugoslavia, Finland, and Mexico.

In virtually every export sale of a nuclear power plant the French have been able to overcome an apparently less-than-best price offer from other foreign manufacturers by offering a financing package that assures an unbeatable net cost to their buyers. Not surprisingly, an examination of recent purchases shows that these buyers, in almost every instance, passed up better technology and a lower competitive price proffered by U.S. suppliers of nuclear power plants.

The d'Estaing and Mitterrand governments have both appreciated the political wisdom of supporting exports through a discount financing program. At home, more jobs are created by expanding industries and prices for items purchased domestically remain stable because the country enjoys an overall balance of payments. And more jobs means more tax revenues with less unemployment and insurance costs. Abroad, France carries more clout in political spheres where, through its ability to sell energy plants and airplanes, it can influence international events.

Contrasted with the French experience, the American electric power industry, especially the nuclear industry, finds itself shut out from international competition at a time when domestic sales are dwindling. Adversely affected by the costs of over-regulation and bureaucratic inefficiency, production delays and cost overruns in this industry have all but eliminated the home market.

The aggressive credit policies of foreign competitors have forced the American nuclear industry to compete not only with foreign industrial corporations but with their governments as well. It is shocking that Washington in its effort to remain true to free market theory has not seen the practical implications of its position. The political and economic advantages of the sale of high technology equipment are being squandered to satisfy national economic policy perfectionists. Moreover, failure to maintain truly competitive, fair, or free conditions in the international market through discount financing promises to destroy an industry that is already hard pressed for orders.

It must also be seen that the commercial power industry serves as a necessary and vital pool for the skilled manpower and technological innovations necessary to support this nation's defense needs for nuclear technology. Without a commercial power industry serving as a continuing market for the further training of engineering graduates and other technical personnel, the nation's nuclear educational and research structure would have to be scaled down significantly. Furthermore, with a paring down of this structure and the trained personnel within that structure, the country would be risking the loss of necessary personnel and technology it would need to supply future peak demands in our national security nuclear power needs.

The Reagan Administration has recognized that the nuclear industry has a significant role to play in helping meet America's energy needs. In this connection, it would be counterproductive to adopt a policy

toward ExIm Bank which would impede this major American industry from competing internationally by further limiting the bank's ability to provide loans and guarantees.

At least fourteen major foreign orders for nuclear plants are anticipated in the next year or two. Typically, most are orders for beginning facilities and networks which will be expanded over time. Because of the complex inter-relationships of fuel requirements to the kind of systems built, original purchase orders generally tie the consumer to the same manufacturer well beyond the terms of the first contract. Subsequent purchases could therefore be dependent on the availability of financing incentives for current needs through ExIm Bank. This situation will particularly apply in Mexico, China and Korea where forecasted nuclear power needs are already understood.

The arguments presented herein favor of ExIm have been made from the perspective of one segment of our industrial structure. Admittedly, these arguments do not apply to American industries which can and have produced exports without special help. Therefore, in the interest of swiftly achieving a free and unsupported world market, the ExIm might be required to accept applications for ExIm credits on a selective basis only. In other words, the burden of proving the absence of fairness and parity of competition in a market would rest on the manufacturer's shoulders. In so doing, these criteria could be designed to put maximum pressure on nations with discount financing policies with the intention of fostering a mutual agreement for significant reductions in or elimination of export credit subsidies.

There is much pressure mounting in the United States to cut back on the activity of the Export-Import Bank. This pressure is part of the budget cutting process now underway in Congress. Gutting ExIm would not only endanger certain capital intensive American industries, it would additionally represent a weakening in this country's bargaining position and national resolve to protect free markets and eliminate internationally all subsidies to national exports.

The goal of a free unsupported world market, while very desirable, is beyond human grasp if sought after by weakening our nation's industries' ability to compete for sales. This country's best economic defense against foreign governments' industrial loan subsidies is the offense provided by the Export-Import Bank. At the same time, it serves as a weapon to protect the United States' position in the world marketplace while it also serves as an incentive to convince those foreign governments to join in abstaining from disrupting the flow of the market.●

## NEIGHBORHOOD SCHOOLS

### HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. GEPHARDT. Mr. Speaker, few issues today arouse as much controversy as forced busing as a means to desegregate our schools. In the academic community, the merits of involuntary desegregation plans continue to be debated and doubted; among the parents of schoolchildren who ultimately serve as the pawns in this experiment there is near unanimous disapproval.

What is it that the American people object to about busing? With more than 50 percent of U.S. schoolchildren riding a bus each day, it certainly cannot be the fact the children are transported to school via a schoolbus. Rather, the objections occur when children are forced to attend a school in another neighborhood, far away from their community, in an effort to achieve a noble goal in a manner which has never been proven to be beneficial to the students involved.

It is this central objection which I seek to address today with the introduction of a constitutional amendment to prohibit the assignment of a student to any school other than the public school nearest his place of residence. In my view, this amendment addresses a number of questions that have been raised over previous legislative attempts to limit forced busing. Its language is simple and straightforward. It would enshrine the neighborhood school as U.S. policy yet would continue to permit and encourage the voluntary attendance at schools other than the one nearest the home in order to pursue specialized education.

It is my sincere belief that forced busing has been counterproductive to the goals of the sociologists who sought to rectify the inequities on our education system and the solution must be found elsewhere.

Other approaches must be tried—such as insuring equal funding for public schools—that do not carry with them the undesirable consequences of removing children from their neighborhood and transporting them elsewhere.●

## VIRGINIA WING NO. 1 IN NATION

### HON. DAN DANIEL

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. DAN DANIEL. Mr. Speaker, the Virginia Wing of the Civil Air Patrol has recently been accorded outstanding recognition by the top echelons of that organization.

Being selected as the No. 1 wing in the Nation, the Virginia group has been signally honored. The members of this outstanding group have been doing a splendid job for many years and this formal recognition is a culmination of a long period of steady growth and achievement.

A recent press release sets forth the details of the honor and I ask permission that this be carried in the RECORD at this point.

The release follows:

VIRGINIA WING CIVIL AIR PATROL,
*Sandston, Va., August 15, 1981.*

For the first time in its history, the Virginia Wing, Civil Air Patrol, has been rated number one in the nation based on the Management Analysis program conducted each year by the National Headquarters, Civil Air Patrol, Maxwell Air Force Base, Ala. The evaluation period covered is from July 1, 1980 through June 30, 1981.

Virginia Wing is comprised of 35 units with approximately 1,900 members throughout the state, and they are either senior squadrons (adults), composite squadrons (seniors and cadets), or cadet squadrons (young people, 13-18 years).

Col. Floyd B. Callihan is commander of Virginia Wing, and in making the announcement, he said, "Our selection as number one was not the result of a few, but the entire membership did their very best in each category being evaluated by National Headquarters. I am proud of each and every one of them. Our wing has always been in the top 10, and we have even come close to being rated number one."

During the National Board meeting of Civil Air Patrol in New Orleans, August 28 and 29, Virginia Wing will be honored by National Commmander, Gen. Johnnie Boyd, through Col. Callihan who will be present with other staff members, to accept the signal honor as being the nation's top rated wing.

The criteria for the Management Analysis Program (CAP-MAP) and its associated awards are composed of 12 categories, as follows:

(1) Membership growth (2) Cadet Awards: Mitchell, Earhart and Spaatz (3) Cadet encampment attendance (4) Cadet flight orientation (5) Senior training (6) Chaplaincy effectiveness program (7) Management and control of Civil Air Patrol property (8) Corporate owned powered aircraft utilization (9) Emergency services resources (10) Communications (11) Flight clinic attendance (12) Reporting and Public Affairs narrative.●

## RESOLUTION TO RESCIND BUTTER SALE TO NEW ZEALAND

### HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. OBERSTAR. Mr. Speaker, on August 5, the U.S. Department of Agriculture and the New Zealand Dairy Board signed an agreement detrimental to the interests of American farmers.

The USDA sold 220 million pounds of Commodity Credit Corporation butter to the New Zealand Dairy Board for $155 million, or about 70 cents per pound. The current price on the open market is $1.05 per pound. The decision to sell the butter at 70 cents per pound cost the American taxpayer approximately $77 million.

I am upset not with the decision to export butter, but with the manner in which the USDA negotiated and announced the sale and the provisions which give control over U.S. dairy

export policy to the New Zealand Dairy Board.

The Governments of Poland, Ireland, Romania, and U.S. butter exporters all had expressed interest in buying the butter for up to $1.05 per pound. Secretary of State Haig vetoed these possible sales in the belief the butter would be sold eventually to the Soviet Union.

The CCC sale to the New Zealand Dairy Board includes a provision which prohibits the dairy board from selling this butter to the Soviets. However, the administration failed to realize that the increase in world butter supplies will benefit the Soviet Union indirectly. This is a problem with all embargoes. As long as the Soviets can buy butter from other countries, they will not be affected by our embargo. The result is that American farmers are hurt by the action much more than the Soviets.

Two clauses were included in the agreement which give control over U.S. dairy export policy to the New Zealand Dairy Board. It can veto further sales of U.S. butter abroad through July 1982. It also has the right of first refusal on any butter and the United States may want to sell abroad between July 1982 and December 1982.

New Zealand exercised its veto power under the August 5 agreement on August 10, when it blocked a sale to Egypt of 26.5 million pounds of our butter, roughly 10 percent of U.S. Government stocks.

This veto is a clear example of the harmful affects the provision will have on U.S. dairy farmers.

As new members of the international dairy marketing community, we must learn the intricacies of the market. It is also important that the USDA negotiate and announce future sales of this type in a more straightforward manner.

I am today introducing a resolution calling upon the administration to rescind the August 5 agreement. I ask that the text of the resolution be included in today's RECORD.

I urge my colleagues to join me in this effort to convince the President to rescind the August 5 agreement and to prevent similar detrimental contracts in the future.

Whereas the embargo on grain sales to the Soviet Union had insufficient impact on the Soviet economy to justify the detrimental economic effect of the embargo on American farmers;

Whereas President Reagan lifted that embargo on April 24, 1981;

Whereas on August 5, 1981, the United States agreed to sell 220 million pounds of Government-owned surplus butter to the New Zealand Dairy Board for $155,000,000;

Whereas under the agreement the United States Department of Agriculture sold the butter, which was 80 percent butterfat, to the New Zealand Dairy Board for 70 cents per pound;

Whereas the world price for butter which is 82 percent butterfat is $1.05 per pound;

Whereas the executive branch rejected offers by the Governments of Poland, Romania, and Ireland and by United States exporters to purchase the butter at the world price because of concern that the butter would be transferred to the Soviet Union;

Whereas, although the New Zealand Dairy Board agreed not to sell any of the butter directly to the Soviet Union, the increase in world butter supplies will benefit the Soviet Union;

Whereas the agreement with the New Zealand Dairy Board also included two clauses under which the New Zealand Dairy Board could veto further sales of United States butter abroad through July 1982 and would have the right to buy, before any other purchaser, any butter the United States may want to sell abroad between July 1982 and December 1982;

Whereas the terms of the agreement will give control of United States dairy export policy to the New Zealand Dairy Board; and

Whereas the only group adversely affected by the agreement will be American farmers, not the Soviet Union: Now, therefore, be it

*Resolved*, That it is the sense of the House of Representatives that the President should take immediate action to rescind the agreement entered into on August 5, 1981, to sell United States butter to the New Zealand Dairy Board.●

## NASSAU COUNTY FEIS

### HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. McGRATH. Mr. Speaker, it is with great pleasure and pride that I take this opportunity to congratulate the Nassau County, N.Y., Ancient Order of Hibernians who will be holding their ninth annual feis over the upcoming weekend, in Plainview.

Each year this celebration of Irish culture attracts thousands of spectators and hundreds of talented artists, athletes, and performers who compete in traditional Irish sports and participate in music and dance contests and art exhibitions. The theme for this year's feis is "Family" and events will be held to highlight the importance of family life in Irish and American culture. Each year the Ancient Order of Hibernians use this occasion to honor an individual who has made great contributions to the goals and activities of the organization. The honoree this year is New York State Assemblyman Sean Patrick Walsh.

A great deal of credit for the coordination of this festival goes to the members of the Nassau County A.O.H. and its ladies' auxiliary and their respective presidents, Dave Henshaw and Marie O'Neill. I would ask that all the Members of this body join me in wishing the members of the Nassau County A.O.H. and all of the visitors and participants at the feis an enjoyable traditional Irish weekend.●

## UNITED AUTO WORKERS SUPPORTS H.R. 4400

### HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. TRAXLER. Mr. Speaker, Mr. HILLIS, of Indiana, and I have sponsored H.R. 4400, the Mobile Source Clean Air Act Amendments of 1981, which amends title II of the Clean Air Act relating to automobile and truck emissions. I have recently received a letter of support for H.R. 4400 from the United Auto Workers that I would like to share with my colleagues.

I am especially pleased to have the support of the United Auto Workers, an organization that is committed to providing for a healthy environment and to preserving jobs. The UAW, which was consulted in the development of the provisions of our bill, has advised us of its support for the carbon monoxide, oxides of nitrogen, and hydrocarbon emission levels presented in this legislation, based on the weight of current scientific data which indicates that the levels we are proposing will not adversely affect public health.

I share the UAW's commitment to preserving jobs and making continued progress in air quality across this Nation. We will make the greatest advances in cleaning the air by getting the old cars off our highways, and replacing them with clean-burning, fuel-efficient vehicles. We will also be helping to put some of the thousands of unemployed auto workers back to work.

Mr. Speaker, a copy of the letter I received from the United Auto Workers follows:

INTERNATIONAL UNION, UNITED AUTOMOBILE, AEROSPACE & AGRICULTURAL IMPLEMENT WORKERS OF AMERICA—UAW,
*Washington, D.C., September 11, 1981.*

Hon. BOB TRAXLER,
*U.S. House of Representatives,*
*Washington, D.C.*

DEAR CONGRESSMAN TRAXLER: This is in response to your request for our views on H.R. 4400, the proposed Mobile Source Clean Air Act Amendments of 1981, which you introduced with Congressman Hillis.

We agree with you that early action on extending the mobile source provisions of the Clean Air Act is desirable. It is our belief that Congress should begin work immediately on legislation to extend all provisions of the Clean Air Act with the objective being final action before adjournment later in the year. If this is not possible, however, we hope Congress will at least complete action on the mobile source issues.

H.R. 4400 represents a thoughtful proposal for dealing with several difficult and interrelated issues in a reasonable manner, and we support it on the basis of our understanding that its provisions would not result in deterioration of public health. As we have indicated, we continue to be concerned

about air quality, and we intend to elaborate on our position with respect to a number of issues when we testify on H.R. 4400 and other proposals relating to the Clean Air Act.

We believe your bill has made a constructive contribution to the discussion of mobile source issues. We look forward to working with you and other Members of Congress on the extension of the Act.

Sincerely,

DICK WARDEN,
*Legislative Director.*●

## DENY AWACS TO SAUDI REGIME

### HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. SCHUMER. Mr. Speaker, the administration maintains in proposing the AWACS sale to Saudi Arabia that there is little reason to doubt the stability of the current Saudi regime. Fears that AWACS technology will fall into unfriendly hands are therefore groundless, the administration argues.

A closer look at recent events in Saudi Arabia, however, undermines the administration's claim. In November 1979, religious insurgents forced a takeover of the Grand Mosque at Mecca, and Saudi security forces proved themselves to be quite inept at stopping them. Orthodox religious zealots throughout the country are a major source of discontent, and large numbers of Shia Muslims in the oilfields area are highly susceptible to the revolutionary movement in Iran. Popular resentment against the concentration of power in the hands of the Saudi royal family continues to grow, and is fed by widespread corruption in the government and unpopular budgetary priorities. The increasingly restive National Guard and Saudi Army are potential powerful rivals to the House of Saud.

It is crucial to remember that in 1977, State, Defense, and CIA experts all testified to Iranian stability and argued for the transfer of sophisticated military equipment to the Shah. It is imperative that we do not provide our most advanced reconnaissance technology to a regime that may very well go the way of the Shah.●

## DANGEROUS TECHNOLOGY TRANSFER: U.S.-U.S.S.R. ACADEMIC EXCHANGE PROGRAMS

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. FINDLEY. Mr. Speaker, in the July 23, 1980, RECORD, I spoke of the dangers of the United States training Soviet "students" in high technology. These risky programs have continued despite the Soviet invasion of Afghanistan. I intend, therefore, to offer an amendment to the State Department authorization bill when it comes to the floor later this week to prohibit U.S. Government funding for programs that train Soviets in high technology. My 1980 statement which I am resubmitting to the RECORD today explains the importance of such an amendment:

TRAINING THE SOVIETS TO FILL IN THE GAPS

Mr. Speaker, the United States relies on its technological superiority to maintain a strategic advantage over the Soviet Union. With the fearsome increase in the quantity and delivery capability of Soviet military forces, this U.S. technological edge could make the difference between deterrence or war, between survival or defeat.

Yet, the United States has been far too lax in controlling the transfer of high technology to the Soviet Union. Some examples are now well-publicized: U.S. technology built the Soviet Kama River plant which produced many of the trucks that rolled into Afghanistan this winter. U.S. precision miniature ball-bearing grinding machines helped the Soviets develop MIRV guidance systems to give their huge intercontinental ballistic missiles pinpoint accuracy. Having enabled the Soviets to make their ICBM's more deadly, the United States must now pay a second price—a multimillion-dollar MX system to undo the damage our technology transfer policy created.

In the aftermath of the Soviet invasion of Afghanistan, President Carter imposed new, though no doubt temporary, restrictions on high technology exports to the U.S.S.R. This followed congressional action on legislation in 1979 to tighten controls on technology transfer to Communist States.

But the type of technology transfer to the Soviet Union which should arouse the greatest concern for our national security—the training of Soviet scientists and engineers in American universities and research institutions—continues, unabated and unfettered. Via federally funded U.S.-U.S.S.R. academic exchange programs, the United States is enabling Soviet citizens to come to this country to acquire critical technological know-how and understanding of vital scientific processes. Much of what these Soviet scientists and engineers study here has a dual-use potential, that is, it has military as well as peaceful applications.

The U.S. intelligence community has actually discovered that some of the Soviet students are assigned to work on defense programs when they return to the U.S.S.R. But this is no doubt just the tip of the iceberg. Given the closed nature of Soviet society and our complete lack of control over the end use of the knowledge we have imparted, we have no way to monitor the whereabouts or the nature of the work of the Soviet students when they go home.

In spite of these facts, no new restrictions have been imposed on United States-Soviet academic exchanges—a program where few restraints have existed in the past. United States-Soviet academic exchanges began in 1958; they have occurred at their current level since the mid-1970's. Approximately 70 Soviets annually come to the United States to study at academic and research institutions while about that same number of Americans go to the Soviet Union. Fifteen to twenty on each side are involved in a Soviet Academy of Sciences exchange program which, despite its name, focuses primarily on economics and the social sciences. About 10 more Soviets and 10 Americans each year are senior research scholars. The remaining 40 from each country participate in the U.S.-U.S.S.R. graduate student/young faculty exchange. This last program offers a 10-month stay in a university or research institution of the other nation.

There is a disturbing disparity in the research topics pursued by each side in both the senior research and the graduate student/young faculty exchange programs. In 1978-79, for example, all 10 of the U.S. senior scholars researched liberal arts or social science topics while 8 of the 9 Soviet senior scholars specialized in the natural sciences. Again, the 43 American graduate students participating in 1978-79 studied history, literature, music or another liberal arts topic in the Soviet Union while 36 of the 43 Soviet graduate students and young faculty members who came here, on the other hand, studied science, most notably physics and chemistry.

One American thus spent her 10 months in Moscow looking into "The Heroine in the Russian Fairy Tale." Another examined "The Political Attitudes Behind the Assassination of Tsar Paul I" while still another focused on "Performance Practices in Russian Choral Music of the Late 19th and Early 20th Centuries."

The contrast of these topics with those of the Soviet students is startling. One Moscow State University student was in the United States for 10 months researching laser physics, nonlinear optics, and spectroscopy as well as tunable lasers. Another was also interested in lasers—two level atoms in one-mode laser fields. The list goes on. In case these technical topics are initially as inscrutable to you as they were to me, tunable lasers and two-level atoms in one-mode laser fields both relate to separating out parts of complex atoms. This field is still in its infancy though we are already certain of its implications for chemical warfare.

Many of the Soviet graduate students and young faculty members, in fact, spend their time here working on advanced state-of-the-art U.S. technology and on research in areas in the forefront of American scientific discovery. Aircraft engine design, ship hydrodynamics, and optical signal processing are among the many topics recently pursued with obvious interest for the Soviet Armed Forces. And the Soviets are now surpassing their past record by pushing for greater access to U.S. computer technology through these exchanges.

Part of the reason for the disparity between American and Russian topics is that young American scientists prefer to work in the superior U.S. labs rather than undergo a restrictive and half productive year in a Soviet institution. Applying for such an exchange scholarship is, of course, a matter of individual choice for Americans. No one forces them to go.

Not so for the Soviet students who are carefully selected by their Government according to the scientific requirements of the U.S.S.R. Furthermore, the Soviet "students" are far older than their American counterparts. Usually, they are at least 35 and already extremely experienced in their field. The Soviet Government carefully analyzes what gaps exist in Soviet scientific knowledge and works to place students in research programs designed to help them fill those gaps. The Soviets insist on placing their students in the very best American

universities and science programs: MIT, Cal Tech, Berkeley, and Syracuse are high on the Soviet list.

At one time it may have been easier to restrict Soviet access to high technology of military significance by keeping them out of government labs. However, today each of the armed services awards contracts to U.S. universities for an increasing amount of scientific research with potential military uses. The university research may continue for years before the Government assumes direct responsibility for its further development. Therefore, it is dangerous to give Soviet scientists a free rein for 10 months in U.S. university laboratories. There has, indeed, been more than one case where the Pentagon discovered that a research assistant working on a defense contract in a university lab was actually a Soviet exchange student.

Ironically, Soviets working in American labs have access to equipment which the United States will not agree to sell to the Soviet Union on the grounds that it would damage our national security to so so. In their own labs in the U.S.S.R., they would have to work around the lack of this equipment. Their hands-on experience with this equipment gained during their stint in the United States, of course, undermines the effectiveness of any export embargo. In addition, Soviet familiarity with the state of U.S. technology, its priorities, successes, and failures, provides the Soviets with the insights they need to develop effective countermeasures to our scientific advances.

The threat these exchanges pose to U.S. national security interests is very real. The United States should therefore, immediately take steps to restrict this critical outflow of U.S. technology to the Soviet Union.

We should insist on mutuality in these exchanges. The United States should not be training Soviet "students" in physics and chemistry while Americans are researching 18th century Russian history. The United States must put an end to this one-way flow—an outflow—of U.S. technology.

The result of these proposed restraints may well be that these academic exchange programs with the Soviet Union will come to an end. Or, future Soviet students in the United States will spend 10 months researching topics such as "The Importance of the American Comic Strip as an Indicator of Social Change in the United States." So be it. There may be a place for United States-Soviet exchange programs to improve understanding between our two nations but it should focus on humanitarian programs, perhaps medicine or cultural affairs. It should not be a one-way drain of U.S. high technology and science which threatens U.S. national security. U.S. security is far more important than the goodwill these programs may produce. And, in the aftermath of the Soviet invasion of Afghanistan, we should clearly recognize the need for a strong U.S. national defense rather than Soviet goodwill.●

## ATTORNEY GENERAL'S TASK FORCE ON VIOLENT CRIME REPORT

### HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. FISH. Mr. Speaker, on August 17, 1981, the Attorney General's Task Force on Violent Crime issued its final report. In that report, the task force made several recommendations with respect to victims of crime, who, in its estimation, are all too frequently victimized by a criminal justice system unresponsive to their special needs. The task force wisely noted that the Federal Government, and in particular, the Attorney General, can play an extremely important leadership role in advocating that victims of violent crime, at all levels of government, be afforded their proper status in the criminal justice system.

Mr. Speaker, I am today submitting a concurrent resolution to commend the Attorney General's Task Force on Violent Crime for drawing national attention to the unfortunate plight of victims of crime and for urging the Federal Government to assume its appropriate leadership role in addressing these problems. In addition, this resolution would urge the Attorney General to promulgate Federal standards for the fair treatment of victims of crime, as recommended by the task force. Although the task force did not endorse specific standards, this resolution would urge inclusion of the following guidelines:

Federal law enforcement agencies, U.S. Attorney's Offices and correctional facilities shall keep interested victims informed of the progress of investigations and prosecutions and shall notify them of a defendant's release from custody;

Federal law enforcement agencies and U.S. Attorney's Offices shall notify victims of serious crime of available financial and social service assistance, including victim compensation and witness fees, and shall advise them that they may wish to consult with private counsel who may be able to advise them of potential civil remedies and other forms of relief or assistance;

U.S. Attorney's Offices shall encourage employers of victim-witnesses to cooperate in minimizing the economic disadvantages resulting from court appearances;

U.S. Attorney's Offices shall provide victim-witnesses secure waiting areas during court appearances to minimize contacts with defendants, their families and friends;

Victim-witnesses shall be provided with adequate protection and shall be informed of available protective measures, including relocation;

Federal law enforcement agencies and U.S. Attorney's Offices shall return to victims stolen or other property held for evidentiary purposes as quickly as possible;

U.S. Attorney's Offices shall obtain the views of serious crime victims before entering into plea negotiations with defendants or recommending sentences; and

Federal law enforcement agencies, U.S. Attorney's Offices and correctional officers shall treat victims of serious crime with dignity and compassion.

Mr. Speaker, in addition to the leadership role that the Federal Government can play, citizens organizations can provide effective assistance in achieving needed improvements. For that reason, I formed an organization called National Victims of Crime, a group which will provide an organized voice for law-abiding citizens in achieving criminal justice reforms. This union of Federal Government leadership and citizen concern is the best weapon that we have in the war against crime.●

## CELEBRATION ON THE GRAND

### HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. SAWYER. Mr. Speaker, this is a tremendous week for Grand Rapids and the Fifth District of Michigan. Thanks to television, our entire Nation will be able to witness "Celebration on the Grand", a joyous outpouring of civic pride and renewal.

More than a decade of planning and hard work to restore our city is being celebrated with the dedication of the Gerald R. Ford Presidential Museum, the Amway Grand Plaza Hotel, and the Grand Rapids Art Museum.

It is an opportunity for our citizens to celebrate themselves, their vision, progress, vitality, and planning. All of those ingredients which won for Grand Rapids the "All-America City" honors this year.

Past and present leaders of four nations will be in attendance along with President Reagan, Vice President Bush, former President Ford, and a host of dignitaries and celebrities.

More than 700 members of the media from all over the world will watch and report on the festivities. I know they will love our city and our people. Grand Rapids is proud of our 38th President, Jerry Ford. I hope you will join with us as we pay tribute to a great President, our Grand City, and its vibrant people.●

## THE CIGARETTE SAFETY ACT

### HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. MOAKLEY. Mr. Speaker, I would like to share with my colleagues an editorial from the American Medical News. It outlines the concerns of many of the people in the medical profession that the Congress must begin to address the No. 1 national cause of residential fire deaths and injuries—the cigarette-related fire.

A text of the editorial follows:

CIGARET SAFETY

The American Medical Association supports the concepts in two House and Senate bills that would require "self-extinguishing" cigarets.

The AMA House of Delegates this summer adopted a Board of Trustees report calling for objective studies and develop-

ment of regulations requiring the manufacture, if feasible, of cigarets with reduced capacity for causing fires.

The bills (S. 51 and H.R. 1854) would authorize the Consumer Product Safety Commission to set standards so that cigarets and little cigars would have a "minimum capacity" for igniting upholstery and mattresses. The bills stipulate that the process used to meet the self-extinguishing standards cannot add additional toxic elements to the cigaret or little cigar.

H.R. 1854 differs from S. 51 in that it requires the Consumer Product Safety Commission to terminate regulatory proceedings if it finds that such a standard would be "technologically impractical or economically unreasonable."

The AMA Council on Legislation received information that in 1979, fires started by cigarets resulted in 2,300 deaths, 5,800 injuries, and $210 million in property damage.

The AMA board has expressed concern that implementation would be through the Consumer Product Safety Commission. The commission is the center of legislative controversy, and is slated for substantial funding and staff reductions.

"The AMA would recognize passage of cigaret safety act as a positive step in eliminating one of the most significant causes of residential fires," said AMA Executive Vice President James H. Sammons, MD, in letters to the bills' principal sponsors, Sen. Alan Cranston (D, Calif.) and Rep. Joe Moakley (D, Mass.). "While a 'safe' cigaret would not eliminate all fires caused by careless use of smoking materials, efforts should be undertaken to reduce any causative action where possible," Dr. Sammons wrote.

"Serious burns can be the most debilitating of all accidental injuries. If the development and marketing of 'firesafe' cigarets proves to be feasible, this would certainly be an excellent example of an initiative that could prevent potentially devastating effects," Dr. Sammons said.●

## NATIONAL AUTO POLICY—UNFINISHED BUSINESS—PART II

### HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. PEASE. Mr. Speaker, the second installment of UAW President Doug Fraser's address dwells upon what our auto industry is prepared to do to help itself. Signs are already seen of a new resolve and toughmindedness in the boardrooms and on the assembly lines of American auto companies.

But it is vitally important for those of us in Government positions to recognize that our corporate managers and autoworkers cannot reverse the plight of our auto industry by themselves. Just as the governments of virtually every other industrialized nation work hand in hand with the private sector to forge national auto policies, so, too, must our Government promote cooperation in labor, corporate, and Government circles. Consider carefully the litany of steps taken by the Japanese Government, for example, which have allowed the Japanese auto manufacturers to surpass our industry in production:

CONTINUATION OF ADDRESS BY UAW PRESIDENT DOUGLAS A. FRASER TO THE SIXTH ANNUAL AUTOMOTIVE NEWS WORLD CONGRESS

The UAW agrees that major responsibility falls on the industry itself, and on labor, to rebuild our own house; nor do we shrink from our role and responsibility in that regard.

Take productivity, for example. We never have stood in the way of new technology, as evidenced by auto's remarkable 3.4 percent average annual increase in productivity over the last twenty years—productivity far in excess of the all-manufacturing average. The current productivity slump is the result of depression-level sales volume and capacity utilization; productivity can be expected to rise sharply if and when the industry recovers.

We expect to continue our cooperative attitude toward new technology.

On product quality and absenteeism, the UAW has demonstrated a cooperative attitude many times in the past, and intends to continue to do so in the future. Product quality is justifiably of great concern to the American consumer, and this is an area in which we sense a new seriousness among workers and a higher level of commitment than in the past on the part of corporate management.

Absenteeism isn't a problem peculiar to the auto industry nor to the U.S. We negotiated procedures in the last round of bargaining that have been helpful in combatting this problem.

But all of us should understand that the industry and the UAW cannot solve the auto crisis alone. Indeed, many of the steps the U.S.-based auto multinationals will be taking to improve their competitive position could cause further widespread unemployment and continued erosion of the nation's industrial base.

To the extent that the nation's objectives are preservation of regional economic stability and a satisfactory level of auto industry employment, it is important to recognize that these are not inherently corporate goals.

Nor will the proposals currently advocated by the Administration to revitalize basic industry and revive the economy meet these employment and regional stabilization objectives.

Proposals for tax and regulatory relief may throw some money at the corporations, but they provide no guarantee as to how and where that money will be spent.

In the case of the auto industry, in the absence of other needed public policies, there is no assurance that federal assistance will be used to finance domestic revitalization; there is nothing to prevent it from financing further offshore sourcing and continued internationalization.

The U.S. no longer has the luxury of remaining the only major nation without a coherent, employment-oriented auto policy. Our non-policy is a holdover from a by-gone era of cheap fuel and rapid economic expansion, when U.S. dominance in auto and other key manufacturing sectors was unchallenged and other war-torn countries were striving to re-industrialize.

In 1980, after seven straight decades as unchallenged world leader, the U.S. was displaced by Japan as the world's largest motor vehicle producer. Yet we remain the largest motor vehicle market by far, while Japan exports half of its production.

Through the early 1970s, the Japanese government carefully nurtured and protected its auto industry. Imports were subjected to prohibitive tariffs, while foreign investment was strictly controlled to promote transfer of technology while preventing development of foreign-controlled marketing networks and preserving the autonomy of Japanese producers. Credit was allocated to the fledgling industry on favorable terms.

Moreover, Japan's auto industry was—and continues to be—the beneficiary of government policies to stimulate the manufacturing sector at the expense of non-international trade-oriented sectors. Auto makers get their energy and raw materials artificially cheap, transport their products to foreign markets via subsidized Japanese ships, and escape most taxes on what they export.

The Japanese auto industry has been a double beneficiary, first of the government's strategy of encouraging manufacturing exports to finance energy and other raw material imports; and second from the systematic encouragement of high productivity, high technology manufacturing at the expense of other industries which had been favored during an earlier stage in Japan's economic development.

Moreover, though its prohibitive auto tariffs are now a thing of the past, an array of non-tariff barriers push the sticker price of a typical North American-made car sold there to two to three times the U.S. level, effectively shutting out North American vehicles from the Japanese market.

Indeed, every other nation in the world that has or wants an auto industry, has taken definite steps to shape its development.

Government ownership and financial assistance is common, as evidenced by VW, Renault, BL and Alfa Romeo; in that regard, Chrysler is hardly unique.

In many cases, the steps other countries have taken include strict quantitative restrictions against Japanese imports.

In the UK, for example, Japanese imports are restricted to a market share under 11 percent.

It is no coincidence that Nissan has announced plans for large scale direct investment in that country, its largest European market.

France limits imports to a 3 percent market share; and Italy, to 2,200 cars per year!

West Germany just negotiated limits as the Japanese started to exceed a 10 percent market share.

In each case, decisive action was taken well before Japanese import penetration reached half the 22 percent share taken of the U.S. market.

Australia requires autos sold in that country to contain 85 percent domestic content (which can be offset by parts exports); Brazil and Mexico have likewise stimulated development of their auto industries by means of stringent local content rules.

In the case of Mexico, this is paying off handsomely in the form of commitments by several auto multinationals to source a substantial part of their worldwide requirements for engines and other key components from that country.

By contrast, we have the most open auto market in the industrialized world, with tariffs only one-fourth the EEC level and we have the most permissive posture toward Japan.

To make matters worse, our federal reserve conducts an outrageously high interest rate monetary policy. In addition to its

disastrous domestic consequences, that policy cheapens imports and makes U.S. manufactured goods less competitive on world markets.

Whatever the appropriateness of our pre-1974 auto policy, in today's world it is a prescription for disaster.

It is not appropriate for U.S. auto policy to be determined, by default, in the boardrooms of multinational corporations, or in Tokyo, Mexico City, or Bonn. Yet that is exactly what will happen if we do not begin to chart our own course. We will continue to be passive victims of other nations' policies and priorities, for which U.S. workers will be made to pay the price. There is one positive development in this area.

In April, the government of Japan announced a plan of voluntary restraint, under which the number of cars exported to the U.S. from Japan will be held to 1.68 million units during the year starting April 1, 1981, down 7.7 percent from the prior year. Restraint will continue through fiscal 1982, when sales growth of Japanese-made cars will be limited to 16 percent of any increase in the total market. Restraints may continue through fiscal 1983, though no commitments have been made.

Japan's announcement is a welcome long-overdue step. Unfortunately, many appear to have assumed that temporary, voluntary import restraint has "solved" the nation's auto trade problems. That is not the case; no one should be lulled into a false sense of security.

Moderation in the flow of Japanese autos into the U.S. market should assist U.S. companies to carry out their plans for a thorough overhaul of product lines and facilities. But it does nothing to slow down the rapid increase in foreign sourcing by U.S.-based companies.

During this critical period of restructuring, the auto multinationals are making many important sourcing and investment decisions. These decisions have long lead times and once made are often difficult or impossible to reverse.

Major commitments by these corporations, with profound consequences for North American employment and the future of the nation's industrial base, will be made in the months and years ahead. It is therefore critical that the temporary breathing space provided by Japan's voluntary agreement not be frittered away.

The time has come for us to take the next step. The Japanese automakers enjoy an $11 billion market here. We have to force them to put some capital where their markets are—to create jobs and cash flow in the cities and towns where they sell their products. They should have done this voluntarily, as we in the UAW called upon them to do time after time in recent years. Instead of savaging our auto market, the Japanese ought to become a part of it. We've waited too long for them to act as responsible trading partners.

And while America has waited, the American dream has wilted. Hard-working citizens seeking the chance to put in a fair day's work for a fair day's pay found themselves without jobs. People who dreamed of some day owning their own homes found themselves in unemployment lines. Americans who hoped to send their kids to college found themselves forced to seek welfare.

The time has come to quit waiting and start acting. We need legislation that would have the effect of requiring the Japanese to build plants and create jobs here where their market is.

I'm talking about content legislation. The UAW intends to launch a major effort aimed at achieving content legislation in Washington.

We intend to work with key Senators and Representatives in both parties, and we believe a content bill can be introduced this summer.●

## VLADIMIR KISLIK

### HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. McGRATH. Mr. Speaker, I want to call to my colleagues' attention the plight of yet another Soviet prisoner of conscience, Vladimir Kislik. Kislik, a distinguished scientist, first applied for permission to emigrate in 1973. Since that time, he has been forced to work in menial jobs, and recently was convicted of "malicious hooliganism" and sentenced to 3 years in prison.

The New York State Legislature recently approved a resolution condemning the Soviets' treatment of Vladimir Kislik, and I include the text of the resolution at this point in the RECORD.

STATE OF NEW YORK—SENATE RESOLUTION No. 1003

Whereas Vladimir Kislik, a distinguished scientist, determined to depart from the Soviet Union in nineteen hundred seventy-three in order to freely practice the traditions of the Jewish heritage as well as on numerous occasions since that year has been denied the basic human right to free emigration; and

Whereas Vladimir Kislik's aspiration to emigrate has resulted in his employment being limited to menial labor by Soviet authorities, the confiscation of his personal belongings, and other indignities, including the Soviet police repeatedly questioning him for the purpose of "trumping up" foreign agent charges against other Soviet Jews; and

Whereas Vladimir Kislik, a distinguished scientist, has had his name deleted from the important scientific papers he wrote while engaged in research at the Kiev Institute of Nuclear Research, and has been beaten by Soviet Authorities as a warning to him to stop holding scientific seminars; and

Whereas Vladimir Kislik remains within the Soviet Union, despite the emigration of his son, Maxim Kislik, to Israel, thereby placing Vladimir Kislik in the ranks of many Soviet parents who are unfortunately separated from their children by the design of Soviet Union officials; and

Whereas Vladimir Kislik had endured persecution, harassment, imprisonment and family separation simply because of his desire to practice his own religion in a country of his choice; and

Whereas Vladimir Kislik has recently been charged by Soviet Authorities with "malicious Hooliganism," unjustly convicted, and subsequently sentenced to a three year term; and

Whereas the Legislature of the State of New York, which holds justice, freedom and liberty as the highest ideals, urges the Soviet Union to immediately free Vladimir Kislik and permit him to join his family in Israel in the name of human rights and human justice; and

Whereas the Soviet Union's continuing persecution of its Jewish citizens and denial of those rights and privileges accorded other recognized religions in the Soviet Union will not succeed in isolating Soviet Jews from their friends in the world so long as those who hold liberty and freedom as the highest ideal continue to speak out on behalf of all beleaguered and oppressed people: Now, therefore, be it

*Resolved*, That this Legislative body pauses in its deliberations to condemn Vladimir Kislik's continued oppression by Soviet Authorities and urges the Soviet officials to give Jews in the Soviet Union the same rights afforded its other citizens, rights affirmed by the Soviet Union's Constitution, the Declaration of Human Rights adopted by the General Assembly of the United Nations and Principle VIII of the Final Act of the Helsinki Accord; and be it further

*Resolved*, That copies of this Resolution, suitably engrossed, be transmitted to The Honorable Ronald W. Reagan, President of the United States; Honorable Hugh L. Carey, Governor of the State of New York; Honorable Alexander Haig, Secretary of State of the United States; and to each member of Congress of the United States from the State of New York; Lynn Singer, Executive Director of the Long Island Committee for Soviet Jewry, 91 North Franklin Street, Hempstead, New York 11550; Leonid Brezhnev, Secretary General of the Communist Party, the Kremlin, RSPR, USSR; and Oleg Troyanovsky, Ambassador, Soviet Mission to the United Nations, 136 East 67th Street, New York, New York 10021.●

## AN AMERICAN HERO

### HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. SANTINI. Mr. Speaker, the veterans of America have long been recognized for their courageous deeds in the effort to maintain this country's freedom. But it is often only after these brave men and women have passed from our midst that we take any action to show our appreciation for their contributions. I would like to change that tradition and take steps to honor a real, live American hero, now.

Today in Reno, a celebration is taking place to honor one of Nevada's brave legionnaires. I am speaking of Nevada's own Ioannis "Johnny" Lougaris who has gone beyond the call of duty in service to his country. This man, a Greek immigrant, made the United States his country and fought for it like any native. The wounds he suffered in World War I were complicated by the onset of tuberculosis he contacted while defending this country and doctors told him he had only 6 months to live. But did this stop him? No. He moved on to Nevada, made that State his home, and fought off disease and depression to become a

successful lawyer in Reno. His immigrant and combat experience gave him the insight to know what a precious life we live in the United States and how important it is to maintain the freedom that has been ours through the centuries. He also realized that defending the country takes a special kind of spirit and a special kind of person and one who should not be neglected when he finally returns home. Johnny Lougaris worked unceasingly to see the Veterans' Administration Medical Center built and located in Reno to help servicemen who fought so valiantly for their homeland.

Now, the people of Nevada, in a move to pay heartfelt tribute to their comrade, asked that the VA center in Reno be renamed the "Ioannis A. Lougaris Veterans' Administration Medical Center." I fervently supported this move and am glad to report that with the fine cooperation of Congressman SAM HALL, the name change can become a part of a bill that will shortly be considered by the House, insuring this memorial to honor someone whose perseverance has benefited so many Nevada veterans.●

## HANDICAPPED ACCESSIBILITY CAN BE A REALITY

### HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. FRANK. Mr. Speaker, we are now witnessing a very serious assault by the administration on the rights of the handicapped, particularly on the guidelines promulgated by the Architectural and Transportation Barriers Compliance Board requiring access to Federal and federally funded buildings. The Board recently announced its intention to rescind these guidelines, which I believe to be a tragic mistake. Denial of access to the handicapped into Federal buildings is a denial of the right to participate in our democratic decisionmaking process, a right we should be encouraging, not discouraging. Handicapped access is not simply something which would be nice to have; it is a basic civil right, the abridgement of which is as serious and invidious as discrimination on account of religion, race, sex, or ethnic background.

I ask my colleagues to read the following statement, which was written by Ms. Phyllis Ryan, a constituent of mine from Newton, Mass., and to join with me in opposing the administration's proposal to rescind the accessibility guidelines.

A copy of the statement follows:

STATEMENT OF REPRESENTATIVES OF THE INTERESTS OF THE HANDICAPPED

Regulations that protect all people, combined with citizen action to insist on their enforcement, have brought us from that steep, bumpy, dangerous hill to this legal, workable ramp giving the disabled and elderly access to water, located in Newton but available to everyone.

We should not be persuaded that laws protecting everyone's rights to equal access and opportunity are burdens, but should recognize that they are safeguards for all of us who, at any time, might find ourselves in need of their protection.

In America, committed to equal rights for all, it is difficult, but it is possible, to achieve equal access and equal protection under the law for everyone. Changes are made slowly. Inertia and opposition must be overcome. But collective struggling for change is the only way we can achieve equity.

Government can function for the people if people take action on their own behalf and others support them.●

## SUBSTANTIVE AMENDMENTS TO H.R. 3613—FLORAL RESEARCH AND CONSUMER INFORMATION ACT

### HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. COELHO. Mr. Speaker, I rise to introduce a substitute bill for H.R. 3613, the Floral Research and Consumer Information Act. I originally introduced this legislation on May 19, 1981, with 20 cosponsors. Subsequently, 13 additional cosponsors have been added.

Mr. Speaker, this legislation has broad support from the floral industry. It is an attempt by the floral industry to try to increase their sales by assessing themelves a small percentage of the value of their produce for research and promotion efforts. The program would be conducted at absolutely no cost to the American taxpayer.

Since my introduction of this legislation on May 19, representatives of the floral industry have been meeting with administration officials in order to achieve a consensus on this legislation. As a result, I am recommending several changes which I would like now to incorporate in the legislation by introducing a new bill.

The following is a list of the substantative amendments that are made in the new bill:

SUBSTANTIVE AMENDMENTS TO FLORAL RESEARCH AND CONSUMER INFORMATION ACT

(1) The statement of "Congressional Findings and Declaration of Policy" is amended to clarify that nothing in the Act is to be construed a trade barrier to flower and plants in foreign countries. Section 2

(2) Propagational material would be subject to assessments. Section 3(f)

(3) The definition of term producer is changed to conform to USDA suggestions. Section 3(m)

(4) Under the procedure for certified industry organizations submitting nominations to the Floraboard, certified organizations would submit only one nomination for each position on the Floraboard. Section 7(b)

(5) The system of assessing producers at the "point of first sale" is changed to a system of assessing producers for each sale. For each domestic sale, producers will deduct the cost of plant material from the value of the sales transaction on which the assessment is made. The deduction of the cost of plant material prevents any flowers and plants from being subjected to a double assessment. Section 7(e)

(6) The bill is amended to say which kinds of entities the Floraboard is authorized to contract with. Industry groups, profit and non-profit companies, private and state colleges and universities and governmental groups are authorized to be contractors. Section 7(h)

(7) Only employees (not officers) of the USDA and Floraboard would be given access to confidential information. Contracting agencies would not be given access to such confidential information. These changes were suggested by USDA. Section 8(c)

(8) The bill would be amended, as suggested by USDA, to make clear that Federal agencies would have access to confidential information for the purpose of investigatory or enforcement actions necessary for the implementation of the Act. Section 8(c)

(9) The exemption of flowers and plants which are ultimately sold for consumption outside of the United States is eliminated. This change is made because such an exemption is no longer appropriate in the new system of assessment. Section 12(b).

Mr. Speaker, this legislation has broad support from the floral industry. It is a self-help program that is in the best tradition of free enterprise. Producers of flowers and plants receive no Federal subsidy and no price support programs. They are not asking for such a program now. They are merely asking for the legal authority to assess themselves for voluntary research and promotion efforts so that they can build a better market for their products.

Moreover, the passage and enactment of this legislation would not insure that flower and plant producers would have a research and promotion program. After the law is enacted, the growers will have to go through a lengthy and detailed administrative procedure in developing an order that would then have to be approved by the producers themselves. Unless two-thirds of all producers or a majority of producers who are responsible for the production of more than two-thirds of the total product vote for such an order, it will not be implemented.

In addition, there is another safeguard for those producers who do not wish to participate. Those producers who do not believe in the program for any reason whatsoever, have an absolute right to ask for, and promptly receive, a refund of their entire assessment.

Mr. Speaker, I commend this legislation to the attention of the House and I hope that it will be possible to have

prompt hearings and early committee action on the legislation.●

## WEST BLOOMFIELD WOMAN RECALLS TORNADO TERROR

### HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. BROOMFIELD. Mr. Speaker, last Friday I had the honor of attending a ceremony at the White House paying tribute to 10 genuine young American heroes.

One of the most inspiring among them was Miss Donna Slack, a 21-year-old college sophomore from West Bloomfield Township, Mich., in my congressional district.

Donna was presented the 1976 Young American Medal for Bravery by President Reagan for saving the lives of three young brothers when a tornado ripped through their home on March 20, 1976.

Disregarding her own safety, Donna threw herself on top of the boys moments before the storm demolished their home. Her act of bravery may have saved their lives and certainly spared them serious injury.

The award was belated because President Carter discontinued the ceremony after he took office. I am certain that anyone who had the privilege of witnessing Friday's presentation and meeting these fine young people would join me in commending President Reagan for reviving this important tradition.

It offers one more opportunity for emphasizing the greatness of our country and the goodness of our people.

The following article written by Joe Cisneros of the Oakland Press, a newspaper which serves my congressional district, provides an interesting account of Miss Slack's heroism and a warm insight into her character.

WEST BLOOMFIELD WOMAN RECALLS TORNADO TERROR

Donna Slack of West Bloomfield never thought when she voted for Ronald Reagan in November that one day she'd meet the chief executive face-to-face.

Their meeting is scheduled to take place 11 a.m. Friday in the White House Rose Garden. Ms. Slack, who saved the lives of three young brothers in her charge when a tornado ripped through the township March 20, 1976, is to receive a 1976 Young American Medal for Bravery from the president.

The presidental citation is three years late in coming, but "We are very excited, very honored," says Ms. Slack, a 21-year-old Oakland Community College sophomore studying to become a certified public accountant.

She already has a citation from the Michigan State Police for her heroism. She was nominated for the medal by Gov. William Milliken in October 1977.

In presenting the award, Reagan is reviving a practice abandoned by former President Jimmy Carter. In 1978, she received a letter from then-U.S. Attorney General Griffin Bell telling her she was chosen for the award. The ceremony was delayed because of scheduling difficulties at the White House, according to letters Ms. Slack received since then.

Word came about three weeks ago from the Justice Department that Ms. Slack, the daughter of John and Carolyn Slack of Buxton Avenue, would be among 10 people recognized for acts of heroism. Her parents and a brother, John B. Slack II, will depart Thursday for Washington.

A selection committee headed by FBI Director William Webster chose the recipients from nominees selected by state governors. A Justice Department spokesman said he did not know why President Carter never scheduled the ceremony.

"If I had to wait this long, I am glad it is President Reagan that I get to meet," says Ms. Slack.

It's been five years, but "I imagine they get a little nervous when they hear the tornado sirens, as anybody would" township Police Chief Alfred McGhee says of the residents of an area near Orchard Lake and Maple roads where the tornado struck at about 7:16 p.m. that fateful March evening.

One life was lost, and 42 other people were injured; damage to residential property alone exceeded $2 million.

Recalling the "complete devastation," Lt. David Snowaert, now the operations officer at the Michigan State Police Pontiac post, says, "We were just fortunate that there were not more people killed or injured in this tornado."

Ms. Slack, who celebrated her birthday Saturday, hasn't forgotten the nightmare experience. "I can remember almost everything like it happened yesterday," she says. "It is something I will never forget."

The heroine was a 15-year-old baby-sitting for her neighbor's children, Aaron, Jason and Justin Hegedus, then 5, 4 and 3, when the life-threatening drama unfolded.

The children waited upstairs to be bathed while she went to the front door to hand over a pair of binoculars requested by a neighbor.

The exchange was never completed, as the neighbor jumped into his vehicle and sped away. The reason soon became apparent. "I looked up and saw it coming," she recalls. She tried to close the door, but couldn't. "Finally, I let it go. The lights went out and the kids started screaming. I told them to hold on to the bannister and come downstairs."

The boys—without any clothes on—had made it to a landing about two steps from the ground floor when she realized there was no time to get to the basement. "So I threw them down on the landing and lay on top of them.

"The next thing I knew I was on the lawn, 60 feet from the house. I looked over and saw that the house was leveled."

Two of the boys were still under her. The third was next to her. She said two suffered minor cuts and bruises, but Jason needed 40 stitches to close a gash on his back.

"I never thought about leaving those kids upstairs and running for the basement," she says. "I have been brought up to think of others before myself."

The children she saved now live in Milford, but Ms. Slack remains close. "They are like a second family to me," she says.●

## U.S. ECONOMIC ASSISTANCE SHOULD BE CONDITIONED ON ECONOMIC FREEDOMS AND POPULATION CONTROL

### HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. PORTER. Mr. Speaker, I strongly suspect that most Americans—as I do—upon returning home from travel abroad, feel an overwhelming sense of gratitude for the privilege of being citizens of this bountiful land. Not only do we enjoy personal freedoms unparalleled in human history and a stability and continuity of government unknown in most places on the Earth, but here we have largely eradicated the horrible diseases and hopeless poverty that overwhelm a large portion of mankind around the world.

Appreciation for what we so often take for granted, however, is not enough. Nor could the redistribution of portions of our wealth from the productive sector at home to the unproductive either here or abroad ever be enough. No transfer of wealth or resources could ever significantly impact the unbelievable poverty and problems that need correction.

What is needed, Mr. Speaker, are wholesale changes in philosophy and direction in those countries seeking our economic assistance—the same changes we are now finally making at home to emphasize those economic factors that truly lead to long-term solutions: Capital formation, education, technology, and the real productivity growth that can only come in an environment of freedom from excessive government control, regulation, and taxation.

Another factor of immense importance is the need for population control. India, for example, though its economy has grown substantially since independence in 1947, has stood absolutely still in per capita real income despite $30 billion in Western aid during that period simply because where there were previously 400 million Indians, there are now almost 700 million. Every bit of the growth has been absorbed by more people and the average Indian has not only experienced no betterment in his standard of living but, without a brake on population growth, is utterly without hope for the future. In such circumstances, economic aid should not be considered—except on an emergency humane basis—without conditions requiring actual progress in controlling future population.

Conditions requiring economic freedom and population control are absolute prerequisites, in my judgment, to success in assisting developing coun-

tries. To the extent we fail to include these conditions, we not only throw hard-earned money away without hope of real economic progress and thus shortchange our own constituents, but, with the short-sighted policies we now pursue, we continue to lead developing countries into the economic never-never land of poverty, depredation, starvation, disease, and death.●

## PRIVATE RELIEF BILL—TOLEDO MINING CO.

### HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. MARRIOTT. Mr. Speaker, today, I am introducing a private bill for the relief of Toledo Mining Co. which holds four Federal oil and gas leases in Wyoming which are about to expire, W 66245, W 66246, W 66247, and W 62250. This bill would extend those leases until 2 years after the effective date of its enactment or the termination of the period for which the leases have been suspended, whichever is later, and so long thereafter as oil and gas is produced in paying quantities.

This legislation would prevent Toledo Mining Co. from losing a potentially important oil and gas lease due to their agent's misinterpretation of the provisions of the Mineral Leasing Act of 1920. Relying on the erroneous representations of the operating company, Toledo believed that these four leases which were segregated out when the Deadman Unit was formed, would be preserved by drilling within the unit. The true effect of the segregation was that on the nonunitized lands—the four leases in question—by law, Toledo had 2 years in which to drill a well capable of producing in paying quantities prior to lease expiration. When the false statement was discovered, Toledo made efforts to bring these four leases to production, but too late. The rough terrain and weather and remote location made drilling permitting and actual operations impossible in the remaining time. Operations on the leases were suspended by the U.S. Geological Survey in order to perform the environmental assessment work necessary to approval of an application for a permit to drill. Although the operations are now suspended, when the suspension is terminated, only 48 days of the lease term will remain to complete a well—clearly, not enough time.

No administrative solution to this unfortunate situation is possible; therefore, it is up to Congress to act. Toledo is willing to invest the required time, money, and effort to drill the ultradeep well required to bring into production a potential domestic gas supply that would otherwise go untapped for several years if the leases are not now extended.

At a time when we have been pressing industry to supply us with more sources of natural gas, it seems to me this legislation makes sense. I ask that the bill be referred to the appropriate committee for consideration.

H.R. —

A bill to extend the lease terms of Federal oil and gas leases, W 66245, W 66246, W 66247 and W 62250

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. That the Secretary of Interior is authorized and directed to extend United States oil and gas leases issued under section 17 of the Mineral Lands Leasing Act of 1920, as amended, designated W 66245, W 66246, W 66247, and W 62250, and presently known as the Toledo Unit in Lincoln County in the State of Wyoming, and which would otherwise expire 48 days after the termination of U.S. Department of the Interior administrative suspension of operations and lease terms currently in effect, until two years after the effective date of this Act or the termination of the period of suspension, whichever comes later, and so long thereafter as oil and gas is produced in paying quantities as defined under the Mineral Lands Leasing Act: *Provided, however,* That except as specifically modified herein as to such leases, all other provisions of the Mineral Lands Leasing Act of 1920, as amended, shall be applicable as to such leases.

SEC. 2. The effective date of this Act shall be the date the leases specified in section 1 would have expired by operation of law, but for the passage of this Act.●

## HOW THE UNITED STATES GIVES AWAY ITS HIGH TECHNOLOGY TO THE SOVIETS

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. FINDLEY. Mr. Speaker, the September 6, 1981, issue of Parade magazine picks up on a concern which I have been stressing for well over a year now; that is, the United States, by training Soviet scientists in long-term academic programs in high technology, is harming its national security interests. My own statement on this issue is elsewhere in today's RECORD. I also wanted to include the article from Parade by Michael Satchell and again stress the importance of stemming this high technology giveaway to the Soviets:

HOW WE GIVE AWAY OUR SECRETS

(By Michael Satchell)

Today, much of Soviet military hardware and technology rivals ours. It should. A lot of it is American.

A look at the history of technology transfer to the Soviet Union reveals that in the pursuit of détente during the 1970s, we allowed the Soviets to take or buy vast amounts of superior technology—much of it having direct military application—that took us years, and cost us billions of dollars, to develop. We opened our industrial plants, research laboratories and universities to Soviet scholars, scientists—and spies. That process is continuing under the Reagan Administration.

Under détente, we supplied the technology-starved Soviets with sophisticated computer and electronics hardware. We also built entire factories and assembly-line production plants in the Soviet Union.

After the Soviet army rolled into Afghanistan in December 1979, the flow of computers and other sophisticated equipment was halted, and the State Department was ordered to clamp down on Russian scientists who were flocking here to study in sensitive areas.

However, in the 18 months between January 1980—when the embargo supposedly went into effect—and June of this year, some 450 Russian scientists and technicians have been granted visas by the State Department. They have been allowed to attend conferences or study such topics as lasers and optics, high-energy physics, computer software engineering, particle accelerators and other highly technical disciplines.

Another 77 Soviets have been allowed in for study under U.S. government-sponsored exchange programs. The New York-based International Research and Exchanges Board (IREX), which arranges scholarly exchanges between the U.S. and the U.S.S.R. and Eastern European Communist nations, placed 31 top Russian scientists in study programs for the 1980–81 academic year at such institutions as the Massachusetts Institute of Technology. Stanford, Northwestern and UCLA.

Says Sen. Jake Garn (R., Utah): "Allowing them to study high-level technical subjects is far more damaging than selling them grain. They are causing us to spend billions of extra tax dollars on defense."

A case in point: the Bryant grinding machines, which produce pinhead-sized ball bearings, vital to the manufacture of advanced inertial guidance systems for intercontinental ballistic missiles. For 12 years, we refused Soviet requests to sell the machines to them.

When the Nixon Administration extended the hand of détente in 1972, the Soviets asked again. The sale was approved, and the Russians bought 164 machines for $20 million.

At that time, the best Soviet ICBM was a nuclear blunderbuss, packing a mighty wallop but often missing its target by 3 miles or more. Today, with the help of the ball bearings made by the Bryant grinders—plus American computers and know-how—the Russian SS–18 multiple warhead rockets can hit the bull's-eye within 500 feet or less leaving our fleet of 1054 Minuteman and Titan missiles sitting ducks in their silos.

Our response? The proposed MX movable-missile system—estimated to cost up to $60 billion.

Believing the Soviets interested in massive purchases of jumbo jets, we allowed a team of 20 high-ranking Soviet scientists, engineers and KGB agents to tour the Boeing aircraft plant. According to Gen. George Keegan—head of Air Force Intelligence from 1971 to 1977—they took thousands of pictures, viewed the assembly lines, were given mountains of information and had access to secret laboratories. It was later learned that the visitors wore special shoes that picked up metal shavings to reveal

secret alloys used in jumbo jet construction. Subsequently, instead of buying American planes, they built their own wide-bodied Ilyushin jet transports and powered them with copies of Rolls-Royce jet engines made under Amercian patent.

Dr. Miles Costick, head of the Washington-based Institute on Strategic Trade, testifies regularly before Congress on technology transfer. He notes that Soviet embassy employees in Washington, including known KGB agents, are allowed to attend Congressional hearings on defense and national security. And they own computer terminals that link them to American data banks, providing instant information on new products and patents.

"With technology transfer," Costick says, "we have saved the Soviets well over $100 billion in research and development costs."●

## THE WAR ON CIVIL SERVANTS

### HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mrs. SCHROEDER. Mr. Speaker, while we were on our August break, an article of special interest to all who are interested in effective management of Government appeared in the Washington Post. I ask that it be reprinted for the benefit of my colleagues who may have missed it.

[From the Washington Post, Aug. 25, 1981]

THE WAR ON CIVIL SERVANTS

(By Murray Comarow)

There are important differences between big business and big government—differences in how success is measured, in how decisions are made, and so forth. In one obvious respect, however, business and government are alike: both depend on people to get the job done. If the employees of a company or agency are alienated and bitter, they won't do a very good job.

As any corporate executive will appreciate, including the skilled and resourceful businessmen who play major roles in the Reagan administration, this is as true for the Department of Health and Human Services as it is for General Electric, as valid for the Interior Department as it is for the Bank of America. And it is especially the case with regard to upper-level managers, the senior career people whose experience and energy get the job done anywhere.

Those top people are leaving government in droves. Since 1977, Newsweek reports, there has been a 500 percent increase in the number of top employees in the 55-to-59 age group retiring. Nineteen out of 20 workers in that bracket retired last year. NASA says most of its space shuttle team, for example, will soon be gone. Nor are those who remain moved, by and large, to extend themselves. The result is a quiet, almost unobserved government crisis of competence and commitment.

That crisis can only be understood within a larger framework: the conviction on the part of our elected officials for the past decade that government—and the men and women within it—is the root cause of social and economic problems.

Every group tends to reflect and be influenced by society's perception of it, career government people no less than blacks, Hispanics or women. As the larger population, misled by its elected leaders, scorns its servants, so will its servants react to that scorn through increasing alienation and demotivation.

Item: Office of Personnel Management Director Donald Devine recently said that Senior Executive Service members—the government's top career people—should not be involved in formulating policy. This view is not only archaic, it is destructive, for it would deprive policy-makers of the best views of their most informed staff. While final policy decisions should and would be made by the politicians and their appointees, are the polls so insecure that they cannot listen to other voices? Devine's view, while widespread in this administration, has been rejected in some agencies—Treasury, for example.

Item: A small matter of bad faith: Originally, half the SES men and women were eligible for bonuses. Now only one out of five are, Grafting a private-sector type bonus system onto a traditional civil service is not an overnight job. Allegations of mismanagement and unfairness—both warranted and unwarranted—were to be expected. Giving up on the system before it has been fairly tried would be a mistake.

Item: The $50,112 pay cap, no higher than the salaries of many subordinates, forces SES people to ask themselves why they are taking so much added heat and pressure.

I'm not sure what can be done about the mind-set of many Reagan officials—not much different from the Carter crowd, actually. But I suggest that professional organizations such as the National Academy of Public Administration and the American Society for Public Administration can do something. And the academic community can do something. That is to respond, constructively and with dignity, when a government official or the press expresses opinions or reveals "facts" that are unsound or untrue. Two examples:

1. Devine's statement about keeping top career people from participating in policy-making should have provoked protests from all quarters. It did not.

2. The stream of misleading terms ("burgeoning bureaucracy" and "ever-increasing size of government") should be countered by the Office of Personnel Management's own figures. These reveal that the ratio of government employees to the general population over the last 25 years has been fairly stable. Nor has the growth in government expenditures been out of line as a percentage of the gross national product, as compared with other developed nations.

Few senior civil servants would opt to join SES today if they had another chance to decide. Indeed, they and other senior careerists are beginning to behave like blue-collar unionists. Who can blame them? If they don't band together to protect their interests, who will? The professional societies and the academics have not.

The Carter-Reagan view of government-as-enemy is bad for this nation. While we should never act as single-minded advocates for the bureaucracy, we should be advocates for sound government. If that involves criticizing the bureaucracy, fine. If that demands resisting mindless anti-government and anti-careerist rhetoric, we should act with equal vigor.●

## 3M LANGUAGE SOCIETY ANNUAL MEETING

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. SIMON. Mr. Speaker, about a year ago I saw an item in the CONGRESSIONAL RECORD, inserted there by Senator DAVID DURENBERGER, regarding the language program of the 3M Co., of Minnesota.

I have since that time received some information from them about their program and have been most impressed.

3M is one of the U.S. corporations that is doing what every major U.S. corporation ought to be doing: Putting an emphasis on foreign languages.

And they are doing it in such a way that it is not drudgery for the employees of 3M.

My recollection is that about 750 employees of 3M are now studying foreign languages.

They have a 3M Language Society and are providing courses in approximately 20 languages.

Their program includes not only noontime classes, summer classes, and evening classes, but hosting of foreign business visitors and their families and training of personnel who will be going overseas on assignment, and translation and interpreting services.

I am inserting into the RECORD a speech made by the language services administrator, Esther F. Piper, before the Minnesota Council of Teachers of Foreign Language and a speech by Manuel J. Monteiro, vice president of European operations for 3M.

Had I known about their good work before I wrote my book on the foreign language problem, I would certainly have commended 3M as one of the most enlightened corporations in this country.

What they are doing should be good news to their stockholders and good news to Americans who want a favorable balance of trade.

3M LANGUAGE SOCIETY ANNUAL MEETING, DECEMBER 4, 1979, REMARKS BY MANUEL J. MONTEIRO, VICE PRESIDENT, EUROPEAN OPERATIONS

Thank you, Allan, and good afternoon everyone.

The Language Society has been very helpful to me in my career with 3M as often times I've had to call on them for help in translations, interpretations and in speech writing in a foreign language.

One instance in particular, is the day I was asked to give a speech to a group of Hungarians who would be visiting 3M. When I address a group of foreign speaking people, I always try to give my speech in their language. So I called on Mr. Gabor from Central Research and asked if he could help me write and give a speech in Hungarian.

Mr. Gabor asked me if I spoke Hungarian, I said no. He said, "well, you won't be able to do it." I said I could try. So Mr. Gabor translated my speech from English to Hungarian, made a tape recording in Hungarian of the speech so I could practice and also came over and tutored me prior to my giving the speech.

The speech was a success as, after I made the speech, the Hungarians said they could understand me—at least most of it.

The Language Society has assisted me in translating speeches into French, German, Spanish and Portuguese.

The 3M Language Society is a unique organization. Over the years, you have been recognized for your achievements by 3M's management and the news media. Why?

This is a group of volunteers who tackle the difficult task of learning foreign languages—and it is difficult—and it does take dedication—to extend your capabilities beyond your first language.

Even more important than the individual effort which each of you makes, however, is the fact that you are dedicated to a principle—the idea that language differences do not necessarily have to separate people. The learning of languages can bring people of diverse history and cultural backgrounds together so that they understand and respect each other.

Look at the world situation. Was there ever a time when mutual understanding and respect were needed more than now? Was there ever a time when Americans needed to hear foreign languages—and not just the European languages—more than right now?

Yet, according to the President's Commission on Foreign Language and International Studies, which issued a report a few weeks ago, Americans are grossly deficient in learning languages other than English.

Consider the facts which the Presidental Commission uncovered in its year-long investigation. Only 15 percent of American high school pupils study any foreign language, compared with 24 percent in 1965. Only 8 percent of the U.S. colleges require a foreign language, compared to 34 percent in 1966.

At a time when Americans need to be understood in the Arab world—also a time, when the Arabs need to understand us—the United States State Department can only find adequately trained linguists for 35 percent of the posts that require Arabic.

For the rest of the world, the State Department's situation in terms of trained linguists is better, but, still not good enough. Trained linguists can only be found for 66 percent of the State Department's available positions.

The Presidential Commission called Americans' incompetence in foreign languages as nothing less than scandalous. It said that the United States has developed a "moat mentality" in which the American people are looking inward to develop understanding rather than outward where language competence is absolutely necessary for the nation's security.

If there were more Americans learning foreign languages, consider the potential results. Certainly, for example, our government and its citizens would be able to improve our communications with our allies. We would be in better position to analyze the behavior of potential adversaries. We would improve our ability to earn the trust and sympathies of the uncommitted.

According to the Presidential Commission, one reason why the United States suffered a trade deficit of nearly $29 billion in 1978 was that Americans don't speak other languages well enough to persuade foreigners to buy their products.

The United States, of course, is a nation of immigrants. Yet, Americans have never excelled in studying foreign languages. And, the situation is getting worse.

Here, though, we have the 3M Language Society bucking the national trend. And, you have been doing it successfully for 13 years. To be sure, there are not many of you. The challenge is to interest millions of Americans to learn foreign languages. But, a beginning must be made and it must be made not just in our formal institutions of education, but, in businesses such as this which relate to international markets.

The situation is much like that of the child who asked his parents: "How do you eat a whale?" His parents answered almost in unison: "One bite at a time."

So, you have made a modest start in devouring the whale, not to mention all the ethnic foods you eat in the course of your activities and the food that is on the table at this luncheon. You also have made a contribution to 3M through your hosting and translation programs.

Moreover, in this, our company headquarters, you have contributed to 3M's view of the world. You have helped our people develop an attitude that regards world markets not just as extensions of our domestic markets, but as opportunities which are global in scope and unending in their potential.

For people in this country to be motivated to learn languages, they need pathfinders such as yourselves. Let people know about the personal satisfaction that each of you gets through studying languages. Communicate your enthusiasm both inside and outside of 3M.

The Language Society is a living example that learning languages need not be drudgery or something to be endured—it can and should be an intellectual pursuit to be enjoyed.

People take piano lessons even though they know that they are not going to be concert pianists. Why do they study piano? To enjoy producing music.

Why, then, can't more people follow the example of the 3M Language Society and learn world languages even though they don't intend to be linguistic experts? They can, and they should, because there is as much enjoyment in understanding languages and, through them, alien cultures, as there is in enjoying Bach, Beethoven and the Beatles.

Thank you very much for inviting me to this unique organization and your Annual Meeting.

---

### World Languages Integrated Into International Business; Minnesota Council of Teachers of Foreign Language; Esther F. Piper, Language Services Administrator, 3M

I have a Ph D in a language—what can I do with it? To rephrase the students' question, they are asking "How do we make the transition from the classroom—the academic world—to the business world?"

They soon find out that even though a person has studied a language for seven years or more—that fact, of itself, does not constitute a qualification for joining a certain company.

How do we encourage young people to study a language—with emphasis on attaining a skill—to be used in conjunction with a profession?

We must start with ourselves—as parents and teachers—to broaden some of our own ideas. For a long time it has been an unnecessarily limiting factor in the study of foreign languages, to think only of "Careers in Foreign Languages." It opens up a whole new and exciting future to think of "languages as an added skill" in any profession. We must also ask ourselves as parents and teachers—how do we make the present language curriculum more relevant to today's world of business?

It's important to have a knowledge of the classics, if we are to be well-educated, but shouldn't there also be an alternate course for the advanced language student which focuses more on business and professional needs? Some of those needs for language assistance are, of course, for:

(1) Translating a legal document on one of our product lines;

(2) Interpreting for an overseas businessman who needs to be trained on some equipment using our products;

(3) Tutoring a family recently transferred here on temporary assignment from an overseas subsidiary.

Or they could be more ordinary requests such as,

(1) A receptionist or a security guard needs assistance with a visitor who speaks little English;

(2) A secretary needs help in placing an overseas call, or answering an incoming call;

(3) A telex operator needs help with a wire to be sent overseas;

(4) An overseas family needs help in enrolling their child in an American school where no teachers speak even a few words of their language.

These and many more requests come across my desk every day.

We are mainly concerned with 2-way communication which occurs not only when we transmit ideas—but when we receive them—as well. So often we think of Americans as being the teachers, the transmitters of information—with the "foreigners" being the receivers. This is not always the case—much valuable research is being done outside the United States—and in a recent year more patents were filed in other countries than here. What a student transmits depends largely on the profession he chooses.

He could be hired in a company such as 3M and work for them for many years without ever using his language. My husband did for 12 years before we were transferred to Europe on a five year assignment when he needed this skill immediately! In 1957—language was not a consideration, and it is not the prime consideration now, but the fact that he had three years of French, two years of Latin and two of Scientific German in college helped him to do a better job.

We had two small children, we lived in Paris, Dick travelled up to 75 percent of the time throughout Western Europe, we lived in a 10 story apartment building where no one spoke a word of English and I found myself embarked on my first career in a foreign language—as a homemaker! (Luckily for me I had six years of French and four of Latin.)

We don't often think of homemaking as a career in which you would need a second language—and yet how could any homemaker perform her tasks in another country without knowing the language and something about their way of doing things and their culture as well.

The expertise in the language and the insights into European cultures which I gained, were experiences that helped me in

my second career in foreign languages—as Coordinator of the 3M Language Society and since May 1978 as Administrator of Language Services for 3M!—a staff service, part of the Personnel Department.

We hired a young lady, a new Coordinator of the Language Society. While I retain overall responsibility for both functions, this gives us the capability to expand further the scope of a program, which didn't even exist 15 years ago.

This Language Society, at 3M, is a recreational program made up of some 775 people, teaching and learning 12 languages in noontime classes. All are 3M employees—who donate their time at noon to teach their native language; others, like my husband and myself teach from our own experience of living overseas. Not all will be used in business—some people are studying because relatives still live in Europe and speak no English. Others plan to travel and will need the language unless they stay strictly in the tourist area.

3M has subsidiaries in 50 countries encompassing 22 languages—85,000 employees worldwide—of which 33,500 employees are outside the United States. It has been said that one out of every six jobs in 3M U.S. is due directly to our overseas business—that is one out of every three jobs in 3M in Minnesota.

Americans are employed overseas for limited periods of time for specific reasons such as, to aid in setting up operations or the introduction of new products or for training people. When the job is done, they come home. And we did too. However, while there, Dick put his languages to good use. Many of the people he travelled with spoke no English, so he spoke English only on Saturday evenings when he phoned home to us in Paris. (At present we have about 100 families overseas—roughly two per subsidiary.)

Normally, a person is not paid more simply because he has studied a language—but when in the course of his work—he uses his/her language to do a more effective job—promotions and raises are the natural results.

Mr. Thwaits, our President of International Operations noted that in a 12 month period there were 155 International relocations, 800 trips of 3Mers from other countries to St. Paul and 900 trips of 3Mers from St. Paul to other countries. The person working in the next office or the next lab, or the next desk might be from another country and not speak English very well. He may need training in our ways or may be here to bring new technologies to us.

In learning a language we build an awareness of others—their needs and their struggles. In learning their culture we learn to understand them, we often like them and find that we have much in common. If we are learning from them—and we know even a little of their language—we are more patient and understanding. If we each try in both languages—we have communication—and we have gained the cooperation of a colleague!

An American scientist, who speaks some Italian, can put on a much more effective, and better attended seminar in Italy—if he gives his message in Italian.

Someone unexpectedly needing an interpreter will have more patience with his visitor. He doesn't speak the languages of all the countries where he travels either.

Last year 63 3M employees translated almost a million words in 16 languages for 114 departments. To insure the best translation possible the translator should know the target language, know the idiomatic use of that language, know the culture of the country and understand the technical field in which he is translating.

We furnished 10 French speaking interpreters for 3 days to work in meetings with 60 business visitors from France in laboratory demonstrations, sales and marketing meetings for Visual Products. Those interpreters had the material to be presented more than two weeks in advance to give them time to (1) prepare the necessary vocabulary, (2) visit the laboratories and see the equipment to be demonstrated, (3) translate all the visuals that were to be used.

Each presenter had his notes in English on the frame of his visuals. He was well aware that pauses must be made for adequate interpretation time.

Tutoring Services are provided for 3M families assigned overseas, so they may learn about that country's culture, traditions and society in addition to the language. This has become a recognized asset for them since the prior knowledge of what is acceptable and how things are done in a country makes that person a more productive employee sooner, without spending an excessive amount of time adjusting to a different life style.

We also provide tutoring for the overseas 3M employee and family assigned to St. Paul. They may have learned English in their own country but due to lack of opportunity to speak it and to hear American English spoken, they are rather insecure. Until they can gain some fluency—here are some suggestions. We teach our employees when working with someone of limited language capabilities—in any country: to speak slowly, pronounce their words clearly, take the slang, the idioms out of their conversation and when asked to repeat always say the same thing in the same way.

John Marshall, director of China Affairs at 3M, said at the Minnesota Town Meeting at the State Capitol Friday, April 6, National Language Day:

"I think in a world as fragile, interrelated and interdependent, as ours is today, it behooves us all to take an interest in the countries in which we reside, and the world in which we live, to do all we can to develop our own studies in this direction, and to use our best influences to assist others."

We believe at 3M that a multinational company can be an effective instrument working toward a better world for all mankind. Again quoting from our International Operations President, Mr. James Thwaits, talking about multinational companies he said, "we are a vehicle for world peace, certainly through the free interchange of goods and services—But going much beyond that, through the person-to-person exchange of human understandings from the many face-to-face contacts that you all have with people from around the world. That's really what promotes world peace."

We offer all of our employees and their adult family members the opportunity to learn another language.

We believe that—

It is important also that you encourage your students to notice someone who needs help in a grocery or department store, hospital, at the bank or the airport—with teachers of other subjects. In any situation where they find themselves—they may have an opportunity to use their second language. Whenever they apply for work, permanent or part-time, they should list their second language experience.

With a major in a profession and a minor in languages a student should have a distinct advantage in the job market of the 1980's.

Language training is worth every effort we put into it, for it is skill, a tool that is useful all our lives—to open doors to new opportunities, to broaden our point of view, to expand our ideas, to help make you—and me—better citizens of the United States—and better citizens of the whole world!

Thank you.●

## THE FBI'S UNIFORM CRIME REPORT

### HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. ROTH. Mr. Speaker, recently released figures for crime in 1980 perpetuate the alarming increase that has plagued the Nation since the early 1970's.

Crime rose 9 percent in 1980 from 1979. There was a murder committed every 23 minutes. The FBI's Uniform Crime Report said 13 million serious crimes were reported last year, a level 55 percent higher than a decade ago.

Adding insult to injury is the fact that criminals escaped apprehension in four out of five crimes committed in 1980, with an arrest rate of 19 percent for serious crimes.

I most adamantly urge my colleagues to act swiftly and in unison to reform the criminal justice system and put an end to the war being fought every day in every corner of America.

Let us get down to business and improve law enforcement, expand the penal system and enact mandatory sentencing laws. Convicted criminals belong behind bars and not on the streets of this Nation.

The lives and property of law-abiding Americans are at stake. If ever this august body needed to act, it is now.●

## ANTI-SEMITIC ACTS: THEY MUST BE STOPPED

### HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. LEBOUTILLIER. Mr. Speaker, "Congress shall make no law respecting an establishment of religion * * *," the first amendment begins, but the overall intent of the Constitution is to guarantee a free and untrammeled exercise of religion that is free from official or individual harassment. Protection of a people—be it from foreign lands or from each other—is the elemental goal of a constitutional republic.

We have fulfilled this goal, but there are attempts to defy the spirit of our laws and social system.

A prime example of this attempt to intimidate and provoke law-abiding worshipers is found in the case of burgeoning anti-Semitism. This odious outburst of malevolent activity has been occurring with alarming frequency on my native Long Island, N.Y. There are approximately 414,000 Jewish people living in the highly populated surburban New York City counties of Nassau and Suffolk. Most of these citizens are one, two, and in some cases three generations removed from bloody pogroms and officially conducted campaigns of extermination. This region contains 15 percent of America's Jewry, but it is also the third largest Jewish community in America.

Frequent acts of synagogue desecration, violent acts committed to artifices of Jewish worship, personal harassment, and schoolyard hate-spewing have alarmed all of Long Island's community leaders. The problem is not confined to Long Island; it seems to be a national phenomenon that is on the upswing.

Because of this nationwide growth in anti-Semitic and other forms of religious attacks, my distinguished colleague from California, Ms. FIEDLER, has introduced H.R. 2394, which seeks to elevate religious desecration to a Federal crime. I became an early cosponsor of Ms. FIEDLER's bill, and I urge its speedy consideration by the Judiciary Committee. I also urge my fellow colleagues to join me in cosponsoring this needed legislation. As a nation, we will become serious about combating acts of religious desecration. We cannot legislate changes in the hearts of men; but we can mandate serious penalty if their hateful actions unjustifiably impede another's sacred right to worship in peace and security.

Adam Simms, who is the Long Island area director of the American Jewish Committee, recently authored a piece in the internationally read Present Tense magazine entitled "Watching and Waiting on Long Island." I share Mr. Simms' deep concern about the problem of anti-Semitic acts, and hope that this plague will cease.

We are a pluralistic nation. The age-old Yiddish proverb—"live and let live"—applies with great weight when seeking to deter anti-Semitic acts.

I offer Mr. Simms' article from the summer 1981 issue of Present Tense for the consideration of my colleagues:

WATCHING AND WAITING ON LONG ISLAND

(By Adam Simms)

Long Island juts like an extended crab's claw into the Atlantic Ocean eastward from New York City. Before World War II it was the preserve of potato farmers, fishermen and wealthy estate owners. But after the war, suburbanization brought many changes, including religious, ethnic and racial diversity, to its burgeoning population.

Jews are now as much a part of the Long Island landscape as commuter traffic jams and pleasure boats. In fact, most Islanders are surprised when they learn that the estimated 414,000 Jewish residents in their two counties—Nassau and Suffolk—number only 15 percent of the region's total population, but constitute the nation's third largest Jewish community (after New York City and the Los Angeles metropolitan area). Over the years, Long Island Jews have been involved in the same questions as Jews elsewhere in the country: Israel's security, Soviet Jewry, Jewish education, assimilation, intermarriage, the cults, and, on a more pleasant level, bar mitzvahs and weddings. But of late a special anxiety haunts them—the specter of anti-Semitism.

It is the weekend of Halloween in October 1980. Friday evening Sabbath services are ending at Community Reform Temple in Westbury. Twenty-year-old Ethan DeJong drives past the synagogue. He has volunteered to patrol the neighborhood to prevent more of the vandalism that has defaced his and a neighboring congregation, Temple Sholom, during the preceding month. He sights a group of teenagers spraying shaving cream on the glass entrance door. The scrawls quickly take shape: "Judes," "Jews ——," swastikas, crosses.

An auxiliary police car passes; the youths flee. DeJong gives chase. Six blocks from the temple, he captures one of them. Joseph McCloskey, a 16-year-old Westbury resident, is turned over to the Nassau County police, who charge him with harassment. Ten weeks later, following statements by McCloskey, the police arrest Donald Ostrander, also 16 years old and from Westbury, for taking part in the vandalism.

In early March, in Mineola District Court, Judge Thomas Ryan fines McCloskey $150, places him on probation for a year and orders him to perform one hundred hours of community service. The judge rejects Assistant District Attorney Edward Lieberman's request that McCloskey be sentenced to one or two weekends in the county jail. Rabbi Michael Klein-Katz, spiritual leader of the desecrated synagogue, announces that under the circumstances he agrees with Judge Ryan's decision against a jail term. "It would have only hardened him and made him . . . able to boast to his friends that he had done time," the rabbi says.

What makes Community Reform Temple's encounter with Joseph McCloskey unusual is the fact that he was caught by someone who was concerned about the property he had defaced. In other respects it is a paradigm of repeated anti-Semitic acts that have sent small tremors through Nassau and Suffolk counties since the Halloween episode.

Police department reports and interviews with police spokesmen provide some insights into the extent and nature of the problem.

The incidents began before Halloween and reached high tide at the end of November. During that period, more than sixty cases of property destruction and written, verbal or telephoned threats were reported to the police or in the press. Since December, the number has declined. The counties have recorded combined totals of twenty incidents in December, eighteen in January, ten in February, twenty-six in March and twenty-two in April.

This time-clustering is a significant factor, according to law enforcement officials and Jewish community leaders. Halloween, one night when property owners expect pranksters to do some damage (and hope it won't be much), has never been a time of special concern for the Island's Jewish community. But last year's Halloween was preceded by extensive publicity about a synagogue bombing in Paris and the worldwide protest that followed. Local anti-Semitic vandalism that began toward the end of October also was widely reported. Not long after, knowledgeable observers believe, it was mindless imitative behavior—rather than hardcore religious or ethnic bigotry—that surfaced.

Indeed, fears that political extremists, such as neo-Nazis or the Ku Klux Klan, may secretly be fomenting anti-Semitism have so far proven groundless. Deputy Inspector Kenneth Carey, who supervises the Nassau County Police Department's investigations of anti-Semitic incidents, notes that regional law enforcement intelligence networks have yet to find any direct or indirect linkage. Says Carey's Suffolk County counterpart, Detective Sergeant Howard Mandell; about his area's three known Nazis and one Klansman: "They've taken a really low profile. Our Klansman still has his sheet under his bed, but he hasn't taken it out."

Further, all the vandals apprehended by both police departments have been under 17 years old, white and male. (In one case, a 9-year-old was picked up in Smithtown on Halloween for smearing swastikas on a house, car and driveway.)

Sergeant Mandell, a former schoolteacher who says his classroom experiences with adolescent psychology have come in handy during interviews with most of the vandals caught in his jurisdiction, describes them thus: "They tend to come from a lower-middle-class background. They tend to have a ne'er-do-well mentality. They have not succeeded in what they want to do; they are looking for a scapegoat for their own failure."

Beyond this assessment, hard facts about motives remain elusive. Shaky economic conditions have historically been associated with outbursts of anti-Semitism, but Long Island has been having a modest business boom and unemployment has not risen markedly during the past year or so.

Teenage alcohol and drug use, often associated with property destruction, was pinpointed in a special Nassau County task force study as a significant factor in the 81 percent increase in vandalism of all kinds during the past decade. But based on their interviews with adolescents involved in anti-Semitic incidents, the police discount this. Few of the vandals, they say, were stoned or drunk when they committed the acts or were arrested.

Lacking a clear explanation for the anonymous, unpredictable destruction that randomly erupts, Long Island's Jewish community has, for the most part, settled into a *sotto voce* dialogue between its predominantly cool head and sometimes queasy stomach.

Some Jews, analyzing the situation objectively, believe that it is under control. They tell themselves that Jewish community relations agencies and the Long Island Board of Rabbis are doing their jobs. Local politicians and church leaders strongly denounce the acts. Police departments appoint high-ranking officers to investigate each incident. District attorneys successfully prosecute those arrested. News media report developments accurately, without sensationalism. Tough it out; let the cops and D.A.s do their work. Let the message sink in, and the kids

will put away their spray cans as soon as some other fad comes along.

But for many the sinking feeling in the pit of the stomach refuses to go away. With each new tremor it rumbles: This is no fad. Something is awry. All dreams are illusory, and the American dream is no exception. Life was good in Weimar Germany and we know what happened there. The cops may be trying, but the incidents continue. Spray cans today—pogroms tomorrow?

Still, though ambivalence ruled for a time, cool community heads have prevailed. An illustration is the way the Jewish Defense League was neutralized when it came upon the scene.

Two weeks after the Halloween incidents, a J.D.L. spokesman in Manhattan announced that his group would send "fifty to one hundred armed patrols" to Long Island to watch synagogues, cemeteries and private homes. Queried by a local paper about who had requested "protection" and who would provide it, the J.D.L. said that it had no active chapters in the area and outsiders would man the patrols. But for quite a while no patrols materialized, though dozens of anti-Semitic acts were reported in Nassau and Suffolk counties during the next thirteen weeks.

Then, in mid-February, J.D.L. founder Meir Kahane—in the United States on a speaking tour after serving a jail sentence in Israel for leading violent demonstrations against West Bank Arabs—touched down at synagogues in both counties, proclaiming that "a Holocaust in this country is very real." (Close on his heels was Brett Becker, national director of the J.D.L., who urged Suffolk synagogue presidents to organize gun clubs in their congregations to defend their property and themselves. Nobody heeded this call.)

But five weeks later, Rabbi Sol Appleman of Syosset's East Nassau Hebrew Congregation announced that he and nine other J.D.L. members, armed with semi-automatic .22 rifles, handguns and a baseball bat, had begun patrolling seven synagogues in Nassau County. Introduced with an eye toward the headlines—an improvised target shoot in a temple meeting room was staged for the benefit of an inquiring reporter—the guns were put away and the patrols suspended after Inspector Carey met with the rabbi to inform him that there are laws against bearing arms in a threatening fashion.

The rest of the Jewish community, especially rabbis of the synagogues to be "protected," heaved a sigh of relief. Their militant colleague had not informed them of his plans; they had learned about their would-be champions from newspaper reports.

Otherwise, the J.D.L.'s appeals fell on deaf ears, for the Jewish community realistically decided that loutish teenagers, and not professional bigots, are the vandals. To adopt "machismo-at-Masada" postures, Jewish leaders felt, would be a wild over-reaction. Long Island Board of Rabbis president Simon Resnikoff expressed the general consensus when he observed, shortly before the J.D.L.'s hasty retreat, that people bearing arms send a signal that "They are ready to wage a war. Nobody is firing at us. The police have been doing a very good job, and this action tells the world that we are panicking."

Panic has not taken root, largely because most of the Jewish community believes that public agencies are most effective in halting incidents, reasserting accepted standards for adolescent behavior and quarantining residual contagion. Vigilantism, they agree, is not the way.

Inspector Carey and Sergeant Mandell are making it clear that the first line of defense is vigorous law enforcement. They give many overtime hours to discussions with Jewish and general community groups and the press, getting across the message that their departments investigate each incident with the thoroughness due felonies such as rape and burglary—despite the fact that under current statutes most of the vandalism qualifies as, at most, misdemeanors.

Noting that Newsday, the area's major daily newspaper, usually links stories of new incidents to reports of arrests, Mandell declares that "If other kids read about it, that has a far-reaching deterrent value. It also sends a message to the real [adult] bigots, who would like to 'do it the right way,' that maybe it's not the time for them to do their thing."

As to whether teenage vandals will change their attitudes as well as their behavior, he is less sanguine: "They'll learn to stifle their animosities. They can sit around their houses and talk about ethnic groups, but they can't go out in the streets and do it. We're not going to change their basic attitudes. I'm not a social worker, and their parents and the school system haven't done an effective job of teaching them proper values. So I teach them in a different way that you can't go out and pick on your neighbor for his values."

Until recently, schools had been reluctant to take on the problem of adolescent prejudice and vandalism. But as some students increasingly used school property as billboards for swastikas and ethnic and racial epithets, some school districts began to act. Several officials in Long Island's approximately 150 school districts have set out to demonstrate that their schools are equipped to form and change attitudes among students and to contribute to the security of their communities. Their main focus is the intergroup relations program.

Of all the programs planned or under way, perhaps the most ambitious is the one in Great Neck. It grew out of a vicious graffiti attack three days before Halloween which defaced the entire front and one side of North Senior High School with swastikas and "KKK" daubings. This vandalism, reported throughout the New York metropolitan area, deeply shocked Great Neck residents, who are proud of their school's excellent record and the community's religious, racial and ethnic mix. They turned to North Senior High's administration and staff for response and reassurance, correction and catharsis.

SHARE Day (an acronym for "Stop Hatred And Respond Effectively") was the first step. On December 11, classes at the now sandblasted high school were replaced with more than 150 workshops on the nature and dynamics of prejudice. Parents and other adults who wanted to join in this demonstration of concern were invited to come in the evening for a public discussion resolving misunderstandings and tensions.

SHARE galvanized support among members of the school board, administration and staff, and the local citizenry for a proposal to launch a "prejudice reduction" project. Under the plan, the community's educational establishment—from pre-kindergarten through its adult program—is expected to provide coherent focus and direction for community activists who, until recently, found it difficult to coordinate their organizations' efforts to deal with local problems of prejudice and tension.

On February 24, 1981, members of the Religious Fellowship of Westbury join congregants of Community Reform Temple in court as Joseph McCloskey is sentenced. The Fellowship has issued a statement that anti-Semitic vandalism is a societal issue, not a Jewish one; among the signers are representatives of local Baptist, Quaker, Catholic, Methodist and African Methodist Episcopal churches.

Ironically, Joseph McCloskey brings the Fellowship together following a period of inactivity. Soon after, the group sponsors an interfaith seminar and takes part in a Passover seder at Temple Sholom. Rabbi Michael Klein-Katz sees the religious leadership's response as an encouraging sign—but he recognizes that interfaith dialogue, presently in the province of the clergy, does not run very deep in Westbury. He doesn't know how many of his congregants, or members of Christian congregations, would participate if a grassroots dialogue were proposed.

East Meadow's school district, where Joseph McCloskey is a high school student, has been hesitant about following Great Neck's example, even after Rabbi Klein-Katz approached district officials about this.

On May 7, Daniel Ostrander, like McCloskey, was fined $150, placed on a year's probation, and ordered to perform 100 hours of community service. In lieu of the two weekends in jail requested by District Attorney Lieberman, the judge required that Ostrander devote twenty hours to studying about the Holocaust. And in an unrelated case on the Island, another teenager who had painted a swastika and the word "Jew" on the house of a Lake Ronkonkoma Jewish family, was sentenced to six months imprisonment.

The unarmed patrols go on at Community Reform Temple. Members of the synagogue have approached the neighborhood civic association about expanding the area covered, to help deter frequent residential burglaries. The association indicated interest, but hasn't followed up vigorously.

There hasn't been anti-Semitic vandalism at Community Reform since Halloween night. Things appear to have quieted down in Westbury. People are watching. And waiting.●

## EXPIRATION OF EMERGENCY PETROLEUM ALLOCATION ACT

### HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. BROWN of Ohio. Mr. Speaker, last week the Subcommittee on Fossil and Synthetic Fuels held 3 more days of hearings on whether to grant the President any new price and allocation authority over petroleum once the Emergency Petroleum Allocation Act expires on September 30. As the ranking Republican on the subcommittee, I have been permitted the opportunity of making opening remarks. I insert these remarks in the RECORD at this point:

REMARKS OF THE HONORABLE CLARENCE J. BROWN BEFORE THE SUBCOMMITTEE ON FOSSIL AND SYNTHETIC FUELS, JULY 28, 1981

POST EPAA AUTHORITY

Mr. Chairman: I would like to begin by thanking you for convening this hearing and join you in welcoming Kenneth Davis, the Deputy Secretary of Energy, to the Subcommittee.

Mr. Chairman, I know of your efforts to have the DOE testify here today, and once before on July 14. I understand that DOE was reluctant to testify prior to the President's final decision on legislation to succeed EPAA. As you know, the President has now made his decision that no new authority is necessary.

I, for one, am delighted—at the President's position and at the willingness of the Deputy Secretary of Energy to share the Administration's position with us today.

As my colleagues know, the Emergency Petroleum Allocation Act of 1973 expires on September 30 of this year. And with it, will expire the authority of the President to control the prices and the allocation of crude oil and petroleum products: the tried-twice and failed-twice ideas of the past. Controls on prices and on allocations were in effect during both the 1973 oil embargo and during the shortfall in 1979 precipitated by the Iranian revolution. Both times, the evidence now clearly shows, these Federal regulations made matters worse.

But more importantly, the expiration of EPAA will come at a time when this nation is far more prepared to weather an energy emergency than ever before. Let me explain.

According to today's Washington Post, the Strategic Petroleum Reserve was filled with a record 16 million barrels of oil during the month of May, an average of 513,000 barrels a day. The SPR office at DOE has informed me that, in June and July, the average daily fill was over 400,000 barrels a day, not as great as May, but a far cry from the previous rate of fill during the previous Administration—which only under Congressional pressure brought the rate of fill from zero barrels a day to 100,000 barrels a day.

But the Strategic Petroleum Reserve is not our only—and by no means our largest—stockpile of oil. According to the latest survey of the Department of Energy, total private and public reserves of oil are an incredible 243 days of full import oil replacement—that means that if a shortage hit us today, we could, conceivably, continue to consume at the usual rate of 5 million barrels a day for eight months. Naturally, we would not consume this stockpile that fast, since prices would rise eliciting greater conservation, thereby stretching out our available stockpiles even longer. Nor could we exhaust all of this inventory without literally drying up every pipeline in the country. But, it is an academic point to debate exactly how long we could stretch these supplies; the important point is that we have them.

We did not, however, have a Strategic Petroleum Reserve when we wrote the EPAA. We did not have 243 days of full oil import replacement when we wrote the EPAA. So, perhaps, when we wrote the EPAA we had the excuse of, if not ignorance, then innocence, or if not innocence, then an overconfidence in ourselves and in the Federal government.

We have none of these excuses today. We ought to be wise enough now to watch September 30 come and go without making the same mistakes we made before.

I realize that it may be asking too much to ask a legislative subcommittee not to legislate, but we must resist every temptation. Because if we do begin to legislate, we will find ourselves with a bill on our hands remarkably similar to EPAA. Even if we were to have each member of this Subcommittee sign a blood oath, sooner or later along would come a series of amendments to put this group of energy users ahead of that, one region ahead of another, and one type of refiner ahead of another. We could not, in my judgment, stop this process from happening.

How can I be so sure that any bill, no matter how simple, is pre-destined to evolve into another complicated EPAA, with a long and growing list of priorities? Because that is exactly what happended to EPAA itself.

Mr. Chairman, if you and my colleagues would permit, a short history of how we first got into price and allocation controls might shed enough light to keep us out of the dark this time.

During the Arab Oil Embargo in 1973, the price controls on petroleum—imposed under the Wage and Price freeze pursuant to the Economic Stabilization Act of 1970—turned a modest decrease in world oil supplies into a major product distribution crisis in the U.S. Because prices were unable to rise under the price controls, a "shortage" led to long gasoline lines and new legislation, the EPAA. Since the price freeze authority had failed, it was believed by many that a scheme of general price and allocation regulations would solve a future crisis and also help to keep consumer prices low.

This is a copy of S. 1570, introduced by Senator Jackson on April 13, 1973, entitled "The Emergency Fuels and Energy Allocation Act of 1973".

It was four pages short.

It granted broad discretion to the President to allocate crude oil and fuels but only when he declared that an "extraordinary shortage or dislocation" existed or was imminent.

It contained not one priority classification although it stated that such protection was within the discretion granted to the President.

It contained no price control authority.

It was due to expire September 1, 1974.

That bill grew into what was passed in November of 1973, the Emergency Petroleum Allocation Act, the EPAA. And the EPAA contained a certain section chock full of priority classifications, section 4(b)(1). I could read off this list, but I know my colleagues are familiar enough with all the various interest groups which won—or didn't win—a priority over other users.

But let me point out that the two major groups not provided for are: (1) the average American automobile driver; and (2) the average American heating oil purchaser.

The EPAA, as originally passed, did not work as we planned. The shortages, the gasoline lines and the frustrations of our constituents were not being remedied, they were being compounded. We couldn't, evidently, legislate the shortages to fit our preconceived plan. But that did not stop us.

So we amended the EPAA time and again. We prevailed upon the Executive Branch, under both Republican and Democratic Administrations, to "improve" its regulations. Create a new department! Create the Office of Hearings and Appeals!

And the regulations poured out of the Federal Government. And the appeals from our citizens poured into the Government. Middleclass America was sitting in gas lines, but K Street in Washington was swarming with Energy Lawyers. The Economic Regulatory Administration received 110,000 applications for motor gasoline allocation adjustments.

These volumes consist of 80,000 pages of Hearings and Appeals decisions—only a fraction of the total of 33,000 decisions. But all of this only indicates the burden on the Federal Government as it attempted to adjust these regulations in the real world.

The burden on the private businessmen was far greater. The Office of Hearings and Appeals case files of applications for exception relief and enforcement cases fills 27 standard 5-drawer filing cabinets; 9 larger shelf cabinets; and 573 record boxes. Most of this paper was prepared by private attorneys at great expense to the applicants—thousands of whom were gasoline station dealers.

From the relatively concise, discretionary program of the original EPAA—which would be "temporary, only temporary"—came reams of regulations, eight years in existence.

And somehow, over the course of eight years, the "emergency" stayed with us. Why? The reason was the EPAA itself.

With domestic crude oil prices kept below world prices, U.S. consumers paid less for petroleum products. However, they also conserved less. U.S. producers produced less because of the lower prices. Imports, therefore, rose substantially as the price of imported oil was subsidized at the expense of domestic supplies. Total imports increased by one-third between 1974 and 1979—despite an increase in Alaskan production of 1.2 million barrels a day.

Mr. Chairman, I voted for the original EPAA. I signed the Conference Report. I crossed my fingers, but my sincerity did not help.

I am firmly convinced that we cannot reconsider the EPAA without re-creating the EPAA.

Let us concentrate on the pleasant news that we now have a record inventory of private and public oil stockpiles of 243 days of full import replacement. That is a remarkable achievement. We now have a Strategic Petroleum Reserve being filled at a rate more than four times greater than the rate we mandated last summer in the Energy Security Act.

We are, therefore, in a far better situation than we were in 1973. We no longer have the excuses of ignorance or innocence. So, I prevail upon my colleagues to support the Administration's position.

Thanking each of you for allowing me these somewhat long—but I hope, helpful—remarks, I welcome Kenneth Davis of the Department of Energy.

Thank you, Mr. Chairman.

---

STATEMENT OF THE HONORABLE CLARENCE J. BROWN BEFORE THE SUBCOMMITTEE ON FOSSIL AND SYNTHETIC FUELS ON THE EPAA, SEPTEMBER 9, 1981

Mr. Chairman, at the last EPAA hearing which was held on July 28 by this subcommittee, I believe I made clear my opposition to any new price and allocation legislation. My colleagues were gracious to allow me a good bit of time on that occasion, so I will be brief today.

Price and allocation controls on petroleum during a sudden severe curtailment in supplies are worse than ineffective—they are damaging. The mere prospect that price and allocation controls will be implemented in

an emergency discourages the stockpiling of crude oil and products—because of the fear that Uncle Sam will steal stocks from the prudent ant and give them to the grasshopper. Also, price controls discourage prior buildup and timely drawdown of private inventories.

Price controls will also keep consumption up and create a shortage of demand over supply. Finally, allocation controls will have the Department of Energy in Washington again distorting the supplies of fuel, such as sending residential heating oil to farmers, or commuters' gasoline in Ohio or New York to Florida vacationers.

It is time to realize we were wrong in 1973 when we passed the EPAA and again in 1975 when we extended it. Why are there those who insist on renewing these tried-and-failed tools of big government? Are all the special interests so powerful that it is only the consumers' long term interests that are sacrificed?

Adoption of a "no allocation bill" policy by the administration does not mean that the Federal Government does not have a role in some future sudden cut-off of foreign oil supplies. On the contrary, the Federal Government already has numerous powers to deal with energy and national security emergencies. Our best single defense is the strategic petroleum reserve, which thanks to the Reagan administration, is being filled at over 400,000 barrels of oil per day. In his first year in office, President Reagan's administration will have doubled the crude oil in SPRO to over 220 million barrels.

Private stocks are also critical to the Nation's ability to adjust to sharp fluctuations in crude oil imports. The recent provision in the Economic Recovery Tax Act which permits 5-year depreciation and investment tax credit treatment for petroleum storage facilities is a proper step in the direction of positive Government support for rather than discouragement of—private inventory building.

But I do not believe that it is sufficient for the administration to simply say that the free market is the best allocator of petroleum during a crisis and then expect the Congress to obey. The bad tradition of turning to price controls and the enormous power of special interests must not be simply brushed aside. The administration must work to educate the Congress and the public that its position is both intellectually and practically the best alternative.

The administration must also educate the Congress of its awareness that it has a role in the management of a petroleum crisis.

Nor do I believe that the Federal Government can close its eyes to the plight of the truly needy during a petroleum interruption in which prices may rise and discourage consumption. I have no reluctance to seeing social policy questions addressed as long as we separate our energy policy from our social policy.

In sum, I urge my colleagues to listen carefully to the parade of special interests before us this week, and think carefully about not what will be the best for the slickest lobbyists, but what will be the best for the American people and the economy as a whole.

I introduce into the RECORD a letter which my colleague, the gentleman from North Carolina, Congressman JAMES BROYHILL, and myself wrote to President Reagan on September 9, 1981, with respect to the administration's position on price and allocation legislation. Today, we received President Reagan's response which I would also like to include in the RECORD at this point.

The letters follow:

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
*Washington, D.C., September 9, 1981.*

The PRESIDENT,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: As Republicans who have long been opponents of price and allocation controls, we applaud the Administration's position of opposition to the enactment of any price and allocation authority to replace the Emergency Petroleum Allocation Act of 1974 (EPAA), which expires on September 30, 1981.

As you know, the EPAA grew out of the Wage and Price Guidelines as the Federal solution to the Arab Oil Embargo of 1973-74. During the period of price controls, the United States conserved less, produced less, and imported more petroleum at higher prices than it would have without such controls. Furthermore, twice during the seven years of price and allocation controls on petroleum, the Nation experienced major gasoline lines from minor shortfalls in crude supplies. We firmly believe that price and allocation controls will be as inequitable and unworkable if imposed in the future as they were in the past.

Notwithstanding what we understand to be your clear and unequivocal position in opposition to any extension of the Emergency Petroleum Allocation Act, there are many Members of the House and Senate who appear undecided on this issue. Moreover, in the absence of any formal statement from the White House, there are a number of Members who are prepared to pass new price and allocation legislation without any Administration input. A number of bills have already been introduced. As the September 30 expiration date approaches, Chairmen in the House and Senate may be under increasing pressure to act on emergency price and allocation legislation.

We are concerned that unless your Administration makes a strong statement of its opposition to such legislative initiatives, we may not be able to block the extension of price and allocation control authority on your behalf. We, therefore, believe your timely and unequivocal statement on this matter is needed as soon as possible.

Sincerely,

JAMES T. BROYHILL,
CLARENCE J. BROWN.

---

THE WHITE HOUSE,
*Washington, D.C., September 14, 1981.*

Hon. CLARENCE J. BROWN,
*House of Representatives,*
*Washington, D.C.*

DEAR BUD: I know that you and Jim Broyhill have worked hard over the years to eliminate unnecessary Federal regulation of energy. As the expiration date of the Emergency Petroleum Allocation Act approaches, I want you to know that I fully share your opposition to any extension of allocation and price control authority.

Experience under the existing law has taught us that rather than ensuring equity, allocation and price controls simply make a bad situation worse. As you noted in your letter, allocation and price controls have turned minor shortages into major gas lines twice in the past seven years.

My Administration is fully committed to preparing for and protecting against oil supply emergencies. The Strategic Petroleum Reserve will acquire more oil this year than in the preceding four years. The Department of Energy undertook an internal reorganization to focus responsibility in a new Assistant Secretary for Emergency Preparedness. Working with other affected agencies and taking advantage of the numerous legal authorities that will remain in force after September 30, DOE is developing careful plans that will encompass a broad range of emergency response measures.

In closing, I would like to thank you and Jim for your strong support.

Sincerely,

*Ron.*●

---

## TRIBUTE TO CHARLES L. KMEN OF CICERO, ILL.

### HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. HYDE. Mr. Speaker, the Life newspaper in my district recently published a short article about a very courageous constituent of mine, Mr. Charles L. Kmen of Cicero. For the past 25 years, Mr. Kmen has been paralyzed and confined to an iron lung but despite his handicap he has kept an active mind and particularly enjoys writing.

One of his hobbies is writing songs and among them is a march for his hometown simply entitled "Cicero."

Mr. Kmen, an Air Force veteran, is a "profile in courage" and deserves our congratulations and best wishes. I am pleased to share the following article about him with my colleagues, as well as reprint his song "Cicero":

[From the Life, June 28, 1981]

RESIDENT WRITES MUSICAL TRIBUTE TO CICERO

(By Susan Saccaro)

He has been completely paralyzed for 25 years and confined to an iron lung, but that doesn't stop Charles Kmen from using his mind, his last active resource, for learning about the world around him, a world greatly limited for a victim of polio.

A resident of Cicero, the 51-year-old Kmen has written a march honoring his home town. The lyrics were submitted to Morton High School for arrangement, but rejected as school funds could not cover the expense.

"To arrange the piece so that it is playable by a band requires a great deal of time, expertise and expense," states a letter sent to Kmen from Joseph Frantik, head of the fine arts division. "Our budget does not permit us to undertake this type of project, and the members of our music faculty are not professional arrangers."

The Ciceronian is hoping to find someone who will volunteer to arrange the score, he said, as he can create a melody but does not write music.

"I kind of figured I'd write something about the town," Kmen said. "Nobody else did it before, so I thought I'd try."

Kmen said he has 18 other songs copyrighted, and wrote his daughter's wedding march in 1974.

"It's kind of like a hobby," Kmen explained. "I can hum it, then I find someone who can put it in note form."

One of his latest efforts, a hymn entitled "What Have You Done That Was Good?", was played after a Mass in Our Lady of Charity Church, 3600 S. 57th Court. Organ music for the hymn was provided by Robert Valenta, while lyrics were sung by Lynn Macejek.

But the Ciceronian's talents are not limited to musical creativity, as he has tried his hand at a manuscript as well. Kmen spent eight years working on a 26-chapter book entitled "Sentenced to Live."

"The publishers just weren't interested," said Kmen, adding the piece was rejected by the 40 publishers who were sent copies. "I still have it yet. It's like a record of what happened to me. The grandchildren can read it someday."

In his writings, Kmen attempts to explain the pain and pity of polio, he said, and how the physical results affect the victim in other ways.

GLAD TO BE ALIVE

Though there were times the polio victim said he wanted to die because of the pain, he is glad he survived it, adding, "Now I got to see my grandson."

Bryan Charles Gerdzunas is Kmen's only grandchild, born of his only daughter, Kimberly. His daughter was 1-year-old when Kmen became one of 1,100 Chicagoans afflicted with polio.

"You're locked in your flesh," Kmen said of paralysis. "You can't move, but your mind is active."

An understatement, to be sure, as Kmen's mind is constantly creating ideas, though his motionless hands cannot put them on paper.

"When I get a thought, either my wife writes it down or someone else does," he explained. "I'm looking for volunteers who could help me write my dictation or help with simple sketches to put my ideas on paper."

The sketches the Air Force veteran refers to are designs for toys he has thought up, along with "different gadgets." Kmen said volunteers are "the hardest thing to find. People are always so busy." He would also like to find some retired men with whom to play cards.

The amateur songwriter, author, inventor loves to go out for car rides, but even that is a rare treat since it takes two men to get him and his wheelchair into a car, he explained. But despite the physical restrictions given to him by an invisible enemy, Kmen continues reading, learning and creating, making the most of the one thing polio didn't steal away; his mind.

CICERO

Cicero, hey, Cicero, say
Cicero, a town you should know
A good suburb of Chicago
Hard working people left their past
Built town and industry to last
Cermak Road, the lake's a stone's throw
This new land to house more peasants
Once violets prairie for pheasants

(*Chorus*)

We are the new generation
Proud graduates of Morton High
Progress of our town's children
Have their own college right nearby
Basketball, baseball champions
We're part of future Midwesterners
Ethnic group's family ties are strong
Ciceronians get along.●

## SOUTH AFRICA AND SOVIET UNION: ODD PAIR ON MINERAL MARKETS

### HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. SANTINI. Mr. Speaker, as you know, I have warned the Members of this House for the last several years of our vulnerability with respect to the supply of strategic and critical minerals from southern Africa. On August 4, 1981, the Washington Post published an article linking the Soviet Union and South Africa in the strategic minerals trade.

In light of recent political events in this area involving South Africa, Namibia, and Angola as well as troops from both Cuba and the Soviet Union, one cannot deny the existence of dangerous instability in this region that is so critical to our mineral well-being.

It was with great alarm that I read of the cooperation between the Soviets and the South Africans in minerals marketing. This is especially disconcerting when one realizes that the Government of South Africa, the Saudi Arabia of strategic minerals, is strongly anti-Communist.

For the convenience of my colleagues who may not have had the opportunity to read this article, I include this article, "South Africa and the Soviet Union: Odd Pair on Mineral Markets," in its entirety in the CONGRESSIONAL RECORD.

[From the Washington Post, Aug. 4, 1981]

(By Caryle Murphy)

JOHANNESBURG.—Each year in carefully concealed movements, thousands of carats of rough diamonds from Soviet mines in Siberia are transferred to vaults owned by a South African-run enterprise based in London. In exchange, the Soviets are paid millions of dollars by the South Africans.

This diamond connection between two of the world's bitterest enemies, who are also through a twist of geological fate two of the largest treasure-troves of precious stones and strategic minerals, is part of a series of secret and regular contacts between South African businessmen and Soviet officials.

Some of the contacts, the best documented ones, involve South African marketing for Soviet diamonds. Others reportedly are aimed at sharing information about mining technology and the marketing of certain strategic minerals in addition to the diamonds.

As the major competitors on the Western market for such important commodities as gold, coal, asbestos, iron, manganese and platinum, Pretoria and Moscow share a common interest in seeing a high or at least a stable price for these products, vital to both their economies. So despite their ideologic distaste for each other—and Moscow's support for economic sanctions against South Africa in international political forums condemning apartheid—calmer and friendlier relations prevail in the discreet world of international finance and business.

It would be going too far to say there is collusion between South Africa and the Soviet Union to fix mineral prices, especially in the case of gold. But their covert contacts undoubtedly provide them both with valuable information and contribute to what financial people like to call "orderly marketing."

Diamonds are forever and the South Africans would like to market them for everyone forever. For decades, maintaining a controlled world supply of diamonds has been the prerogative of De Beers Consolidated Mines. This is the diamond section of Harry Oppenheimer's Anglo-American Corp., the world's largest mining empire headquartered on a quiet, tree-lined street in this city's financial district.

For many years the Soviet Union, second-largest producer of gem diamonds in the world, had an open contract with the London-based, De Beers-controlled Central Selling Organization to market their diamonds. Although this was abrogated in 1963 for political reasons, a working relationship still exists.

European diamond dealers buying from "the syndicate," as the Central Selling Organization is also called, say they find Soviet gems in their purchases. Oppenheimer has privately told people here that his cousin Philip Oppenheimer, who heads the Central Selling Organization, regularly travels to Moscow and that De Beers executives meet the Soviets in London. Earlier this year a British Broadcasting Corp. "Panorama" television program told how a Soviet delegation visited the South African diamond mine in Kimberley and how Oppenheimer had dined in London with Boris Sergeev, deputy president of the Soviet diamond and platinum marketing organization in Moscow.

The Soviet Union is not the only ideological foe of South Africa to deal with the Central Selling Organization. Marxist-run Angola, which is virtually at war with South Africa because of its support for anti-Pretoria insurgents in Namibia, also sells its diamonds through the group's pipeline.

Mining and Technical Services, a Liberian-registered company whose board has several directors formerly associated with De Beers, has recruited expertise and technological aid since 1977 to help the Angolan diamond industry recover from its disruption during the civil war there in 1975–76, according to a British diamond expert, Timothy Green.

It was at the Bolshoi Theatre in Moscow that the curtains were accidentally raised on other acts in the Kremlin-South African connection. In the audience watching a performance of the opera "Boris Godunov" one night last November was one of Oppenheimer's right-hand men, Gordon Waddell. As chairman of Anglo's Johannesburg Consolidated Investments, Waddell directs operations of the world's largest platinum mine. A former son-in-law of Oppenheimer, Waddell is also on the four-man Operating Committee that makes top day-to-day executive decisions for the Anglo American Corp.

Waddell was accompanied by another Anglo executive and two unidentified Soviet officials. He told an inquisitive BBC reporter who spotted him that he was "just passing through."

"I would find that explanation quite difficult to believe," said William Gutteridge,

professor of international studies at Birmingham's University of Aston and an expert on Soviet-South African relations. "You don't just pass through Moscow and get good seats at the Bolshoi ballet by accident," Gutteridge said in a telephone interview.

South Africa and the Soviet Union supply 95 percent of the world's platinum. South Africa's major mines sell on long-term contracts. But the Soviets, who produce about one-fifth of what South Africa does, sell their platinum on the free market. A tacit agreement for the Soviets not to accept a free-market price substantially under the South African contracted prices would be in the long-term interests of both parties, observers note.

"You've got to have some kind of marketing arrangement," said one South African trader commenting on Waddell's presence in Moscow.

It would not be the first time Waddell met the Soviets. Each May in London's Savoy Hotel, platinum merchant Barry Salter brings together about 200 of the world's major platinum producers and consumers. The Soviets and South Africans are among the guests quaffing quality wine and talking shop.

Gutteridge says that he also knows of at least one secret meeting two years ago between Soviets and South Africans in Oslo during which the Soviets told the South Africans they were temporarily dropping out of the platinum market.

"There are some cases too, for example in chrome, of the Soviet Union indirectly contacting South Africa on prices," he added. But "the evidence on platinum is pretty clearcut . . . I would not be surprised if they are not also discussing mining and refining techniques."

While there is no evidence of direct discussions on gold sales between the two countries, which together supply 80 percent of this precious metal, there are ample opportunities through intermediaries to learn about each other's intentions.

The South African Reserve Bank, which last year sold more than $10 billion worth of gold, and the Soviets' Zurich-based Wozchod-Handelsbank deal with the same bullion dealers and Swiss banks. In addition, Anglo-American owns 29 percent of the London-based Consolidated Gold Fields, a gold-mining finance house that besides owning profitable gold mines in South Africa is regarded as the expert source in the West on Soviet gold production.

The company's executive director, Michael Beckett, visited Moscow for discussions with Soviet officials last September that he said were to gather information for his company's annual bullion survey and to discuss gold mining technology. He also acknowledged that his company regularly speaks with officials of Wozchod-Handelsbank.

Christopher Stolz, senior deputy director of the South African Reserve Bank, agrees his country and the Soviet Union "have common interests in marketing operations of gold" that could lead to similar sales policies. But he denies any formal or informal discussions.

The bank does, however, "get a lot of information, quite good information sometimes" on Russian sales through banks and dealers used by both countries in New York, Frankfurt, Zurich and London, Stolz said.

Ian Wright, a former executive of Consolidated Gold Fields and now a London stockbroker specializing in gold, said in a telephone interview that "the strings or ties between the Soviet Union and South Africa are very slender indeed, but I'm quite sure some kind of link has been made."

Wright speculates that any tacit agreement might be along the lines of agreeing on a floor price below which both countries would not sell. Such an agreement would be all the more useful now than in the past due to what Oppenheimer calls the volatility of the gold market.

As Communists who pride themselves on their anti-South African posture in international bodies, the Soviets appear more embarrassed by the publicity of these contacts than the South Africans. but they have not been as adept as the South Africans in denying them.

Anatoli Gromyko, head of the Soviet Africa Institute, told a Swiss newspaper that asked him about Soviet ties to the Central Selling Organization: "The Soviet Union has contacts with the cartel which deals in diamonds, which is not to be confused with official government ties with South Africa."

And when a BBC team questioned the Soviet deputy ambassador to London, Vladimir Bykov, about Oppenheimer's meal with Sergeev, Bykov replied, "Harry Oppenheimer is an international businessman. I assure you that our representative when he talked to him, he talked to him as a businessman, perhaps from Britain or the U.S., not like to a South African."

"There is no cooperation at all," Oppenheimer said last May in Frankfurt when asked about the Waddell excursion to Moscow. "There are common interests obviously in these markets and naturally both sides try to know what the other is doing. There are no agreements. Perhaps it would be better if there were, but I'm afraid there are not."

Waddell did not attend Salter's platinum lunch this year. When a rival South African platinum producer, Sidney Newman of Lonrho, playfully broached the subject of Waddell's visit to Moscow, Soviet trade official Eugene Manakov shouted from his seat, "He was at the Bolshoi," according to a participant at the lunch.

At this, grins and chuckles bubbled over in the Savoy's dining room.●

# HOUSE OF REPRESENTATIVES—*Wednesday, September 16, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O gracious God, we ask Your favor on all those who labor in this assembly that the opportunities to serve You will be known and thus bring a measure of justice to people everywhere. Give us strength and diligence not only for the tasks near at hand, but also enlighten us to see how we, even in seeming small measure, can do those things that keep bringing purpose and meaning to people in our land and in the world. Give us the zeal and determination to do the things that make for peace so we can live with one another without threat, but with trust and respect, recognizing that we are all created equal in Your sight, blessed by Your providence and guided by Your Spirit. This we pray. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

## CONGRESSMAN STRATTON OFFERS BILL TO END DEFICITS WITHOUT MAKING FURTHER CUTS IN EITHER DEFENSE OR SOCIAL PROGRAMS: H.R. 4487

(Mr. STRATTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRATTON. Mr. Speaker, we are all aware that there is a crisis in Washington because of the unwillingness of the financial community to bring down interest rates because of continuing budget deficits. There are a number of suggestions now being made with respect to how to deal with this serious economic problem. One group says we should cut more deeply into defense. Another group says we should cut social security and a third group says we should go back and cut some of the social programs. Some people have even suggested putting the bankers in jail. All of these approaches would obviously be disastrous. Yet the Director of the Office of Management and Budget tells us that we need some $70 billion of additional revenue in order to get the Reagan program into balance.

Well, yesterday I introduced into the House H.R. 4487. This is a relatively painless solution to our problems. It provides for a reduction in the personal income tax rates in the Reagan tax cut legislation now on the books from 25 to 15 percent. This change will produce an estimated $65 billion of revenue. By passing this bill we will not have to cut defense or social security, or undertake further cuts in our domestic programs.

My bill does not tamper with any other feature of the tax cut legislation, including the stimulative cuts provided to business.

I urge Members to join me in cosponsoring this legislation, so that we can have a viable alternative to damaging budget cuts.

## A HECK OF A WAY TO RUN A RAILROAD

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, there is an old phrase, "That's a heck of a way to run a railroad." A lot of people are feeling that way about their rail service today.

Many of our communities will never hear another train whistle. Unfortunately, many railroads in this country, including the one that operates in my State, are quietly abandoning our towns. They are forming holding companies. They are abandoning branch lines and they seem to have more interest in their mineral, timber, and other interests, than they have in running their railroad.

I think it is time to get the railroads back on track. We gave them massive amounts of property to run that railroad. Now they want to keep the property and abandon the rail service.

I intend to use every handle I can to fight these railroad actions. I have the Congressional Research Service doing a study to determine what our remedies are; but I want this Congress to know that I am going to use every legislative and legal remedy available to reclaim land and minerals given these railroads when they abandon service and I will continue to fight the formation of their holding companies.

Most companies try to structure their service to attract the customer. The railroads structure their service for their own interests and they tell the customer that this is the way it is. It is a heck of a way to run a railroad and we do not have to sit quietly by and take it.

## BALANCING THE BUDGET ON AMERICA'S RETIREES

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, I wish to commend the President for his promise yesterday that he would propose no further cuts this year, in social security. But I wish he would speak to Mr. Stockman; I wish he could convince some of his allies in Congress to quit the scare tactics.

There is no excuse for those scare tactics; there is no excuse for telling 36 million recipients of social security benefits that Washington may renege on its commitment if Washington's high-risk gambles with the economy do not pay off.

There is simply no excuse, Mr. Speaker, for an administration and a Congress to contemplate balancing a Federal budget on the backs of America's retirees.

There are other, better alternatives: a billion dollars in wasteful tobacco, sugar, and other subsidies; a half billion in unnecessary public works projects; as much as $15 billion a year, according to the General Accounting Office, in sloppy management at the Pentagon.

These are the programs we should be cutting, Mr. Speaker. We should not, to borrow that phrase from Vice President BUSH, try to make "voodoo economics" work by sticking more needles into the social security system and wounding America's elderly.

## CALIFORNIA DEMOCRATIC DELEGATION UNANIMOUSLY OPPOSED TO SALE OF AWACS TO SAUDI ARABIA

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, California is a defense State and the 22 members of the California Democratic delegation do not agree on many things, but it was my great pleasure last night to deliver to the White House a letter signed by every single one of the 22 Members of the California Democratic delegation opposing the sale of

AWACS to Saudi Arabia. This is what we told President Reagan:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
*Washington, D.C., September 15, 1981.*

President RONALD REAGAN,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: We respectfully inform you that the twenty-two member California Democratic delegation—the largest in the Congress—is unanimously opposed to the sale of AWACS and the F-15 enhancement package to Saudi Arabia. The overriding consideration on which our opposition is based is our considered judgment that this sale would be profoundly contrary to the interests of the United States.

We fully share your stated desire to further advance the Camp David process and to strengthen relations both with Israel and with friendly Arab nations, but we believe that the proposed Saudi arms package would increase tensions and instability in the Middle East and would threaten the integrity of some of our most sophisticated weapons systems.

Sincerely,

Tom Lantos, Don Edwards, Mervyn M. Dymally, Glenn M. Anderson, Anthony C. Beilenson, George E. Brown, Jr., John Burton, Phillip Burton, Tony Coelho, George E. Danielson, Ronald V. Dellums, Julian Dixon, Vic Fazio, Augustus F. Hawkins, Robert T. Matsui, George Miller, Norman Y. Mineta, Leon E. Panetta, Jerry M. Patterson, Edward R. Roybal, Pete Stark, and Henry A. Waxman.

## NONRECOURSE LOAN PROVISION FOR SUGAR IS NOT A MONSTER

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, when the 1981 farm bill comes to the floor of the House, our attention will be directed to the merits of the sugar provision. This provision calls for nonrecourse loans for our Nation's sugar growers in the event of record-low prices.

The nonrecourse loan provision is not the monster it is cracked up to be. Nonrecourse loans for sugar will not break the bank. They will not saddle the consumer with heavy debt. They will not force the price of sugar to skyrocket. Nonrecourse loans will do one thing and one thing only: They will guarantee that we, in this country, have a vital and healthy domestic sugar industry.

Opponents of the sugar provisions have knowingly circulated misinformation about the nonrecourse loan program. And, I want to set the record straight right now.

When the price of sugar drops through the floor, many small farms simply go out of business. Under the sugar provisions in the farm bill, farmers of beet and cane sugar can get a loan on their crops rather than sell at a loss. When the price of sugar falls below the loan level established in the bill, the nonrecourse loan program is triggered. The farmer can then obtain a loan from the Government using his crops as collateral. When the price goes back up, farmers can later redeem their crops by paying off the loan with interest. What this means for the small farmer is that he is not forced out of business by an unstable market. What this means for the consumer is a stable market and stable prices.

The bottom line is that administering this program will not cost the Government a penny. And the bottom line is that it is time we treated sugar just the way we treat other crops: Corn, wheat, rice, soybeans, oats, honey sorghum, and rye all have nonrecourse loan programs. The time has come for sugar to receive equal treatment.

## IS PRESIDENT'S NAME "REAGAN" OR "FAGIN"?

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of California. Mr. Speaker, the administration's proposal to reduce the quantity and ingredients of school lunches leaves me wondering whether the President's name is Reagan or Fagin.

This is the same administration which wanted to slash food-stamp benefits to families whose children were eating school lunches. Now they want to reduce those lunches.

We can all appreciate the plain silliness of the administration's proposal.

Cakes, which are mostly flour, milk, water, and especially sugar, will now count as eggs.

Catsup will count as a vegetable? The catsup is mostly water, corn sirup, sugar, vinegar, and salt, in addition to tomato.

Relish as a vegetable? The relish is mostly chopped pickle, corn sirup, sugar, vinegar, water food starch, and salt.

But this proposal is more than silly; it is malicious. Many children in the school lunch program depend on those meals for one-half their daily nutrition. Depriving them of wholesome, edible meals in schools sentences them to nutritional deprivation which will affect their schoolwork and their health, and ultimately, their personal development.

And this proposal is cruel. What kind of a message does it send to the poor and the hungry people of this country when they read that Mrs. Reagan is going to spend more on a single china place setting for the White House than it costs to feed a schoolchild for an entire year or three high-risk mothers in the women, infants, and children program, which saves $3 in medical costs for every dollar it spends.

The message is very clear: They do not care.

I hope the Congress sends a different message. As Representatives of all the people instead of merely the well to do, we must be more concerned with the quality and availability of the food we put on the table than with the exquisite design of the china the food is served on.

## ANOTHER IN SERIES OF "EVENTS" AT THREE MILE ISLAND

(Mr. ERTEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ERTEL. Mr. Speaker, last Friday night we experienced yet another in a series of "events" at Three Mile Island. This time, the normal leakage from TMI 2's primary coolant system increased 500 percent, from one-tenth gallon per hour, to six-tenths gallon per hour.

This coolant spilled into the reactor containment building joining the already over 8 feet of contaminated water that makes up the radioactive swamp in the building today.

Since the accident 2½ years ago, many of the systems maintaining the status quo at TMI 2 have gone without maintenance. It should come as no surprise, then, that these systems will develop new problems.

Luckily, Friday's "event" did not result in any offsite radiation exposure. But, it again raises the troubling question: How long can we drawout the TMI 2 cleanup without inviting disaster?

Public health and safety demands a TMI cleanup funding solution to be put in place soon. H.R. 2512 does that job and insures that people living around the site of the next accident are not held hostage to increased health and safety hazards.

## NO GOOD REASON FOR SALE OF AWACS

(Mr. FRANK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRANK. Mr. Speaker, it is unfortunate that at the current moment the No. 1 legislative priority of the Reagan administration appears to be breaking congressional resistance to selling AWACS to Saudi Arabia.

I noted with distress, but not surprise, the Saudi Arabians' vehement objection to the notion that there should be stronger strategic collaboration between America and Israel. This reflects Saudi Arabia's hostility to the very existence of Israel. It is not an attitude one would expect from a nation

primarily interested in opposing Soviet penetration of the Middle East.

There is simply no good reason in American foreign policy terms for the sale of these AWACS. We run the risk of losing control of this most important and sophisticated defense technology—the risk that we ran a few years ago when, if the ayatollah had shown a little patience, he would now be in possession of AWACS, because we almost sold them to the Iranian regime.

The argument that the Saudis have, in fact, earned these planes by oil pricing concessions to the United States simply misconceives the basis for Saudi oil pricing policy which is, as it ought to be, their own long-term economic interest in preventing other OPEC nations from pricing oil out of the energy market.

The sale of the AWACS will undermine further the chance of progress in the Israeli-Egyptian peace talks, which are the main framework and, in fact, the only framework in which peace negotiations now exist in the Middle East.

It makes no sense to reward Saudi Arabia for its fierce hostility to the Camp David talks and its support of the pro-Soviet PLO by selling them the most desired items in the American defense arsenal. Congress should vote down this sale.

## POLICIES OF INTERIOR SECRETARY JAMES WATT

(Mr. FROST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FROST. Mr. Speaker, I believe that any member of the party not in office in the White House must be prudent in calling attention to the misjudgments of those at the helm of Government.

Now, Mr. Speaker, after 8 months, I feel fully justified in challenging the direction of the policies of Interior Secretary James Watt.

I had reservations about Mr. Watt's objectivity since he had been the director of a foundation which represents developmental interests. As Secretary of the Interior, he is charged with serving the competing interests of mineral development and environmental preservation. My apprehensions, as it has turned out, were not unfounded. Mr. Watt's policies are not designed to balance the need for energy independence and the need to preserve our Nation's wealth of beauty. His objectives are strictly economic—and shortsighted.

Some resources have to be developed—but there are also alternative energy sources available which can be developed. There are no alternatives to our wilderness areas and national parks. Previous Secretaries—Democratic and Republican—have realized these facts. It is true that they have tended to lean in the direction of preservation, but by no means can any of these men be called extremists. They have made determined efforts to strive for the balance I mentioned. But Mr. Watt's term, thus far, represents a drastic shift in policy direction.

Mr. Watt denies this. But at the same time, he claims that he has been so effective in his job that he is a rebel without a cause—that the sagebrush rebellion has been won. He may be a rebel, but it is apparent that his cause is not consistent with his responsibilities as steward over departmental programs.

Mr. Speaker, I rise today to urge the Secretary to review his obligations and revise his policies so as to properly reflect his department's mission.

## SECRETARY OF THE INTERIOR REPRESENTS ALL AMERICANS

(Mr. GEJDENSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEJDENSON. Mr. Speaker, as a member of the House Interior Committee I have become quite familiar with Secretary Watt's policies with regard to the environment. Mr. Watt, as director of the Mountain States Legal Foundation was an able advocate for those who wished to open up Federal lands to mineral development. There is now a new director of the Mountain States Legal Foundation who is also an able advocate for development interests. Secretary Watt, however, is still operating as if he were still in his former capacity.

The Secretary of the Interior holds a very special position in this country. Whether or not future generations will have the opportunity to enjoy unspoiled wilderness areas, well-kept national parks, and other natural resources that we may sometimes take for granted, is to a large extent in his hands. The responsibility is a broad one. Different segments of society obviously have different interests. This is where the need for the balancing of interests comes in.

Currently 90 percent of all Federal lands are open to development. Only 2.9 percent of all Federal lands in the lower 48 States are closed to development. Secretary Watt feels that this "balance" is unfairly weighted in favor of the "environmental extremists." I have to disagree with Secretary Watt on this.

Public lands belong to all the people, and their interests need to be protected. I feel that Secretary Watt has failed in fulfilling his obligation to those who truly own the Federal lands—the people of this country.

## LET'S STEP BACK FROM SECRETARY WATT'S POLICIES

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Mr. Speaker, I want to call attention of the House and the Nation, really, to the conduct of Secretary Watt this past week at the Governors Conference. Apparently Watt recognizes his faltering policy and popularity in the polls, and as a consequence he is trying to give the States everything they ever wanted. The problem is, he is doing it at the expense of the environment, I think that this really is crass contradiction to the responsiblities that he assumed when he became Secretary of the Interior.

I am very concerned about the changing complexion of things. I think that the degradation of our natural resources and environment are too great a cost to pay to buoy up the image of the Reagan administration's resource policies with regard to land use, and with regard to the environment. So I would hope that we can avoid this and step back from these actions proposed by Secretary Watt, and look at it dispassionately. The Department of the Interior should seriously defend the National Government's water rights and legitimate interests, not place them on the auction block to placate criticism. It does not take much talent or fortitude on Watt's part to cave in to a "States rights" argument in this regard.

Mr. Speaker, I must say I was disappointed to hear President Reagan remark during a press gathering in August that he thought that Secretary of the Interior James Watt was doing a good job in the face of attacks from environmental extremists.

Now what bothers me about the President's statement is not the fact that he supports James Watt. This is to be expected, because Secretary Watt is the ball carrier for the administration's environmental policies. What really bothers me is the fact that our President has fallen into the trap of using the code words, "environmental extremist." Those who oppose the policies of Secretary Watt, and I am one of them, are now labeled environmental extremists, not only by Secretary Watt but by the President as well. Characterizing someone as an extremist is a convenient way to brush off criticism, attempting to make it appear that the administration's environmental policies are only opposed by a few Americans.

It is clear that there are many Members of Congress and vast numbers of Americans who oppose Secretary Watt's policies. To dismiss our concerns as the talk of extremists is both irresponsible and a disservice to many concerned Americans.

## UNWARRANTED CRITICISM OF SECRETARY SCHWEIKER

(Mr. HYDE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HYDE. Mr. Speaker, the gentlewoman from Colorado issued a "Dear Colleague" letter recently with a copy of a magazine cover photo of Secretary and Mrs. Schweiker splendidly attired sitting at a lavish banquet table. Our colleague entitled the photo and the accompanying cartoon "The Two Sides of Ronald Reagan's America."

This criticism, I might mention, was emulated by two Washington Post columnists whose talent for research is exceeded by their talent for criticism.

Now, what they all failed to tell you was that this was a publicity photo for the Juvenile Diabetes Foundation's annual charity ball, of which Mrs. Schweiker is chairlady. Except for Secretary Schweiker's 20-year-old tuxedo and Mrs. Schweiker's gloves, everything in the picture, including Mrs. Schweiker's gown, was loaned by local merchants for purposes of the publicity picture.

I know it is great fun to criticize the Reagan administration, but I wish they would not use the Juvenile Diabetes Foundation to do it.

I yield back the balance of my time.

## DAIRY AMENDMENT RECKLESS, NOT REASONABLE

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUNDERSON. Mr. Speaker, the administration's latest amendment to the 1981 farm bill regarding dairy price supports, as reported in the Washington Post this morning, is nothing short of appalling. This shortsighted and uninformed proposal demonstrates just how out of touch some members of the Agriculture Department and others are with the long-term best interests of the farm community and the American consumer.

Simply stated, it is a drastic overreaction to an admittedly serious problem of overproduction.

The Congress has already addressed the problem of overproduction in the dairy industry twice this year when it voted to eliminate the April adjustment in March and when parity was decreased from 80 percent to 75 percent in reconciliation. These reductions have already saved over $500 million in outlays on the dairy program in fiscal year 1982 alone and must be given time to bring about the necessary adjustment in dairy production.

Now, in addition to these previous sacrifices, dairy farmers will lose another $2.3 billion annually in cash receipts if the administration's proposal is incorporated into the farm bill. This would be a death blow to thousands of young dairy farmers who are barely making it now in this time of soaring production costs. Similarly, consumers will also be forced to suffer with high prices and production shortfalls when there are insufficient dairy farmers to meet the demand for dairy products.

I call upon my colleagues to exercise reason—not reckless abandon—when we consider the dairy price support program in the coming weeks.

## ABUSE IN FOOD STAMP PROGRAM

(Mr. COLEMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN. Mr. Speaker, I rise to inform my colleagues that yesterday, September 15, 1981, the Department of Agriculture's Office of the Inspector General, and several other law enforcement officials in southeastern Virginia arrested 40 persons for exchanging food stamps for cash.

The investigation showed that the cash was being used to buy cars, guns, television sets, and drugs, including heroin and marihuana.

This investigation is one of several being conducted by the Office of Inspector General into criminal activity in the food stamp program. Yesterday's arrests bring to 600 the total indictments for food stamp fraud this year. Persons arrested for food stamp trafficking say that the stamps are just like money—that they can buy anything with food stamps—not only food, but cars, guns, and drugs.

Mr. Speaker, this year's budget for food stamps is $11.5 billion. This program is intended to feed the poor and disadvantaged of America. Clearly, it is not intended to provide a second currency for criminals. Food stamps are not intended to purchase guns, illegal drugs or other such items.

Mr. Speaker, as ranking member of the Food Stamp Subcommittee, I rise to assure my colleagues that I will continue to do all I can to reduce waste, fraud, and abuse in the food stamp program. I hope my colleagues will join me in this effort and in working with the Inspector General's Office and law enforcement agencies in their continuing effort to crack down on illegal trafficking of food stamps.

## INTEREST RATES AND INFLATION

(Mr. COLLINS of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLLINS of Texas. Mr. Speaker, the gentleman spoke a moment ago about high interest rates, because that is the No. 1 concern of everyone in this country, high interest rates. We, in Congress, know that we in the Halls of Congress are the ones who are responsible for inflation and high interest rates, because in 1970 we were looking at $200 billion that Congress spent to run this country and today Congress is looking at $725 billion. Congress has gone from $200 billion to $725 billion. Everyone in my home town says they cannot think of one thing the Government is doing for them today that they were not doing in 1970 except spending more money and giving America more inflation.

I was interested in a statement that was made by Mr. Butcher, who is chairman of the Chase Manhattan Bank, and he said:

> There is a difference between using a dollar to finance a deficit, which is inflationary because it adds nothing in the long run to the economy, and a dollar that ends up in private investment and thereby improves productivity and creates jobs and real wealth.

Let us spend less money in Congress and put the money back in the private sector.

## AWACS SALE IS A DANGEROUS GAMBLE

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, the administration's decision to sell AWACS planes to Saudi Arabia threatens to compromise not only American security but NATO defenses as well.

The AWACS aircraft—with its remarkable abilities as a battlefield surveillance plane and as a tactical battle control station—is the key feature in NATO's first joint military program. The capacity of the AWACS planes for detecting opposing aircraft and directing friendly fighters will double NATO air surveillance capability. Future enhancements planned for the NATO planes, including an improved information-processing and communications setup, will further secure NATO's defenses.

If the sale is completed, there is no possible guarantee that AWACS secrets will not fall into unfriendly hands. The Soviets, far behind in look-down radar development, could wipe out the gap by recovering an AWACS. The sale is a dangerous gamble that the West can ill afford to take.

## TRIBUTE TO ROGER BALDWIN

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, the death of Roger Baldwin on August 26 deprived America of our most persistent and effective advocate for civil liber-

ties. In all his 97 years, he never ceased working on behalf of the Bill of Rights.

Roger Baldwin helped to found the ACLU in 1920. For the next 30 years he served as its executive director. He defended the constitutional rights of those as disparate as Nazis, Communists, Henry Ford, the Ku Klux Klan, Socialists, and Jehovah's Witnesses. He understood that effective protection of the rights of all citizens required the defense of "people you disliked and feared," he said, "as well as those you admired."

Simply stated, he was deeply committed to democracy. His goal, he said, was "a society with a minimum of compulsion, a maximum of indivdual freedom and of voluntary association, and the abolition of exploitation and poverty." It is a tribute to Mr. Baldwin, I believe, that today most Americans accept his credo as their own.

Many of the ACLU's cases during Baldwin's tenure, and since, are landmarks in the evolution of American law and society. The two that gave him the most satisfaction, he said, were the 1925 "Monkey Trial" in Tennessee, where the ACLU defended John T. Scopes' teaching of evolution, and the 1962 case, Baker against Carr, which established the one-man, one-vote principle.

Roger Baldwin was truly a giant among Americans. Perhaps more than anyone else, he is responsible for insuring that the Bill of Rights is vigorously applied. We all owe him an enormous debt. It is to the lasting benefit of every American that this man lived and worked in this Nation.

## ELECTION AS MEMBER OF COMMITTEE ON GOVERNMENT OPERATIONS

Mr. MICHEL. Mr. Speaker, I offer a privileged resolution (H. Res. 220) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 220

*Resolved*, That Michael G. Oxley, of Ohio, be and hereby is elected to the Committee on Government Operations.

The resolution was agreed to.

A motion to reconsider was laid on the table.

## CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1982

Mr. WHITTEN. Mr. Speaker, pursuant to the order of the House on yesterday, I call up for consideration in the House the House joint resolution (H.J. Res. 325) making continuing appropriations for the fiscal year 1982, and for other purposes.

The joint resolution reads as follows:

H.J. RES. 325

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, and out of applicable corporate or other revenues, receipts, and funds, for the several departments, agencies, corporations, and other organizational units of the Government for the fiscal year 1982, and for other purposes, namely:

SEC. 101. (a)(1) Such amounts as may be necessary for continuing projects or activities (not otherwise specifically provided for in this joint resolution) which were conducted in the fiscal year 1981 and for which appropriations, funds, or other authority would be available in the following appropriations Acts:

Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation Act, 1982, notwithstanding section 15(a) of the State Department Basic Authorites Act of 1956 and section 701 of the United States Information and Educational Exchange Act of 1948, as amended;

District of Columbia Appropriation Act, 1982;

Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act, 1982;

Military Construction Appropriation Act, 1982; and

Department of Transportation and Related Agencies Appropriation Act, 1982.

(2) Appropriations made by this subsection shall be available to the extent and in the manner which would be provided by the pertinent appropriation Act.

(3) Whenever the amount which would be made available or the authority which would be granted under an Act listed in this subsection as passed the House as of October 1, 1981, is different from that which would be available or granted under such Act as passed by the Senate as of October 1, 1981, the pertinent project or activity shall be continued under the lesser amount or the more restrictive authority: *Provided*, That where an item is included in only one version of an Act as passed by both Houses as of October 1, 1981, the pertinent project or activity shall be continued under the appropriation, fund, or authority granted by the one House, but at a rate for operations not exceeding the current rate or the rate permitted by the action of the one House, whichever is lower, and under the authority and conditions provided in applicable appropriation Acts for the fiscal year 1981.

(4) Whenever an Act listed in this subsection has been passed by only one House as of October 1, 1981, the pertinent project or activity shall be continued under the appropriation, fund, or authority granted by the one House, but at a rate of operations not exceeding the current rate or the rate permitted by the action of the one House, whichever is lower, and under the authority and conditions provided in applicable appropriation Acts for the fiscal year 1981: *Provided*, That for the purpose of this joint resolution, when an Act listed in this subsection has been reported to the House but not passed by the House as of October 1, 1981, it shall be deemed as having been passed by the House.

(5) No provision which is included in an appropriation Act enumerated in this subsection but which was not included in the applicable appropriation Act of 1981, and which by its terms is applicable to more than one appropriation, fund, or authority shall be applicable to any appropriation, fund, or authority provided in the joint resolution unless such provision shall have been included in identical form in such bill as enacted by both the House and the Senate.

(b) Such amounts as may be necessary for continuing the following activities, not otherwise provided for, which were conducted in the fiscal year 1981, at a rate for operations not in excess of the current rate or the rate provided for in the budget estimate, whichever is lower, and under the more restrictive authority—

activities for which provision was made in the Department of Defense Appropriation Act, 1981; and

activities for which provision was made in section 101(b) of Public Law 96-536 regarding foreign assistance and related programs, notwithstanding section 10 of Public Law 91-672, and section 15(a) of the State Department Basic Authorities Act of 1956.

(c) Notwithstanding the provisions of sections 102 and 106 of this joint resolution, such amounts as may be necessary for continuing projects and activities under all the conditions and to the extent and in the manner as provided in H.R. 4120, entitled the Legislative Branch Appropriation Act, 1982, as reported July 9, 1981; and the provisions of H.R. 4120 shall be effective as if enacted into law; except that the provisions of section 305 (a), (b), and (d) of H.R. 4120 shall apply to any appropriation, fund or authority made available for the period October 1, 1981, through November 1, 1981, by this or any other Act.

(d) Such amounts as may be necessary for continuing the following activities which were conducted in fiscal year 1981, but at a rate for operations not in excess of the current rate—

activities of the Department of State for contributions to the United Nations Relief and Works Agency for Palestinian Refugees notwithstanding section 10 of Public Law 91-672, and section 15(a) of the State Department Basic Authorities Act of 1956.

SEC. 102. Appropriations and funds made available and authority granted pursuant to this joint resolution shall be available from October 1, 1981, and shall remain available until (a) enactment into law of an appropriation for any project or activity provided for in this joint resolution, or (b) enactment of the applicable appropriation Act by both Houses without any provision for such project or activity, or (c) November 1, 1981, whichever first occurs.

SEC. 103. Appropriations and funds made available or authority granted pursuant to this joint resolution may be used without regard to the time limitations for submission and approval of apportionments set forth in section 665(d)(2) of title 31, United States Code, but nothing herein shall be construed to waive any other provision of law governing the apportionment of funds.

SEC. 104. Appropriations made and authority granted pursuant to this joint resolution shall cover all obligations or expenditures incurred for any project or activity during the period for which funds or authority for such projects or activity are available under this joint resolution.

SEC. 105. Expenditures made pursuant to this joint resolution shall be charged to the applicable appropriation, fund, or authorization whenever a bill in which such applicable appropriation, fund, or authorization is contained is enacted into law.

SEC. 106. No appropriation or fund made available or authority granted pursuant to this joint resolution shall be used to initiate or resume any project or activity for which appropriations, funds, or other authority

were not available during the fiscal year 1981.

SEC. 107. Any appropriation for the fiscal year 1982 required to be apportioned pursuant to section 665 of title 31, United States Code, may be apportioned on a basis indicating the need (to the extent any such increases cannot be absorbed within available appropriations) for a supplemental or deficiency estimate of appropriation to the extent necessary to permit payment of such pay increases as may be granted pursuant to law to civilian officers and employees and to active and retired military personnel. Each such appropriation shall otherwise be subject to the requirements of section 665 of title 31, United States Code.

SEC. 108. All obligations incurred in anticipation of the appropriations and authority provided in this joint resolution for the purposes of maintaining the minimum level of essential activities necessary to protect life and property and bringing about orderly termination of other functions are hereby ratified and confirmed if otherwise in accordance with the provisions of this joint resolution.

SEC. 109. No provision in any appropriation Act for the fiscal year 1982 that makes the availability of any appropriation provided therein dependent upon the enactment of additional authorizing or other legislation shall be effective before the date set forth in section 102(c) of this joint resolution.

SEC. 110. To meet the emergency facing a number of fruit producing States, particularly California, from the Mediterranean and other types of fruit flies, as well as the immediate and long-range threat to the timber stands and the watersheds of the Northeastern United States and other areas from the gypsy moth, as well as to meet threats from other pests and diseases, the Secretary of Agriculture is authorized to exercise the emergency authorities provided for in H.R. 4119 as passed the House of Representatives on July 27, 1981, in connection with the program of the Animal and Plant Health Inspection Service, notwithstanding any other provision of this joint resolution.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) is recognized for 1 hour.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and to include extraneous material, in consideration of House Joint Resolution 325.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Mr. Speaker, I yield 30 minutes to the gentleman from Massachusetts (Mr. CONTE) for purposes of debate only, pending which I yield myself such time as I may require.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, we bring before you today a resolution providing continuing appropriations for many programs and activities of the Federal Government for a 1-month period.

STATUS OF APPROPRIATIONS BILLS

The House has now passed 7 of the 13 regular appropriations bills for fiscal year 1982. Another appropriation bill is scheduled for floor consideration this week, and, hopefully, more will be scheduled for House consideration later this month.

While a majority of the bills will have been acted on by the House by the end of this month, the Senate has had only limited opportunity to consider these bills due to the lateness of the submission of massive budget revisions by the executive branch. In fact, only one appropriation bill has passed the Senate as of this time and that bill has completed the conference process in the House (HUD-independent agencies).

URGENT NEED FOR CONTINUING RESOLUTION

Without this critical funding mechanism the majority of the Government programs face shutdown at midnight on September 30. I would like to call attention to an opinion of the Attorney General concerning the shutdown of the Government. The Attorney General's opinion states in pertinent part as follows:

During periods of "lapsed appropriations," no funds may be expended except as necessary to bring about the orderly termination of an agency's functions, and that the obligation or expenditure of funds for any purpose not otherwise authorized by law would be a violation of the Antideficiency Act.

This removes what flexibility there was in previous years to carry on Government activities for a short period beyond the last day of the fiscal year. This year we must pass a continuing resolution by October 1 to maintain necessary Government activities for defense, health, safety, and welfare.

DELAY IN BUDGET PROCESS

As you know, President Carter submitted his fiscal year 1982 budget on January 15 of this year. President Reagan was sworn in office on January 20 and in early February he announced his economic recovery program. It wasn't until March 10 that the President submitted his fiscal 1982 budget revisions and this was followed in March and April with a number of rescission and deferral proposals which had an overall affect on fiscal 1982 spending. The conference report on the first budget resolution was agreed to on May 21 which directed the House and Senate to make massive reductions in funding levels of many Government programs by the reconciliation process. This reconciliation effort was not completed until July 31.

Although these delays cost precious time and hampered by the fact that it was extremely difficult to determine the latest executive branch and authorization funding levels because of ever changing conditions, the Appropriations Committee acted as swiftly as possible, reporting out 5 of its 13 appropriation bills in the later part of June and early July and reporting out 4 additional bills in the latter part of July. Even now, the administration is in the process of making additional changes in their current budget requests to bring about desired reductions in order to minimize the extent of the fiscal 1982 deficit. Two appropriation bills are scheduled for Committee action this week. As stated earlier, the House has passed 7 of the 13 appropriation bills as of this time but the Senate has acted on only one of these. Not a single bill has been signed into law and there has been the threat of Presidential veto on a number of these bills. As my colleagues can see, the necessity for a continuing resolution is unquestioned.

COVERAGE OF THE CONTINUING RESOLUTION

This resolution provides funding for the programs covered under 8 of the 13 regular appropriation bills for a 1-month period. The resolution excludes funding for the 5 bills which passed the House before the August recess because it was felt those bills could complete conference action and be sent to the President before October 1.

The five bills not included in the continuing resolution are as follows: Agriculture; Energy and Water; HUD-Independent Agencies; Interior; and Treasury-Postal Service-General Government.

The rates provided in the resolution are restrictive and are based on the concept of traditional continuing resolutions used each year. The rates are based on where the individual bills are located in the legislative process as of midnight September 30. If the bill has passed the House and the Senate, the rate is the House level or the Senate level, whichever is lower. If the bill has passed only the House, the rate is the House level or the current rate, whichever is lower. Special provision is made for the Defense bill, the foreign aid bill and the legislative branch bill.

PROTECTION FROM INSECT EMERGENCIES

I would like to point out to my colleagues that this resolution includes authority to immediately respond to the problems to plant diseases caused by the Medfly or the gypsy moth type infestation. This authority is important because these and other types of infestations do not know anything about State lines, or about the distinction between rural and urban areas. The purpose of providing this authority in this resolution is to make our intent quite clear, and to permit the Secretary of Agriculture to be fully and immediately responsive to any emergency which may arise.

PHILOSOPHY OF THE CONTINUING RESOLUTION

The basic philosophy of this continuing resolution is simple. It is designed to carry forward activities of the Government into the fiscal year that begins on October 1. The resolution is effective only until November 1

and its applicability to programs and activities ceases as the regular bills become law. It is essential that officials responsible for administering programs during the period covered by the resolution take only the limited action necessary for orderly continuation of projects and activities, preserving to the maximum extent possible the flexibility of Congress in arriving at final decisions on funding levels and restrictive provisions. Accordingly, the rates of operation for programs and activities under the resolution are to be interpreted as ceilings and not as mandatory spending levels. This is necessary in order to preserve congressional prerogatives in the course of the regular authorization and appropriation process. It is also expected that departments and agencies will carefully avoid the obligation of funds, for specific budget line items or program allocations on which Congress may have expressed strong criticism, at rates which would impinge upon discretionary decisions otherwise available to the Congress.

□ 1230

I could go into great detail as to what is involved, but may I say again that it is within the limits of the President's recommendations for the coming year. It is within the limits of section 302 of the first budget resolution. Again, we are just asking the Members to go along with us for 30 days while we work all these matters out.

I would like to call to the attention of my colleagues in the House that I was joined in sponsoring this legislation by my good friend, the gentleman from Massachusetts (Mr. CONTE), the distinguished ranking minority member of the committee. Without his help on this resolution and his commitment to a streamlined, restrictive and responsible resolution, today's action would not have been possible.

Mr. Speaker, I would like to close my explanation of this resolution with only one thought. This resolution provides for the orderly continuation and operation of the Government and it provides funding for Government agencies at very restrictive rates. It is not a spendthrift resolution. This resolution that we have before you in total actually spends less than amounts proposed by the President.

I call this to the attention of my colleagues so that they can, in all good conscience, vote for this responsible resolution.

Thank you.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding. I would just like to ask the distinguished chairman of the committee a couple of questions for clarification.

I understand the gentleman's point that we will be within the budget figures. Has the bill been examined to assure us that we would also be within the outlay figures, since it has become a question of controversy within the last few days?

Mr. WHITTEN. It is my understanding that it definitely is within that limit, and also it is below the budget authority recommendations by the President in the budget he has before us.

Mr. WALKER. I thank the gentleman for that clarification. If the gentleman would yield further, I also wanted to get a clarification on the section in the bill which does, as the report indicates, protect the provisions on the federally funded abortions, and prohibition against preventing implementation of programs on voluntary prayer. Am I correct? I just want to make certain the protection is in the bill on page 3, under section 101(a)(4), that the language there is what protects those various amendments and assures that all the various provisions that are now in law with regard to restrictive amendments will be held throughout the 30-day period.

Mr. WHITTEN. Anticipating that the question would be asked, we spelled out in the report exactly what we do, so we continue all the restrictions that presently exist which prohibit use of Federal funds for abortion or to prevent voluntary prayer in public schools, and I might also add that the provision maintaining the tax-exempt status of private schools continues in the Treasury-Postal Service bill. This action is for the 30-day period and is spelled out in detail in the report.

Mr. WALKER. Am I correct, the section to which I referred?

Mr. WHITTEN. That is correct. That is what it means, and we also point it out in detail in the report.

Mr. WALKER. I thank the gentleman very much.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, and Members of the House, I support House Joint Resolution 325, making continuing appropriations for fiscal year 1982. In fact, I took the unusual step of cosponsoring this joint resolution with my good friend, the chairman of the committee, the gentleman from Mississippi, (Mr. WHITTEN).

With one exception, the joint resolution provides continuing appropriations for projects and activities through October 31, or until the applicable appropriation bill is enacted, with or without any provision for the project or activity, whichever first occurs.

Five bills are covered under section 101(a): Commerce, Justice, State, and the Judiciary; District of Columbia; Labor, Health and Human Services, and Education; Military construction; and Transportation.

The spending rate for any one of these five bills is based on the status of the bill as of October 1.

If a bill listed in section 101(a) has passed the House and the Senate, a project or activity is continued at the House or Senate rate, whichever is lower, and under the more restrictive authority. An item included by only one House is continued under the rate provided by that House, or the current rate, whichever is lower, and under the authority and conditions for fiscal 1981.

If a bill listed in section 101(a) has been reported to or passed only the House, a project or activity is continued at the 1981 rate, or the rate provided by the bill as reported to or passed the House, whichever is lower, and under the authority and conditions for fiscal 1981.

Any general provision in a bill listed in section 101(a) shall take effect under the joint resolution only when included in identical form in a House and Senate bill, or when a general provision is identical in form to current law, and is included by one House in a bill that has passed both the House and the Senate.

Two bills, defense and foreign assistance, are covered under section 101(b), and are continued at the rate provided in the budget estimate, or the current rate, whichever is lower, and under the more restrictive authority.

The legislative bill is continued for the full fiscal year by section 101(c) at the rate and under the conditions provided in the 1982 bill as reported to the House.

Five bills which passed the House before the August recess are not covered by the continuing resolution: Agricultural, Energy and water development, HUD-independent agencies, Interior, and Treasury-Postal Service.

The committee hopes and expects that action on these five bills will be completed before the beginning of the fiscal year.

The joint resolution contains the standard general provision that continuing appropriations shall not be used during fiscal 1982 to initiate or resume any project or activity for which budget authority was not available during fiscal 1981.

For those five bills where spending rates are established by section 101(a), depending on the status of the bill as of October 1, we do not now know what the rate for any particular project or activity will be, or what the overall spending rate for those bills will be under the joint resolution when enacted.

I support this joint resolution precisely because it contains virtually no

special provisions for individual spending rates or reductions.

All 13 of the regular annual appropriation bills are still before the Congress and the President for action. The Congress and the President should complete action on those bills before we consider extracurricular action on spending cuts for 1982.

This joint resolution provides minimum continuing appropriations for the orderly continuation of Federal programs and activities. It preserves the right of Congress to establish funding levels and limitations through the regular appropriations process.

It deserves, and I ask for, your support.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I will be glad to yield to my good friend from Virginia.

Mr. PARRIS. Mr. Speaker, would the gentleman tell me, whether the gentleman from Mississippi, the distinguished chairman of the committee, yielded to the gentleman from Massachusetts for the purpose of debate only. Would the gentleman tell me whether or not this resolution is open to amendment?

Mr. CONTE. No; it is not.

Mr. PARRIS. If the gentleman will yield further, I had prepared an amendment, Mr. Speaker, to this resolution, and specifically to subsection (c) of section 101. But as I understand the gentleman's response, under the rules of the House and because of parliamentary limitations I am precluded from offering or pursuing that amendment.

The thrust of this resolution is to freeze for an additional 30 days the salaries of Federal employees and executives, who have not had any kind of increase for over 3 years. My amendment, Mr. Speaker, would have eliminated the pay cap that now throttles the compensation of 35,000 Federal executives in the top seven levels of civil service categories. It is devastating performance and it is crippling the morale of Federal employees.

The amendment would have appropriated 10.5 percent in a pay raise, which is 50 percent of normal comparability rates for fiscal year 1979 and fiscal year 1980. It would have excluded Members of Congress for compensation from that increase.

I say to the gentleman from Massachusetts and the gentleman from Mississippi that I would certainly hope that the committee will consider adopting in the final legislation a proposal similar to my amendment, and that this unconscionable limitation on compensation of Federal executives can be removed at an early date.

I thank the gentleman for yielding.

Mr. CONTE. I thank the gentleman from Virginia.

Mr. MILLER of Ohio. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield for debate only to the gentleman from Ohio (Mr. MILLER).

Mr. MILLER of Ohio. Mr. Speaker, I thank the gentleman for yielding. I too have an amendment, and it is to the legislative section of the continuing resolution. Yesterday, we had under unanimous consent the authority to bring this continuing resolution to the floor of the House, which means, of course, that we were not allowed to offer amendments unless the chairman would be willing to yield for that purpose.

What I want to bring to the attention of the House is that last May the House Administration Committee authorized an increase in the allowance for travel, official expenses, and district office equipment and furnishings allocated to Members of the House. It is not possible to determine the precise figure for the amount of money involved, because not all Members use their full allowance, and travel is variable. But a reasonable estimate is that this increase will average out to roughly $10,000 per Member, for a total of around $4.4 million.

When we are cutting down on the social programs and the domestic programs, it is pretty hard to talk to a constituent back in the district and ask him to tighten his belt when we increase our office allowances here.

Some say we are entitled to this increase because all our expenses have gone up due to inflation. To this I reply: Tell it to the taxpayers. You think they do not know about inflation? About price increases at the supermarket, the filling station, the drugstore, the department store? Tell the taxpayer who needs a new car but cannot afford it about inflation. Tell the young couple that cannot afford a home about the cost of living. Tell the housewife who finds that planning her menus has become an exercise in budget cutting about inflation. Tell the mother who is wondering how she is going to pay the bills for outfitting her youngsters for school about inflation. Since the word got around that I intended to offer this amendment I have heard a lot about the increase in travel costs. Sure air fares have increased. No doubt about it. So has the cost of gasoline. Tell the family that had to give up the idea of a family vacation because they simply could not afford it—tell them about the increases in the cost of travel.

The American people know all about inflation. What they do not know is how to get someone else to foot the bill for increases in their expenses.

We in Congress simply must practice what we preach. We are preaching austerity to the American people, and rightly so, because this living-beyond-our-means cannot continue. Now we must also practice austerity.

I have the amendment prepared, and I would ask the chairman, the gentleman from Mississippi, if he would yield for the purpose of offering the amendment to reduce the legislative appropriation by $4,400,000.

Mr. WHITTEN. In response to the gentleman's remarks for the record, the Committee on Appropriations turned down the gentleman's amendment. Funds for office expenses must be spent for legitimate expenses. If not spent, they remain in the Treasury.

Personally I do not spend anything like the total amount available, many others do not, but that does not mean that others might not have the need.

What the gentleman would do is reduce a ceiling when he was turned down by an overwhelming vote in the committee. Further, Mr. Speaker, I call attention to the fact that if we yield to my friend, we would have an obligation to yield to at least 50 others. I am sure that this is the reason for the decision that the resolution be open for debate only.

I guess I know of at least 50 differences of opinion that would have been before the House, and we likely would not have finished them in this continuing resolution within these 2 weeks which under the Attorney General's ruling would bring most Government services to a standstill.

So, for that reason, we were faced with the necessity of bringing up the resolution under the conditions that we have here, and these are various controversial subjects which will be available to the gentleman and to others, as I understand it, when we get to a further continuing resolution. But, at any rate, we were faced with dire necessity.

May I say that I appreciate very much the cooperation of my friend from Massachusetts and members of the Appropriations Committee, because we have, if I may say so, been long-suffering this time because we have done our job, but the appropriations have been delayed by various reasons, but not by the Committee on Appropriations. We were ready to go. Now, we find ourselves with less than 2 weeks, and no appropriation bills signed into law. If we do not get them signed into law or provide some means of appropriation, the whole Government will be in trouble on October 1. So, may I say that I cannot yield to the gentleman in that I refused to yield to about 45 or 50 others who have their items that they would like to bring up. I would not wish to have appeared to have agreed with the gentleman's description of the situation, but that again can be thrashed out, but not at this time.

Mr. MILLER of Ohio. Two items: We are under a unanimous-consent request, and therefore the gentleman

could yield time not for debate only, but time to offer the amendment. I would like to clarify that.

Mr. WHITTEN. I would like to accommodate my friend from Ohio, but I have about 50 other colleagues in the same situation. I cannot afford to yield in one instance and refuse to in the others, so I have to stick to that rule. I cannot yield for that purpose.

Mr. MILLER of Ohio. But the other continuing appropriations are for only 30 days, and the legislative bill is for 1 year. So, therefore, this amendment would be different than for the other amendments.

Mr. WHITTEN. I repeat my statement that I cannot yield.

Mr. MILLER of Ohio. I thank the gentleman.

Mr. CONTE. Mr. Speaker, I yield for debate only to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr Speaker, I thank the gentleman for yielding.

Mr. Speaker, I think the Members should know the legislative situation, and my colleague, Mr. MILLER, was just explaining it. But we have before us, in effect, the final act, legislative act on the appropriation for the House. We are adopting here today without any debate, without any opportunity to offer any amendments, the whole legislative appropriation for fiscal year 1982.

Now, the bill had been reported from the Appropriations Committee earlier. It had been scheduled for floor action earlier. It has been withheld. It has never been brought to the floor, and now, of course, in this procedure we will be adopting the legislative appropriation for 1982.

The gentleman from Ohio, myself, and other Members who had amendments we wanted to offer to the legislative appropriations are foreclosed. We have been foreclosed from offering an amendment to legislative appropriations for 1982 unless the chairman will assure me that H.R. 4120, as reported by the Appropriations Committee, will be brought to the floor of the House for proper consideration and that the normal legislative process for the legislative appropriation will be followed.

Can the chairman of the committee give me that assurance?

Mr. WHITTEN. Mr. Speaker, I will yield to the gentleman who heads the subcommittee, the gentleman from California (Mr. FAZIO).

Mr. FAZIO. Mr. Speaker, I appreciate the chairman's yielding to me. The reason by which we have decided to place in the bill the full year appropriation for the legislative branch is because of a rather unprecedented thing which occurred in the subcommittee comparable to ours on the Senate side, whereby all the items relating to the House were stricken.

□ 1245

We are very concerned about the traditional responsibility each House has with respect to the interest of the other, and we felt we should go to this conference committee with all the leverage we would need in order to protect the interests of the House vis-a-vis the Senate as a result of this rather unprecedented act they took. We hope we will not have any confrontation on any of the issues, and we do not expect any, but we do think we should protect the interests of the House in this regard, and, therefore, we felt the entire year should be before the Congress.

Mr. ERLENBORN. Mr. Speaker, I wonder if the gentleman would answer the question that was asked, though.

Can the gentleman assure me that H.R. 4120 will be brought before the House for further debate and amendment, and that the normal legislative process will be followed in the regular course?

Mr. WHITTEN. Mr. Speaker, if the gentleman will yield, I think that would depend on the conference with the Senate and what is agreed on.

Mr. ERLENBORN. Then the gentleman can give me no assurance of that?

Mr. WHITTEN. I can give no further assurance other than what has been stated.

Mr. ERLENBORN. Mr. Speaker, I was afraid of that, and it appears we never will have an opportunity to work our will as a body here on normal legislative matters in the normal course.

Mr. WHITTEN. Mr. Speaker, I say that had we had the necessary cooperation we would like to have had, these bills would have been here months before. I can only say that we have done the best we could.

Mr. ERLENBORN. I know there are obstreperous Members who want to offer amendments and I am sure that is the kind of cooperation the gentleman does not want to have.

Mr. FAZIO. Mr. Speaker, this resolution provides funds for the operation of the legislative branch during fiscal year 1982, the same as reported to the House in 4120, and explained in House Report No. 97-170. This is my first year as chairman of the Legislative Branch Subcommittee and I would like to express my thanks to the other members of the subcommittee for their help and support throughout the hearings and markup process. The members of the subcommittee include Mr. MURTHA of Pennsylvania; Mr. TRAXLER of Michigan; Mr. BENJAMIN of Indiana, the former chairman of the subcommittee who was been very generous when I needed some advice; Mr. BURGENER of California, who has been very helpful in his position as ranking minority member; Mr. CONTE of Massachusetts, the ranking minority member of the full Appropriations Committee; Mr. LEWIS of California; Mr. CAMPBELL of South Carolina; and of course, Mr. WHITTEN of Mississippi, who, as chairman of the Committee on Appropriations, is an ex-officio member of the subcommittee.

RECOMMENDATIONS FOR FISCAL YEAR 1982

Mr. Speaker, the bill we are considering today includes funds for the legislative branch, totaling $1,101,266,000 of which $650,761,000 is for congressional operations. These figures exclude appropriations for the operation of the Senate in accord with the long-term practice under which each body determines its own housekeeping requirements.

The budget requests considered by the committee totaled $1,181,977,000. The recommendation is $80,711,000 less than was requested. This is a reduction of almost 7 percent under the amounts presented in the President's budget. We have searched our records going back over 25 years and find, Mr. Speaker, that this is the second largest reduction in a legislative branch bill ever presented in this House.

The overall appropriations recommended are $60,509,074 over the current year level. This represents only a 5.8-percent increase. Since inflation rates have been running at 10-12 percent, it is fair to say that we have actually reduced the size of the legislative branch budget. In the face of our recent inflation rates this budget is far below the amount necessary to keep up with the constant increases in prices and wages.

In general, very few increases for workload expansion have been allowed, and then only when the work of the Congress has so required or where we are trying to protect the taxpayers' investment in legislative branch resources. It has been the general policy of the committee to provide the funds necessary for employee cost-of-living pay raises and other mandatory items and for a selected number of the increases made necessary because of rising prices. These increases have been offset by reductions in staffing, equipment, alterations, repairs, and in the potential effects of legislation.

H.R. 4120 requires a 1.4-percent reduction in the projected level of legislative branch employment. We have allowed only 22 of 265 new jobs requested, but other cuts in the employment base will enable us to end up with 83 fewer jobs in the legislative branch than we now have. But I believe we have been careful to insure that the essential operations necessary to support the Congress have been preserved.

At a time when the Federal budget presented by the administration is up by 8.8 percent, and while the budget resolution calls for an increase in budget authority between fiscal year

1981 and fiscal year 1982 of 8 percent, we are bringing a legislative branch budget to the House that will result in a reduction in the work force and budget authority that is growing at a rate which is one-third less than the growth in the executive branch even in these austere times.

We are actually reducing the employment base in the legislative branch and we are recommending a decline in real dollar terms in the overall budget of the legislative branch.

Mr. Speaker, we can tell the taxpayers that the legislative branch is participating completely—as a matter of fact we are showing the way—in the process of reducing Federal expenditures. Every Member of this body can report to his constituents that fiscal responsibility begins at home—here in the Halls of Congress.

At this point in the RECORD under permission which I have already obtained, I will insert a tabulation detailing the committee recommendations in comparative form:

LEGISLATIVE BRANCH APPROPRIATIONS BILL, FISCAL YEAR 1982 (H.R. 4120)—COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY FOR FISCAL YEAR 1981 AND BUDGET ESTIMATES AND AMOUNTS RECOMMENDED IN THE BILL FOR FISCAL YEAR 1982

| Agency and item | New budget (obligational) authority fiscal year 1981 [1] | Budget estimates of new (obligational) authority fiscal year 1982 [2] | New budget (obligational) authority recommended in bill | Bill compared with— | |
|---|---|---|---|---|---|
| | | | | New budget (obligational) authority fiscal year 1981 | Budget estimates of new (obligational) authority fiscal year 1982 |

[1] Does not reflect effect of section 309 of H.R. 7593 as provided by section 101(c) of Public Law 96-536 which requires that 2 percent of total budget authority not required by law shall be withheld from obligation and expenditure.
[2] Includes the following budgert amendment (H. Doc. 97-49) for fiscal year 1982:
" Joint Committee on Taxation ..... $123,000.

### REVENUE ACTIVITIES

The Members may be interested to know there are a number of revenue activities within the legislative branch which will return $82 million before expenses to the Federal Government during fiscal year 1982. Included in this estimate is $2 million to the Capitol Power Plant in reimbursements for heating and air conditioning, $11.5 million from copyright fees and the sale of catalog cards and publications by the Library of Congress, $5.5 million in gift and trust fund income, and $63 million from the sale of Government documents through the Office of the Superintendent of Documents. Savings attributable to General Accounting Office activities total approximately $3.7 billion, which also have an offsetting effect on total Federal finances.

### MAJOR ITEMS IN BILL

#### TITLE I—CONGRESSIONAL OPERATIONS

The bill provides a total of $650,761,000 for fiscal year 1982 for seven major areas of congressional activity or in areas of direct support of the Congress. These include the House, joint items, the Office of Technology Assessment, the Congressional Budget Office, the Architect of the Capitol—except Senate and Library buildings and grounds—the Congressional Research Service, and congressional printing and binding.

#### HOUSE OF REPRESENTATIVES AND JOINT ITEMS

The allowances of $447,403,000 for the House and joint items for 1982 includes an amount of $363,794,000 for the operations of the House itself. This is less than a 1-percent increase over 1981, most of which is caused by last October's pay increase for our employees.

#### RECOMMENDED REDUCTIONS

The total recommendation for congressional operations is $23,527,000 less than was requested. Included in this decrease is: a reduction of $4 million in funding requested for the special and select committees—due to actions already taken and approved by the House; a markdown of $342,000 in the Sergeant of Arms budget; a reduction of $3,167,000 in various supplies, materials, and administrative expenses of the House; a reduction of $6,167,000 in various joint items, primarily in official mail; a reduction of $1,081,000

under the request of the Office of Technology Assessment; $840,000 less than requested by the Congressional Budget Office; the deferral of certain projects and other downward adjustments totaling $3,864,000 in the budget of the Architect; a reduction of $713,000 for the operation of the Congressional Research Service; and a reduction of $3,300,000 in congressional printing and binding.

TITLE II—OTHER AGENCIES

A total of $450,505,000 is recommended for the six agencies carried in title II of H.R. 4120. This allowance is an increase of $27,819,000 over the current level of appropriations and $34,884,000 less than requested.

The agencies that are included in this title of the bill and the amounts recommended are as follows: First, Botanic Garden, $2,311,000; second, Library of Congress (except the Congressional Research Service), $161,010,000; third, Library Buildings and grounds, $8,715,000; fourth, Copyright Royalty Tribunal, $461,000; fifth, Government Printing Office (except congressional printing and binding), $45,008,000; and sixth, General Accounting Office, $233,000,000.

Mr. Speaker, I will not attempt to discuss all of the recommendations made by the committee for the various agencies funded in this title of the bill, but I would like to mention a few. Our general policy has been to provide only the resources necessary to maintain activities at the current level and to fund mandatory increases. Only 4 of the 232 additional staffing requested have been allowed. In addition, a reduction of 100 positions under current staffing has been made.

Also, Mr. Speaker, the committee has recommended no funding for the Railroad Accounting Principles Board. We have taken a close look at this proposed new program. It had been established to recommend uniform rail cost accounting standards for regulatory purposes. However, the General Accounting Office has informed us that the Interstate Commerce Commission has just released a uniform rail cost system that the industry will be obliged to use. The committee believes, based on the GAO findings, that this is not the time to set up a new Government entity which may lead to confusion and redundancy since the ICC is already doing the job. We have decided not to fund the RAPB—but have asked the GAO to monitor the new system and to advise the Congress of any deficiences.

We have allowed $2.5 million to fireproof the bookstacks at the Thomas Jefferson and John Adams Library of Congress Buildings. The stacks need this protection desperately. We have also provided the Architect sufficient funds to finish completely the design work on the restoration and needed renovation of those buildings. There is no money in the bill for the construction part of that project—nor will there be until we get a properly certified estimate of the cost of the entire project. We do not intend to authorize the use of so-called phased construction—a method that has proven so costly in the past.

CAPITAL IMPROVEMENTS

Due to lack of authorization, the Committee has denied the funds for site acquisition and design of a proposed new Government Printing Office Building.

TITLE III—GENERAL PROVISIONS

Section 305 provides that during fiscal year 1982, individuals in the legislative, executive, or judical branch, or the District of Columbia government, may not receive a pay raise over their rate of pay on September 30, 1981, if their salary is set at a rate which is equal to or greater than level V of the Executive Schedule (currently frozen at $50,112.50 per annum), or to a percentage of such rate. There is also a limitation on bonuses paid to senior executive service personnel.

EXPLANATION OF SECTION 305

Section 305 provides for a pay freeze for high-level individuals in the legislative, executive, and judicial branches or in the government of the District of Columbia.

The first sentence provides that the rate of basic pay or salary will be frozen at the rate payable or, if higher, the maximum rate payable on September 30, 1981, which is the last day before the 1981 comparability adjustment is to take effect. It also defines in clauses (1) and (2) the individuals who are subject to the freeze. Under clause (1) any individual whose rate of pay is $50,112.50 or more (that is equal to or greater than level V of the Executive Schedule) is covered by the freeze. This clause covers those individuals whose rates of pay were directly affected by the 1977 Quadrennial increase (such as judges, Members, Senators, heads and assistant heads of cabinet departments), as well as individuals whose rates of pay are administratively set at rates above $50,112.50 (such as certain high-level positions in the Postal Service).

Clause (2) covers those individuals whose rates of pay are limited to a maximum rate which is equal to or greater than the rate for level V by reason of a statutory or other salary ceiling. For example the maximum rate for GS-18 is limited to the level for level V which under existing law (section 101(c) of Public Law 96-536) is $50,112.50. Under the provision the $50,112.50 ceiling is maintained. The amendment also maintains existing ceilings on rates of pay for committee staffs, other officers and employees of the House and Senate, and for administrative assistants whose maximum rate of pay is limited by congressional resolution.

Clause (2) would also limit the 1981 pay increase for some individuals who are currently paid less than the level V payable rate of $50,112.50. For example, a GS-14, step 4 employee presently makes $49,002. Under the amendment, He could not receive this October's entire comparability increase since his pay would be subject to the "frozen" $50,112.50 statutory ceiling. The parenthetical "or a percentage of such maximum rate" insures a freeze in rates of pay for those House committee staff employees whose rates are limited to 75 percent of level IV.

Section 305 applies to individuals in all three branches, and thus includes individuals in the Postal Service and the military service.

The Office of Personnel Management has informally estimated that the freeze will apply to 48,487 individuals broken down as follows:

Directly affected by freeze (currently at level V or above):

| | |
|---|---|
| Executive branch | 800 |
| Legislative branch | 546 |
| Judicial branch | 1,641 |
| Additional affected by frozen ceiling | 45,500 |
| Total | 48,487 |

Under the provision, the freeze is in effect for fiscal year 1982. If the freeze is to continue beyond fiscal year 1982, it will be necessary for Congress to enact a similar limitation of funds again next year.

Subsection (b) provides a special rule to cover positions which are created after September 30, 1981, and requires the appropriate officials in each branch to promulgate regulations to insure that the pay for such positions will be set at a rate equivalent to that for comparable positions which were in existence on September 30, 1981.

Subsection (c) provides that the number of Senior Executive Service bonuses be limited to 25 percent of all those eligible, instead of the 50 percent allowed under the civil services reform law. This would not affect the payment of differentials, allowances, or other payments, except salaries and bonuses.

Subsection (d) provides that the salary or pay actually paid to an employee, as a result of the application of the amendment, will serve as the basis for computing life insurance, retirement, and other benefits, rather than the higher statutory rate.

CONCLUSION

Mr. Speaker, these are the highlights of H.R. 4120, as reported to the House on July 9, 1981. The committee report (No. 97-170) explains our actions in much more detail, and is available to all the Members of the House.

The committee has little discretion as far as the amounts for the House and the joint items of the Congress are concerned. Salaries, allowances,

and expenses of the Members, special and select committee funding, and other items have been approved by the House and are already in effect through the adoption of House resolutions from the Committee on House Administration. Where the committee has discretion, it has been exercised.

As I noted earlier in my remarks, the committee is recommending an overall reduction totaling $80,711,000, and only 22 of the 265 new positions requested in those areas where we have control have been allowed. Moreover, the level of legislative branch staffing will actually be less than the current level.

We are bringing a legislative branch budget to the House that is smaller in real dollars than the current year.

We have trimmed the fat from the legislative branch and have made a conscious effort to stimulate increases in productivity.

We have no apologies to make in voting for this budget, Mr. Speaker.

I think all the Members can support and identify with these recommendations during this period of extreme budget austerity.

● Mr. ALEXANDER. Mr. Speaker, I would like to address two questions to the gentleman from Iowa, chairman of the Appropriations Subcommittee on Commerce, Justice, State, and the Judiciary. As the chairman of the subcommittee knows, I and other members of the committee and House, are convinced that the State-based economic development representatives are essential to the effective and efficient operation of the Economic Development Administration.

My questions are these.

Is it not correct that the intent of the Congress that the EDR's remain in place and doing the jobs they have done through the years was clearly expressed in the reports on the Supplemental Appropriations and Rescissions Act for 1981 and H.R. 4169, the regular EDA fiscal year 1982 appropriations bill which passed the House this month? And, further, is it not correct that the chairman decided against offering an amendment on this matter to the language of this resolution now before us because of the committee's desire to present the House with as simple a continuing resolution as possible and that that decision in no way reflects a change in our concern over the administration's actions ignoring congressional intent with regard to the EDR's?

Mr. SMITH of Iowa. The gentleman is correct in both instances.●

Mr. CONTE. Mr. Speaker, I have no further requests for time.

Mr. WHITTEN. Mr. Speaker, I move the previous question on the joint resolution to final passage.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 281, nays 107, not voting 45, as follows:

□ 1300

The Clerk announced the following pairs:

On this vote:

Mr. Pepper for, with Mr. Pickle against.

Mr. O'Brien for, with Mr. Hollenbeck against.

Until further notice:

Mr. Biaggi with Mr. Vander Jagt.
Mr. de la Garza with Mr. Hunter.
Mr. AuCoin with Mr. Martin of North Carolina.
Mr. Fascell with Mr. Marriott.
Mr. Mavroules with Mr. McGrath.
Mr. Udall with Mr. Young of Alaska.
Mr. Ireland with Mr. Rousselot.
Mr. Garcia with Mr. Schulze.
Mr. Florio with Mr. Dreier.
Mr. Fuqua with Mrs. Fenwick.
Mr. Crockett with Mr. McDade.
Mr. Phillip Burton with Mr. Rudd.
Mr. Coelho with Mr. Madigan.
Mr. Brown of California with Mr. Lujan.
Mr. Evans of Indiana with Mr. Lowery of California.
Mr. Fithian with Mr. Hagedorn.
Mr. Boner of Tennessee with Mr. Hartnett.
Mr. Savage with Mr. Burgener.
Mr. Cheney with Mr. Goldwater.
Mr. McCloskey with Mr. Rhodes.

Mr. GEPHARDT, Mr. PATTERSON, Mrs. MARTIN of Illinois, and Mr. HANSEN of Idaho changed their votes from "yea" to "nay."

Mrs. HOLT changed her vote from "nay" to "yea."

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## PERSONAL EXPLANATION

Mr. JOHNSTON. Mr. Speaker, I was unable to be present on the floor of the House of Representatives for rollcall No. 205 yesterday, on H.R. 3380, to increase the pay and allowances of members of the Armed Forces. Had I been present, I would have voted "yea."

## MILITARY CONSTRUCTION APPROPRIATIONS, 1982

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 215, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 215

*Resolved,* That during the consideration of the bill (H.R. 4241) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes, all points of order against the following provisions in said bill for failure to comply with the provisions of clause 2, rule XXI, are hereby waived: beginning on page 2, line 3 through page 8, line 7; and all points of order against the following provisions in said bill for failure to comply with the provisions of clause 6, rule XXI, are hereby waived: beginning on page 4, line 7 through page 5, line 5; and beginning on page 7, line 1 through page 8, line 2,

The SPEAKER pro tempore. The gentleman from Texas (Mr. FROST) is recognized for 1 hour.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 215 is a rule to facilitate consideration of H.R. 4241, the Department of Defense Military Construction Appropriation Act for fiscal year 1982. The rule waives points of order pursuant to clause 2 and 6 of rule XXI against certain paragraphs of the bill.

Clause 2, rule XXI, prohibits unauthorized appropriations and legislation in an appropriations bill. As in the case of other appropriations bills that we have considered this session, this waiver is necessary because legislation authorizing funds for military construction for fiscal year 1982 has not yet been enacted. H.R. 3455, the military construction authorization bill, was passed by the House on June 4, 1981, by a vote of 311 to 36. A similar Senate bill is currently awaiting Senate floor consideration. Since the authorization has not been enacted into law, the appropriating provisions of H.R. 4241 violate the provisions of clause 2, rule XXI.

Additionally, the limitations and legislative provisions in the bill appear in the section entitled "General provisions" and are not covered by the waiver of clause 2, rule XXI.

Mr. Speaker, House Resolution 215 also waives clause 6, rule XXI, which prohibits reappropriation of unexpended balances of funds. The waiver is necessary because two paragraphs in the bill which authorize transfer of unexpended balances from previous appropriations for use in military public works projects and defense family housing constitute reappropriations. The rule specifically identifies those sections of the bill for which waivers are granted.

Mr. Speaker, H.R. 4241 provides $6.9 billion in new budget authority for military construction projects and military family housing for fiscal year 1982. This amount is approximately $591.5 million or 10 percent below the administration's budget request but also represents an increase of $1.6 billion over the fiscal year 1981 appropriation of $5.3 billion. H.R. 4241 does not exceed the total amount recommended in the authorizing legislation passed by the House.

Mr. Speaker, I know of no particular controversy over this rule. I urge my colleagues to adopt House Resolution 215 so that the House may proceed to the orderly consideration of the bill on its merits.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I shall not go into the details of the resolution, as the able gentleman from Texas (Mr. FROST), has explained them thoroughly. I know of no objection to the rule. I think it is important that we get the appropriation bills behind us.

There are some deficiencies in the measure itself which I am sure will be discussed on the floor. However, Mr. Speaker, I urge the adoption of the rule.

I reserve the balance of my time.

Mr. FROST. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. GINN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4241) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Ohio (Mr. REGULA) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Georgia (Mr. GINN).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4241, with Mr. SHARP in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from Georgia (Mr. GINN) will be recognized for 30 minutes, and the gentleman from Ohio (Mr. REGULA) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Georgia (Mr. GINN).

Mr. GINN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, before beginning my remarks I want to say that I do not think any subcommittee chairman from the Appropriations Committee has ever had any ranking member be any more cooperative than the gentleman from Ohio (Mr. REGULA) has been to me. Today I want to express my profound appreciation to him, along with my appreciation to all members of our subcommittee, because we have workd together, I think, as a bipartisan team, and we

bring today to the floor an excellent bill.

The Military Construction Subcommittee held extensive hearings that have led to the bill that is before the House today. The amended request for military construction and family housing totaled $8 billion. The committee has deferred consideration of $522.3 million for MX funding of that request. The total amount recommended includes $6.9 billion, which is the largest military construction appropriation to ever reach the floor of the House of Representatives.

The committee's recommended fiscal year 1982 funding represents a $592 million reduction from the amount considered, but a $1.6 billion increase over the amount approved in fiscal year 1981. The recommendation by the committee is $96 million below the outlay request of the executive branch and also $40 million below the section 302 budget allocation.

The committee's recommendations reflect the current fiscal and economic conditions of the country and weigh the highest priority military requirements against the need for fiscal restraint. I feel the recommended bill achieves this balance.

The committee this year focused on some of the most important issues facing the country today, the basing of the MX missile, Indian Ocean, Persian Gulf program, NATO programs in construction, the Pacific, and the overall need to improve the quality of life in the military. I will now highlight a number of major recommendations that are explained in more detail in the committee report.

Mr. Chairman, the committee has deferred, without prejudice, the consideration of $522.3 million requested in fiscal year 1982 for design, construction, land acquisition, and headquarters facilities for the land-based system to support the MX missile.

□ 1315

The committee had hoped to have the opportunity to hold hearings and to examine the administration's MX proposal prior to completing action on the fiscal year 1982 appropriations bill for military construction. However, Mr. Chairman, no decision from the administration on the MX system has been made. The long-term significance of the MX program is such that the committee feels that action should be deferred until hearings and a full review of the program can be conducted. In order to assure timely approval of the other items in the fiscal year 1982 request, the committee feels that action must proceed at this time.

The committee will work with the administration in the upcoming months to find the most beneficial method to review and act on additional military funding for the MX or other systems that might require construction funding.

The committee continues to support the policy of developing capabilities in the Persian Gulf area to assure the continuation of the flow of oil from the region, while respecting the sovereignty of foreign states. The committee recommends $335 million to continue our efforts to provide additional facilities in the Middle East. Construction projects at Ras Banas, Egypt, and Lajes, Portugal, are not recommended because of questions concerning the design, need, and country-to-country agreements.

Over the past years, not enough attention has been paid to fulfilling our need to provide modern facilities for our personnel stationed in NATO countries. The committee feels that planning has been based on the assumption that the United States would stay in Europe for a short period. That short period has turned into more than 30 years. Facilities are now worn and inadequate and no longer meet the requirements of a modern military force. The needs have grown to the point, Mr. Chairman, that the Department estimates a requirement of more than $10 billion in construction to solve the current construction deficiency.

The committee's recommendation of $1 billion in NATO funding is the largest ever. The committee feels it is time to get on with improving facilities for our people who serve there.

Recent news reports have indicated that the Republic of Germany is reluctant to proceed with the development of the master restationing plan in Germany. However, it is my understanding that the Government is interested in continuing discussions on the implementation of the restationing proposal. It is essential that talks be initiated rapidly in order to accelerate the implementation of the master restationing plan. We are at a critical juncture with our facilities in Germany. It is time to improve our installations, as well as locate them in the most strategic locations. The relocation of facilities from crowded urban areas will allow for more productive use of property by Germany and for siting U.S. facilities at more advantageous locations. The funding for the program by the Germans will be recouped from moneys obtained through the release of urban property and thereby to offset the planned increase defense expenditures.

The committee has recommended $18 million for projects associated with the master restationing plan. The U.S. contribution is proposed in order to show our commitment to the program and to obtain a like response to the Government of Germany. I am disappointed that the initial response from the Republic of Germany is one of only continuing to discuss this plan. I hope that in the next several months the discussions will turn to positive action by the German Government.

In regard to another NATO construction matter, the ground-launched cruise missile facilities have been recommended in order to show our support for the program, but we require, Mr. Chairman, that the Department seek NATO infrastructure funding for essentially all GLCM construction.

The committee held extensive hearings this year to examine the issues relating to improving the quality of life for the men and women who serve in the U.S. military. In a special hearing on the subject this year, the committee invited and heard testimony from the top ranking enlisted person in each service and the Exectutive Secretary of the Defense Advisory Committee on Women in the Service. The committee has added a new section to the report on quality of life to show the need to accelerate unaccompanied personnel housing, to improve family housing overseas, and to fund child care centers with military construction funds. Design funds in the amount of $20 million have been added to the request to accelerate the design of 20,000 substandard barrack spaces.

The committee again this year has focused on the need for the Department of Defense to increase the host nation's support provided to U.S. Armed Forces defending foreign nations. The committee feels that as the United States significantly increases its spending on defense, other countries should develop host nation programs to reduce the U.S. costs associated with the maintenance of large numbers of U.S. troops and dependents stationed abroad.

ENERGY

The committee held extensive hearings this year on DOD's energy program. It is essential that the Department, as the single largest user of energy in the United States, embark on an aggressive program for both energy conservation and new technology improvements.

The committee approved all requested projects for energy conservation except those requested for temporary buildings scheduled for replacement. The committee is confident that the Department will reach its goal of a 12-percent reduction in energy use by 1985.

The committee included language in the bill clarifying the life cycle cost criteria to be used when determining the feasibility of solar energy applications to construction projects. The committee also made reductions to the utility account in family housing as a direct incentive to reduce consumption.

POLLUTION ABATEMENT

The committee has approved all funds requested for domestic air and

water pollution abatement programs. Testimony before the committee indicated that the Department of Defense, not the Environmental Protection Agency, will pay for DOD use of sewage treatment plants, when they are tied into the local system. The committee acknowledges that some additional costs may be incurred because of the waiting period for this decision.

Although the Department has made gains in reducing pollution abatement violations, there still remains a backlog of pollution control projects. The committee expects the Department to continue to devote sufficient planning and design funds to continue to reduce this backlog.

SAFETY

The DOD safety program has been an issue of particular interest to the committee. Worker safety should be a primary concern of the Department, and the committee feels that priority should be given to any military construction project that will eliminate safety problems.

The committee directed last year that the Department prepare a multiyear plan that establishes how military construction projects will be funded to correct safety problems. That report was prepared and has been published in part 3 of this year's hearing record. The committee has approved all requested safety projects and urges the Department to continue to program its safety improvements so that it can meet its stated goal of eliminating all serious hazards by 1984.

MEDICAL PROGRAM

The committee has been concerned about several issues involving medical readiness and held extensive hearings this year to examine these concerns. The committee feels that there are many methods available to provide for medical mobilization space without overbuilding military hospitals. The committee has directed the Department to review design alternatives that would improve the mobilization capacity of military hospitals constructed in the future, and to develop a standard guidance on ways to improve military service plans for use of existing hospitals.

SHORTFALL FUNDING

The Department requested $387,437,000 in fiscal year 1982 to cover funding shortfalls in varying amounts for each of the services. The committee provided $293,400,000 of that request. The fiscal year 1982 budget amendment reduced that total military construction request by $119,300,000 because the President's economic recovery plan is expected to result in lower inflation and result in Government-wide savings. The committee has accepted these reductions and is hopeful that these savings can be achieved. However, since the shortfall was justified partly on the basis that lower than actual inflation rates were used in estimating and since the Department has lowered the assumed inflation rate for the fiscal year 1982 request, the committee does not anticipate any funding shortfall requests in the future.

MILITARY CONSTRUCTION, ARMY

The committee is recommending appropriations totaling $1,029,519,000 for "Military construction, Army." This is $70,181,000 less than the amount requested and $143,285,000 more than the amount appropriated in fiscal year 1981. The major reductions are the Fort Carson, Colo., land acquisition; the shortfall funding reduction; the construction management for NATO; and the Ras Banas, Egypt, project. The committee added planning and design funds to advance barracks projects and approved two additional barracks projects.

MILITARY CONSTRUCTION, NAVY

The committee is recommending appropriations totaling $1,404,883,000 for "Military construction, Navy." This is $72,917,000 less than the amount requested and $613,748,000 above the amount provided in fiscal year 1981. The major reductions are the deletion of four airfield pavements projects; the Mariana Islands land lease; and the shortfall funding adjustment. The committee has included $204,000,000 to initiate construction of the San Diego, Calif. hospital. The committee added several projects to modernize and enhance the capabilities of the Nation's shipyards.

The committee has approved a substantial amount for the Marine Corps and has added several projects to enhance their readiness.

MILITARY CONSTRUCTION, AIR FORCE

The committee is recommending appropriations totaling $1,407,565,000 for "Military construction, Air Force." This is $295,535,000 below the amount requested and $470,340,000 above the amount provided in fiscal year 1981. The committee has deferred consideration of the $522,300,000 requested for the MX missile system as discussed earlier. The major reductions were the adjustment to the shortfall request and reductions to projects at Lajes Air Base, Portugal; Ras Banas, Egypt; and Diego Garcia, as well as deletion of all requested funds for the collocated operating bases in Europe.

MILITARY CONSTRUCTION, DEFENSE AGENCIES

The committee is recommending appropriations totaling $251,004,000 for "Military construction, Defense agencies." This is $103,096,000 below the amount requested and $10,996,000 below the amount provided in fiscal year 1981. The major reductions are the deletion of the National Security Agency building project at Fort Meade, Md.; the fuel tankage project in Korea; and an adjustment to the emergency construction request.

NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

The committee is recommending appropriations totaling $385,000,000 for the NATO infrastructure. This is $135,000,000 above the amount provided in fiscal year 1981 and is the full amount requested.

MILITARY CONSTRUCTION, RESERVE COMPONENTS

The committee is recommending appropriations totaling $313,342,000 for "Military construction, Reserve components." This is $77,142,000 above the amount requested and $79,831,000 above the amount provided in fiscal year 1981.

The committee heard testimony this year which indicated that there is a significant backlog of Reserve construction. The committee has provided a substantial increase in the Reserve components request in order to accelerate the replacement and modernization of Reserve facilities. The committee has recommended adding only projects that are at a sufficient design level to require construction in fiscal year 1982.

FAMILY HOUSING, DEFENSE

The committee is recommending appropriations totaling $2,238,027,000 for "Family housing, Defense." This is $126,869,000 less than the amount requested and $128,196,000 above the amount provided in fiscal year 1981.

The committee continues to be concerned that although the number of family housing units has remained relatively stable over the past several years, the cost of the family housing program has increased at a greater rate than the annual rate of inflation. The committee has made reductions in this year's request in areas where better management and increased emphasis on conservation of energy can lead to cost savings. The committee has approved all projects that contribute to improved quality of life in the military. The reductions made by the committee encourage better management and will not adversely impact the quality of life.

HOMEOWNERS ASSISTANCE FUND

The committee has approved the $2,000,000 requested to insure payment to individuals who are forced to dispose of their homes due to base closure or reductions in the scope of operations.

The committee has made every attempt to recommend funding for projects in the United States. The funding recommended relates to approximately 200,000 jobs in the construction and related industries and accounts for $3.5 billion of the bill.

In addition to these areas of emphasis, the committee is recommending a series of pluses and minuses in the various military construction programs.

Each of these is identified in the back of the report in the State list section.

I urge the swift adoption of this bill, Mr. Chairman. The recommendation provides for the most far-reaching military construction program ever passed by the House of Representatives. It is time for us to proceed to improve the facilities in the Defense Department. This must be done both for the sake of the men and women who work and live in these buildings and for the long-term defense needs of the country.

Mr. REGULA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I wish to echo the chairman's remarks about the excellent working relationship in the committee. This is due, in large part, to the leadership provided by the gentleman from Georgia. In every instance, members of the committee, of the subcommittee, as well as outside Members had an opportunity to present their ideas on needed construction. It has been a real pleasure to work with the gentleman from Georgia, particularly because our efforts have been totally nonpartisan, and the only goal of the committee is to best serve the needs of this Nation and the Armed Forces.

I would point out to the Members that, while military construction is not an exciting topic, it is one of the very basic elements in having an adequate security system for the United States.

The cutting edge of any weapons system has to be construction, regardless of what it might be: a new airplane, a new ship, a new system of any type. There has to be a development of port facilities, such as Kings Bay for the Trident submarines on the east coast. There must be runways adequate for our airplanes. There must be wind tunnels, such as we have in Arnold Engineering in Tennessee to test equipment. All of these involve construction. Therefore, the forerunner of any adequate security rests in getting a finely developed construction system to meet the needs of any given weapons system.

We hear a lot today about the necessity of a volunteer military service and the necessity to retain skilled people in the service.

Again, construction is a very important element. If you have inadequate housing facilities, be it in the United States or in the 29 territories and foreign countries that have U.S. personnel, the problems of retention are magnified because people are concerned about adequate housing. They are concerned about adequate workplace facilities. I want to emphasize that an adequate military construction budget is basic to everything we do in military programs.

I would also emphasize that no matter what kind of figures you use on this particular bill, we are under the administration's requests and under the section 302 allocations. We are under the President's request by $96 million. We are under the section 302 allocation by $40 million. So I think that everyone can feel comfortable that in the terms of actual budget outlays for fiscal year 1982, the military construction budget is under any set of measures that you might want to use. This again reflects the leadership of the chairman in trying to make everything that we do in this budget cost effective. Seven billion dollars is a lot of money, and it is important that we use this wisely to achieve the greatest amount of construction possible.

This year's Department of Defense request for military construction totaled $7.5 billion, excluding a half billion dollars for MX missile system projects. This is the largest request ever submitted to this committee. After extensive hearings on the various projects, and in view of this country's current economic situation, the committee reduced funding by over a half billion dollars and is bringing a bill totaling $6.9 billion in military construction appropriations for 1982. I think the bill achieves a balance between our national defense needs throughout the world and the need to control overall Federal spending and to justify defense expenditures to the American taxpayers.

In addition to the specific construction projects funded in this bill, there are certain issues that the committee addressed this year.

I might add that I do not think we often recognize the magnitude of the construction programs. We are involved in 1,286 bases worldwide. All of these construction decisions have to be made by this subcommittee, in terms of funding.

In regard to the MX missile program, with President Reagan's decision on MX basing imminent, the committee has deferred all MX-related requests, including $146.3 million for planning and design, $345.5 million construction, $9.5 million planned acquisition, and $10 million of community impact assistance, along with $11 million for MX headquarters. We recognize that there is a great deal of uncertainty in the whole question of the basing mode for the MX, and therefore we are deferring this until there is a clear decision in the Department of Defense and in the Congress on basing for the MX weapons system.

In fiscal year 1981 $92 million was requested in the supplemental MX planning and design, and this was also deferred by this committee earlier in the year. The committee will work with the administration to evaluate and review the President's forthcoming decision on MX basing and his request to provide construction funds. Hearings will be conducted and a thorough evaluation of the MX construction request will be made by the committee.

The Persian Gulf is a vital region to the United States; vital because it is our supply of oil; vital because of raw materials coming from the African Continent. Funding for projects in the Persian Gulf is recommended at over $334 million, along with the suggestion that the United States continue to pursue sharing the burden of military presence in this part of the world with NATO allies and Japan, who also have a real stake in what happens in the Persian Gulf area.

This can often be handled by our allies by replacing U.S. responsibilities in other parts of the world. I would say to our NATO allies that they should take a look at their foreign economic assistance programs. They should take a look at their NATO commitments, and help relieve U.S. burdens in Western Europe, because we in turn are taking a large share of responsibility for the Persian Gulf.

Facilities expansion at Diego Garcia will proceed next year with the $187.4 million appropriation in this bill; $26 million is available for dredging and facilities expansion in Kenya.

In terms of NATO, in consideration of the 240,000 American Armed Forces personnel in West Germany who are working in facilities that predate World War II—some of them, in fact are World War I facilities—the committee has recommended $385 million, the full amount requested for the NATO infrastructure program, and $750 million for unilateral funding of construction and modernization of U.S. facilities.

Maxwell Taylor, retired Chairman of the Joint Chiefs of Staff, has noted that shortages of well-maintained equipment and of supply units generally mean that in Europe and elsewhere regular divisions, no matter how prepared themselves, are not in fact ready to perform their combat missions. Improving working and living conditions in NATO facilities is a top priority with the committee.

Even though West Germany has agreed in principle to offer host nation support, it has yet to appropriate any money. We are again recommending that efforts to seek more host nation and infrastructure funding continue.

I cannot emphasize too much the leadership this subcommittee has provided, not only this year, but in past years, in attempting to get greater host nation support from our NATO allies and also from the Japanese. I think it is very important that these nations take a larger share of responsibility for those forces that are stationed in their country.

□ 1330

In one of the most important hearings the committee held this year,

Members heard testimony from the top ranking enlisted person in each service on the quality of life program. It was very clear that construction of new, modern housing for both unaccompanied personnel and families is sorely needed.

For example, housing at U.S. bases in West Germany is so short that thousands of soldiers, many with dependents, have been forced into the local economy. Families may pay $800 a month—more than twice the housing allowance given men living off base—for apartments that Army inspectors classify as substandard or even uninhabitable.

Those who were able to see the NBC show hosted last week by Dave Brinkley observed the truly miserable living and working conditions our servicemen must endure in Europe. It is time we devoted as much of our energy and resources to making working conditions minimally tolerable as we do to procuring new weapons systems.

The committee added $45 million in fiscal year 1982 construction money to increase by 2,000 the number of unaccompanied personnel housing units to be built in 1982. In addition, we added $20 million to design and plan housing projects at an accelerated pace for 1983.

Child care facilities are certainly a necessary element of life in the working, military community. The committee found that child care centers are often in make-shift buildings and not up to acceptable standards. Ten centers at a cost of $14.7 million are funded in this bill.

I would like to emphasize the matter of contracting by the Department of Defense.

This year's request of over $509 million for planning and design is the largest ever in a military construction appropriations bill. I have been increasingly concerned about cost overruns that have necessitated a lot of reprograming requests this past year.

The committee is initiating an in-depth survey and investigation study on such contracting procedures as unsolicited proposals, sole source contracting, revolving door procedures, contract add-ons and change orders, and the contract selection process.

Based on the results of this study, the committee will conduct extensive hearings on this matter. In addition, this bill contains the same provision as other appropriations bills in requiring that all consulting service contracts be made a matter of public record and available for public inspection.

These hearings will begin this fall on the matter of contracting. I think that one of the important things that needs to be addressed by this Congress in terms of military budgets is how to do a better job of contracting. We took important action in the past months to allow multiyear contracting for procurement. We need to address the same issue in the matter of contracting for Government construction facilities.

It is vitally important if we are to restrain the budget costs, to restrain overruns, which erode credibility of the defense budget, that we examine the statutory requirements in the matter of contracting and see if we cannot find a better way, a more cost-effective way to meet this Nation's defense needs.

This bill today is a result of careful examination and deliberation by the committee. In this period of Government restraint in spending, we have cut back in several areas, and, in fact, are over a half billion dollars under the Department's request.

I believe this bill reflects the current economic conditions of the country and balances those conditions against the highest priority military requirements.

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from California.

Mr. CLAUSEN. I thank the gentleman for yielding.

Mr. Chairman, I rise to compliment the distinguished chairman, the gentleman from Georgia, and the distinguished gentleman from Ohio, the ranking Republican on the Subcommittee on Military Construction of the Committee on Appropriations, for what I think is an exceptionally good job under very difficult circumstances.

Mr. Chairman, I rise in support of H.R. 4241, the military construction appropriation bill for fiscal year 1982. One of the priority items addressed in this legislation is the modernization needs of our U.S. naval shipyards. In consideration of the fact that Congress will undoubtably authorize a significant increase in the production of naval vessels over the next several years, I feel it is essential to make a careful evaluation of our naval yards, their repair facilities, and their potential for future construction. The Mare Island Naval Shipyard in Vallejo, Calif., is one such facility. Mare Island has been sighted for the possible construction of 688 class attack submarines. Indeed this would be a superior choice, seeing that it is the only public west coast facility to have ever constructed submarines. There are also a large number of civilian employees at Mare Island who are experienced in new construction.

An undertaking of this magnitude however, would require greater funding not only for new ships and submarines, but also for the upgrading of the existing facility. The construction or repair of our modern subs requires both the most modern and efficient equipment, as well as an optimum arrangement of naval personnel. At the present time, Mare Island is faced with substandard pipe and boiler facilities which are widely dispersed along the shipyard's waterfront. These facilities need careful attention in order to meet occupational safety and health standards. The current inadequacies are causing both an inefficient workflow as well as insufficient labor supervision, all of which result in additional and unnecessary production costs. Rising costs in the future may be inevitable if Mare Island is forced to continue in the maintenance of substandard buildings.

Budget requests for military construction facilities of the past years have been woefully neglected. It must be noted that our objective in this legislation is to maintain the efficiency of our current naval shipyards. By making this our highest priority, we can then look forward to modernization of our Navy with the confident knowledge that past neglects have been remedied.

Mr. LOEFFLER. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Texas.

Mr. LOEFFLER. Mr. Chairman, I rise in strong support of H.R. 4241, the fiscal year 1982 military construction appropriations bill. This bill provides more than $6.9 billion in new budget authority for military construction projects in the United States and throughout the world. This represents an increase of almost 30 percent over the fiscal year 1981 level in keeping with our commitment to provide necessary increases in defense spending across the board. After years of steadily declining defense budgets, this legislation represents a critical first step in our efforts to insure our Nation's security through a strengthened and viable military capability.

I would like to point out that this bill provides more than $590 million less in budget authority and $150 million less in outlays than the President's March budget request over and above the amounts deferred from consideration for the MX missile program. In keeping with previous congressional action on the MX missile, the committee has deferred without prejudice consideration of the $522.3 million requested for MX-related projects. This action was not taken lightly, however. In view of the fact that no final decision has been made by the administration regarding the MX program, the committee felt that it was necessary to proceed with the fiscal year 1982 military construction bill so that other programs and projects critical to our military readiness will not be delayed. Should the administration proceed with a recommendation to Congress, I know that our subcommittee is committed to a prompt review and action on that recommendation.

While the committee provided major increases in funding for possible Middle East contingencies, including an aggressive construction program in the Indian Ocean and other areas in this critical part of the world, reductions were made in funding for certain activities related to the rapid deployment force. These reductions were due, in large part, to the lack of country-to-country agreements with the appropriate nations involved. It is my hope that the Department of Defense will proceed quickly to secure the necessary agreements so that we may continue to develop a sound operational plan for the RDF in the event of a severe crisis.

The committee has recognized the important contributions which living conditions and facilities make toward improving the quality of life in the military. The bill provides across-the-board increases in such areas as unaccompanied enlisted personnel and family housing in a cost-effective manner which, when coupled with other initiatives such as pay and compensation, will encourage greater enlistment and retention in our Armed Forces.

As this is my first term on the Appropriations Committee and on the Military Construction Subcommittee, I want to thank the chairman, the gentleman from Georgia (Mr. GINN), and the ranking minority member, the gentleman from Ohio (Mr. REGULA), for their leadership and for their assistance to me. I look forward to working with you and the other members of the subcommittee in the future.

I particularly want to thank the chairman for his assistance in securing funds to initiate planning and design for critically needed facilities at Goodfellow Air Force Base in San Angelo, Tex. This important cryptological training center has for some time been under consideration for closure. That ominous cloud has passed, and I am grateful for the committee's recognition of the urgent need to expedite the design of facilities at Goodfellow.

Overall, Texas military facilities received approval for more than $125 million in construction-related projects, including many which are directly related to maintaining a high degree of readiness of both Active and Reserve Forces located in the State and improving the quality of life for those personnel. Bases and projects receiving funding under this bill include enlisted housing at Kelly and Lackland Air Force Bases in addition to a $2.2 million marksmanship training facility at Lackland, funds to upgrade facilities in support of Air National Guard, Air Force Reserve, and Army Reserve contingents in San Antonio, Tex., and a $1 million data processing facility at Laughlin Air Force Base in Del Rio, Tex.

Again, I want to thank the gentleman from Georgia and the gentleman from Ohio for their leadership during the consideration of this important legislation. At this time, I would like to engage the gentleman from Georgia in a colloquy concerning the Brooke Army Medical Center at Fort Sam Houston, Tex.

Mr. Chairman, I am extremely concerned relative to the physical condition of the existing hospital facilities at Brooke Army Medical Center, Fort Sam Houston, Tex. Brooke Army Medical Center is essential to the health care capabilities of the Army Medical Department and the U.S. Army. The Center ranks second among all Army hospitals in both beds occupied and outpatient visits, and is the location of the internationally known and respected burn center.

However, the Center is dispersed among numerous old buildings across the post, resulting in safety hazards, performance inefficiencies, and demeaning patient care. Efforts to achieve a major hospital construction project have been frustrated by resistance within the Department of Defense and have resulted only in limited renovations of little permanent value.

As a result of these concerns and at the urging of the House Armed Services Committee, the Department has proposed construction of a major addition which would consolidate and modernize all BAMC activities at Fort Sam Houston. While fully justified and long overdue, construction has been delayed until fiscal year 1987. However, it is my understanding that the project could be moved up to fiscal year 1986 should design funds be available as early as fiscal year 1982. In view of the critical need for this facility, and because of the long leadtime for the development of a medical center of this size, including the required extensive economic analysis and design studies, it is my strong recommendation that the Department expedite programing for a new Brooke Army Medical Center so that design may be initiated during fiscal year 1982.

Mr. GINN. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Georgia.

Mr. GINN. The gentleman is correct in his analysis on the need to proceed rapidly with the design and construction of new facilities for the Brooke Army Medical Center. I support you in the desire to proceed with this project. The Army has furnished the committee with information that indicates that planning and design funds for the Brooke project may not be required until fiscal year 1983 because of necessary prearchitectural work that must take place during fiscal year 1982.

Mr. LOEFFLER. Mr. Chairman, I would expect, then, that the committee would proceed with full design funding for the project in fiscal year 1983. However, if the necessary work were to be completed prior to fiscal year 1983, are sufficient planning and design funds available for the project at the Brooke Army Medical Center?

Mr. GINN. The committee has recommended approximately $128 million in planning and design funds for the Army in fiscal year 1982. If the various studies for the Brooke project were completed earlier than scheduled, I feel the Army has sufficient planning and design funds to accommodate any requirements for the new hospital. I want to assure the gentleman that the committee will watch the design status of the project very carefully, and, if additional funding becomes necessary, that we will work with the Army, through reprograming or other means, to assure that sufficient design funds will be available when required.

Mr. LOEFFLER. Mr. Chairman, it is my understanding, then, that the committee will closely monitor the progress of the Brooke Army Medical Center project to assure its design and construction on the most timely basis, and that if the Department is able to proceed with design in fiscal year 1982, design funds will be available?

Mr. GINN. I will give the gentleman my assurances that the committee will see to it that the Brooke project is carefully monitored and that design funds will be available when needed.

Mr. LOEFFLER. I thank the gentleman for his assurances. I urge support for the fiscal year 1982 military construction appropriations bill and again give my thanks and appreciation to the distinguished chairman of our subcommittee and to the distinguished ranking minority member of our subcommittee, and I yield back the balance of my time.

Mr. REGULA. Mr. Chairman, I yield such time as he may consume to the gentleman from Alabama (Mr. DICKINSON).

Mr. DICKINSON. I thank the gentleman for yielding.

I want to rise in support of this military construction bill.

Mr. Chairman, yesterday, I stood in the same place to discuss one leg of what I considered probably the biggest problem facing the military. That had to do with the compensation of our uniformed personnel.

Today I think the other leg of what is necessary to maintain an effective combat force is being addressed, and that is the military construction bill.

There are two things we talk about if we want to avoid resorting to the draft. What do we have to do to build and maintain an adequate force? Is the All Volunteer Force working? And people say no, no, it is not, we are not attracting the right quality of people and not retaining them.

Well, Mr. Chairman, we do not have to worry about attracting people into the service nearly so much as we do about retaining those we already have who we have trained, in whom we have hundreds of thousands of dollars invested in their skills and experience. If we do not provide them the quality of life that they expect and deserve, then we have found that we lose them.

We find there is a constant hemorrhage of trained personnel and that we have to replace those losses through the very expensive process of recruiting and retraining new personnel for positions that had been filled by good people who would like to have stayed had they been offered a better standard of living and quality of life that they are entitled to and that they see in the civilian community.

So when the gentleman from Ohio commented on what has happened in West Germany, he is exactly correct. Our Subcommittee on Armed Services visited in Stuttgart, I think 6 months ago, and was given a briefing as to the situation there.

General Allen, who is Deputy CINCEUR, gave us an extensive briefing and the situation that the gentleman from Ohio described was impressed on us. He said:

Congressman, you would not let your son, if you knew it, live in the conditions that we are forcing our enlisted men to live in, because we will not furnish them on-base housing. We do not have the facilities. They have to go off base to find places in which to live with their families. They are having to pay exorbitant rates because of the shortage of housing in West Germany and it is substandard housing that you would not allow anybody in your family to live in, but we are forcing our soldiers to live in these conditions.

The answer is, what we are trying to do today in part, the military construction budget. We are not worried about the weapons systems now. They are a concomitant part and a very important part of our overall defense posture.

When we authorized the Trident submarine we knew that necessary facilities would be constructed for it. We know that we have to appropriate for the necessary support and berthing facilities for it. When we authorize so many aircraft, we know we are going to have an airport with a paved runway of $x$ number of feet, hangars, revetments, and so forth, but what about the people?

I am required to do a great deal of traveling as ranking member of the Committee on Armed Services. I have been all around the world, and it is our job to see what conditions our people are living in and in base after base we find people living under deplorable conditions. I have seen people in this country, in my district, living in World War II barracks, with holes in the walls, so to speak, through which the wind blows. When you can see this happening all through the United States, we might as well not worry about how much money we are going to spend on the MX missile and all the exotic programs and strategic programs. That money is going to come, because somebody is out there selling that program. But when it comes to creature comforts, a decent standard of living for our enlisted people, particularly, we fall far short. The quality of life they deserve has never been achieved. This military construction bill is one step toward correcting that and I want to commend the chairman of the subcommittee and the ranking member and all the members of the Subcommittee on Military Construction for focusing on this problem.

I hope we will continue to focus on it and I hope that we will furnish all of our people in uniform an adequate standard of living so that we do not have to worry about them being demoralized, and losing confidence in their Government. We gave them a pay increase yesterday. Let us give them better living conditions today. I want to rise in strong support of the bill and congratulate the committee for its work.

□ 1345

Mr. GINN. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Chairman, I want to rise in strong support of this legislation and also to compliment the chairman and ranking member for the job they have done.

Mr. Chairman, I welcome the opportunity to enter into a brief colloquy with the distinguished chairman of the subcommittee, the gentleman from Georgia.

I have a simple request concerning the construction of the proposed National Guard Armory for Westchester County which is noted in the subcommittee report.

It would be helpful, for the purpose of clarification, that the armory be designated as the Yonkers/Mount Pleasant Armory. This will allow for the final site selection to be made in the area of Yonkers or Mount Pleasant. Current planning is underway to determine the best location.

Mr. GINN. Will the gentleman yield?

Mr. PEYSER. I would be glad to yield.

Mr. GINN. I have had the opportunity to review this request, and I believe that the project area should be identified as the Yonkers/Mount Pleasant Armory. We would expect the Department of Defense to return to the Committee to report the final site selection. This will allow for an orderly planning process for the project.

Mr. PEYSER. Mr. Chairman, I thank the chairman very much.

Mr. REGULA. Mr. Chairman, I yield such time as he may consume to the gentleman from Oklahoma (Mr. EDWARDS), a member of the subcommittee.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I just rise first of all to thank the chairman of the subcommittee and the ranking member of the subcommittee for the excellent job they did. We had extensive hearings on all of the parts of the bill. We gave very careful attention to things that have been somewhat controversial, including the continued funding on the MX program.

We gave all points of view a very good hearing.

I want to thank the chairman and the ranking member and say that I fully support the actions of the subcommittee on the bill that we have reported out.

I think on matters like the MX, we have done what was prudent, practical, and reasonable from the point of view of people who are committed to a strong national defense.

I would hope that the House would support the recommendation of the subcommittee and approve the appropriations.

Mr. GINN. Mr. Chairman, I yield 1 minute to the gentleman from Colorado (Mr. KOGOVSEK).

Mr. KOGOVSEK. Mr. Chairman, I want to take just a brief period of time right now to commend the chairman of the subcommittee and also the ranking member, the gentleman from Ohio (Mr. REGULA) for their diligence and for their hard work on the committee.

As the gentleman from Ohio indicated, the Military Construction Subcommittee is not the most exciting committee to serve on. I think all too often the people of this country think that a subcommittee sits down and meets here in Washington hour after hour and really does not get out and do the groundwork that has to be done.

I want to bring to the attention of the House at this time the work that was done by the gentleman from Georgia (Mr. GINN), and by the gentleman from Ohio (Mr. REGULA), on a very small matter, at least so far as the overall budget is concerned, the proposed expansion of Fort Carson. I would commend the gentlemen from Georgia and Ohio who, on a very small matter of $30 million, and it is small compared to the entire budget, for taking the time and having the diligence to come to Colorado and look at the Fort Carson expansion site which is a major concern to the people of southeastern Colorado. It is a critical problem to the gentleman from Colorado. It was more than just a day's visit. It was an in-depth investigation of the expansion issue.

I think that as the gentleman from Ohio (Mr. REGULA) and the gentleman from Georgia (Mr. GINN) were riding on the back end of a pickup truck in southeastern Colorado on a very hot day that approached the 100° mark, when the gentleman from Ohio and the gentleman from Georgia were riding on the back end of a pickup truck eating a lot of southeastern Colorado dust, they wondered, I am sure, about the job that they had to do.

I wanted to take this time, to tell the gentleman from Georgia and the gentleman from Ohio, that on behalf of my constituency I want to thank them both for their attention to detail, for their diligence and for their hard work on this committee.

Mr. GINN. Mr. Chairman, will the gentleman yield?

Mr. KOGOVSEK. I yield to the distinguished gentleman.

Mr. GINN. Mr. Chairman, I would say to the gentleman from Colorado, I think I can speak for the gentleman from Ohio (Mr. REGULA), as well as our entire subcommittee, we thoroughly enjoyed our visit to the gentleman's great State and to the gentleman's great district.

The matter we were looking at there is a very important matter. We look forward to continuing to work with the gentleman. We thank the gentleman for his hospitality while we were there.

Mr. KOGOVSEK. Mr. Chairman, I thank the gentleman.

I would ask to associate myself with the remarks that were made on behalf of the bill by the gentleman from Ohio (Mr. REGULA) and by the gentleman from Georgia (Mr. GINN).

I speak in support of the bill.

Mr. GINN. Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Chairman, I wish to thank the distinguished chairman for giving me this time. I wish to congratulate the chairman and the ranking member of this subcommittee for the report and the bill which they bring to the floor today.

I particularly want to associate myself with the remarks of the gentleman from Alabama (Mr. DICKINSON) on the work done by the committee on behalf of housing for American personnel in Europe and elsewhere.

The conditions that our fighting men and women, the living conditions which they must endure, are really getting intolerable. In this bill we take a long step forward in correcting that situation.

I think there is no greater base for high morale, a high sense of duty, than to have good living conditions. This we must look after.

The committee, as I say, has started on that road now.

Mr. GINN. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. Yes; I yield.

Mr. GINN. I want to thank the gentleman, of course, for his complimentary remarks and say to the gentleman and to the chairman, the gentleman from Georgia (Mr. BRINKLEY), who are both very important members of the House Armed Services Committee, that we are attempting to follow the gentleman's lead in improving housing conditions and the quality of life of all our military personnel.

We thank the gentleman from Texas (Mr. KAZEN) and the gentleman from Georgia (Mr. BRINKLEY) and other members of the committee for the great work they have done in this area.

Mr. KAZEN. I thank the gentleman.

My chairman of the Milcon subcommittee of the Armed Services Committee, the gentleman from Georgia (Mr. BRINKLEY), has been looking into this situation. We have found out that in many, many parts of the world the living conditions are nothing that the American people could be proud of. It is right here in this bill that we begin to do something about it.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(By unanimous consent, Mr. KAZEN was allowed to proceed for 2 additional minutes.)

Mr. KAZEN. Mr. Chairman, I wish to compliment my colleague, the gentleman from Texas (Mr. LOEFFLER) for bringing to the attention of the committee the situation at Brooke Army Hospital. Our colleague, the gentleman from Texas (Mr. GONZALEZ) in whose district the hospital is located has been very interested in this situation for a long time. In fact, it was the gentleman from Texas (Mr. GONZALEZ) who obtained the $10 million appropriation last year or the year before to update the physical plant only up to the point where it would not become unaccredited, and that is how bad the situation is there. Mr. Chairman, that hospital houses the most renowned burn center in the world and we must not neglect it.

I am glad to get the assurances of the chairman of the subcommittee that they will continue to push the Army to get going on this project as soon as possible and that the committee will then look very favorably upon the appropriations for this hospital.

Lastly, Mr. Chairman, I would like to ask a question concerning Chase Field in Beeville, Tex., which is in my district.

The budget requested $2,800,000 for paving at that base. I see where the committee has refused to fund it.

Now, what was the reason for the refusal?

Mr. GINN. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. Certainly.

Mr. GINN. We are not recommending the paving in the fiscal year 1982 bill, to which the gentleman referred, we think for a good and sound reason, certainly, though, without prejudice.

There is a new system, known as the CASS system, and in seventh grade language which we can all understand, that means centralized airfield support system. It is a new system of installing and implementing refueling facilities, which has worked very well at civilian airports. The military has already successfully tested that at Randolph Air Force Base in Texas.

Mr. KAZEN. In my district, sir.

Mr. GINN. Yes, in the great district of the gentleman.

What we are attempting to do is to urge the Navy to move forward with the CASS system.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. GINN. Mr. Chairman, I yield the gentleman 1 additional minute.

We are attempting to urge the Department of the Navy to move forward with the implementation of the CASS system at the field to which the gentleman referred, so it will not be necessary to pave it, tear it up and put in a system and repave it.

We have taken this action without prejudice and I assure the gentleman we will work very closely with him in urging the Air Force to move forward quickly with implementation of the CASS system and the paving to which the gentleman referred.

Mr. KAZEN. Fine. I would hope the Navy would move quickly on this project, because it is very sorely needed.

As the gentleman knows, Chase Field is one of our advanced training bases and it is a very necessary cog in the defense of this country.

Again, Mr. Chairman, I commend the committee for the bill which they bring forth today.

Mr. GINN. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, I thank my colleague, the gentleman from Georgia, for yielding. I wish to commend the gentleman from Georgia (Mr. GINN) and the gentleman from Ohio (Mr. REGULA) for the excellence of their bill. I think it is quite a good bill.

I commend these gentlemen for their leadership role, as well as their colleagues on the subcommittee, as well as the staff.

I do it, Mr. Chairman, especially because it is a true fact that success is a matter of margins. This subcommittee in committee hearings has provided that important extra dimension, which is a good example to all of us. For example, rather than relying completely upon the brass and the military services to come before their committee, they have brought before

them some enlisted personnel on one occasion.

On another occasion they visited personally Fort Carson, Colo., to see for themselves how it was out there on an important land acquisition proposition.

They have dealt with the basics. They have dealt with conventional forces.

I know the gentleman from Georgia (Mr. GINN) has taken a trip in the Southeastern United States to review Marine facilities, and at Jacksonville, the naval facilities, and in Georgia some Army and Air Force facilities. These are the basic things that construct a fine bill such as we have today.

I simply commend these gentlemen for doing a good workmanlike job and would join with my colleague, the gentleman from Texas (Mr. KAZEN) in his alliance with the gentleman from Texas (Mr. LOEFFLER) in his thoughts about the Brooke Army Hospital facility and the need there to make positive affirmative movements over the next years until we have that in place.

I thank the gentleman for this time.

Mr. GINN. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. Yes.

Mr. GINN. Mr. Chairman, the gentleman who just spoke and who has yielded to me, and I appreciate his yielding to me, is not only my colleague from Georgia and the dean of my delegation, he is also chairman of the Subcommittee on Installation and Facilities which authorizes military construction projects. We have taken the lead from the work that the gentleman and his great subcommittee have done, and we thank the gentleman for the advice and counsel he has given us in our work.

Mr. BRINKLEY. I thank the gentleman.

Mr. GINN. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. REGULA. Mr. Chairman, I have some additional requests.

Mr. Chairman, I would like to point out to the Members something that I think needs to be emphasized and that is epitomized in the military construction budget. That is that much of our military budget goes for people. Approximately 50.7 percent of the total defense budget in this Nation is for people programs. This amount is in marked contrast to the military budget of the Soviet Union which devotes 17 percent to manpower. We emphasize the need for hospitals, living quarters work facilities, and a host of other programs that are geared to the needs of people.

I think sometimes when we see the large size of defense budgets in the United States, that people envision those dollars as being spent on weapons, nuclear warheads and so on, when in reality probably the United States spends a larger share of its total defense budget on caring for people than any nation in the world today.

I think it is an important part of our national attitudes that we care for those who serve us in the military forces of our Nation and provide for the security of all of us.

Mr. Chairman, I yield 1 minute to the gentleman from Virginia (Mr. TRIBLE).

Mr. TRIBLE. Mr. Chairman, I thank the gentleman for yielding me time, and I rise in support of this measure.

I commend the committee for its efforts on this bill, which represents a substantial 30-percent increase over the fiscal year 1981 bill. Such an increase is necessary if we are to provide adequate facilities for our Armed Forces.

Military construction is essential to a strong defense. Quality housing, adequate work facilities, and sufficient dining and recreational facilities are necessary to an efficient, high-morale force.

This bill provides $1 billion for new construction to improve the readiness of United States and Allied Forces in Europe. The need to improve our European facilities is great; most of these facilities were built immediately after World War II for short term use, and after 35 years of constant use urgently need repairs and upgrading. This construction is essential to make our forces more effective and to restore high morale to our men and women stationed in Europe.

I note that the committee has denied funding to several projects in the Persian Gulf-Indian Ocean region. I hope that these denials stem not from a lack of support of administration efforts to develop adequate staging facilities in this area, but rather from uncertainties in the planning process. If so, I strongly urge the Pentagon to solidify the plans and ascertain the locations for each of these projects as soon as possible. While we talk about the threat to our security from this region, the Soviets are acting. They are stockpiling planes and weapons at several locations, increasing their naval presence, and fomenting revolt. We must back up our verbal commitment with action to protect our interests in this area.

I also note that the committee has denied funding to the manufactured housing pilot project at Fort Irwin, Calif. This project would compare 200 units of manufactured housing (which meets HUD standards) to 254 units of conventional site-built housing. An earlier test in Nevada indicated that 70 manufactured housing units compared favorably with site-built housing, and cost only 53 percent as much. The Armed Services Committee, believing that a larger scale project was needed, authorized the Fort Irwin project.

Manufactured housing may result in significant savings to the Government, and it should receive further study. I would urge my colleagues who participate in the conference on this bill to give their consideration to including this project in the conference version of this bill.

Construction projects are the building blocks of our defenses. This bill provides an adequate level of funding for our armed services, and I urge my colleagues to support it.

● Mr. McCLORY. Mr. Chairman, I am pleased to note that the Appropriations Committee in this legislation has provided funds for substantial improvement in military construction for the Great Lakes Naval Training Center in my congressional district. This action is consistent with the President's determination to revitalize our defense establishment, and the funding improvements for the Great Lakes Naval Training Center are an essential part of our military buildup.

The current Service School Command at Great Lakes provides training for the most skilled and technologically expert personnel in the U.S. Navy. The service school is composed of the following seven technical training schools teaching more than 100 career courses: gunnery school, engineering systems school, fire control technicians school, opticalman/instrumentman school, electronics technician school, basic electricity and electronics school, and electrician's mate/interior communications school.

The average population of those attending the technical training schools at any given time is 8,500. The facilities for instruction and the personnel for providing this critical training to our Navy men and women are currently available. However, the quarters necessary to meet the housing needs at the Service School Command are inadequate. Accordingly, I applaud the committee for its wisdom in providing $8.8 million for quarters for enlisted personnel at Great Lakes.

Mr. Chairman, the recruit training which is provided at Great Lakes is likewise a major part of military training in which the recruit command at Great Lakes Naval Training Center has broad experience and a record of accomplishment from which the U.S. Navy and the Nation have greatly benefited. The graduation of recruits at Great Lakes occurs 50 weeks of the year and averages a graduating class of 750 men and women per week. Moreover, it is very interesting to note that since 1911 one out of every three sailors in the U.S. Navy has received at least part of his training at the Great Lakes Naval Training Center.

In addition to providing for improvements in housing for enlisted person-

nel, the committee approved $3 million for the construction of a needed cold storage warehouse, making a total funding level of $11.8 million for Great Lakes.

Mr. Chairman, I strongly support the administration in its efforts to strengthen our military defense. With the development of sophisticated weaponry, logistics and other aspects of military preparedness and maneuvers, the role of the U.S. Navy in the event of armed conflict is of critical significance. By maintaining the finest technical training in the world, Great Lakes is an indispensable and vital element of our national security. I commend the committee for its response to the construction needs of the Great Lakes Naval Training Center.●

● Mr. SANTINI. Mr. Chairman, I would like to make a few brief remarks at this time on what has come to be my favorite subject of legislative debate—the MX missile. The military construction bill before us today has deferred without prejudice $522 million for the basing costs of MX. I would like to say at this time that in light of the present uncertainty about the basing of MX, I think that the chairman has taken a wise and prudent course of action in deferring appropriations for this project. Chairman GINN and the committee members have acted in the best tradition of fiscal responsibility.

It is certainly no secret in this House that I have spent a large part of my life for well over 2 years studying MX basing and alternatives in an attempt to protect my home State of Nevada from man's largest construction project with all of its impacts on our land and on our people. I, and many of my House colleagues, have searched for basing systems which would buy us more for our defense dollar without wreaking havoc on one State. We have presented our preferred alternatives to the President, and the ball is now in his court. It looks very much as though we are on the homestretch, and Congress and the Nation will know very shortly just what shape the MX will take.

Without diverging into a discussion of the merits of the latest rumored basing proposals, I want to make a statement at this time that if Nevada gets the MX basing, even in a scaled-down version, the physical, social, environmental, and economic impacts will still be very serious. Planning and mitigation of those negative MX impacts will continue to be a top priority for me as Nevada's lone Member of this body.

Chairman GINN of the Military Construction Appropriations Committee, and Chairman BRINKLEY of the counterpart authorizing committee and I may well become even better acquainted than we are already in the coming year. These gentlemen and I have not always agreed on MX, but they certainly have always agreed with me on one thing. If the system comes, this Nation will have to pay the total cost of MX—not just the weapon, not just the basing scheme, but for MX generated impact problems as well.

Of the $522 million for MX basing which this bill defers, Mr. Chairman, some $10 million was allocated for community impact assistance for fiscal year 1982. I wish to state for the record that Chairman GINN has assured me that if the President makes an MX basing decision which puts this massive project in Nevada, House conferees will give the most favorable consideration to the reinstatement of the MX community impact funds in conference committee or in a separate supplemental bill.

I am most grateful for the committee's favorable response to my belief that MX impacts are indeed a matter of national responsibility. Thank you.●

Mr. REGULA. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. All time for general debate has expired.

The Clerk will read.

Mr. GINN. Mr. Chairman, I ask unanimous consent that the bill be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The CHAIRMAN. Are there any points of order against the bill? The Chair hears none.

AMENDMENT OFFERED BY MR. JAMES K. COYNE

Mr. JAMES K. COYNE. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

FAMILY HOUSING, DEFENSE

For expenses of family housing for the Army, Navy, Marine Corps, Air Force, and Defense agencies, for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation, maintenance, and debt payment, including leasing, minor construction, principal and interest charges, and insurance premiums, as authorized by law, $2,238,027,000, to be obligated and expended in the Family Housing Management Account established pursuant to section 501(a) of Public Law 87-554, in not to exceed the following amounts:

For Construction: $275,545,000;

For Debt payment: $148,111,000;

For Operation, maintenance: $1,814,371,000:

*Provided*, That the amounts provided under this head for construction, and for debt payment, shall remain available until September 30, 1986: *Provided further*, That funds previously appropriated under this head in fiscal year 1980 for debt payment in the amount of $1,992,000 for the Department of Defense shall be transferred and merged in the Family Housing Management Account with, and be available for the same period as, the funds appropriated in this Act for debt service for such departments and agencies, and such funds may be obligated and expended for such purposes: *Provided further*, That of the amounts appropriated for operation and maintenance, not less than $811,000,000 shall be available only for the maintenance of real property facilities.

The Clerk read as follows:

Amendment offered by Mr. JAMES K. COYNE: Page 7, line 8, strike out "$2,238,027,000" and insert in lieu thereof "$2,223,117,000".

Page 7, line 12, strike out "$275,545,000" and insert in lieu thereof "$260,635,000".

Mr. JAMES K. COYNE. Mr. Chairman, I rise to offer an amendment to delete $14,910,000 authorized in this bill to the Department of the Navy for the construction of 200 off-base family housing units near the Johnsville Naval Air Development Center in Warminster, Pa., and the Willow Grove Naval Air Station located in Horsham, Pa.

The Navy desires to purchase approximately 30 acres of privately owned, industrially zoned land in a suburban community where open space is rapidly diminishing. This initiative, as presently proposed, is inconsistent with community planning, which has, in the past, tried to sensibly coordinate private residential needs and industrial land usage with the priorities of the Warminster/Horsham Townships. Acquisition of this land, added to the 1,000 acres within Horsham Township already owned by the Federal Government, will result in the removal of one-twelfth of township property from the tax rolls. In these budget-cutting times, when the Federal Government is already asking so many sacrifices of local governments, township officials believe that further reductions in their tax base would be detrimental to the area and to their ability to provide funding sources for necessary local services.

Additionally, under another program, AICUZ, the Department of the Navy has already begun to purchase private properties totaling 300 acres at the northern and southern ends of the Willow Grove runway which have been determined to be too close to incoming and outgoing flights. While Horsham residents are well aware of the benefits derived from having the Navy as a neighbor, they are also aware of the penalties which must be paid. Although few air tragedies have occurred in the vicinity of the complex, the community has readily recognized the potential danger and has, for the most part, cooperated with the Department of Navy in this particular land acquisition endeavor.

I call this project to my colleagues' attention to emphasize the spirit of cooperation my constituents generally display in their relationship with the Navy.

However, this existing housing proposal which is the subject of my amendment threatens to destroy this relationship. I have been actively working with local officials and representatives of the Navy to develop a suitable alternative to the off-base housing plan. The surrounding localities, and in particular the residents of Horsham, many of them veterans, take a tremendous amount of pride in the role they have historically played in our Nation's defense readiness. By deleting the funds for this construction and the related encroachment on the local tax base, we will provide the Navy and the community with the necessary time to conduct a thorough review of the avenues open to use to see that a suitable alternative is developed, one that satisfies the Navy's criteria without placing an undue burden on the neighboring communities and their residents.

Therefore, I strongly urge my colleagues to adopt this amendment and I thank them for their support.

Mr. GINN. Mr. Chairman, I rise to speak on the amendment.

Mr. Chairman, the committee had approved the request of the Navy for $14,910,000 to construct 200 units of family housing at Naval Air Station Willow Grove in Pennsylvania. As of January 1980 there were 279 eligible families residing in unsuitable housing. An updated survey indicates that, at present, slightly fewer than 200 families are now residing in unsuitable housing.

Mr. Chairman, we have examined this amendment and have no objections to it. The downward trend in the number of families in inadequate housing at this location reflects, I feel, the effects of the variable housing allowance and will probably continue to reduce itself. I also recognize the difficulties in finding a suitable location that does not result in the loss of potential tax revenue, something that is extremely important to the gentleman from Pennsylvania.

Therefore, Mr. Chairman, after reviewing the amendment on this side, we feel we can accept it.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. GINN. I yield to the gentleman from Ohio.

Mr. REGULA. I thank the chairman for yielding.

We on this side do not object to the amendment and recommend its adoption. I think it is an enlightened approach, because it recognizes the need to maintain the local tax base in the private sector.

As we legislate additional responsibilities away from Washington back to the local communities, it is very important that they be able to enhance their tax base to increase the job opportunities through industrial development. I commend the gentleman from Pennsylvania (Mr. JAMES K. COYNE) for recognizing that need in his community.

Certainly in a Nation where one-third of the entire land of this country is owned by the U.S. Government, it makes a lot of good sense to, wherever possible, avoid putting additional lands into the public sector. I think this amendment is an excellent step in maintaining a strong private sector economic base.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. GINN. I yield to the gentleman from Texas.

Mr. KAZEN. I agree with the remarks of the gentleman from Ohio. I can sympathize with the thrust of the amendment. However, let me ask the chairman and members of the subcommittee what alternative we have to provide adequate housing for these Navy families? We want these bases around us. We want to have the advantages. And, of course, we have to have the best possible defense that we can get.

At the same time, as the gentleman has well said, the base of our security is people. Here we are with over 200 families that, according to what I have just heard the chairman say, are living in substandard homes. Now, what are we going to do to improve that situation?

Mr. GINN. If the gentleman would yield to me, I would say to the gentleman simply that we feel that because of the successful effects of the variable housing allowance at this particular installation, that the need is not quite as severe as it was when the Navy came in with its request.

In addition to that, we think there is available space onbase for any additional housing that would be needed, which would free up this very fine industrially developed potential site.

I yield to the gentleman from Pennsylvania.

Mr. JAMES K. COYNE. I cannot speak to other bases around the country. The specific facility involved here at the Willow Grove Naval Air Station, we have identified sufficient land on the base itself, which perhaps it not as convenient to the nearby sewer system, but we can certainly overcome those objections, I am convinced, and I am going to work with the Navy and the local township officials to see that the needs of these Navy personnel are met on the base without further detriment to the local tax base and the community.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. GINN. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. I just want to commend the gentleman from Pennsylvania for his amendment. I appreciate the committee's position in this matter. I think it is a very worthwhile amendment. I commend him for it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. JAMES K. COYNE).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. BUTLER

Mr. BUTLER. Mr. Chairman, I offer amendments, and I ask unanimous consent that these amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The portions of the bill to which the amendments relate are as follows:

MILITARY CONSTRUCTION, ARMY

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, and facilities for the Army as currently authorized in military public works or military construction Acts, and in sections 2673, 2674, and 2675 of title 10, United States Code, and for construction and operation of facilities in support of the functions of the Commander-in-Chief, $1,029,519,000, to remain available until September 30, 1986: *Provided,* That of this amount, not to exceed $137,550,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor: *And provided further,* That $1,000,000 of the funds available for planning and design shall be available only for the design of a headquarters facility for the U.S. Army Forces Command at Fort McPherson, Georgia.

MILITARY CONSTRUCTION, NAVY

For acquisition, construction, installation, and equipment of temporary or permanent public works, naval installations, and facilities for the Navy as currently authorized in military public works or military construction Acts, and in sections 2673, 2674, and 2675 of title 10, United States Code, including personnel in the Naval Facilities Engineering Command and other personal services necessary for the purposes of this appropriations, $1,404,883,000, to remain available until September 30, 1986: *Provided,* That of this amount, not to exceed $92,500,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor.

MILITARY CONSTRUCTION, AIR FORCE

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, and facilities for the Air Force as currently authorized in military public works or military construction Acts, and in sections 2673, 2674, and 2675 of title 10, United States Code, $1,407,565,000, to remain available until September 30, 1986: *Provided,* That of this amount, not to exceed $93,000,000 shall be available for study, planning, design, ar-

chitect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor: *Provided further,* That $500,000 of the funds available for planning and design shall be available only to design facilities at Goodfellow Air Force Base, Texas.

MILITARY CONSTRUCTION, DEFENSE AGENCIES

(INCLUDING TRANSFER OF FUNDS)

For acquisition, construction, installation, and equipment of temporary or permanent public works, installations, and facilities for activities and agencies of the Department of Defense (other than the military departments), as currently authorized in military public works or military construction Acts, and in sections 2673, 2674, and 2675 of title 10, United States Code, $251,004,000, to remain available until September 30, 1986; and, in addition, not to exceed $20,000,000 to be derived by transfer from the appropriation "Research, development, test, and evaluation, Defense Agencies" as determined by the Secretary of Defense *Provided,* That such amounts of this appropriation as may be determined by the Secretary of Defense may be transferred to such appropriations of the Department of Defense available for military construction as he may designate: *Provided further,* That of the amount appropriated, not to exceed $28,000,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committee on Appropriations of both Houses of Congress of his determination and the reasons therefor.

NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

For the United States share of the cost of multilateral programs for the acquisition or construction of military facilities and installations (including international military headquarters) for the collective defense of the North Atlantic Treaty Area as authorized in military construction acts, $385,000,000, to remain available until expended.

MILITARY CONSTRUCTION, ARMY NATIONAL GUARD

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Army National Guard as authorized by chapter 133 of title 10, United States Code, as amended, and the Reserve Forces Facilities Acts, $62,925,000, to remain available until September 30, 1986.

MILITARY CONSTRUCTION, AIR NATIONAL GUARD

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Air National Guard, and contributions therefor, as authorized by chapter 133 of title 10, United States Code, as amended, and the Reserve Forces Facilities Acts, $117,740,000, to remain available until September 30, 1986.

MILITARY CONSTRUCTION, ARMY RESERVE

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Army Reserve as authorized by chapter 133 of title 10, United States Code, as amended, and the Reserve Forces Facilities Acts, $59,277,000, to remain available until September 30, 1986.

MILITARY CONSTRUCTION, NAVAL RESERVE

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the reserve components of the Navy and Marine Corps as authorized by chapter 133 of title 10, United States Code, as amended, and the Reserve Forces Facilities Acts, $36,000,000, to remain available until September 30, 1986.

MILITARY CONSTRUCTION, AIR FORCE RESERVE

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Air Force Reserve as authorized by chapter 133 of title 10, United States Code, as amended, and the Reserve Forces Facilities Acts, $37,400,000, to remain available until September 30, 1986.

The Clerk read as follows:

Amendments offered by Mr. BUTLER: Page 2, line 11, strike out "$1,029,519,000" and insert in lieu thereof "$1,009,276,400".

Page 3, line 6, strike out "$1,404,883,000" and insert in lieu thereof "$1,354,096,100".

Page 3, line 21, strike out "$1,407,565,000" and insert in lieu thereof "$1,373,940,100".

Page 4, line 15, strike out "$251,004,000" and insert in lieu thereof "$245,382,800".

Page 5, line 19, strike out "$62,925,000" and insert in lieu thereof "$60,131,950".

Page 6, line 2, strike out "$117,740,000" and insert in lieu thereof "$112,531,000".

Page 6, line 8, strike out "$59,277,000" and insert in lieu thereof "$56,803,150".

Page 6, line 16, strike out "$36,000,000" and insert in lieu thereof "$34,345,000".

Page 6, line 22, strike out "$37,400,000" and insert in lieu thereof "$35,855,000".

Page 14, after line 13, insert the following new section:

SEC. 123. The provisions of the Act of March 3, 1931 (40 U.S.C. 276a-276a-5; 46 Stat. 1494), commonly referred to as the Davis-Bacon Act, shall not apply to the wages paid to laborers and mechanics for any work or services performed under any contract entered into on or after the date of enactment of this Act for the construction of any project funds for which are appropriated by this Act.

POINT OF ORDER

Mr. GINN. Mr. Chairman, I make a point of order against the amendments.

The CHAIRMAN. The gentleman will state his point of order.

Mr. GINN. Mr. Chairman, I make a point of order against the amendments because they constitute legislation in an appropriations bill, which is in violation of clause 2, rule XXI.

The amendments proposed constitute a change in existing law, which under House rules is not allowed through an appropriations bill.

The amendments are legislative in nature and are in violation of clause 2, rule XXI. Therefore, Mr. Chairman, I ask for a ruling from the Chair.

Mr. BUTLER. Would the gentleman reserve his point of order until I make my presentation?

Mr. GINN. Yes, Mr. Chairman, I will cooperate with the gentleman.

PARLIAMENTARY INQUIRY

Mr. HARTNETT. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. HARTNETT. We do not have a whole lot of on-the-job training for new Members who just arrived in the 97th Congress. In the event I would want to raise a point of order, as did the distinguished chairman from Georgia, that the amendment is what I would call double or triple barreled, that I, as a Member, although I may want to vote for some of the changes that are proposed by the gentleman from Virginia (Mr. BUTLER) in his amendment to the bill, I may not want to vote for others.

My inquiry is: Is this amendment being offered as one amendment, and if it is, would the point of order be in order that the amendment was not properly drawn and that I was being precluded from voting for—I would have to vote for or against all of them where, in fact, I may want to vote for one or the other?

The CHAIRMAN. The Chair will respond to the gentleman's inquiry by stating that the gentleman from Virginia has already gotten unanimous consent to offer his amendments en bloc. However, if a point of order is sustained against those amendments or any portion thereof, under the precedent the remaining amendments will have to be reoffered, at which point the gentleman from Virginia will again have to ask permission to have them offered en bloc. If that is denied, then the amendments would have to be offered individually.

Mr. HARTNETT. Mr. Chairman, what you are telling me is, in order for the gentleman from Virginia to offer a series of amendments like that, the gentleman has to obtain unanimous consent prior to doing that or, in fact, he would have to offer each one of them individually?

The CHAIRMAN. The gentleman is correct. The very first action the gentleman from Virginia engaged in was to ask for such unanimous consent.

Mr. HARTNETT. I thank the Chair.

PARLIAMENTARY INQUIRY

Mr. GINN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. GINN. I want to make sure I have reserved a point of order with the Chair.

The CHAIRMAN. The Chair has indicated a point of order has been reserved.

The Chair now recognizes the gentleman from Virginia (Mr. BUTLER) for 5 minutes in support of his amendments.

□ 1415

Mr. BUTLER. Mr. Chairman, I appreciate the courtesy of the manager of the bill in allowing me to make my presentation before he insists upon his point of order.

Mr. Chairman, today we are discussing appropriations for military construction.

The bill provides $6.902 billion for various projects during fiscal year 1982.

However, even as we discuss this bill, there is an underlying discussion of how we must continue to reduce Federal spending and the defense budget is not immune from the budget ax.

Today, I am offering an amendment which could reduce military construction costs during the coming fiscal year by as much as $400 million.

My amendments would remove Davis-Bacon applicability for military construction projects funded under the fiscal year 1982 military construction appropriations bill, and reduce various line functions.

I have provided for a reduction in total spending of $123.9 million in order to reflect the least amount of savings that is anticipated from waiving Davis-Bacon applicability.

The Davis-Bacon Act, enacted in 1931, requires contractors for construction projects exceeding $2,000 funded in whole or in part by Federal funds, to pay the prevailing wage for similar private sector jobs in the area.

The act was intended to prevent mobile labor from underbidding local labor, a widespread problem during the depression.

At the time of its enactment, there were no minimum wage laws, unemployment compensation, or other laws to protect the wages of workers.

While the Davis-Bacon Act may have been necessary at the time of its creation, it is unnecessary now.

In 1931, the nationwide construction industry had been crippled by the depression, but now, the act only inflates the price the Federal Government must pay for construction work.

This has been documented by voluminous studies by the General Accounting Office which point out that wage determinations for the prevailing wage are often not the wage that actually prevails or even the average wage, but are union-negotiated rates, generally far in excess of the average wage.

As many of you know, the Senate Armed Services Committee has agreed to an amendment to its version of the military construction authorization bill which would waive Davis-Bacon requirements as they apply to any military construction project executed after the date of enactment of the fiscal year 1982 Military Construction Authorization Act.

During committee hearings, Department of Defense experts estimated a waiver might save between 5 and 15 percent of the contract costs on applicable contracts.

That indicates a savings anywhere between $124 million and $400 million, which is substantial savings by anyone's standards.

The General Accounting Office has indicated that Department of Labor prevailing wage rates ranged from 5 to 15 percent higher than the actually prevailing construction wage rates.

And the GAO is not the only agency recognizing the inflationary impact of the Davis-Bacon Act.

In February 1981, the Congressional Budget Office stated in its report "Reducing the Federal Budget: Strategies and Examples," that repeal of the Davis-Bacon Act would have significant cost-saving benefits.

In its report, CBO stated:

Repeal of Davis-Bacon might result in cumulative outlay savings of $776 million by 1986 in just the three largest Federal construction programs: military construction, Environmental Protection Agency construction grants, and ground transportation construction.

It must also be considered that these figures may be substantially understated since many contractors will not bid on Federal projects because of Davis-Bacon applicability.

The increased competition could result in even greater savings.

Just this past weekend, the administration proposed reducing defense spending by $2 billion in fiscal year 1982.

The need to increase our defensive posture and regain our military position in the world is widely recognized.

However, the concern that we must not do so at the expense of our social programs is also accepted.

Waiving of Davis-Bacon applicability for military construction projects provides a means of reducing our defense spending, while at the same time permitting scarce Federal dollars to be used in a manner which benefits our defense initiatives.

We would, of course, prefer the act be repealed completely.

However, the need to remove its requirements from military projects at this time is extremely evident and I urge this body to adopt my amendment.

Mr. Chairman, I would ask the gentleman from Georgia to withdraw his point of order.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. I will be happy to yield.

Mr. REGULA. Mr. Chairman, I thank the gentleman for yielding. I am sure the gentleman is aware, but I want to point out to the other Members that in the bill before us we did delete $69,200,000 in anticipation of revised regulations implementing the Davis-Bacon Act. This is the best judgment we could get as to what reductions would result from administrative changes that are anticipated.

I think we should emphasize that the subcommittee has already recognized the savings that will amount to over $69 million.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

(By unanimous consent, Mr. BUTLER was allowed to proceed for 2 additional minutes.)

Mr. BUTLER. I thank the gentleman for his contribution, but I would point out that in pointing out what the report says about the $69 million we will save by these new regulations, which of course will not become effective until some little time down the line, pinpointing only $69 million, the gentleman points out the great contrast between the perhaps $400 million we would save by repealing the statute. There are just some savings which cannot be accomplished by regulation, which can be accomplished by removing the statute's applicability. One, of course, is that we have not repealed the recordkeeping we still impose on the contractors. We have not repealed all the requirements that burden the contractors by the regulation, so I think the gentleman has illustrated what is most important, that we repeal Davis-Bacon.

POINT OF ORDER

The CHAIRMAN. Does the gentleman from Georgia wish to press his point of order?

Mr. GINN. Yes, Mr. Chairman, I insist on the point of order.

Mr. BUTLER. Mr. Chairman, if the gentleman insists on his point of order, I will not put him further to the proof. I will concede that perhaps he is correct.

The CHAIRMAN. The Chair sustains the point of order.

Does the gentleman from Virginia wish to reoffer any remaining part of his amendments at this point?

Mr. BUTLER. No, sir, if the Chair will not take them all I am not going to give him any of them.

AMENDMENT OFFERED BY MR. HARTNETT

Mr. HARTNETT. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

MILITARY CONSTRUCTION, NAVY

For acquisition, construction, installation, and equipment of temporary or permanent public works, naval installations, and facilities for the Navy as currently authorized in military public works or military construction Acts, and in sections 2673, 2674, and 2675 of title 10, United States Code, including personnel in the Naval Facilities Engineering Command and other personal services necessary for the purposes of this appropriation, $1,404,883,000, to remain available until September 30, 1986: *Provided*, That of this amount, not to exceed $92,500,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the

Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor.

The Clerk read as follows:

Amendment offered by Mr. HARTNETT: Page 3, line 6, strike out "$1,404,883,000" and insert in lieu thereof "$1,420,883,000".

Mr. HARTNETT. Mr. Chairman, I want to thank the Chair and I want to thank the distinguished chairman from my sister State of Georgia for giving me the opportunity to trespass on the valuable debate time that we have here before us. I also want to express my deepest appreciation to my other colleagues from Georgia, the chairman of the Military Construction Subcommittee, Mr. BRINKLEY, for having helped me raise this point.

I might also express deep appreciation for my distinguished colleague from Pennsylvania, who just saved $14 million, Mr. Chairman. Now, I want to spend $16 million, so it would almost be a wash. So, I extend my heartfelt gratitude to those three distinguished gentlemen of this august body.

Mr. Chairman, today we are considering a very important piece of legislation, the military construction appropriation bill of 1982. I would like to offer an amendment which would restore a $16 million naval project which was included in the Military Construction Authorization Act, fiscal year 1982, H.R. 3455, which the House has already passed. However, the Appropriations Committee removed the provision from the military construction appropriations bill.

This project is vitally important to operations at the Charleston Naval Station, which has become one of the primary maintenance and support facilities for the fleet ballistic missile weapon system and Polaris submarines. Briefly, the problem existing at the Charleston Naval Station is this: The buildings and piers are presently supplied with steam from four separate boiler plants that use fuel oil to produce steam. These boiler plants are 71 years old. Although the components of these steam generating plants have been replaced incrementally, they are difficult to maintain as parts are increasingly difficult to obtain. The boiler plants have served their useful like and are costly to operate.

To solve the problem, the Navy planned to shutdown the oil-fired plants and buy the necessary steam from the adjacent shipyard which is served by a large coal-fired plant. The steam distribution project requires 20,000 linear feet of overhead steam lines from the coal-fired plant to the naval station. It will save 5 million gallons of fuel oil per year and have a discounted payback of approximately 6 years.

By 1986 the oil-fired plants will no longer be operational. A modern efficient steamplant on the naval station's property will ultimately be necessary. If such a project were started today it would cost approximately $100 million.

This steam distribution system, once installed, would not only conserve an energy resource and return the Government's investment in a short period of time, but it could also reduce the size and cost of the replacement powerplant.

Because this is both a necessary and cost-effective project I feel that we would be doing a great disservice to the country and the Navy by denying funds for this steam distribution system.

Mr. Chairman, I have a colleague who serves in the 97th Congress in another section of this building, and who also is a ranking member of the Senate Appropriations Committee. I would just as soon, if we are going to get it put back in the First District of South Carolina, that the gentleman from Ohio would have the pleasure of putting it on this floor rather than any other floor in this building.

I thank the distinguished chairman and ranking minority member, the gentleman from Ohio, for permitting me to offer this amendment. I think it makes a lot of sense and will save us a lot of fuel oil. We can save on the cost. It will cost $100 million, but in a few years it is going to be more than that.

Because the gentleman from Pennsylvania saved us $14 million in a preceding amendment, I am asking for a paltry $16 million in the following amendment, which is almost awash.

Mr. GINN. Mr. Chairman, I rise in opposition to the amendment, and I do so reluctantly, because I admire the legislative initiative of the gentleman from South Carolina. There is nothing wrong with the project. There is nothing wrong with his request except for the fact that it is untimely. This is an unbudgeted item. The Navy has not requested this funding for the project because it will probably not be necessary until 1985 when the anticipated additional ships to be home ported in Charleston, S.C., would actually arrive.

Therefore, Mr. Chairman, I must, as I say, reluctantly oppose the gentleman's amendment. We have considered it in our deliberations within the committee. It is a good project. When its time arrives, I feel sure that the gentleman from South Carolina will meet with success within our committee, but as I say, I must oppose it at this time.

Mr. REGULA. Mr. Chairman, will the chairman yield?

Mr. GINN. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, likewise I would rise in opposition to the amendment. I am not addressing the needs of the project. As the chairman has pointed out, if the decision is made to base additional ships in Charleston at some future time, it will become necessary that this be done.

□ 1430

We did examine this, and we addressed the issue on page 29 of the committee report, so it is not something that was casually overlooked.

In terms of contract management and management of the budget, I would just like to point out something here that is probably easily overlooked. We are talking about $16 million. It is not needed until 1985. Therefore, if we were to build the project now instead of 4 years from now, we are talking about borrowing an additional $16 million. At the present Treasury bill rate of 15 percent, debt service and interest costs on $16 million would be $2.4 million.

By delaying this 4 years until needed or, let us say, 3 years, allowing for construction time, by delaying this 3 years until needed, we save a total of $7.2 million in debt service cost because we have not borrowed the money. Therefore, I think it is important, as we try to manage this budget carefully, that we recognize those costs as being a real part of budgetary considerations.

Mr. Chairman, I commend the gentleman from South Carolina (Mr. HARTNETT) for drawing our attention to this, but again it is not a question of the merits of the project; it is a question of timing, and to this point the Navy did not request this project because they are somewhat uncertain about what their ship-basing program will be that far out in the future.

Mr. HARTNETT. Mr. Chairman, will the gentleman yield?

Mr. GINN. Yes, I yield to the gentleman from South Carolina.

Mr. HARTNETT. Mr. Chairman, with the invaluable instructions and information obtained from the distinguished chairman and ranking minority member and with the implied future cooperation of both these gentlemen, I would like to ask unanimous consent to withdraw my amendment temporarily for about about 3 years.

Mr. Chairman, I ask unanimous consent that I may be permitted to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

The CHAIRMAN. The amendment is withdrawn.

Mr. BRINKLEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise simply to compliment the gentleman from South Carolina (Mr. HARTNETT), who is a valuable member of the Committee on Armed Services, and also to assure him of our cooperation to see to the finalizing of this very fine project in

Charleston which will then be in the wings when the necessary funding is provided in future years, whether in 1985 or earlier. We will look forward to working with the gentleman then.

Mr. HARTNETT. Mr. Chairman, I thank the gentleman for that assurance.

Mr. BRINKLEY. Mr. Chairman, I yield back the balance of my time.

Mr. JOHN L. BURTON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of this legislation, and I would like to enter into a colloquy with the gentleman from Georgia (Mr. GINN) on an item appearing on page 28 in the report that deals with the Mare Island Naval Shipyard, Calif., pipe and boiler shop.

There is $25 million included for the overhaul and repair of this facility, and the purpose of making this type of investment would be to provide for more efficient and economical operation of Mare Island as they move ahead into the overhaul and repair of modern submarines, because the project would consolidate 10 separate outmoded buildings that are spread along 1.3 miles of waterfront. They have numerous OSHA and EPA deficiencies, all of which would be alleviated by the new construction.

May I ask the gentleman, is that correct?

Mr. GINN. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I am delighted to yield to the gentleman from Georgia.

Mr. GINN. Mr. Chairman, before I attempt to answer the gentleman's question, I wonder if he can give me his assurance that he intends to vote for this bill this year?

Mr. JOHN L. BURTON. I vote for this bill. I have voted for this bill several times.

Mr. GINN. Yes. The gentleman is correct.

Mr. JOHN L. BURTON. Military construction is very important. I remember on the first effort of Chairman Nedzi, I voted for the bill.

Mr. GINN. The gentleman is correct.

Mr. JOHN L. BURTON. Mr. Chairman, I do appreciate the chairman's comments on that, because this will have the effect of saving dollars in the future by providing a more efficient operation at this facility. In fact, today the gentleman from California (Mr. FAZIO) and I entered in the RECORD a statement concerning the celebration of the 500th vessel that was constructed here in a facility that was first opened by "Damn-the-torpedoes-full-speed-ahead" Farragut 120 years ago.

Mr. BURGENER. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. Yes, I am happy to yield to the gentleman from California.

Mr. BURGENER. Mr. Chairman, I commend the gentleman for his interest in this project.

Mr. JOHN L. BURTON. I have always been interested in Vallejo.

Mr. BURGENER. I might ask, where is this facility located, in whose district?

Mr. JOHN L. BURTON. It is in the district of the gentleman from California (Mr. FAZIO), but it affects the bay area, and as the gentleman knows, the bay area is considered as one, although it is more than one district.

Mr. BURGENER. Mr. Chairman, I really want to commend the gentleman for his statesmanlike approach to some other Member's district.

Mr. JOHN L. BURTON. I would do that, and I would hope that the gentleman from San Diego would sometime convince all those retired admirals to let some of the other ships be home ported somewhere else.

Mr. BEARD. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I am happy to yield to the gentleman from Tennessee.

Mr. BEARD. Mr. Chairman, I want to commend the gentleman from California for his support of this project, because obviously, by the construction of this new facility, it will make the new district even more gorgeous than it is today.

Mr. JOHN L. BURTON. It is one of the finest districts one could ever see, and as you look across from Marin County toward the island you see nothing but blue sky and blue water and seagulls with people carrying umbrellas. I thank the gentleman for his participation.

Mr. Chairman, I rise in support of this portion of the bill and of the bill itself, and I yield back the balance of my time.

Mr. ADDABBO. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in full support of this bill, and I take this time to commend the chairman of the subcommittee, the gentleman from Georgia (Mr. GINN), and the ranking minority Member, the gentleman from Ohio (Mr. REGULA), for their exemplary presentation. This has been a fine presentation of this bill before this Congress by the new chairman and ranking minority Member. They fill the shoes of two other great chairmen and ranking minority Members that have gone before them, and they have grasped the problems that beset this committee and beset the Congress. There are many hard problems, especially the MX, the closing of camps, and the opening of new facilities.

So, Mr. Chairman, I take this opportunity to offer my commendation and the commendation of the House on their exemplary presentation this afternoon. They have done a fine job in their first presentation here before the Congress.

Mr. FAZIO. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would also like to take the opportunity to express my appreciation to both gentlemen from Georgia—the gentleman from Georgia (Mr. GINN) and the gentleman from Georgia (Mr. BRINKLEY)—who are sitting here for the treatment I have been afforded in this fiscal year, both by the authorizing committee and the Appropriations Subcommittee. Both committees have been extremely sensitive to the needs of my district and the facilities there, particularly with reference to the point made by the gentleman from San Francisco, Calif., our new "sea hawk," the gentleman from California (Mr. JOHN L. BURTON). We do appreciate his support. It has been very crucial to our success thus far in the House, and we anticipate more success as a result of his close relationship with Members of the other body.

I would particularly like to express to the gentleman from Georgia (Mr. GINN) my deep thanks for the assistance I have received in increasing the productivity of two industrial facilities, and in northern California that is most appreciated. I understand how difficult dollars are to get in this most difficult fiscal year, and I would like to thank the gentleman publicly for his support.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. FAZIO. I yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Chairman, I am happy to join with the gentleman from California (Mr. FAZIO) in his remarks, and it is with mixed feeling that I hear reports of our good friend going to run for Governor of Georgia. We know he would be a great Governor, and the caliber of the government would be raised by his election. But I will miss him as a personal friend, and for that reason I want to see him back here. He has been a personal friend of mine.

Mr. GINN. Mr. Chairman, will the gentleman yield?

Mr. FAZIO. I yield to the gentleman from Georgia.

Mr. GINN. Mr. Chairman, I do, of course, want to thank the gentleman from New York (Mr. ADDABBO), the gentleman from California (Mr. FAZIO), and the gentleman from California (Mr. JOHN L. BURTON), and all the Members who have helped to draft this bill.

Again I want to thank the distinguished gentleman from Ohio (Mr. REGULA) and the other members of our subcommittee who have worked so long and hard in our efforts.

Mr. FAZIO. Mr. Chairman, I yield back the balance of my time.

Mr. GINN. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with

an amendment, with the recommendation that the amendment be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MINETA) having assumed the chair, Mr. SHARP, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4241) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes had directed him to report the bill back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was not objection.

The SPEAKER pro tempore. The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read a third time.

The SPEAKER pro tempore. The question in on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BEARD. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 382, nays 24, not voting 27, as follows:

[Roll No. 207]

□ 1445

The Clerk announced the following pairs:

Mr. Ford of Michigan with Mr. Young of Alaska.

Mr. Pepper with Mr. Rhodes.

Mr. Hawkins with Mr. O'Brien.

Mr. Fuqua with Mr. Campbell.

Mr. Fascell with Mr. Lujan.

Mr. de la Garza with Mr. McCloskey.

Mr. Florio with Mr. Rudd.

Mr. Biaggi with Mr. Marriott.

Mr. Waxman with Mr. Savage.

Ms. Oakar with Mr. Evans of Indiana

Mr. D'Amours with Mr. Crockett.

Mr. Phillip Burton with Mr. Dowdy.

Mr. AuCoin with Mr. Fithian.

Mr. PHILIP M. CRANE changed his vote from "nay" to "yea"

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

---

□ 1500

## GENERAL LEAVE

Mr. GINN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed, and that I be permitted to include extraneous matter and tabulations.

The SPEAKER pro tempore (Mr. PATMAN). Is there objection to the request of the gentleman from Georgia?

There was no objection.

---

## WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2451

Mr. DUNN. Mr. Speaker, I ask unanimous consent that my name be withdrawn as a cosponsor of H.R. 2451.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

## PENTAGON SCARCELY NICKED IN THE BATTLE OF THE BUDGET CUTS

(Mr. BROOKS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BROOKS. Mr. Speaker, it is nice to see Mary McGrory back in action in the Washington Post after the loss of the Star. Her column in Tuesday's Post dealing with the "ritual scratch" inflicted on the Defense Department in President Reagan's latest round of budget cuts shows her usual sharp observation and deft phrasing.

With the need to make substantial cuts in Government spending so obvious, it is indeed hard to understand that out of the $1.635 trillion the President plans to give the Pentagon over the next 5 years he can find only $2 billion to cut this year and $13 billion for 3 years. And yet hungry schoolchildren are going to take a 33-percent cut in the size of their glass of milk at lunch in order to reduce spending.

I commend Mary McGrory's column to my colleagues:

PENTAGON SCARCELY NICKED IN THE BATTLE OF THE BUDGET CUTS

(By Mary McGrory)

When the government departments line up to claim their Purple Hearts for wounds suffered in the battle of the budget cuts, the Pentagon will be there.

Having received only a ritual scratch inflicted by a wincing commander in chief, it may look a little funny next to agencies that have lost arms and legs, but where the Department of Defense is concerned, Ronald Reagan is ready to stretch a point.

Actually, he only did it to make a point, which is that all government is making equal sacrifice for the realization of the president's economic goals. Making a $13 billion reduction in the rate of rise of the Pentagon spending means that next year the warriors will have $2 billion less to defend us from the Soviets. Out of a budget of $1.6 trillion over the next five years, it may not seem like much—but that's only to people who cannot see the threat from a nation that has added to its perfidy, according to our secretary of state, by using poisonous chemicals in Asia.

As it turns out, the $13 billion was a sum proposed last spring by a Democrat, Chairman Jim Jones of the House Budget Committee, and it was angrily rejected then by conservatives of both parties.

By certain standards, especially his own, Reagan was extremely brave.

He does not believe for a minute that the Pentagon wastes money. Only sloppy, civilian agencies like Health and Human Services and Housing and Urban Development throw the stuff around. Cost overruns and lemon-weapons are honest mistakes, as compared with the deliberate fraud perpetrated in behalf of "welfare queens" and other such predators.

The extraordinary thing about the Pentagon in this Congress is that even waste and fraud have been regarded as sacred cows. Take the fate of Representative Patricia Schroeder's modest attempt to take $8 billion in documented waste (documented by the General Accounting Office) out of the Pentagon budget—with the secretary given discretion in the choice. Only three Republicans out of 60 who had written a letter in May, suggesting that $25 billion could be painlessly removed, dared to vote with her.

She was denounced during the debate of July 16 by outraged defenders of the Defense Department for "a cheap, backdoor attempt to reduce the authorization figure" and for "really going after the national defense of this country." She lost by a margin of almost two to one.

And how will Reagan, with his penknife on the Pentagon's sleeve, be received by such champions? They will groan a bit, but only for the record. The $13 billion frees their hands for the real action—bigger slashes on the social programs.

They were terribly concerned that radicals like David A. Stockman and White House chief of staff James A. Baker III, who have an unfortunate tendency to look at figures instead of red hobgoblins, might persuade Reagan to do something really wild, like a $20 billion to $30 billion cut. Now that reason has prevailed, they are relieved.

During the suspenseful White House meetings where the fate of the big spenders was being decided, two friends of the Pentagon, Representatives William L. Dickinson (R-Ala.) and Charles E. Bennett (D-Fla.), held a press conference under the auspices of the Coalition for Peace through Strength—a 270-member hawk club on Capitol Hill. Although Dickinson had been shown special consideration by Reagan, and had been flown to the ranch for reassurances about some supposedly endangered weapons systems, he was worried that the president might be listening to the wrong voices.

Dickinson can live with the cuts.

The Democrats are in the process of deciding that they can, too. They have informally reached the conclusion that there is nothing in it for them to propose a leaner, alternate defense budget. They do not need to carry the added burden of being called "soft on defense" into the 1982 campaign. They are inclined to let the Republicans fight it out among themselves. There are people in the GOP who are mindful of their budget balancing rhetoric, and somewhat self-conscious about taking milk from babies and pittances from Social Security recipients in order to provide for "the poor relative"—Reagan's term for the Pentagon.

But as Representative Schroeder observes from her experience, "Republicans talk defense cuts, but they never vote them."

Politically and cosmetically, the president is in fine shape. He will "win" in Congress. He has tiptoed into the temple of defense spending. Unfortunately for him, Wall Street is the only audience that counts. If the Street says that the $13 billion nick won't do anything to bring down the high interest rates, he may have to go back and take a serious whack at the wallets of the admirals and the generals. It would go against the grain for him.

For now, though, he and his victims are happy.

They are rejoicing in their token martyrdom. They can say with Mercutio about their wound:

"Tis not so deep as a well, nor so wide as a church-door;

but 'tis enough, 'twill serve."

□ 1215

## REALTORS URGE TAX CUT DELAY TO BALANCE BUDGET

(Mr. SIMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SIMON. Mr. Speaker, we cannot tolerate the present high interest rate levels. No one knows that better than those involved in the housing industries, either construction or sales. They also know that we cannot bring interest rates down with false promises that we can have it all—lower taxes, more defense dollars and a balanced budget. They know such proposals are the stuff of fairy tales, not sound economic policy. The real answers lie in much more difficult measures, and those measures require real courage to support. The National Association of Realtors has shown that courage this week. They have called for the one real, strong and necessary action we must take if we are to bring the Federal budget into balance and get the Government out of the credit markets. That action is to delay part of the tax cut until after the budget is balanced. This is sensible economic policy. The homebuilding and home selling industries know it, and the American people know it. I applaud the courage of the National Association of Realtors in urging this measure. I am inserting the statement of Dr. Jack Carlson, chief economist and executive vice president of the Realtors Association, into the RECORD. I urge every Member to heed his remarks.

STATEMENT OF DR. JACK CARLSON

President Reagan's tentative decision to reduce federal spending by an additional $10 to $15 billion in fiscal year 1982 is encouraging but it is not enough.

If sufficient budget cuts are impossible, the President and the Congress should seriously consider deferring the July 1982 10 percent across-the-board personal income tax cut until October 1982.

With only the spending cuts the deficit would likely exceed the commitments the President made in March and the Congress made in the First Concurrent Budget Resolution limiting spending to $695 billion and the deficit to $38 billion.

Deferring tax relief would at least lower the deficit and thereby lower inflation and interest rates. If, in fact, the budget cuts of $10 to $15 billion and tax relief deferral are achieved, there could be a significant effect on interest rates—a 2 percentage point drop would be possible.

This tax-cut deferral can be initiated in the Second Concurrent Budget Resolution which is required to be passed by September 15, 1981. This would be in keeping with the procedures of the Congressional Budget Act intended to bring various spending and taxing measures in line with the needs of overall economic policy.

The National Association of Realtors, the Nation's largest trade association, repre-

sents nearly 700,000 individuals involved in all phases of the real estate industry.

It is of interest to me that among those criticizing the tax cut are almost all the leading bond people on Wall Street, a former Director of the Budget under Nixon—who has said it is "likely to go down in history as the single most irresponsible fiscal action of modern times"—and conservative columnist George Will. My vote against the tax cut was not popular, and unfortunately there are no popular ways of getting inflation under control and getting interest rates down, but it is essential for the Nation that we do so. We somehow—in both political parties—seem to lack the will to do what is necessary to bring the budget into balance. That is my reason for cosponsoring now for many years a proposal for a constitutional amendment requiring a balanced budget except for times of emergency.

If we had passed that 10 years ago we would have a 6-percent interest rate today.

While everyone in theory is for a balanced budget and lower interest rates, few are willing to call for the tough steps needed to achieve this. Until this statement by the realtors, the only major U.S. industry that has really faced up to the inflation and high interest rate issue has been the life insurance industry. I am pleased to see the realtors joining them. Some will argue that they are only trying to serve themselves. It is true that their proposal would serve their industry, but it would also serve the Nation. Yes, we need some tax relief, but let us not borrow money to get it.

## HAPPY 200TH BIRTHDAY, LOS ANGELES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DIXON) is recognized for 60 minutes.

GENERAL LEAVE

Mr. DIXON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DIXON. Mr. Speaker, I have reserved this time in order to officially—if somewhat belatedly—pay tribute to the city of Los Angeles, which recently capped a year-long celebration by commemorating its 200th birthday.

It was 200 years ago, on September 4, 1781, that El Pueblo de la Reina de Los Angeles Sobre El Rio de la Porcuincula was founded as the first Spanish civilian settlement in southern California. Today, the towers of the new downtown Los Angeles skyline cast long shadows across a bustling plain where an Indian village, a Spanish colonial settlement, a Mexican provincial capital and a Yankee boomtown lie buried beneath.

The bicentennial celebration just concluded helped make Angelenos aware of the richness of their history, which I now commend to the attention of my colleagues.

The initial settlers of Los Angeles consisted of 11 families; 22 adults and 22 children, who were recruited from the Provinces of Sinaloa and Sonora in New Spain, now called Mexico, by Capt. Fernando de Rivera y Moncuda, emissary of the Governor of California, Felipe de Neve. They included farmers, artisans, and stockraisers necessary for the survival of the settlement. Escorted by Spanish soldiers, they departed from Los Alamas, Sonora on February 2, 1781, and arrived in the summer of that year. Their goal was to establish an agricultural pueblo to provide food for soldiers at the presidios at San Diego and Santa Barbara.

Ranging in age from 1 to 67, the pobladores reflected the cultural heritage and racial diversity that link the city's past to it present. Almost all of the settlers from the surrounding province of Sonora were of mixed blood. Three ethnic groups were represented among the earlier settlers; Spanish, Indian, and black. Twenty-six of the pobladores were of African ancestry, since Spanish law had always made it easy for black bondsmen to buy their freedom in New Spain, and custom had raised no barriers to intermarriage.

The three reasons for the choice of the site were the obvious fertility of the land, the availability of water, and the nearby location of an Indian village called Yang Na. Thus, the settlers would enjoy the prospect of agricultural productivity, water, and a source of labor. No eyewitness account of the pueblo's founding has ever turned up, since none of the Founding Fathers could read or write. However, mythmakers have cloaked the day's events in suitable splendor, depicting Governor de Neve on horseback at the head of a procession of priests, soldiers, settlers, and converted Indians. By the start of the 20th century, the ceremony was thought to be the most extensive and most impressive ever held over the founding of an American city.

In the spring of 1822, word reached El Pueblo that Mexico had won its independence from Spain. California was now Mexican territory. Angelenos of the day dutifully changed the flag flying about the Plaza, replacing the Spanish lion with the Mexican serpent.

The transformation for Los Angeles came with the acquistion of California by the United States at the end of the Mexican War. Gradually, the little Mexican settlement was transformed into a Yankee town, the key being the increased American population. The first notable Anglo to reach Los Angeles was Abel Stearns in 1832. Stearns was born in Massachusetts but lived and had become a Spanish citizen in South America.

As the town grew, so did its needs. The first railroad south of the Tehachapis formally opened and the first train left the new Los Angeles depot on the morning of October 26, 1869. With the completion of the transcontinental railroad in 1872, many Chinese came to Los Angeles; some in the search for gold, others just seeking a new way of life. Like their black and brown brothers before them, they found discrimination, but remained and persevered. By the turn of the century, Los Angeles was already experiencing the escalation in property values and shortage of downtown parking space which continue to this day. Indeed, Los Angeles in the early 1900's was overwhelmed with growth, due in large part to the infant oil drilling and movie industries.

The events of the 20th century have left their mark on the tiny pueblo, which has seen its population soar from 102,000 in 1900 to nearly 3 million today. World War II, of course, had a special significance for the city's 40,000 residents of Japanese descent. And the city's postwar boom, fueled in large part by the growth of the area's aerospace industry, has exascerbated the problems of transportation and air quality which confront the present-day mayor, city council, as well as its legislative delegations.

Today, 200 years later, Los Angeles finds itself as the third largest city in this, the greatest Nation in the world. Nearly 3 million persons call it home, and many more come to visit. Like any of the world's great cities, Los Angeles has come to mean many things to many people.

Aesthetically, Los Angeles today is a vast and beautiful metropolis, one in which high-rises and stucco homes, beaches and mountains, lush vegetation and desert lands exist side-by-side. At 463 square miles, its land area is larger than any major city in the world. In addition to its fabulous beaches, that area boasts the only major mountain range to be found in any American city: The Santa Monicas. And at the eastern tip of those mountains lies Griffith Park, the largest municipally owed park in the country.

Culturally, Los Angeles retains all the glitter and glamour of early Hollywood, and then some. The vitality and enthusiasm of the Nation's entertainment pervades the city, and the creative energies of thousands of men and women—from D. W. Griffith to Francis Ford Coppola—have found fulfillment in the city of the Angels. Lo-

cally, L.A. is also home to one of the Nation's finest philharmonic orchestras, and with the opening of the music center and its Dorothy Chandler Pavilion in 1964, features one of the most extraordinary centers for music, dance and theater anywhere.

Consistent with its sunny, year-round climate, Angelenos are devoted sports fans. Over 3 million persons a year crowd beautiful Dodger Stadium, the crown jewel of major league baseball. Across town, the memory of 10 NCAA basketball championships continue to make Westwood and UCLA the Mecca of college basketball. And while Los Angeles waits patiently for the return of professional football, its two collegiate powerhouses, USC and UCLA, consistently bring top 10 rankings back to their mutual home, the Los Angeles Coliseum.

It is athletics which has brought Los Angeles perhaps its proudest modern distinction, as the only city in the world to host the summer Olympics on two separate occasions. Less than 3 years hence, the world comes to the United States—to Los Angeles—for the games of the XXIII Olympiad. The 1984 games promise to surpass their predecessors not only in pageantry and athletic excellence, but also in the prudence, perspective and commonsense in which they are being conducted.

As I mentioned, each person who comes to Los Angeles carries away his or her own special memory or impression of its attributes. To me, Mr. Speaker, the one thing which has made Los Angeles the modern-day success story that it is has been the will of its people, all kinds of people, to work together in a spirit of unity and community. Again, perhaps no city in the country can match Los Angeles' ethnic diversity and cosmopolitan character. Los Angeles has the second-largest Spanish-speaking population of any city in the world, trailing only Mexico City. It trails only New York among followers of the Jewish faith. And it remains the largest city in U.S. history to elect a black mayor, which it has now done three times. Each group, each race, each nationality, has made a contribution; some so innovative and grandiose as to stretch the imagination of men.

It is that indomitable will that has helped Los Angeles surmount its historically insurmountable problems—water, shipping, transportation, and pollution—and which leads us into our third century. At this point, I wish to insert in the RECORD a Los Angeles Times editorial which captures just what this bicentennial celebration is all about; a 200-year act of will.

Happy birthday, Los Angeles.

The article follows:

[From the Los Angeles Times, Sept. 4, 1981]

A 200-YEAR ACT OF WILL

Precisely 200 years old today, Los Angeles is still something new under the sun. For the story of its progress from Spanish colonial pueblo to international center of learning, art and commerce is as much a work of imagination as it is a history—its subject not so much a city as an act of will.

More than any major city, Los Angeles is what it is today because a few men—from the kings of Spain to the barons of land, rail and industry—dreamt and decreed that it would be so, and because tens of thousands of other men—working people from Sonora and Ohio, Shanghai and Odessa—bought and built accordingly.

Los Angeles was not blessed with a great natural harbor or commanding physical site. It does not sit at the confluence of vital rivers or along some antique trading route. Nor was it built atop some ancient center of human habitation or religion. But it has always had an unequaled location in the human imagination.

If New York is the big apple and Chicago the city of the big shoulders, Los Angeles is the city of the big dream—and of the big fix; of the grand illusion and the hard reality. Unconscious of its own or any other's past, it is a place where few have felt obliged to be content with just a second chance.

And yet none of the city's great accomplishments have come without cost or contradiction.

When, for example, Los Angeles' need for water outstripped the resource of its own semi-arid environment, an intricate system of aqueducts was constructed to import water from the Sierra, the Colorado River and Northern California. The city could not exist without this system, and the aqueducts themselves are enduring monuments to human ingenuity and skill, even though they damaged distant environments, robbed other communities of their livelihoods and engendered in the state a bitterness against Los Angeles that persists to this day.

Similarly, when the needs of thousands of new arrivals and the financial interests of aggressive developers converged in the post-war era, the San Fernando and San Gabriel valleys bloomed with suburban housing tracts that made Angelenos the envy of people around the world. Indeed, no community in history ever housed so many of its working-class and middle-income people so well, supplying them with amenities, such as private gardens and swimming pools, usually reserved for the wealthy. But the cost was high: The open spaces that once surrounded the city are gone forever, and, as a consequence, millions are spent each year fighting fires and mudslides.

The unique freeway system built to serve these sprawling suburbs is a similarly mixed blessing. For, while it brought Angelenos an unprecedented degree of personal mobility—and therefore freedom—it also has helped to foul the basin's air and to make the city overly dependent on an increasingly scarce and expensive fuel.

Yet somehow none of the contradictions of accomplishment have shaken Los Angeles' confidence in itself or disillusioned the thousands of immigrants who continue to pour into this area each year. For them, Los Angeles—the community that invented itself—remains the city of exceptions and of exceptional dreams.

Mr. DYMALLY. Mr. Speaker, will the gentleman yield?

Mr. DIXON. I yield to the gentleman from California.

Mr. DYMALLY. Mr. Speaker, in recent years, we have been much given to the criticizing of our urban centers. They are crime-stricken and unsafe, polluted and unhealthy, debt-ridden, and fiscal disasters, dilapidated and unattractive places to live. So we say.

We too seldom pay homage to cities as the nerve center of our economy, as the hub of cultural activity, as the home of scientific and educational enterprise that sustains an enlightened civilization.

So I am happy for this opportunity to laud the city of Los Angeles on this, its 200th anniversary, as one of the great cities of our Nation. Los Angeles has been good to me. Los Angeles gave me my education, my first teaching job, my start in a political career. So it has been for countless migrants, not only from Mexico and the countries of the East, but from New York and Indiana, from Mississippi and Oklahoma, and I might add the Caribbean.

Los Angeles has been a city of hope, a city where dreams are pursued and fulfilled. It is a people city. It is in some ways a troubled city, but it is more an energetic and determined city. It is a city rich in its heritage, and—barring the ever-present earthquake threat—richer still in the brightness of its future.

I join with my colleagues in wishing all the residents and Mayor Tom Bradley of Los Angeles a very happy birthday, and many more to come.

● Mr. ROYBAL. Mr. Speaker, I am happy to inform my colleagues that this month Los Angeles, a city I am truly proud to represent in Congress, is celebrating its bicentennial. I have had the honor of representing parts of this great city for over 30 years—first as a city councilman, now as a Member of Congress.

Two hundred years ago this past September 4, 44 recruits from Mexico, half of them children and most of them of Indian and African blood, claimed a strip of land that had been promised to them by the Governor of New Spain. The strip of land is now the west bank of the Los Angeles River. Thus began a city more properly known as El Pueblo de Nuestra Senora la Reina de Los Angeles.

From these humble beginnings, emerged a city universally envied for its climate, its culture, and its way of life. Few cities in this country can claim the diversity of peoples that Los Angeles enjoys. This deversity is reflected in the large populations of Japanese, Filipino, Chinese, Cuban, Puerto Rican, and Mexican Americans. Moreover, few people realize that Los Angeles is one of the largest Spanish-speaking cities in the world, and has a native American population larger than any Indian reservation.

The contributions Los Angeles has made to this country are as diverse as its people. Its environs include one of the Nation's wealthiest agricultural areas. The entire motion picture industry was created in Los Angeles, and the city has become one of the major centers of communication in the world. Among the marvels to be found in the Los Angeles area are the world's best known amusement attraction—Disneyland—and the Jet Propulsion Laboratory, which brought us pictures from Saturn.

We Angelenos are justifiably proud of our great city and its many contributions to this Nation. We invite all of you to join in our celebration.●

● Mr. COELHO. Mr. Speaker, as a native Californian, it gives me great pleasure to have this opportunity to say a few words in honor of Los Angeles, the largest city in the West. I think it is interesting to note that although it remained as isolated pueblo until 1876, when the Southern Pacific and Santa Fe Railroads promoted a massive "take the train to Los Angeles" campaign, the city is celebrating its 200th birthday just 5 years after that of our Nation.

The Los Angeles area today is a massive urban and industrial complex, stretching from the mountains on the north and east to the beautiful Pacific beaches on the west. It is truly a city of cities offering a wide range of activities for amusement, entertainment, and education. Its center of government, the civic center complex, is the largest concentration of public buildings outside Washington, D.C., and serves well over 3 million people.

In closing, I would just like to add that I am honored to be a part of this important celebration, and I am eagerly looking forward to the summer of 1984, when Los Angeles will host the summer Olympics.●

● Mr. ANDERSON. Mr. Speaker, as a lifelong resident of the Los Angeles area, I am deeply honored to join with my colleagues in recognizing the 200th anniversary of the city of Los Angeles. Although many today will focus their attention on Los Angeles from a historical viewpoint—which, needless to say is quite important—I would like to briefly speak about the social diversity of Los Angeles and the growth and advancement in areas I have personally been involved with and devoted to as a Member of Congress.

What I feel is one of the truly unique attributes of our great city is the vast array of cultural influences which have shaped Los Angeles. This is clearly evident in my own congressional district which includes the harbor area of Los Angeles. For example, I have the privilege of representing large blocks of white Americans, black Americans, Hispanics, Asians, and peoples of the Pacific. Each of these groups brings with it, its own heritage and helps form a more balanced community in which all residents are equal. And, each of these major groups is further divided into numerous subgroupings reflecting different ethnic, cultural, linguistic, and social backgrounds, each making a significant contribution to the city we know and love.

Mr. Speaker, as you know, also included within my district is the great Port of Los Angeles. I am indeed fortunate to represent such a fine port facility. What has occurred at the port—in terms of economic advancement and international recognition—during the past two decades is truly amazing. In my years in Congress I have been able to witness first hand the tremendous growth of this dynamic, but yet beautiful, port and its ever-increasing shore-based facilities. It is a moneymaker for the city, currently moving about 40 million tons of cargo through its facilities each year. I am proud to say that the economic outlook for the port in the future is one of continued progress and steady expansion. This has been accomplished only through the dedicated services of hard-working men and women who are at the port around-the-clock, 365 days a year, and providing the services and facilities for the import and export of goods, which literally millions of Americans across the country rely upon.

The city of Los Angeles is the hub around which the industry, transportation, cultural life, and social activities of the frequently cited "Sixty Mile Circle" revolve. It is a dynamic, living thing. Proud of its historic past, rich in the cultural heritage given it by the early inhabitants, today it looks to the future. It is not content to rest on past achievements, but instead eagerly looks toward overcoming the problems and challenges of today, and to meeting the difficulties prognosticated for the years ahead.

Problems inherent in such a large and diverse political entity are many and varied but, as they have been in the past, they will be solved by the able and efficient elected and appointed officials of the city, supported by a citizenry fully cognizant of their duties and responsibilities as Angelenos, Californians, and Americans. I am proud to be one of them.●

● Mr. WAXMAN. Mr. Speaker, I am especially pleased to join my colleagues from California in commemorating the 200th birthday of Los Angeles. I want to discuss the exceptional heritage of our city on this special occasion.

As a native of Los Angeles, I have always been especially proud of the extent to which my city has given opportunity to a vast array of different racial, religious, and ethnic groups. Even the original settlers, though only 46 in number, included people of the most divergent backgrounds.

I do not want to imply that Los Angeles has been a paradise for each group which has settled in it. To the contrary, each group has encountered a certain amount of prejudice and discrimination. Vestiges of the color line under which blacks suffered are still to be found. There are still traces of the virulent antioriental sentiment which hit both Chinese and Japanese and peaked in the months prior to the infamous relocation of Japanese nationals and Japanese Americans during World War II.

No group has been more important in the 200 year history of Los Angeles then Mexicans and Americans of Mexican ancestry. They have played a prominent role in the life of our city from its founding down to the present day. Our Hispanic community is now the second largest in the world—surpassed only by Mexico City.

Despite the prominence of Mexican Americans and the age of their community, they, too, continue to struggle against the long-established economic and cultural dominance of the Anglo majority.

My own group, the Jewish community, has played an important role in Los Angeles for over a century. However, we have been present in truly substantial numbers for only about the past 50 years. Traces of anti-Semitism have been more than outweighed by opportunities which have allowed us to play a major role in the development of the classical professions, retail merchandising, and numerous other fields.

As my birthplace and hometown enters its third century we are faced with an explosion of new ethnic groups seeking an opportunity to forget the incredible tribulations they have suffered before settling here.

In my own congressional district in central Los Angeles there are thousands of Vietnamese, ethnic Chinese boat people from Vietnam, refugees from Thailand, Laos, and Cambodia. On the same streets we find Jews and Armenians fleeing from Soviet oppression. From the Spanish-speaking world we have people fleeing the chaos and despotism of El Salvador, Guatemala, and Cuba. An entire neighborhood has in a few short years become a full-fledged Korea town with Korean schools, businesses, health services, and churches.

We so-called oldtimers are beset on every side with the problems created for our city by the sudden influx of so many people of such diverse backgrounds. We must meet our humanitarian responsibilities to them—especially in the fields of education and health. We must also realize that we are experiencing in microcosmic form, "the Great American Experience." We have the opportunity to derive from our newly expanded diversity economic, cultural, scientific, and spiritual ac-

complishments of unsurpassed scope and beauty.●

## SUGGESTIONS FOR BUDGET CUTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 30 minutes.

Mr. DANNEMEYER. Mr. Speaker and Members, I remarked yesterday that the chief culprit behind continued high interest rates was deficit spending by the Federal Government. The call for further budget cuts, or at least a substantially reduced budget deficit, since some prefer tax increases to achieve a balance, has been sounded by a growing array of financial, economic, and political leaders.

Accordingly, I wish to present some disturbing facts which illustrate exactly how imminent our continued travel is down this road to fiscal ruin. Treasury statistics beginning in 1789 reveal that we experienced the lowest gross national debt in 1835, $38,000, a drop from a wartime high of $127.3 million in 1815.

For the first century and a half of our Federal Government's existence the debt fluctuated, increasing during wars but subsiding afterward. This cycle was repeated from the time of the War of Independence through the War of 1812 and the War Between the States, to the First World War. Indeed, from 1789 to 1942, the gross national debt rose to a total of $79.2 billion. It took 154 years to get to $79.2 billion. The debt for 1981 alone is estimated by the administration to be $79.6 billion and by the Congressional Budget Office at $84 billion—more red ink in 1 year than in the first 154.

In 1982, the deficit is variously estimated to be $42 billion to $80 billion.

Although the debt roller coastered along a gradual upward path, attaining $316.8 billion in 1964, that year marks a sort of watershed. For, in the years following the normal wartime surge during Vietnam, there has been no downward slide. The opposite has been true. The wartime years of 1965-73 saw the debt climb from $316.8 billion to $468.4 billion, a 47.9-percent increase over a 9-year span. Since 1973, on the other hand, the debt has climbed to a stratospheric $1 trillion, a 113.5-percent increase in just 8 years.

The effect of this irresponsible spending spree on credit markets is not lost. Of the outstanding debts financed by the Treasury, $907.6 billion in 1980, holders of debt securities include commercial banks, $100.9 billion; mutual savings banks, $5.3 billion; Federal Reserve banks, $120.7 billion; corporations, $25.5 billion; State and local governments, $73.4 billion; individuals, most of these being holders of savings bonds, $123 billion; insurance companies, $14.4 billion; foreign and international investors, $126 billion; U.S. Government investment accounts, $197.7 billion; and, finally, miscellaneous accounts, including assets for debt owned by savings and loans, a total of $120.7 billion. That totals $907.6 billion as of 1980.

The question can really be asked: How many mortgages would that sum of debt buy?

When you point the facts out, there is nothing really new about them. So the question comes into existence: Where can we cut Federal spending in 1982 so as to bring this runaway monster that we currently have on our hands under control?

The Members may recall that during the course of the past 3 or 4 days I have taken the well of the House in a special order to outline and read a portion of the 272 items that are reflected in the work product of the economic task force of the Republican Research Committee, indicating where we can make specific reductions in spending in 1982.

Today I would like to continue reading from that list, as an indication to the Members where we can make further reductions in spending for 1982. Again I would ask the Members, when these items are mentioned, would the adoption of these specific reductions in spending for 1982 adversely impact on the poor, the downtrodden, the handicapped, and the deprived of our society?

I think if we are honest with ourselves in each instance, the answer is no, their adoption would not do so.

In the category entitled "Energy."

"Atomic energy defense activities." Here we have an option whereby if we limit the increase over 1980 to 39.1 percent, the equivalent of the Defense Department increase, rather than the proposed increase of 60.8 percent, we could reduce expenditures in this item by $623,077,100.

"Energy programs, general science/research, operations expense." We would allow a 10-percent growth over what was spent in 1981. This would save $27,260,000.

"Energy programs, energy production, demonstration, and distribution." We would allow a 20-percent increase over 1980. The proposed expenditure is 102.4 percent above 1980, which we believe is excessive. This would save $114,397,600.

"Energy programs, energy conservation—area and regional development." We would eliminate this program. We do not believe that its continued existence as a function of the Energy Department of our Government is in any way necessary. This would save $16 million.

"Energy programs, strategic petroleum reserves." We would eliminate Federal financing of this program. We think that its financing can be functioned via public bonds. This would delete $3,607,775,000.

"Energy programs, economic regulation." We would eliminate this because we have in this phase of deregulation largely reduced the staff requirements of the Department of Energy, and this would result in a savings of $40,400,000.

"Energy programs, Federal Energy Regulatory Commission." We would eliminate the gas and oil regulation aspects of this program on the grounds that the deregulation of oil, which our Nation has embarked upon, makes redundant the continued bureaucracy which heretofore has performed this function. This would save $51,167,000.

□ 1515

"Power Marketing Administration, Southeast Power Administration, operations and maintenance." We would allow 10 percent above 1980. The proposed increase here is 324.2 percent over what was spent in 1981. The adoption of this item would save $5,133,600.

"Power Marketing Administration, Southwest Power Administration, operations and maintenance." Here we would allow 20 percent over what we spent in 1980. The proposed items suggests that we spend in 1982 80.5 percent over what was spent in 1980. This would save, if adopted, $9,817,400.

"Power Marketing Administration, Western Area Power Administration, construction, rehabilitation operations, and maintenance." We would allow a 10-percent increase above what was spent in 1981. The proposed increase for this item is 27.8 percent over what was spent in 1981, which in our view is excessive. If this item is implemented, it would save $55,536,300.

"Power Marketing Administration, Western Area Power Administration, emergency fund." We would delete this on the ground that there are sufficient reserves in other accounts. Therefore this would save $234,000.

"Department Administration, information policy and regulation." We would cut 10 percent from what they spent in 1980. These activities in the Department of Energy we feel can be served by other functions and are unnecessary. If this item is adopted, it would save $60,062,400.

"Departmentwide in the Department of Energy." Correcting their auditing procedures pursuant to the recommendations of the General Accounting Office would save $19,800,000.

Members, in this category of the Department of Energy, it will be interesting to note that these proposed savings, if adopted, total 13, for a sum total of $4,693,660,400.

In the Department of Commerce, the following items are suggested for

deletion/modification for fiscal year 1982.

Promotion of "Industry and commerce, International Trade Administration, operations and administration." We would allow a 20-percent increase over 1980. The proposed outlays for this item represent a 102.1-percent increase over 1980. We believe that this is clearly excessive and cannot be justified on any basis of rational thought.

The adoption of this item would result in a savings of $65,468,800.

Promotion of "Industry and commerce, International Trade Administration, trust funds." We would allow a 20-percent increase above 1980. The proposal is for a 123.4-percent increase in just 2 years. We think this is markedly excessive. Adoption of this item would save $6,390,400.

"Science and technology, NOAA, fishermen's contingency fund." We would retain it at the 1981 level. The proposed outlays, based on the projected 2,332.4-percent increase in losses from 1980, we feel is extravagant, to say the least. This would save, if the item was adopted, $400,000.

"Science and technology, foreign fishing observer fund." We do not believe in this time of tight money and excessive cost for credit that we should be establishing a foreign fishing observer fund in the Department of Commerce, and this elimination would save the taxpayers $750,000.

"Science and technology, science and tech research services." We would allow 10 percent growth over 1981. This would save $9,191,000.

"Ocean shipping, Maritime Administration, ship construction." We would eliminate this program. We believe that the construction of ships to carry the goods of this Nation to foreign soil should be left in private hands. The adoption of this program would save $145 million.

"Ocean shipping, Maritime Administration, operating subsidies." We would eliminate this. We believe that the cost of transportation of goods should be paid by the shippers, not by the taxpayers. This would save $417,148,000.

Then finally in this category, the "Department of Commerce, departmentwide savings," auditing procedure corrections recommended by the General Accounting Office, if implemented, would save $112,626,000.

In summary, let me relate that these projected savings from the Department of Commerce, if adopted, totaling eight items, would save the taxpayers $756,974,200.

At a time when the Treasury Department every week is conducting a public auction for the raising of money, and paying 14 or 15 percent for that money, in order to finance the activities of the Federal Government and provide liquidity for the deficit, estimated for the fiscal year that we are now in as nearly to $80 billion, I think it is high time that we serving in this institution have the courage to recognize what the basic cost of the high cost of credit is in this country. That is, the irresponsible spending habits of the institution in which we serve, the House of Representatives. The buck stops here. Spending is out of control, year after year, deficit after deficit and 30 percent of the existing deficit and outstanding debt of the United States of close to a trillion dollars has been created in the last 5 years alone. It cannot go on this way indefinitely and the way we can stop the excessive demand for credit by this establishment is having the courage in this body to vote the suggested changes whereby we delete this excessive level of spending that has been proposed for fiscal year 1982.

I thank the Members and the Speaker for their time.

## A TRIBUTE TO GARY HYMEL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. O'NEILL) is recognized for 30 minutes.

Mr. O'NEILL. Mr. Speaker, I rise today to honor a man who has been like a member of my family for the last 10 years.

Gary Hymel came to work for me in the majority leader's office and proved invaluable to me as an employee, close friend and adviser. Gary has many friends up here and has the respect of the Members of both sides of the aisle. It is no accident—he loves this institution, and he respects the Members of the Congress himself.

Time and time again, people have mentioned he has always been courteous and friendly to everybody and in every situation. Gary has the unique ability to read the House as well as anyone.

He developed this ability by getting to know and listen to people, and to understand points of view and philosophies, not necessarily his own.

The late Sam Rayburn once said that the most beautiful word in the English language is "service." This truly applies to Gary who served his country, his employers, and this institution so loyally and diligently for so many years.

Gary and I are from different parts of this country. When I first met him he was working for Hale Boggs, and after the loss of our dear majority leader he came to work for me.

Through the years, we have been as close as anybody could possibly be. As I say, he has been like a part of my family. Millie and I hate to see Gary leave the staff. We wish him the very best in his endeavors in his new position. I watched his eight children grow up over the years. He and his lovely wife, Winkie, have every reason in the world to be proud of them. What beautiful children. He has gone to work for the Bob Gray Co., downtown. I know that he is going to enhance that company by his brilliance, by his courtesy, by his knowledge, and he will give to them the same service as he gave to the majority leader's office, the Speaker's office, and the whip's office through the years. He is just such an intelligent, industrious, and beautiful individual.

I have grown to know all his children through the years, Amy, Beth, Joy, Peggy, Madeline, Judy, Greg, and Kevin. Some of them have worked here on the Hill, others have visited here often. They have the same love and affection for this institution that their dad has.

Gary, I am sorry to see you leave. You are like a part of my family. I want to wish you happiness, success, and good health in your new endeavors.

## GARY HYMEL

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Louisiana (Mrs. BOGGS) is recognized for 30 minutes.

Mrs. BOGGS. Mr. Speaker, to paraphrase the Bard of Stratford on Avon, we have come today to praise Gary Hymel and not to bury him.

I am reasonably certain that I have known Gary longer than anybody else in this House because Gary came to the Hill in 1965 as a member of my husband Hale's staff in the majority whip's office.

Prior to his move to Washington, Gary was a fine political reporter for the New Orleans States and his coverage of the intricacies of the political scene in Jefferson Parish more than qualified him to deal with the Congress and with the Nation's Capital.

When Hale became majority leader in 1971, Gary became his executive assistant and he contributed a great deal to making both of those leadership institutions the fine institutions that they are today.

On a more personal side, Gary was a great support to me through good times and bad, through easy campaigns and tough campaigns, and at home in the district, in this House, and through the Nation. He was an affectionate tower of strength to me and to my family members when Hale's plane disappeared in Alaska.

As a Member of this body, I know what a great service he has provided over the past several years to the Speaker and to our leaders, both Democratic and Republican, and I might also add that Gary is a graduate of Loyola University of New Orleans where he received his bachelor's degree and Louisiana State University,

where he received a master's degree in journalism, and he continues to have an active interest in the education of young people.

For the past several years, he has been a lecturer for the Washington workshop, a program that helps high school students from around the country to understand our system of government.

While we are here to recognize Gary's outstanding service to this House and to the people at large, with the Speaker I think that I should also salute his loving family, his wife, Winkie, and his children, whose beautiful names bear repeating, Amy, Beth, Joy, Peggy, Madeline, Judy, Greg, and Kevin. They are living testimony to his goodness and we recognize also that their sharing of Gary with us individually and with this beloved institution was a contribution of tremendous worth.

Mr. Speaker, I am happy to join now with other Members of this House who wish to join in this special order in honor of Gary Hymel.

I now yield to the gentleman from Mississippi (Mr. WHITTEN).

□ 1530

Mr. WHITTEN. Mr. Speaker, I join with my dear colleague, the gentlewoman from Louisiana (Mrs. BOGGS), the Speaker and others in taking this opportunity to join my colleagues in an expression of sincere thanks to a good friend of this House, Gary Hymel. Over the years as a Member and chairman of the House Appropriations Committee I have come to know and respect Gary for his insight into critical problems and his never-ending desire to work out solutions that all parties could find acceptable.

It is of paramount importance that the Appropriations Committee, the Rules Committee, and the leadership work together for the good of the country. This we have done. Fortunately for us much of the credit for this coordination goes to Gary. His unique position in the office of the majority whip, the late majority leader and finally the Speaker's office give him an opportunity to see the problems of the House of Representatives from all angles. Gary has always tried to get everyone together on issues. His value to the Appropriations Committee I doubt can never be matched. He kept us informed because he understood our problems. In his important position he made real contributions in bringing individuals and groups together on issues and procedures.

On behalf of the membership of the Appropriations Committee, and its staff, I would like to thank him again, for his constant cooperation, and most of all, for keeping the valuable lines of communications open. As a Member of this body, I personally would like to thank Gary for his unquestioned loyalty to the people's branch of government—the House of Representatives and wish for him success in his new undertaking.

Thank you, Mr. Speaker.

Mrs. BOGGS. Mr. Speaker, I yield to the gentleman from Massachusetts (Mr. MOAKLEY).

Mr. MOAKLEY. Mr. Speaker, I thank the gentlewoman from Louisiana (Mrs. BOGGS) for yielding and commend her for affording Members this opportunity to comment on the retirement of Gary Hymel from congressional service.

All of us deeply regret, but fully understand, Gary's decision to return to private life and wish him all the best in his new work. During his 15 years of dedicated service to the House, Gary has made a lasting impression on this institution. Few staff members ever achieve the kind of recognition and friendship that Gary inspired as aide to the late Hale Boggs, as majority whip and leader, and to Speaker O'NEILL as his aide in that office and previously as majority leader.

Gary served in an extraordinarily able and useful capacity. He was always available to anyone who needed his counsel or help, and served as a consistently objective and loyal adviser to the Speaker and the entire leadership.

His good spirits and fairness are legendary and he served in the highest policy staff positions in Congress for 15 years without ever making a single enemy, a unique talent few can ever hope to duplicate.

His departure from the House is a loss that has already been felt and I want Gary to know how sincerely he is missed by his friends in Congress. I will continue to value Gary's friendship highly and wish him, Winkie, and the children all the best.

Mrs. BOGGS. I thank the gentleman.

Mr. Speaker, I yield to the gentleman from New Jersey (Mr. HOWARD).

Mr. HOWARD. Mr. Speaker, I thank the gentlewoman for yielding and wish to congratulate her for holding these special orders in behalf of our friend, Gary Hymel.

Gary served this institution and the Members and leadership so very, very well, in the years that he was on the Hill, serving both the majority whip and majority leader Hale Boggs, as well as majority leader and Speaker, TIP O'NEILL. I think that his intelligence and background served him well in serving these two great leaders. His knowledge of the media as well as his legislative prowess were of invaluable help to them; but I think also that he was of great help to all the rest of us here in the House of Representatives, because his advice and counsel was of great help, I know, to me many times in preparing legislation to bring to the House. His knowledge of this institution was tremendous, because although whether it was in trying to determine the time of the adjournment on a certain day or the date of adjournment for a session or the scheduling of legislation, when we would ask for his advice he would perhaps be guessing like the rest of us, but he seemed to guess with a great deal more accuracy than the rest of us did.

I think that Gary certainly will be a tremendous asset to whatever endeavor he may wish to involve himself in the coming years.

I would just like to say that his many, many friends on the Hill, as well as the institution itself will certainly miss him.

I thank the gentlewoman.

Mrs. BOGGS. I thank the gentleman very much.

Mr. Speaker, I yield to the gentleman form Florida (Mr. MICA).

Mr. MICA. Mr. Speaker, I thank the gentlewoman for taking these special orders on behalf of my good friend, Gary Hymel.

I might just say that I spent 11 years as a staff member here and we all know, all the staff knows, that they do the hard work in this body. Really, it is true, that the work of the membership and the work of this House is the tip of the iceberg and all these people here and throughout Capitol Hill, the thousands of people who would do a good job, have someone like Gary Hymel to look at and say here is a man that we can all emulate.

He did an excellent job. He was a top staffer for 15 years, and being there making things go right is what it is all about. You do not hear about it until things go wrong. I like that quality in Gary Hymel, because he was there and he did the job. He did it accurately and professionally every day.

I might say that I found many times in this Chamber, not only among the staff but among my colleagues, when everyone was losing their head there was somebody very calm that we could ask what was happening and that was Gary. He always knew. He was always calm, maintained his composure.

Really, I would like to say that he was probably one of the few staffers I knew when I was here that had more children than I did; so he had a great compassion and does have a great compassion in trying to tell us what that schedule would be, when school would be out, when we could plan to go home. That meant a lot to not only me and my staff, but my wife and the wives of Members who are trying to plan for school vacations and Easter recess and the August recess, and it is important.

So, I would say this, we had a quality staffer here, somebody that all of us who have served as staffers on this

hill can emulate, someone whose success in this town is assured.

I congratulate Gary Hymel and wish him every success in the future.

Mrs. BOGGS. I thank the gentleman very much.

Mr. Speaker, I yield to the gentleman from Indiana (Mr. JACOBS).

Mr. JACOBS. Mr. Speaker, I thank the gentlewoman for yielding.

In essence, I echo the remarks of the gentleman from Florida. It is said that the ideal of nature is to be calm, and if that is true, then Gary is an ideal person of Mother Nature.

I suppose we were freshmen together. I arrived in 1965 as well. It occurs to me that learning the rules is something that a lot of people can do. Applying the rules is something that a lot of people can do; but that special grace to breathe humanity into the application of the rules is the thing that sets some people apart. It is the sort of thing that makes Members of Congress come to pay tribute to Gary today. He was and is and will continue to be our friend.

I admire the gentlewoman from Louisiana for about 10 billion reasons, and here is one more.

Mrs. BOGGS. Mr. Speaker, I thank the gentleman from Indiana. If anyone knows the institutions of this House, it is the gentleman whose father preceded him here and who has been such a very valuable Member himself.

Mr. Speaker, I yield to the gentleman from Maryland (Mr. BARNES).

Mr. BARNES. Mr. Speaker, I thank the gentlewoman from Louisiana for yielding to me and I commend the gentlewoman for giving Members the opportunity this afternoon to comment on the departure of Gary Hymel and what it means to us and this institution.

I tend to think of Gary not so much as I got to know him here, but as I got to know him before coming here. Gary was and is the father of students that my wife has taught. I knew him as a father of his children and a really fine family man before I came to know him here in the Congress. In fact, one, or maybe two of his daughters baby sat my kids, so there is a friendship there that goes beyond our association in Congress.

At first when I came here, Gary was enormously helpful to me in giving me advice and guidance, I felt that it was probably just because of that association, that we had known each other before I came to Congress; but it became clear to me that he had precisely that same kind of relationship with the other Members and who was willing to bend over to help us, to show us how this institution functions and to try to give us some sense of how we could perform our responsibilities at best.

I turned to Gary for advice and guidance so many times that I cannot overstate how much I regret the fact that he is not here to turn to in those moments when we all need that calm voice.

How would you handle this? What do you think we ought to do?

My staff will confirm that many, many times when we would be discussing something, whether it was a legislative question or policy issue or whatever, and I would say, "Well, hey, let us check this out with Gary. He will know how we ought to handle this. He will have some good advice for us."

It is precisely that kind of expertise and professionalism that made him the extraordinarily respected servant of this institution that he was.

I do not want to turn this tribute to Gary into a discussion of the merits of the legislation that is before the body, but I just note that there is some irony that today yet again the House has voted, we voted earlier today to refuse to consider adequate pay increases for our staff and for other responsible officials on the U.S. Government.

I think the fact that we recognize that many of the finest people in Government, like Gary, need to consider careers outside of Government because of their responsibility to their families and others, is an unfortunate commentary on some of the actions that we as Members have taken with respect to the way we treat very able and dedicated public servants, such as Gary, and many others who serve in this institution and throughout the Government.

We will miss him. The Government will miss him and this institution particularly, I think, that he loved so much and served so well is going to miss him.

I am delighted to have the opportunity to participate in this special order for Gary Hymel.

Mrs. BOGGS. Mr. Speaker, I thank the gentleman for his participation. Life has come full cycle now and here we have a fine representative in Congress of those children who baby sat for the gentleman's children.

I yield to the gentleman from Pennsylvania (Mr. MURTHA).

Mr. MURTHA. Mr. Speaker, I have to say listening to the gentleman from Maryland that Gary was always a practical politician. As a matter of fact, after he got this big pay raise and having to leave because of the number of children and all these excess bills and so forth and so on, the first thing he did was call and immediately change his position on Kemp-Roth, because he gets a big pay cut.

So I think the way that I will remember Gary Hymel is as the consummate politican, the consummate practical politican, because he understands the system as well as anybody I have ever seen. He never got upset, and we have had some extremely volatile arguments in the office and Gary sat there calmly and the rest of us went to extremes on many occasions; but Gary understood the system. He knew it would go away. He thought things would get better and he always looked on the optimistic side. His enthusiasm, his dedication, and his devotion to the Speaker and to this country are well known.

I commend him and wish him well in everything that he does.

Mr. Speaker, Gary Hymel's change of employment is a real loss to the U.S. House of Representatives. I have never met an individual with more talent, more enthusiasm, and more dedication than Gary.

His extraordinary abilities could easily be overlooked because he handled difficult situations with exceptional ease. As a staff member he has been completely devoted to the Speaker. He understands the system of Government as well or better than any individual I have worked with.

He used his ability with consummate skill to help the Members in innumerable ways, and even after the hardest, longest of sessions, he always was pleasant and courteous.

He leaves with an admirable record of accomplishment and his ability and expertise will be sorely missed by the Congress and the country.

Mrs. BOGGS. Mr. Speaker, as often happens in this body, the gentleman from Louisiana (Mr. GILLIS LONG) was here and wished to participate in person and was called back to a meeting in which he is helping the Chair. His remarks will be included in the RECORD.

Mr. Speaker, I yield to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. Mr. Speaker, I thank the gentlewoman for yielding.

I will not go on at length because my colleagues have more than adequately covered the many virtues of Gary Hymel.

I just would like to add my own words of appreciation for the great service that he gave to the House of Representatives. It seems to me that Gary Hymel is a good example of the adage that, "Nice guys can finish first."

I always think of Gary as, first of all, and foremost, a genuinely nice person, who as many people have said before me, did not lose his cool and was always unflappable. Yet he consistently gave sound advice to the Speaker and to all the Members of the House.

I, too, as my colleague, the gentleman from Maryland, cannot help but think as we lose the services of a genuinely effective person such as this, of the follies of the House sometimes in

relation to compensation for our staff members.

Clearly, Gary has family responsibilities. He felt that in order, among other reasons, to meet those responsibilities he had to look to the private sector where obviously he was worth a great deal more money than he is earning here in the House of Representatives.

Clearly, there are other people who can fill those responsibilities for the salary and will be happy to do so, but I dare say there are very, very few Gary Hymels in the world and his particular shoes will be especially difficult to fill.

So I, too, as my colleagues, wish him well in his new responsibilities and hope that he will frequently and often come back to the House to see us.

Mrs. BOGGS. Mr. Speaker, I think that we realize that this tribute to Gary has also been a tribute to the professional staff members of this institution and to those individual staff members in all of our congressional and legislative offices. We have been so pleased at the great number of Members who were not able to be here and who have, indeed, sent in some very beautiful remarks.

□ 1545

One of the things that has not been mentioned about Gary's service that maybe I can now confess, since the Speaker has left the Chamber, I remember when Carl Albert was elected Speaker and Hale was elected majority leader, and we went past the majority leader's office to try to move in. Carl was sitting on a pile of packing boxes looking very dejected and he said, "You know, what I do not like about my new job?" I could not imagine, he had worked so hard to get there. I said, "What is it, Mr. Speaker?"

He said, "Rooms. I cannot stand rooms." He discovered that the Speaker's office had a great deal to say about the assignment of rooms.

Gary was very adept at helping people find rooms, and I am very grateful for that as well.

● Mr. LONG of Louisiana. Mr. Speaker, it is a pleasure to join in this tribute to my dear friend Gary Hymel. I know of no single person who has contributed more to this institution than he. Gary is an unsung hero of the House of Representatives. For 15 years he has served the Democratic leadership in a staff capacity.

I first knew Gary as a cub reporter in New Orleans, a young man with a flair for political reporting. When Gary went to work for my close friend the late Hale Boggs, then majority whip, we became well acquainted. Over the years, I have watched Gary grow in wisdom and stature. He is now a counselor of the highest degree, a man of seasoned judgment, having realized his full potential as journalist and policy adviser.

Gary's success in his difficult role as leadership aide stemmed from his personal character and intellect. He has always been a man of highest principle and honor. He exhibited evenhandedness and objectivity in his dealings. Gary Hymel's word is his bond. His counsel was sought by great and small, and he has always been willing to extend a helping hand. Throughout the most trying times, Gary has kept his contagious sense of humor intact. He has been a valued friend to Members on both sides of the aisle.

Things will never be the same around here without Gary Hymel's friendly face in the Speaker's office. We all appreciate the sacrifices he has made in his years of loyal and dedicated service to this institution.

As one who has watched a talented and dynamic young man mature with grace and distinction, I take special pride in extending best wishes to Gary in his new career in Government relations. My wife Cathy and I wish Gary and his lovely wife, Winkie and their eight outstanding children new happiness and well-being in their life beyond this House. But all of us hope that we may still avail ourselves of Gary's advice and friendship through many years to come.

Gary will long be remembered in the House of Representatives as a person to be counted on, a statesman and seer. And I personally will feel the daily loss of a close friend and counselor. We rejoice in his opportunity, but we regret his departure.●

● Mr. MICHEL. Mr. Speaker, I am happy to join with my colleagues on the other side of the aisle in paying tribute to Gary Hymel. We over here on this side have a deep respect and high regard for Gary and know full well that his skill and experience played no small part in developing policies and strategy over there which gave us a great deal of difficulty over the years.

As a former staff member myself, I know the importance of competent and efficient staff assistance and certainly Gary ranks at the top of those whom I have had the pleasure of working with during my term of service here in the Congress.

I am sorry he felt it necessary to move on but as one who had the difficult experience in putting four children through college, I can certainly appreciate his reasons for deciding to leave.

We extend to him our best wishes for continued success in the future while at the same time thanking him for his dedicated service to this institution which we all love so well.●

● Mr. REUSS. Mr. Speaker, I am pleased to join in this tribute to Gary Hymel, a fine public servant and an important House employee for 16 years. Gary played a key role in the office of majority whip, majority leader, and, finally, the Speaker's office. During his tenure, he witnessed great changes in the way Congress operates. Through this period of reform in House rules and practices, Gary worked hard and well to insure that the leadership offices served the needs of this body.

Although Gary is now privately employed, his heart remains with Congress. In an interview published earlier this year, he said, "The beauty of the House is that it is a mirror of what America is * * *. This is a very human institution." Gary Hymel's loyal and dedicated service helped make it that way. We miss him, and wish him continued success.●

● Mr. BOLLING. Mr. Speaker, we will all miss Gary Hymel, his lovely wife and their wonderful children on the Hill. I have never known a nicer family.

In his various jobs with our distinguished late colleague, Hale Boggs, Gary was always pleasant and helpful. As an assistant to Speaker O'NEILL in his several leadership roles Gary has been invaluable to the Speaker and helpful to other Members of the House who have had contact with him. I am particularly grateful to him for his assistance to me personally and as chairman of the House Committee on Rules on many occasions.

He has my very best wishes in his new career.●

● Mr. DERWINSKI. Mr. Speaker, I am pleased to join in wishing Gary Hymel much success in his new position with Robert Gray & Co., and in recognizing an outstanding public servant who has given this House many years of competent and dedicated work.

Gary was an outstanding asset to the Speaker's office and to the legislative operation of the House. Intelligent, fair, and possessed of a brilliant and quick mind, Gary is universally respected not only by his friends in the majority, but by all of us in the minority. I found him responsive and helpful to all Members, and I know that his many friends here, on both sides of the aisle, will miss him greatly.

I join my colleagues in wishing him well and extending my personal gratitude for his years of loyal service, and for all the best in his new career.●

● Mr. BEVILL. Mr. Speaker, Gary Hymel is one of my best friends on Capitol Hill, and his leaving his Government career is certainly an occasion which I view with mixed feelings, as I know you must.

Of course, I am very pleased that Gary will be moving into an area which will provide him with many challenges and opportunities, and in which I know he will be very successful. But I shall personally miss his wise counsel, his friendship, and his most generous help.

Gary has served as an associate to all of us. I am particularly grateful to my good friend, Speaker TIP O'NEILL, for his kindness in sharing Gary's many talents and abilities with us these past years.

I wish Gary the rewarding and personally gratifying success which he so richly deserves. We all shall miss his unselfish service to Congress and this country.●

● Mr. HOYER. Mr. Speaker, I am pleased to have this opportunity to honor Gary Hymel for his service to the Speaker, and to many of us, in this House. As a new Member of this body, I have served only a few months. I assumed office in the middle of a busy session, when there was a great deal of activity on the budget, taxes, and other issues to occupy the leadership and its staff. But following my election, and in the transition period as my office was being established, Gary was unfailingly patient and helpful to me and my staff in setting up our office, making helpful suggestions and greatly easing what might have been a difficult process. I wish him well in his future work, and only regret that the many of us who have had the privilege of knowing Gary will not be seeing him quite so often. But he will always be welcome here, since this is his House as much as it is ours.●

● Mr. FORD of Michigan. Mr. Speaker, it is with great admiration today that I rise to pay tribute to our good friend and loyal public servant, Gary Hymel, who is leaving the Hill after 16 years of dedicated service to our Democratic leadership.

My friendship with Gary dates back to the days when I first came to the Congress in 1965. At that time, he was working with the majority whip, Hale Boggs, and from there he rose to become your very able administrative assistant. I have continually been impressed with the very calm and efficient manner in which Gary has carried out the enormous demands of his job. I have high regard for his political savvy and astute legislative advice. While we certainly will miss him as one of the Congress most outstanding employees, it is my sincere hope he will not absent himself completely from our deliberations, and that we can depend on him from time to time for his historical perspective and talented legislative expertise.

His warmth and charm along with his great contribution to public service, will long be remembered on Capitol Hill. It is with a great sense of loss that we bid him farewell. I wish him the best of luck and happiness.●

● Mr. SCHEUER. Mr. Speaker, I rise to honor a gifted public servant and a good friend, Gary Hymel.

Gary has long distinguished himself by the impressive depth of his understanding of the issues, combined with his unparalleled expertise in the intricacies of the legislative process.

With Gary's departure we lose more than a remarkably effective technician with a fine sense of public policy. We lose a man whose accomplishments are best exemplified by the breadth of friendship felt for him in every faction of the House.

I have been enriched by his friendship and wise counsel. I wish Gary, Winkie, Amy, Beth, Peggy, Madeline, Judy, Joy, Greg, and Kevin great happiness and success. With the number of potential voters in his family, I only wish he would move to my district.

I hope that Gary will continue to have personal contact with the many Members who remain his friends and admirers.●

● Mr. GUARINI. Mr. Speaker, I join with my colleagues today in tribute to Gary Hymel, a man who has done much in his supportive positions of assisting the House leadership make this body more responsive, responsible, and human.

Gary's whole profession was dedicated to helping Members in an environment sometimes frustratingly cumbersome. Affable, but professional, this outstanding fellow made a big difference in the day-by-day chores we face. As TIP O'NEILL worked through the ranks of the leadership, Gary labored faithfully at his side with invaluable advice smoothing the way. Not only did the leadership offices work better, but this helped make our whole organization strong and efficient. TIP O'NEILL and Gary Hymel made a formidable team of political savvy and righteous compassion for the less fortunate of this Nation.

I congratulate Gary Hymel for a job done well, and I wish him the best of luck as he embarks on his new career. This House is truly losing a valuable asset.●

● Mr. COELHO. Mr. Speaker, I am only too glad to have this opportunity to speak well of my friend Gary Hymel. You know only too well how much his services meant to the functioning of the House, as well as the Speaker's offices.

Gary has an easygoing air about him which belies the intensity with which he approached and accomplished the things in his job. He was always responsive to inquiries from Members as well as to staff, which meant a great deal to me personally since I have served in both capacities.

While Gary may not be directly in the service of those of us on the Hill any longer, it is comforting to know that he is still in Washington and available for advice and counsel.●

● Mr. ADDABBO. Mr. Speaker, I am delighted to join my colleagues today in paying tribute to my good friend Gary Hymel, who has left the Speaker's office to join the private sector. After 16 years of service in three of the most important offices in the Capitol—the whip's office, the majority leader's office, and the Speaker's office—Gary performed well in all of those functions.

It is a very difficult chore to be the point man for the Speaker of the House. Everybody wants your ear, everybody relies on your judgement, and it sometimes is very difficult to resolve the many conflicts that arise so naturally in a day of politics. I think it can be said that Gary Hymel performed those tasks as well as any person who has ever served in that post. He did that and so much more for Hale Boggs until his death and up until this summer for Speaker O'NEILL. Gary left the Hill with his reputation intact, with his freindships in good order, and with the good wishes of all who have known he and his family and have worked with him through the years. I know that he will do well in his present endeavors and it is a distinct pleasure to join my colleagues in wishing him well.●

● Mr. ANNUNZIO. I rise to join my good friend and colleague, the Honorable LINDY (Mrs. HALE) BOGGS, in expressing my best wishes for continued success to Gary G. Hymel who resigned his post in June as administrative assistant to Speaker THOMAS P. O'NEILL, JR.

Gary has performed his duties with outstanding dedication during the 8 years he has served the Speaker, and I know he will be missed. He began his career in Congress as administrative assistant to the Honorable Hale Boggs of Louisiana 16 years ago, continuing through the years when Congressman Boggs was majority leader of the House of Representatives. He also served Speaker O'NEILL during his period of service as majority leader.

During the years 1954-56, Gary served as an officer in the U.S. Army, and until 1965 he was a sports and political reporter for the New Orleans States-Item.

Again, I congratulate Gary G. Hymel on his distinguished service, and extend the very best to him, and to his devoted wife, Alice, for continued good health and happiness.●

● Mr. CONTE. Mr. Speaker, I know that you agree with me that the U.S. House of Representatives will deeply feel the absence of your outstanding assistant, Mr. Gary Hymel, as he moves on to another career opportunity.

After 16 years, however, we must respect the fact that he needs a break from such difficult challenges as arranging the Monday schedule so that we can all get out to do the Lombardi and Elder invitationals. His job was one of extreme dedication and concentration which was put to the test hourly as others "played through" your office, swapping golf stories,

Irish anecdotes, and sports trivia. Yet, for all those temptations to be pulled away by his own interest in sports, this professionally oriented, diligent administrative assistant to the Speaker was able to keep the legislative train on the tracks in spite of the fact that many of the "engineers" wanted to take other routes.

Gary Hymel is well known throughout the entire Washington legislative scene and was subjected to a daily barrage of inquiries and requests for assistance because of his position so close to you, Mr. Speaker. Without exception his patient and helful approach to everyone who called or visited was in the same tradition that you have established in one of the warmest and friendliest Speaker's offices this House has ever known. But he now has a much more financially rewarding position and with eight children he is going to need a lot more than our capped pay system can provide. So, I suppose we must accept that fact that when our staff members become as proficient and experienced as Gary Hymel, the tendency to leave us in order to better provide for their families becomes very great indeed.

In any event we will miss him as I am sure you will. He is accomplished at the fine art of sports appreciation and sports statistics. I suppose that you will have to hold up that end of things now that he will not be with us on a daily basis anymore.

I want to wish him well in his new career and express my profound gratitude for the 16 years he has been helping us get our business done.●

Mrs. BOGGS. Mr. Speaker, it has been a joy and a privilege to participate in this special tribute to Gary Hymel. I am very grateful for all the Members who joined me.

Thank you very much, Mr. Speaker.

## GENERAL LEAVE

Mrs. BOGGS. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks in the RECORD concerning Gary Hymel.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Louisiana?

There was no objection.

## A BILL TO AUTHORIZE MARIHUANA IN THE TREATMENT OF LIFE- AND SENSE-THREATENING DISEASES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. MCKINNEY) is recognized for 15 minutes.

● Mr. McKINNEY. Mr. Speaker, today I am introducing legislation to legalize the controlled use of marihuana in treating glaucoma and the side effects of anticancer therapy. In my view the time is long overdue for the Federal Government to recognize marihuana's limited medical value and help alleviate the profound pain associated with these medical conditions. While 32 States have adopted laws that allow supervised medical use of marihuana, Federal agencies still define marihuana as a "drug with no accepted use in the United States" and continue to prohibit marihuana's medical application. I hope that through the passage of this bill, we can support these humane State efforts and bring relief to those who suffer from painful and sometimes terminal diseases.

Currently, it is possible to identify two broad disease classifications where marihuana can provide patients with relief not found in any treatments. These two diseases are glaucoma and cancer. Glaucoma is the general name given to an ill-defined group of eye diseases which, if uncontrolled, result in blindness. The National Eye Institute (NEI) estimates there are 30 or 40 types of glaucoma. Glaucomas are incurable, but may be responsive to medical or surgical control. NEI estimates between 2 and 8 million Americans are afflicted with glaucoma and reports that glaucoma is the second leading cause of blindness in the United States. Approximately 70,000 to 80,000 patients are blinded each year due to inadequate medical therapies and surgical techniques, and, at least 10 percent of the Nation's glaucoma cases are inadequately controlled by conventional medication or surgical interventions.

Glaucoma is characterized by an abnormal elevation of the inner eye (intraocular) pressures which, unrelieved, causes damage to the optic nerve and result in a progressive loss of vision, eventually ending in blindness. All standard medical and surgical therapies for glaucoma seek to lower elevated intraocular pressure into the normal or safe range. Historical records indicate that marihuana was often prescribed for the relief of reading tension and eyestrain at the turn of the century and through the mid-1920's. Eyestrain and reading tension are the more common modern misdiagnoses of glaucomatose conditions. In 1938, the LaGuardia Commission, in its extensive report on marihuana, noted the plant's possible utility in the management of ocular disorders.

The first modern clinical and scientific evidence of marihuana's medical value in the treatment of glaucoma was reported by Dr. Robert Helper of the Jules Stien Eye Institute, UCLA School of Medicine, in 1970. After 6 years of analysis and investigation Helper reported that smoked marihuana generated a consistent, dose related and clinically significant reduction in intraocular pressures. In addition, Dr. Helper noted that marihuana appears to enhance the utility of other glaucoma control medicants and is most effectively employed in conjunction with such agents. Numerous studies undertaken at a variety of institutions since 1970 have confirmed Helper's initial and most detailed observations. The NEI acknowledges that marihuana, when smoked, is highly effective on lowering intraocular pressure. Currently, even if marihuana was available only in the worst case situations, between 400,000 and 600,000 Americans with glaucoma would be immediate candidates for cannabis-based therapies. I think this is powerful evidence of both the demand for and the effectiveness of the drug.

The most obvious and well-documented applications for cannibis in cancer-related therapies are: First, in reducing the sickening after effects associated with anticancer therapies, and second, in combating appetite loss associated with such treatment. The National Cancer Institute (NCI) estimates 800,000 to 1,000,000 new cases of cancer are diagnosed in the United States each year. Of this number, NCI estimates 250,000 patients are receiving some form of chemotherapy and 250,000 or more additional patients will receive radiation treatments. In addition, NCI indicates that more than 50,000 chemotherapy patients and approximately the same number of radiotherapy patients suffer from intense and uncontrollable nausea and vomiting.

Currently, two drugs are commonly utilized as antiemetics for persons undergoing chemotherapy: Compazine and a synthetic form of delta-9-tetrahydrocannibomol (THC), the primary pyschoactive ingredient in marihuana. Yet more than half of the persons undergoing chemotherapy treatments do not obtain effective nausea relief from either of these drugs. By contrast, marihuana administered through inhalation is 80 percent effective in the relief of anticancer induced nausea. Thus, the nausea caused by chemotherapy can be alleviated in many persons only through the use of natural marihuana. Despite this medical evidence the Federal Government continues to deny marihuana to those in need.

Under current Federal law marihuana is regulated both under the Controlled Substance Act of 1970 and the Food, Drug, and Cosmetic Act. In addition, the Food and Drug Administration (FDA), the National Institute on Drug Abuse (NIDA), the Drug Enforcement Agency (DEA), the National Cancer Institute (NCI), the National Eye Institute (NEI), and the National Institutes on Health (NIH), all have a bureaucratic claim to regulate the supply, distribution, and security aspects of providing medical marihuana. My bill will eliminate this unwieldy, unnecessary regulatory system and

will make marihuana available for prescription by physicians whose practices involve the treatment of glaucoma or cancer.

Currently, marihuana is classified as a schedule I narcotic substance. Schedule I is the most restrictive classification and defines drugs "with no accepted medical use in the United States." The proposed legislation recategorizes marihuana to schedule II of the Controlled Substances Act of 1970. A schedule II classification recognizes marihuana's medical value, but will not alter criminal sanctions against marihuana's nonmedical uses.

The bill also creates a single agency the Office for the Supply of Internationally Controlled Drugs (the Office) in the Department of Health and Human Services, which is exclusively responsible for regulation of the manufacture and distribution of therapeutic marihuana. Yet it also maintains a significant role for the DEA, by providing for consultation between it and the new agency in maintaining effective controls against the illegal use of marihuana. In addition, the Office is designed to be selfsupporting. Physicians and patients licensed to receive marihuana will be charged a reasonable price for supplies of medicinal quality marihuana. Initial appropriations of $5 million for fiscal year 1983 will be required. Thereafter, the Office as outlined in the legislation, will generate operating funds and replay all initial outlays through the distribution of marihuana to authorized users.

Under the proposed legislation the Office will be responsible for providing a sufficient supply of marihuana to meet the needs of those physicians who qualify and desire to prescribe or utilize it in research. The primary method of providing such a supply will be solicitation of bids for the cultivation of marihuana. Only bidders whose proposals provide for acceptable controls against the diversion of marihuana into illicit channels can be registered to grow marihuana. The Office may also solicit bids for the collection, processing, and distribution of the marihuana crops that will be grown by registered bidders. In addition, the Office may also authorize imports of marihuana in the event of domestic supply shortages.

Distribution of marihuana under the bill would fully satisfy the requirements of the Single Convention on Narcotic Drugs concerning controls against diversion into nonmedical uses. Marihuana may be distributed to hospitals or pharmacies only at the request of registered physicians. In order to be registered as eligible to obtain and prescribe marihuana, a physician must file an application with the office certifying that he will use the requested marihuana solely for the treatment of glaucoma or anticancer therapy induced discomforts. Physicians requesting the marihuana must be approved by the DEA to dispense other schedule II drugs. The Secretary is also authorized to promulgate regulations concerning appropriate controls against illegal use or diversion. These controls should be as restrictive as those now imposed by the DEA on the distribution of other schedule II drugs.

Finally, the legislation exempts marihuana from the FDA's regulations governing "new drugs." These FDA regulations were designed to test pharmaceutically prepared synthetic drugs and cannot adequately deal with naturally occurring medicants like marihuana. Moreover, patent problems, regulatory inhibitions, and marihuana's present schedule I status make it impossible to advance cannibis through the FDA's complicated "new drug" procedures. Marihuana, in effect, "falls through the cracks" of existing FDA regulations. Congress, under the proposed law, would supersede these FDA regulations to recognize marihuana's medical value in the treatment of glaucoma and cancer and make marihuana medically available to patients undergoing supervised routines of health care.

As a result of backward Federal policies, Mr. Speaker, many seriously ill Americans are being denied legal access to marihuana that could save their sight or even their lives. The public and the State legislatures have shown their overwhelming support for medical marihuana use. It is time for the Federal Government to act. I hope you will closely examine this proposal in light of the problems experienced by thousands of Americans in trying to obtain marihuana for medical use, and the potential of Congress to relieve real suffering in the field of medicine.●

## WAGING BATTLE FOR THE MINDS OF MEN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ROTH) is recognized for 15 minutes.

Mr. ROTH. Mr. Speaker, this time has been requested because in the area of foreign policy I think Congress has been derelict in the most important aspect of foreign policy, that is, public diplomacy.

"Waging Battle for the Minds of Men"—this is a battle which we have in recent years chosen not to fight, thereby leaving the field to Soviet-inspired and directed forces.

We have not said very much about the battle of public diplomacy in recent years, yet it is a vital part of our defense. We have ignored the ideological battlefront just as we have let down our guard in the field of military deterrent. If we are to avoid "defeat by default," we must awaken to the danger.

Our Secretary of State has warned us that we are losing the battle of ideas, that the Soviet propaganda apparatus is making gains in the struggle for world opinion. We do not need to look any further than the headlines of our major newspapers to find confirmation of his statements. Anti-American demonstrations in Western Europe against proposed new weapons gives us a graphic and undeniable indication that we are failing to get America's message across. If we are failing in Western Europe, where a free press exists, how much more serious must the situation be in denied areas, where information is strictly controlled?

Our national security rests on a triad composed of three vital elements: A vigorous, expert diplomacy; an alert intelligence service; and a first-class military capability.

After years of neglect, we have in recent months turned our attention to improvement of the defensive forces of this Nation—our national security requires that we act, and act now, to respond to the challenges of an ever-threatening world situation.

In the military services there are critical needs to which we must respond. We need weapons and equipment which will enable us to counter the Soviet modernization and buildup of forces. In regards to our strategic deterrent, we face the question of vulnerability of our land-based ICBM's and the necessity to decide upon a course of action.

In regards to the second aspect of our national security triad—the field of intelligence—we have been looking at the needs of our intelligence agencies, trying to determine what resources are needed for this vital area and to decide if changes need to be made in the congressionally imposed reporting and oversight requirements.

Unfortunately, we in the Congress have thus far failed to deal with the third aspect of our national security triad: The field of diplomacy, and in particular, the "public aspects of diplomacy" whereby this Nation tells its story to the people of the world.

After the Second World War, this Government recognized that a crucial element in the diplomatic process was an ability to tell America's story abroad. We established specialized agencies in the foreign affairs community which would have responsibility for explaining to people overseas the meaning and purposes of American foreign policy. These agencies were to serve as a source of accurate, nonsensational news which would correct misconceptions and combat false or distorted information about the United States and about our position on vital topics.

For many years, this "battle for the minds of men" received considerable attention from both the Congress and the American people. A decade ago, the situation changed. During the era of détente, public diplomacy seemed to be less important. Furthermore, the Soviet bloc agreed to commitments (in 1975) at the Helsinki CSCE Conference whereby assurances were given regarding a freer flow of information.

We now realize that the hopes of the 1970's have not come true. The Soviet bloc has failed to adhere to the commitments which it undertook at Helsinki. Western news sources are not in general available to the populations of the Soviet Union and of Eastern Europe.

Even in the free societies of Western Europe, American foreign policy decisions are not fully understood. Topics of vital interest to the populations of our NATO allies, such as the proposed modernization of our theater nuclear forces and President Reagan's decision regarding enhanced radiation weapons, come under critical attack—attacks not always based on a full knowledge of what it is that we have proposed to do.

As I stated earlier, Secretary Haig has commented on the clear evidence that the Soviet propaganda apparatus is "alive and well." It can quickly gear up to attack U.S. policies and decisions, thus leaving the United States in the position of having to answer false or distorted allegations.

We should be out in front on these issues. Announcements of major U.S. policy decisions should be supported by the full panoply which our international communications agencies can muster. We should be telling the American story in sufficient detail so that the public of the world can evaluate our position objectively, taking into account information available to them from all other sources, so that they can reach an intelligent decision.

In view of the difficulties which we have in getting the American message across in the free societies of Western Europe, we should be very concerned over the situation which must prevail in the denied areas of the world.

We have a long history of supplying news and information via our official broadcasts to areas of the world where information is strictly controlled by the Government. We know from refugees and from reports supplied by our Embassies that our broadcasts fill an important need and serve as vital sources of information for millions of people around the world.

At the same time, we know that we need to make improvements in this area. The Voice of America is forced to operate with outdated, 1942 vintage transmitters. This means that our radio signals are too weak to reach certain areas. We know that our broadcasters lack language ability for certain languages and that lack of broadcasting facilities limits the amount of air time during which we can broadcast in certain languages and to certain areas. These are, however, technical problems which we are aware of and which can be corrected.

Such additions to our public diplomacy effort will require an expenditure of funds—but the among that we are talking about is so small that even in these times of budgetary constraints, they can be made available. In recent years, our total expenditure on public diplomacy has been approximately $500 million: This is less than the cost of 18 Air Force fighter planes. In terms of real dollars, we are spending only one-half as much on public diplomacy now as we did in the mid-1960's. Yet the Central Intelligence Agency reports that the Soviet Union spends between $2 to $3 billion each year on a well-coordinated propaganda campaign designed to convince the rest of the world that the United States is aggressive, colonialist, and imperalist.

At a time when we are being compelled to spend billions of dollars to correct the military difficiencies of this Nation, public diplomacy represents the single best nonmilitary effort which the United States can make in order to promote U.S. interest and to protect our national security.

In the battle for the minds of men, we have been running far behind the Soviets. During the past 25 years the Soviets spent over $1 billion on scholorships, bringing students from throughout the world to the U.S.S.R. The United States, on the other hand, will spend only an estimated $66 million in fiscal year 1982 on all of its education and cultural programs—and consequently only a token amount will be made available for funding of scholarships. Thus by default we lose an opportunity to introduce the leaders of tomorrow to the American way of life.

At the same time, all of the money in the world would not assist the public diplomacy of this Nation unless we change the philosophy in which we tend to view it. We must see public diplomacy as an integral part of the foreign affairs process. It must be put to use, helping us to achieve our diplomatic goals.

All too often, the decisionmakers of the foreign affairs community seem to forget that the international communications tools are available. "After the fact" these tools are brought into play—as in, for example, attempting to respond to Soviet allegations on U.S. policy for the neutron bomb. It should be the other way around: It should be the Soviets and their propaganda apparatus that is forced to try and explain why the American decision is wrong.

If we are not willing to tell the world about America and our goals for a peaceful world, who will? We are a nation born in revolution—and we still have a revolutionary message to proclaim. We have made progress and achievements never before dreamed possible. We find ways to solve our national problems while preserving our freedom and our democracy. This is the story of America. This is the story which we need to tell to the world.

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 5 minutes.

● Mr. GILMAN. Mr. Speaker, yesterday, September 15, 1981, I was at the United Nations in New York City, discharging my duties as a member of the U.S. delegation to the U.N. Consequently, I was unable to be present to vote on five occasions yesterday, and I take this opportunity to announce how I would have voted, had I been present.

Rollcall No. 201 was a vote on the matter of approving the Journal of the previous day's proceedings, which passed by a vote of 366 to 12. Had I been present, I would have voted "yea."

Rollcall No. 202 was a vote on the question of passage of a concurrent resolution (H. Con. Res. 153) to authorize the placement of a statue or bust of the late Reverend Dr. Martin Luther King, Jr., in the Capitol Building. The resolution passed, 386 to 16. Had I been present, I would have voted "yea."

Rollcall No. 203 was on the question of the passage of the conference report on the HUD-independent agencies appropriation bill for fiscal year 1982. The conference report passed by a vote of 209 to 197. Had I been present, I would have voted "yea."

Rollcall No. 204 was a vote on the motion by the gentleman from New York (Mr. ADDABBO) to restructure and skew toward the higher ranks the pay increases provided for the military services, as opposed to the plan proposed by the Committee on Armed Services. This motion failed by a vote of 170 to 232. Had I been present, I would have voted "no."

Rollcall No. 205 was the vote on the final passage of H.R. 3380, the Armed Services Pay Act of 1981, which passed by a vote of 396 to 1. Had I been present, I would have voted "yea."●

## THE INSURANCE SALES DEREGULATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 20 minutes.

● Mr. LAFALCE. Mr. Speaker, both double-digit inflation and spiraling in-

terest rates have been haunting American consumers and small businesses for too long. It is the responsibility of Congress to counter these forces by seizing every available opportunity to attack inflation.

Today, I am introducing an anti-inflationary measure which I hope will generate the support and cooperation of the Members of this body. This legislation would repeal that portion of the McCarran-Ferguson Act which has for far too long permitted the insurance industry to engage in massive price fixing of agent commissions outside the scope of Federal antitrust law. This legislation would put an end to the insurance industry's version of the now defunct and discredited fair trade laws.

If an American consumer or small business desires to purchase a policy issued by a particular insurance company, they will be denied any opportunity to bargain for the price of that policy or the agent's commission with either the insurer's agents or any independent agent who might handle that policy. Notwithstanding the fact that there may be a substantial variance in overhead costs and levels of efficiency among the agents, the insurance statutes in all 50 States require each and every one of those agents to charge precisely the exact same amount of commission as every other agent for that policy.

Conceived during a period of intense agent competition at the turn of the century, these statutes, generally referred to as antidiscount or antirebate laws, were designed in large part to insulate the insurance industry from excessive agent competition. It is incredible that this form of monopoly pricing has gone unchallenged for three-quarters of a century. Today it must stand as one of the most costly and enduring price-fixing schemes ever perpetrated upon the American public.

It is estimated that Americans paid more than $190 billion in life, health, and property and casualty insurance premiums in 1980. Contrast that with the fact that they paid $240 billion in Federal personal income taxes for 1980.

And yet, we have hundreds of thousands of insurance agents—250,000 life insurance agents alone—whom we absolutely prohibit from competing for the sale of insurance policies on the basis of reduced agent commission fees.

Consider for a moment the following case: A small businessman is 53 years old and wishes to purchase a whole life "key man" policy for $153,000. He decides to purchase the policy of a particular company. The annual premium will amount to $5,350. Through business associates he is aware that the agent's commission will be approximately 90 percent of the first year's premium, or $4,800. Even in smaller life insurance policies the agent's commission generally ranges from 90 to 120 percent of the first year premium, with a 5-percent-renewal fee for each year the premium is paid thereafter.

Yet, regardless of whether he discusses his purchase with the company's agents or independent agents, the policy price will be exactly the same. The antidiscount statutes effectively eliminate any commission price competition among agents.

If any of these agents had been a doctor, lawyer, grocer, accountant, or securities broker, he would have been able to sell his services at any price, since price competition is an essential feature of the American free enterprise system. In fact, if any of the members of these occupations were detected charging uniform, identical prices, they might soon find themselves involved in antitrust litigation.

The McCarran-Ferguson Act is a permissive statute. It has allowed States to enact a number of insurance laws that would otherwise be in violation of Federal antitrust statutes. It has provided a Federal umbrella for monopoly price fixing through State laws. I propose that we amend that umbrella and thus nullify the State laws that prohibit insurance agents and brokers from engaging in competitive pricing of commission levels. I propose that we get the Federal Government out of the retail insurance marketplace and permit competition rather than restrictive private agreements between insurers and agents to fix prices.

The potential for savings to American consumers and small businesses is awesome. Even if we assume a very conservative savings of only 3 percent arising from agent competition on insurance premiums of $190 billion, we arrive at annual cost savings of $5 to $6 billion to the American public.

Our economy must be made less prone to inflation and more responsive to anti-inflationary policies. This means in particular that phony Government-supported barriers to price declines must be eliminated. We must begin to ask why American consumers and small businesses should be made to pay billions more in inflated insurance agent commissions in deference to an anticompetitive price-fixing device which in most States is nearly three-quarters of a century old. Clearly the time has arrived for the Congress to review this artificial support for the existing unnecessarily costly insurance marketing system.

Most assuredly the Congress in its deliberations will come to the same conclusions arrived at by a 1977 Department of Justice Task Group on Antitrust Immunities under President Ford. In the course of their report on the insurance industry, the task group reviewed each of the arguments offered by the insurance industry to justify the continuation of the antidiscount laws in all 50 States. The task group convincingly refuted each argument in turn.

The consumer, the businessman and the country are all best served by a dynamic and competitive system of marketing. True competition will force insurers, agents, and brokers to provide the insurance consumer with the most for his money. A repeal of the antidiscount laws will stimulate an increase in productive efficiency which in turn will lead to lower prices and lessened inflationary pressure in this area of our economy.

The measure which I am introducing today is supported by the National Insurance Consumers Organization, the Consumer Federation of America, and the Small Business Association of New England.

I also wish to take this opportunity to announce that the General Oversight Subcommittee of the House Small Business Committee, which I chair, will conduct an informational hearing on this proposal on September 21, 1981, in the Small Business Committee hearing room, 2359 Rayburn, beginning at 10:30 a.m.

Appearing as witnesses that morning will be Ms. Susan Mitchell, Wisconsin commissioner of insurance; Ralph Nader; Dr. William H. Peterson, director of the Center for Economic Education at the University of Tennessee, formerly chief economist for United States Steel Corp.; an insurance agent who will testify how he sells discount insurance through a loophole in the antidiscount laws; Dr. William Scheel, professor of insurance, University of Connecticut; and representatives of the National Association of Life Underwriters, the American Council of Life Insurance, and the Professional Agents Association.●

## OLYMPIC COINS: DOES PRIVATE MARKETING LEAD TO PUBLIC SCANDAL?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, there has been much debate whether the proposed Olympic coins could best be sold by the Federal Government or by private marketers. This is a key point of difference between my bill, H.R. 3879 which calls for Federal marketing, and H.R. 3958 and S. 1230, which call for private marketing. As chairman of the House Subcommittee on Consumer Affairs and Coinage, I have studied the issue for 3 years, and firmly believe that only a sale controlled and run by the Federal Government will avoid the scandals that

have plagued private sales of commemorative coins in the past.

No commemorative coins have been struck in this country for over 25 years as a result largely of the abuses in their marketing by private firms. Problems in the past have included price manipulation, misleading advertising, favoritism in coin distribution, and lack of accounting of the proceeds.

The accompanying article from the September 19, 1981 edition of Numismatic News underlines the seriousness of my concern. A subsidiary of one of the two firms that would be given exclusive marketing rights to the 1984 Olympic coins proposed in S. 1230 and H.R. 3958 has been accused of improprieties in obtaining the rights to market 1982 European games coins in Greece. Accusations of this type undermine the integrity of the sale. Distrust and suspicion generated by accusations of special treatment fall on the Government or agency involved. Only a sale conducted under the direct control of the Government minting the coins can assure that such accusations do not mar the sale of the coins.

I am deeply interested in providing funds to help our athletes prepare for the Olympic games. Much excitement and national pride was generated by the achievements of Eric Heiden and the U.S. hockey team in the 1980 winter Olympic. The national spirit was given a great lift. The sale of Olympic coins can help raise the funds necessary for the training and facilities our athletes require.

The administration and I are in agreement that private marketing is inappropriate for commemorative coinage. The Treasury Department has the capabilty and experience to conduct a successful sale. For 45 years the Bureau of the Mint has sold a wide variety of numismatic items to the public. This spring it sold over 4 million proof sets, all from orders received in about a 6-week period. The Mint is held in high regard by its millions of customers. A sale conducted by the Mint will be a success and avoid the pitfalls inherent in private marketing.

[From the Numismatic News, Sept. 19, 1981]

GREEK PRESS AIRS CHARGES INVOLVING OLYMPIC HOPEFUL

A coin marketing scandal involving one of the two firms proposing to market U.S. Olympic commemoratives in honor of the 1984 Games has broken in the Greek parliament, according to Anastasios Tzamalis, Krause Publications' Athens correspondent.

Accusations have been leveled that Lazard-Numarco Distributing Co., reputedly a subsidiary of Lazard Freres & Co., a Paris-based international investment banking firm, was awarded a sweetheart contract by the Greek government to market its issue of commemorative coins for the 1982 European Games. These accusations were made by Member of Parliament Virginia Tsouderou, who first raised the issue in February, 1981, terming the deal a "first class scandal."

According to the *Economic Post*, a magazine with a wide circulation, prior marketing proposals from the Franklin Mint, the British Royal Mint and Italcambio were not even taken into consideration before the contract was awarded to Lazard-Numarco.

Only snippets of information have breached an offical wall of silence and these indicate that a Greek national, who formerly produced bullion medals and currently represents Lazard-Numarco, arranged the deal through his contacts in the Greek government.

Lazard Freres & Co. is currently a partner with Occidental Petroleum Corp. of Los Angeles in the "coin group," an entity with which the Los Angeles Olympic Organizing Committee (LAOOC) has signed an exclusive marketing contract for any coins struck to commemorate the 1984 Los Angeles Olympic Games.

A 29-design Olympic coin set would be authorized by the Olympic Coinage Act, a bill currently before the Senate Banking Committee that was subject of a July 14 hearing at which Krause Publications and other hobby representatives appeared to oppose it. The bill further stipulates that marketing control would be turned over to the LAOOC, which is now legally bound to use the coin group as its exclusive agent.●

## THE ADMINISTRATION DEALS ANOTHER BLOW TO STATE AND LOCAL GOVERNMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 10 minutes.

● Mr. REUSS. Mr. Speaker, while the rest of the country is only now waking up to the wide gap that exists between what the Reagan program promised and what we are actually getting, there is at least one group for whom the bad news has already hit home—the State and local government officials whose finances have been dealt a double whammy by the President's economic program.

It is ironic that a Republican administration that wants to reduce the size and influence of the Federal Government by delegating some of its responsibilities to State and local governments is, at the same time, hamstringing those same State and local governments through every part of its economic program—through its spending program, its tax program, and its program of high interest rates.

Here is what beleaguered State and local government officials are seeing when they look at the real world of the Reagan retreat from fiscal responsibility.

First, there are budget cuts of as much as $13 billion for fiscal 1982. For example, according to the administration's latest figures, waste treatment grants will fall by $300 million, spending for urban development by the Economic Development Administration will decline $200 million, the elimination of public service jobs under CETA will cost $3.6 billion, job training programs will be slashed $700 million, and grants for social services will fall $1.2 billion. While the administration is cutting aid to State and local governments, it is asking these governments to pick up the responsibilities that the Federal Government is sloughing off.

Where will they get the money to do this?

Clearly, not from any additional tax revenues. In fact, State and local government officials are discovering that the tax cuts which Congress just enacted at the President's request will pull the rug from under their own revenues.

The biggest culprit is the new Federal tax treatment of business depreciation. Since 24 States automatically link their State business income taxes to the Federal Government's tax provisions, a cut in Federal taxes also cuts State taxes. According to the National Governors' Association, State revenues could fall by as much as $2 billion in fiscal 1982 from this change in the Tax Code alone. Another group, the Citizens for Tax Justice, estimates that liberalization of business depreciation will cost the States up to $27.5 billion between 1982 and 1986.

Some of the changes in the individual income tax will also prove costly to the States. For example, States which link their personal deductions to the Federal deductions will be hurt by the new marriage penalty deduction.

Finally, the ill-conceived tax-exempt "all-savers" provision will pile a further burden on State and local governments by siphoning away investors who are attracted by tax-exempt returns. By allowing banks and savings and loan associations to compete for funds currently going into the municipal bond market, the all-savers certificates will increase the borrowing costs of municipalities by as much as $800 million to $1 billion in the next year. Furthermore, the reduction in the top tax rates will also channel money from the municipal markets by reducing the attractiveness of tax-exempt income.

And, to run up the score even more against the defenseless State and local governments, the damage done by the spending and tax provisions of the President's program is being reinforced by the administration's program of high interest rates.

The interest rate that State and local governments face when they issue tax-free municipal bonds today is the highest in the history of this country. Last week, for example, the Bond Buyer Index of some 20 municipal bonds reached a record yield of 12.97 percent. This is more than 50 percent higher than the index level just a year ago, and more than double the rate that State and local governments were paying 4 years ago. Recently, the city of Philadelphia issued a bond paying more than 14.5 percent—the tax-free equivalent of a 29-percent yield for an

individual in the 50-percent tax bracket.

This eruption of interest rates not only forces State and local governments to forego borrowing and postpone capital improvement, it places uncontrollable spending pressures on municipal budgets. For example, a Baltimore city budget official recently told the Joint Economic Committee that the cost of servicing the city's debt has risen from $17.2 million in 1971 to $27 million in 1981, an increase of almost 60 percent, while the debt outstanding has risen only 5 percent, from $493 million to $516 million. The effect on local tax rates—which fall heaviest on lower and middle income homeowners—has been devastating. Since 1961, the property tax rate for serving municipal debt has tripled.

Of course, the administration has not singled out State and local governments to endure this high-interest-rate policy. Many other sectors of the economy are staggering under today's excessive interest rates. For example, the Federal Home Loan Mortgage Corporation reports that the national average interest rate for conventional fixed-rate mortgages rose last week to 18.22 percent, the highest on record. Public utilities have been paying more than 16 percent on recent new issues, almost double the rate of 4 years ago. Interest-sensitive sectors of the economy, homebuilding and auto sales in particular, have been dealt a body blow by today's record interest rates. State and local governments must not only endure high interest rates, they have been crippled by the tax and spending parts of the President's program as well. With friends like Mr. Reagan, who needs enemies?●

## APPOINTMENT OF MEMBER TO SELECT COMMITTEE ON NARCOTICS ABUSE

The SPEAKER pro tempore. Pursuant to the provisions of House Resolution 13, 97th Congress, and without objection, the Chair appoints the gentleman from Ohio (Mr. OXLEY) to the Select Committee on Narcotics Abuse and Control to fill the existing vacancy thereon.

There was no objection.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MCEWEN) to revise and extend their remarks and include extraneous material:)

Mr. MCKINNEY, for 15 minutes, today.

Mr. ROTH, for 15 minutes, today.

Mr. GILMAN, for 5 minutes, today.

(The following Members (at the request of Mr. RALPH M. HALL) to revise and extend their remarks and include extraneous material:)

Mr. LAFALCE, for 20 minutes, today.

Mr. NELSON, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. DYMALLY, for 5 minutes, today.

Mr. REUSS, for 10 minutes, today.

(The following Member (at the request of Mr. WEAVER) to revise and extend their remarks and include extraneous material:)

Mr. ROEMER, for 10 minutes, today.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. ALEXANDER, and to include extraneous matter, during debate on House Joint Resolution 325, continuing appropriations for fiscal year 1982.

Mr. LONG of Louisiana, to insert his remarks after Mr. MURTHA in special order by Mrs. BOGGS on Gary Hymel.

(The following Members (at the request of Mr. MCEWEN) and to include extraneous matter:)

Mr. DANNEMEYER.

Mr. GOODLING.

Mr. WINN in two instances.

Mr. PORTER.

Mr. RITTER.

Mr. DERWINSKI.

Mr. GILMAN.

Mr. DOUGHERTY.

Mr. CORCORAN.

Mr. LEBOUTILLIER.

Mr. COLLINS of Texas.

(The following Members (at the request of Mr. RALPH M. HALL) and to include extraneous matter:)

Mr. MINETA.

Mr. KILDEE.

Mr. PEASE.

Mr. LAFALCE in two instances.

Mr. HAMILTON.

Mr. EDGAR.

Mr. JOHN L. BURTON.

Mr. MCDONALD.

Mr. VENTO.

Mr. OTTINGER.

Mr. FOGLIETTA.

## SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 62. Joint resolution to authorize and request the President to designate the week of September 20 through 26, 1981, as "National Cystic Fibrosis Week."

## ADJOURNMENT

Mr. WEAVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 59 minutes p.m.), the House adjourned until tomorrow, Thursday, September 17, 1981, at 10 a.m.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 4084. A bill to improve the operation of the Marine Mammal Protection Act of 1972, and for other purposes; with an amendment (Rept. No. 97-228). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CONABLE (for himself and Mr. PICKLE):

H.R. 4491. A bill to exempt the U.S. Capitol Historical Society from certain taxes; to the Committee on the Judiciary.

Mr. CONYERS:

H.R. 4492. A bill to amend title 18 of the United States Code to establish a new sentencing system in Federal criminal cases, and for other purposes; to the Committee on the Judiciary.

By Mr. FINDLEY (for himself and Mr. PRICE):

H.R. 4493. A bill to modify the project authorizing replacement of locks and dam 26, Mississippi River, Alton, Ill., and Mo. to authorize construction of a second lock; to the Committee on Public Works and Transportation.

By Mr. GOODLING (for himself, Mr. CONTE, Mr. JENKINS, and Mr. SCHULZE):

H.R. 4494. A bill to apply duty-free treatment to Fourdrinier wires suitable for use in capacitor paper-making machines; to the Committee on Ways and Means.

By Mr. HEFNER:

H.R. 4495. A bill redesignating the Salisbury-Concord standard metropolitan statistical area as the Salisbury-Concord-Kannapolis standard metropolitan statistical area; to the Committee on Post Office and Civil Service.

By Mr. KAZEN:

H.R. 4496. A bill to clarify the citizenship status of the members of the Texas Band of Kickapoo Indians; to provide for a reservation for the Texas Band of Kickapoo; to provide to members of the Texas Band of Kickapoo those services and benefits furnished to American Indian tribes and individuals; and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. LAFALCE:

H.R. 4497. A bill to amend the McCarran-Ferguson Act to eliminate the fixing of sales commissions by insurance companies and to improve the operation of competition in the business of insurance; to the Committee on the Judiciary.

By Mr. MCKINNEY (for himself, Mr. GINGRICH, Mr. FISH, and Mrs. FENWICK):

H.R. 4498. A bill to provide for the therapeutic use of marihuana in situations involving life-threatening illnesses and to provide adequate supplies of marihuana for such use; to the Committee on Energy and Commerce.

By Mr. MICA:

H.R. 4499. A bill to amend title 5, United States Code, to reinstate provisions under which cost-of-living adjustments for Federal annuitants would be made twice each year; to the Committee on Post Office and Civil Service.

By Mr. MITCHELL of Maryland:

H.R. 4500. A bill to extend through fiscal year 1983 SBA pilot programs under section 8 of the Small Business Act; to the Committee on Small Business.

By Mr. NOWAK (for himself and Mr. KEMP):

H.R. 4501. A bill to temporarily suspend the duty on bulk fresh carrots from August 15 to February 15 of each year; to the Committee on Ways and Means.

By Mr. PARRIS:

H.R. 4502. A bill to establish a National Commission on Interest Rates; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ROE (for himself, Mr. HOWARD, Mr. HAMMERSCHMIDT, and Mr. CLAUSEN):

H.R. 4503. A bill to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes; to the Committee on Public Works and Transportation.

By. Mr. UDALL (for himself, Mr. OBEY, Mr. REUSS, Mr. FAZIO, Mr. LOWRY of Washington, Mr. D'AMOURS, Mr. SABO, Mr. MCHUGH, Mr. MILLER of California, Mr. GORE, Mr. OBERSTAR, Mr. WAXMAN, Mr. BROWN of California, Mr. BINGHAM, Mr. MITCHELL of Maryland, Mr. BENNETT, Mr. HUGHES, Mr. WEAVER, Mr. CONYERS, Mr. WEISS, Mr. SCHEUER, Mr. SEIBERLING, and Mr. MURTHA):

H.R. 4504. A bill to repeal the Economic Recovery Tax Act of 1981 and to provide substitute individual and business income tax reductions which are consistent with the achievement of lower inflation, lower interest rates, and a balanced Federal budget; to the Committee on Ways and Means.

By Mr. FINDLEY (for himself, Mr. FARY, Mr. ANNUNZIO, and Mr. YOUNG of Missouri):

H.J. Res. 330. Joint resolution to name the lock and dam authorized to replace locks and dam 26, Mississippi River, Alton, Ill., as "Melvin Price Lock and Dam"; to the Committee on Public Works and Transportation.

By Mr. MICA:

H. Con. Res. 182. Concurrent resolution to provide that Congress will not reduce social security retirement benefits to Americans who have retired or who are about to retire; to the Committee on Ways and Means.

H. Res. 221. Resolution expressing the sense of the House of Representatives regarding semiannual cost-of-living adjustments for Federal annuitants; jointly, to the Committees on Armed Services and Post Office and Civil Service.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1, of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. MATSUI:

H.R. 4505. A bill for the relief of Tomoko Jessica Kyan; to the Committee on the Judiciary.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 907: Mr. MATSUI and Mr. ROSENTHAL.

H.R. 1300: Mr. ROBERTS of Kansas.

H.R. 2793: Mr. BLANCHARD and Mr. DWYER.

H.R. 4103: Mr. DAUB.

H.R. 4157: Mr. PEPPER, Mr. CORRADA, Mr. GLICKMAN, Mr. RATCHFORD, Mrs. SCHROEDER, Mr. OBERSTAR, Mr. EDGAR, Mr. FAZIO, Ms. MIKULSKI, Mrs. BOUQUARD, Mr. FORD of Michigan, Mr. FOGLIETTA, Mr. DORGAN of North Dakota, and Ms. FERRARO.

H.R. 4270: Mr. JACOBS, Mr. WHITEHURST, Mr. MITCHELL of New York, and Mr. MURPHY.

H.R. 4417: Mr. HEFTEL.

H.J. Res. 260: Mr. CONABLE, Mr. JONES of North Carolina, Mr. LEE, Mr. EVANS of Iowa, Mr. DAVIS, Mr. MICHEL, Mr. RAILSBACK, Mr. YOUNG of Florida, Mr. WAMPLER, Mr. SAM B. HALL, JR., and Mr. FISH.

H.J. Res. 293: Mr. HALL of Ohio, Mr. SOLARZ, Mr. CRAIG, Mr. MATSUI, Mr. SILJANDER, Mr. SMITH of Pennsylvania, Mr. DWYER, Mr. D'AMOURS, Mrs. CHISHOLM, Mr. SCHUMER, Mr. OTTINGER, and Mr. HARKIN.

## DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 2451: Mr. DUNN.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3603

By Mr. GUNDERSON:

—Page 81, after line 21, insert the following new section (and redesignate succeeding sections accordingly):

VALUATION OF COMMODITIES

SEC. 1204. Section 403(b) of the Agricultural Trade Development and Assistance Act of 1954 is amended by inserting "a price not greater than" after "valued at".

# SENATE—*Wednesday, September 16, 1981*

*(Legislative day of Wednesday, September 9, 1981)*

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

## PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Loving God, our Father, who giveth life and breath to all, whose goodness never fails, whose steadfast love never ceases, whose mercies are new every morning; we pray for the people of our land. We pray for those who are hurting; for the homeless, the hungry, the voiceless, the unemployed, the oppressed. Look upon them in Thy mercy and cause those who can and should to respond to the need.

We pray for the healthy, the strong, the prosperous, that they may be sensitive to those who suffer and in gratitude for Thy gracious providence be willing to share with them the good with which they have been so lavishly endowed. Grant, O God, that those who are fortunate may understand that their good fortune imposes upon them a Godly responsibility to be compassionate and selfless with the unfortunate. Help them to distinguish between need and greed, to realize we were meant to be channels rather than reservoirs, that good things were meant to be used, not collected. We pray this in the name of Him who never turned away a needy one who came to Him. Amen.

## RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

Mr. STEVENS. Mr. President, it is my understanding that following the recognition of the two leaders there will be a period of routine morning business pursuant to a previous order. Is that correct?

The PRESIDENT pro tempore. After the two special orders.

Mr. STEVENS. I thank the Chair.

## THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## EXECUTIVE PAY LIMITATIONS MUST BE ELIMINATED

Mr. STEVENS. Mr. President, I am going to start a series of comments to the Senate concerning a problem which I think is reaching crisis proportions. I am referring to the unprecedented rate of departure of our top level executives from the Federal Government. The rate has increased and the losses have affected programs in which we have a special interest.

I wish to give some specific examples of the kinds of losses that our Federal Government is suffering. In the social security program, for instance, when we are in a period of financial crisis, and when we need the best executive and technical leadership we can possibly get, it has now been announced that the chief actuary for the social security program, Mr. Dwight Bartlett, a highly respected actuary from private industry who took that position as chief actuary only a couple of years ago, is going to return to the private sector. He is quoted in a letter that he sent to the Baltimore Evening Sun newspaper, which I will ask to be printed in the RECORD, as saying that the limitations of Federal executive salaries played a significant role in his decision to return to the private sector. Obviously, this is no time to be losing the chief actuary from the social security program.

Let me turn to another program. Many of us are extremely interested in the space program and what is going on now. It has been announced that Dr. Gerald Griffin, the Deputy Director of the Kennedy Space Center, has now resigned after 16 years of Federal service with NASA. He stated his reluctance to leave NASA but he said that he, "simply can no longer afford to stay in the Government." He has accepted a position in private industry.

Dr. Griffin is no exception. We have two other letters from NASA concerning the problem which states that in 1980 NASA alone lost 90 senior executives, representing 20 percent of their executives and 75 percent of their senior executive service members who were eligible to retire in fact retired. This is compared to an attrition rate, a normal attrition rate, in NASA of 6 percent.

At this time we are also striving to renew our commitment to a strong national defense and forge ahead in our development of sophisticated, highly technical weapon systems. We are faced with difficult decisions on the type of defense needed and the manner in which we meet our manpower needs. Yet the Department of Defense quotes a separation rate from its senior executive service of approximately 20 percent for each of 1980 and the expired portion of 1981. Some examples of their most pertinent recent losses are:

The Director, Data Processing Directorate, Ballistic Missile Defense Advance Technology Center in Huntsville, Ala., resigned to accept a position in private industry. He stated the executive pay cap played a role in his decision.

The principal Deputy Assistant Secretary of the Air Force for Research, Development, and Logistics resigned after 1 year to work in the private sector at a substantially higher salary.

A Deputy Assistant Secretary in the research and development area of the Air Force resigned to work in the private sector at twice his Air Force salary.

We cannot keep losing people of this caliber because we are unwilling to face the reality of the labor marketplace. We must eliminate the executive pay limitations which bring about constantly this attrition. We are losing highly technical individuals who can no longer afford to work for the Federal Government, and the programs which we are changing, the directions which we are changing, must certainly falter. We must have competent executive personnel at the senior level in the executive branch.

Mr. President, I ask unanimous consent that the letter I mentioned from Dwight Bartlett and an editorial from the Washington Post this morning entitled "Thaw-Time for Top Federal Pay" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HEALTH AND HUMAN SERVICES,
*Baltimore, Md., August 27, 1981.*

Attention: Thomas Hasler.
EVENING SUN,
*Calvert and Centre Streets,*
*Baltimore, Md.*

DEAR MR. HASLER: In your column "Federal Digest" which appeared in the June 13, 1979 edition of the Evening Sun you spoke of the difficulties that the Social Security Administration had in filling the position of Chief Actuary, primarily because the salary was then limited to $47,500. In the column you identified me as the individual who finally and somewhat reluctantly accepted the position while many others had turned it down for financial reasons.

As a followup to that column I thought you might be interested to know that I have now decided to return to private business and have accepted the position of Executive Vice President, National Health and Welfare Mutual Life Insurance Association in New York. A primary consideration, although not the only consideration, was financial.

By private sector standards the job was hugely underpaid at the time I accepted the position in December 1978. Since that time I have had one raise, to $50,112, which amounts to 5½ percent. In the same period, i.e., from December 1978 to July 1981, the Consumers Price Index has risen 35.3 percent and the hourly earnings index has risen 23.8 percent.

I recognize that I am not alone in having been vastly underpaid for the responsibilities I have had. Essentially the same situation applies to all my colleagues in the Senior Executive Service. It is naive and dangerous of our political leaders and citizenry to assume that the call to public service, which is very real for many, will be sufficient to result in the hiring and retaining of talented executives and professionals in sufficient numbers in the face of increasingly

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

inadequate compensation by private sector standards.

Sincerely,

DWIGHT K. BARTLETT III,
*Chief Actuary.*

---

[From the Washington Post, Sept. 16, 1981]

THAW-TIME FOR TOP FEDERAL PAY

Most Federal white-collar workers were less than giddy a few weeks ago when President Reagan proposed an annual pay raise for them of 4.8 percent. But the news this week that he would like the same raise for senior government executives must be music to the frozen little ears of these employees, who have not seen an extra penny—not one—in four years. After all this time, they deserve a break today.

True, their current salaries may not be the stuff of which poverty is made. But when you freeze everyone's pay at the top for four years, the crowd bumping against the ceiling gets thicker, incentives get thinner and valuable experience and talents vanish into retirement, which at prevailing pension rates can prove more lucrative than staying on the job.

That's hardly the formula for top-flight management in government, which is why Congress should support the administration's recommendation to end the freeze and to offer the same modest rate of increase proposed for all other federal white-collar workers. It is not a matter of "comparability" with whatever a worker's supposed counterpart in private business may be earning, but with whatever others down through the federal ranks may be getting.

Still better, of course, would be a federal pay structure that took into consideration 1) regional differences in cost of living and pay scales and 2)—would you believe?—the value of the work performed by each employee. That may be too much to ask, but then, who is footing the bill, and how much is too much to pay?

---

## ZIP PLUS FOUR

Mr. STEVENS. Mr. President, I hope all Members of Congress enjoyed as much as I did the opportunity to return home during the recent recess.

During that recess, to the consternation of some people, the U.S. Postal Service notified 15 million businesses and boxholders of the four additional numbers to be added on to the current ZIP code. I do not need to remind anyone that the ZIP-plus-four proposal has stirred a great deal of controversy. One of the controversial aspects was thought to be that every American would have to learn an entirely new nine-digit ZIP code. That is not the case. No one will have to use it if he or she does not want to, and I have legislation pending to make certain that it remains voluntary. But beyond that, no one is being asked to learn any new digits.

It was interesting to note that when the boxholders were notified of their new ZIP code it turned out to be their current ZIP code plus their post office box number. For instance, the ZIP code for my office in Juneau is now 99801, plus 4 digits, 0149. That is my post office box number with a zero in front of it and my current ZIP code.

I have had no complaints at all—not one single complaint—as chairman of the Post Office and Civil Service Subcommittee, of the notification that went out to 15 million people. I think it is high time that the Members of Congress who are raising so much fuss over ZIP plus four realize that the country knows that it is not so bad. As a matter of fact, the country, in the time I have been in the Senate, has changed from 5 digits for the telephone system to 10. We now have 10 digits in our telephone numbers and we are asking to go to 9 for the ZIP plus 4.

The reaction I have been receiving from Alaskans and others in various parts of the country I have visited was "This is not so bad." In fact, I found an enthusiastic reception to the idea that someone's box number is actually going to be incorporated into their current ZIP code.

---

## RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield to Mr. PROXMIRE such time as he may require.

Mr. PROXMIRE. I thank the distinguished minority leader.

(Mr. GORTON assumed the chair.)

---

## A LONELY CRY

Mr. PROXMIRE. Mr. President, for 14 years I have spoken daily on this floor to remind the Senate of our failure to act on the Genocide Treaty. I have made frequent reference to the most infamous examples of genocide, the holocaust.

The word genocide brings to mind memories of Hitler, Nazis, and the massive, inhumane annihilation of millions of people. Without diminishing the horror of this blatant example of genocide, I would like to remind my colleagues of a lesser known, but equally terrifying tragedy, the tragedy of East Timor.

Incidentally, that is typical of the genocide that has occurred throughout history, unfortunately, that has occurred in a number of places throughout the world since the Nazi genocide of the Jews in Europe and, of course, which calls for action by this body, not just out of memory and respect for those who were the victims of Hitler's genocide, but because it is a continuing problem that the world must face.

Few people know of East Timor, where it is, and the atrocities happening there in recent years. East Timor is a tiny island off the northwest coast of Australia in the Indonesian archipelago. In 1975, Indonesia invaded and annexed this former Portuguese colony, and in July 1976 incorporated East Timor as its 27th province.

Today a major political and military struggle continues between the Indonesian Army and a left-wing political group called Fretilin.

The abjectly poor Timorese people suffer greatly from the ugly results of postcolonial warring factions, civil war, foreign invasion and lingering low-level warfare. Some experts have compared the devastation and starvation in East Timor to that in Cambodia.

The population of East Timor in 1975 was 650,000. By the end of last year, which marked the termination of foreign famine aid by international relief organizations, up to 100,000 East Timorese had died of starvation or had been killed. Experts estimate that more than 200,000 people, or two-fifths of East Timor's population, suffer from severe malnutrition.

In writing about East Timor, columnist Jack Anderson said in 1979 that the "population in the countryside has been starved deliberately to stifle the resistance movement." He quoted a frantic plea picked up on shortwave radio in 1975.

> Women and children are being shot in the streets! . . . We are all going to be killed! This is an appeal for international help . . . Please help us!

We cannot ignore desperate pleas like these.

Whether or not the incidents in East Timor constitute genocide, the United States must do all it can to speak out against such gross and deplorable violations of human rights.

One way which we, as Members of the U.S. Senate, can affirm and protect the most fundamental of all human rights—the right to live—is to ratify the Genocide Treaty. The Genocide Treaty is not simply a response to the atrocities of the holocaust, the Turkish persecutions of Armenians during World War I, or the Russian pogroms during the late 1800's. The Genocide Treaty is a means to protect human lives, today and in the future, in all areas of the world. I suggest that there is no better affirmation of our obligation to protect human rights than to ratify the Genocide Treaty.

Mr. President, I thank my good friend, the minority leader, for yielding the time. I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, have I any time remaining?

The PRESIDING OFFICER. The Senator has 5 minutes remaining.

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

I understand that Mr. RIEGLE has a special order for 15 minutes which he will not utilize. If the distinguished acting majority leader wishes to have the time, he may have it.

Mr. STEVENS. Mr. President, I do ask unanimous consent that that 15 minutes be transferred to my control to follow the special order that is currently ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

---

## RECOGNITION OF SENATOR COHEN

The PRESIDING OFFICER. Under the previous order, the Senator from Maine (Mr. COHEN) is recognized for not to exceed 15 minutes.

---

## UNITED STATES-CANADA RELATIONS—A TIME FOR REASSESSMENT

Mr. COHEN. Mr. President, in the international community, few neighboring

nations have enjoyed the cordial, cooperative relationship which the United States and Canada have historically shared.

Our two nations, sharing common interest and concerns, have worked well together. The recent act of extraordinary heroism on the part of Canadian Embassy employees in Tehran, helping to hide and then facilitate the escape to freedom of several Americans who had eluded the anti-United States revolutionaries in Iran, exemplifies the spirit of friendship between our two countries.

Still, there is a danger—and I see it as an increasingly serious one—that acts of economic self-interest could jeopardize this relationship of mutual cooperation and benefit. Two recent articles reflect the growing problem. "Administration Eyes Sanctions Against Canada," which appeared in the September 10 Washington Post, and " 'Canadianization' a Red Flag to U.S. Firms and Their Friends in Congress," which was in the August 1 National Journal, discussed growing tensions between the two countries.

Mr. President, I ask unanimous consent that those two articles be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. COHEN. The thrust of both articles is that the United States is growing increasingly concerned over actions by the Canadian Government which are hampering American businesses wishing to operate in Canada. Equally serious are steps providing unfair advantages for Canadian industries competing with American firms and agricultural operations.

The economic policies of the Canadian Government in recent years have been perceived by American business and government officials as posing a threat to U.S. interests. For border States such as Maine and for smaller businesses within those States, the impact of those policies can be serious.

The situation may not be one as clearly visible as that of Japanese cars threatening the American automobile industry or Taiwanese shoes hurting the American footwear industry. But in times of economic uncertainty, the trade decisions being made north of our border can have a devastating effect on Americans who have every reason to hope that their Government will take a stand on behalf of their economic survival.

I hope in future statements to provide additional detail on the full economic impact of decisions reached and actions taken by both the Canadians and our Government. At this time, though, I would like to cite what I view as some problem areas—those which I hope will be addressed before it is too late for the continuation of harmonious relations and mutually beneficial economic policies.

Agricultural interests in the United States have been critically hurt in recent years. Later today, I will propose an amendment to the farm bill which I hope will alleviate the crisis for potato farmers. While not wanting to go into the detail that I will in discussing my amendment, I do want to relate the key aspects of the potato problem.

In the past year alone, there has been nearly a 300-percent increase in both potato seed and tablestock shipments from Canada to the United States. This increase is partly a result of gradual reductions of tariffs under the Trade Agreements Act of 1979. But Canadian growers have other advantages. The monetary exchange rate allows the importer to pay, in effect, 20-percent less to purchase Canadian potatoes, a product indistinguishable from those produced on U.S. farms.

In Canada, subsidies at both the Federal and Provincial level are known to exist. Additional inequities in energy costs, transportation subsidies, and restrictions on U.S. potatoes entering Canada only add to the frustration of U.S. producers.

Other border States have problems with smaller industries. Maple syrup from Vermont; carrots, cabbage, and onions from New York; blueberries from Michigan and New Jersey; raspberries from Washington State; and wood products in all the border States are particularly vulnerable.

This is especially true of the small horticultural industries, since there is no protective mechanism such as section 22 of the Agricultural Adjustment Act, which protects the commodities under price supports. The only mechanism is through the International Trade Commission, and countervailing duty petitions take over 6 months, are costly, and are difficult for these small industries to prove.

The difficulty in getting satisfactory redress is frustrating to many small companies which feel that Canadian companies are using predatory pricing policies to obtain U.S. markets. In one case, packed smoked herring, there are no duties. This causes the small U.S. company to face added difficulties, since its Canadian competitors, with government assistance and favorable exchange rates, can significantly undersell in the U.S. market.

Lumber and wood manufacturing firms are facing the same situation. Although the major problem is the U.S. economy (lack of housing starts and high interest rates), any market that exists is being taken over by Canadian mills—again with Canadian subsidies and favorable monetary exchange rates.

Trade flows freely at the large industrial level; however, in smaller industries where Canada is protective and interested in developing self-sufficiency, the Canadians are restrictive. This is particularly true in the case of leather tanning and poultry. In both cases, the United States has opened its markets, while the Canadians have restrictive tariffs or quotas on both products.

The Canadianization program of Prime Minister Pierre Elliot Trudeau—who was reelected last year on a platform promising increased Canadian control of the economy, especially in energy, is a legitimate cause for concern on the part of American firms and Government officials. It is understandable that the Canadians wish to hold a firmer grip on their economic and energy future. Still, this program will have a significant impact on American petroleum firms, which now have a substantial role in Canadian oil production.

For those of us in the Northeast, the fishing industry offers a particularly stark illustration of the extent to which the Canadians can take large portions of an American market at the expense of the domestic industry.

Maine fishermen have, for many years, competed with Canadian counterparts who have at their disposal a host of programs of assistance sponsored by the Federal Government of Canada and by the Provinces. Canadian fishermen can receive a grant covering an astounding 35 percent of the cost of building a boat. In addition, they are eligible for low-interest loans available through both the Federal and Provincial governments. Beyond this, Canadian fishermen can receive a range of indirect assistance from their Government.

The irony in all this is that the United States refuses to see that the fishing market which the Canadians are exploiting is its own. Moreover, the fish are taken from waters in which Americans have an equal, if not superior, legal right to fish.

In part because the Canadian Government places a higher value on its fishing industry than does the United States, it was successful last year in signing a treaty for the settlement of the maritime boundary with the United States that was highly unfavorable to U.S. fishermen. This treaty was defeated only when the Representatives and Senators from the region opposed it. The Reagan administration showed great wisdom in withdrawing it.

This is an industry—one of small businessmen—where 20 percent of the world's fisheries lie within our borders, but we import two-thirds of the fish we consume. The moneys which New England fishermen would make with adequate Government support would be money that would not leave this country and would go toward redressing the imbalance in our balance of payments.

What this example makes clear is how distorted and out of focus the issue of United States-Canadian economic and trade relations is. The Canadian Government should not be blamed if it places a higher priority on a particular industry than does our Government. Similarly, one can understand the interest of the Canadians in protecting their key industries.

The Canadian oil and fish policies also reflect the regional differences within that country, ones which are distinctly reflected in the decisionmaking process in the United States. Canada obviously places a high priority on aiding its eastern provinces and their fishing industry; the interest of the burgeoning Sun Belt have appeared to some in the older, industrialized Northeast to benefit to a

greater extent from U.S. Government policies.

The provincial nature of Canadian Government is another factor. Each province can provide economic incentives of its own, in addition to any steps by the central Government, to aid its industries. Our States, under the Federal system, do not have the same ability and resources to take those kinds of actions.

The question, then, is what the United States and Canada can and should do to assist their industries and protect their economic interests while operating within a framework of regional cooperation. Our mutual interests are strong. The degree of our interdependence makes it all the more essential that we minimize our disagreements and resolve minor differences before they become major ones.

Each country can point to policies of States and the neighboring communinatory or unfair. Each can cite an action of the other which it believes is harmful to its interests.

For the northern tier of the United States and the neighboring communities in the Canadian provinces, it is especially critical that we take early, effective steps to correct problems which exist and to anticipate prospective ones. If that does not happen, a "no win" situation can be created.

Take, for example, what happened in 1976, when the Canadian Government told Canadian companies they could no longer deduct as a business expense the cost of advertising on U.S. television stations. This cost American stations bordering Canada, including a number in Maine, about $15 million annually.

In response to the Canadian action, the U.S. Congress passed legislation permitting taxpayers to deduct the cost of attending only two conventions outside the country each year. This step was estimated to cost the Canadian tourist industry about $100 million each year.

Mr. President, this offers a perspective of what we can expect if our two Governments fail to resolve differences and choose retaliatory means of response. It would seem that both sides would want to avoid this kind of situation. Yet, the Canadians, by some of their recent actions, have caused some U.S. Government officials to speak, as reflected in the Post article, of specific sanctions against Canada. Our two nations are clearly reaching a point where the decisions they make and steps they take will have far-reaching implications.

President Reagan, recognizing the sensitivity of this issue, proposed during his Presidential campaign, that there be a "North American accord" among the United States, Canada, and Mexico. The concept of a common market for our continent, on the order of the European Economic Community, is one which many favor as a means of insuring that the economic interests of the nations of this hemisphere are protected.

We need to take a closer look at what Anthony Westell of the Carnegie Endowment for International Peace has referred to as the "poison pinpricks," the minor irritants between the United States and Canada which could, if not staunched, become major fissures. As Westell said in a recent Foreign Policy article:

An overriding question for the 1980s, therefore, is whether the two countries are going to recognize that they are committed to a special and increasingly complex relationship and establish new institutions to manage it, or whether they are going to try to maintain the pretense that they are just good neighbors with diverging interests and proceed to engage in unnecessary confrontation.

As we seek to establish those new institutions, it is all the more imperative that we do all we can to avoid the unnecessary confrontations which could weaken our alliance and diminish its effectiveness. We in Congress bear a special responsibility to see that the "poison pinpricks" I cited earlier—the disagreements on agricultural, energy, fishing, and other policies—are dealt with effectively.

This will be a difficult process, but I think it is a critically important one. We must make it a top foreign policy priority.

For the benefit of my colleagues, I submit the Post and National Journal articles I referred to earlier.

EXHIBIT 1

[From the Washington Post, Sept. 10, 1981]

ADMINISTRATION EYES SANCTIONS AGAINST CANADA

(By Jane Seaberry)

The Reagan administration is considering tough retaliatory sanctions against the Canadian government if it goes ahead with nationalization plans aimed at limiting U.S. investment in Canada.

Actions under consideration range from abandoning the U.S.-Canada auto pact to granting the president emergency powers to eliminate or alter any trade agreement between the two countries.

The actions being considered resulted from a review ordered by the Cabinet at a meeting last month, administration sources said yesterday. At that meeting, the Commerce Department and the U.S. trade representative were asked to come up with a list of possible sanctions.

The Canadian government was notified of the White House study here Tuesday during consultations on Ottawa's "Canadianization" program.

A Canadian Embassy spokesman yesterday acknowledged the meeting with administration officials, but said it would be hard for the White House to design a program to hurt Canada without also hurting the United States. He said the talks were continuing and that he expected them to produce satisfactory results.

"We're letting them know there is serious concern, not just in Congress but also in the administration, and they can't count on the administration to stand between Canada and Congress," Raymond J. Waldmann, assistant secretary of Commerce for international economic policy, said in an interview.

The administration has set no timetable for determining what action it might take, Waldmann said, "but we felt it was important to let [the Canadians] know now."

"There's still an opportunity" for Canada "to look at what they're trying to achieve through these measures and consider the interests of other conutries," Waldmann added. "The president is interested in harmony with Canada, yet we have this incident that's in the way."

Canadian Prime Minister Pierre Elliot Trudeau and his Liberal Party were reelected last year on a platform promising increased Canadian control of the economy, especially in energy.

Trudeau has proposed a new energy policy designed to reduce foreign ownership of the oil and gas industry from 72 to 50 percent by 1990 and to make Canada self-sufficient in energy.

Trudeau also has proposed tighter controls on non-energy subsidiaries of foreign companies operating in Canada. U.S. firms have complained that the proposals are aimed primarily at them. Nearly 80 percent of foreign investments in Canada are controlled by U.S. interests.

Besides the administration sanctions, legislation is pending in Congress to force a moratorium on Canadian investment here and stiffen financial requirements for Canadian firms attempting to acquire American companies, Waldmann said. He said the White House is considering throwing its support behind that legislation.

He added that Congress is pressuring the administration to invoke the Mineral Lands Leasing Act, which prohibits a foreign company from leasing federal land for mineral development unless that country reciprocates. The secretary of the interior can declare Canada "non-reciprocal."

Waldmann said the administration was not trying to act as a big brother telling Canada what to do, but he acknowledged that it was "finger-twisting."

The most far-reaching option being considered by the White House would allow the government to initiate an investigation under Section 301 of the Trade Act of 1974. That, after a government determination, could give the president broad powers of retaliation.

The determination that Canada violated an agreement or conducted unjustifiable trade practices must be backed by evidence, which the Commerce Department is gathering. Several weeks ago Commerce mailed to the executives of the Fortune 500 companies a questionnaire asking them what problems they have had with the Canadian government, Waldmann said.

Another issue clouded by the administration's review is the U.S.-Canadian auto pact, which the Canadians have said they want renegotiated to provide more benefits for their companies, which are mostly divisions of U.S. firms.

"CANADIANIZATION" A RED FLAG TO U.S. FIRMS AND THEIR FRIENDS IN CONGRESS

(By Richard Corrigan)

Two kids, one hefty, one scrawny, are playing in a sandbox. The bigger boy moves happily all over the box, absorbed in his castle building. The other one sticks to the north end, muttering whenever the big kid bumps him aside.

Suddenly the little kid throws sand in the big one's face, tells him to stay the hell on his side of the box and reaches over into the south end to knock over some castles there.

The big kid looks stunned and mad. "That's no fair!" he bellows. "Anyway, I thought we were friends."

A dispute of this kind is going on between the United States and Canada as a result of the Canadian government's new, nationalistic energy policy.

U.S.-based oil and natural gas companies, which have long dominated the petroleum industry in Canada, are being squeezed by the "national energy program" unveiled last October by Prime Minister Pierre Elliott Trudeau.

The U.S. companies operating in Canada are the chief targets of a "Canadianization" campaign designed to establish Canadian

control, through government and corporate expansion, of the petroleum industry. Canada's objective is not nationalization of the oil and gas business, as occurred in Mexico more than 40 years ago, but a stiff dose of de-Americanization.

At the same time, freewheeling Canadian companies have been moving to gain control over, or snatch assets from, some sizable U.S. corporations, touching off a wild series of takeover moves and countermoves within the United States.

From the U.S. point of view, Canada has abruptly altered the traditionally wide-open business and trade relationships between the two nations by embarking on a discriminatory and shortsighted course that will prove harmful to both countries. The forays by Canadian companies into U.S. energy interests only exacerbate the situation.

Bipartisan pressures are building in Congress for retaliatory action against Canada, with Members of Congress complaining that the Reagan Administration's efforts at diplomatic persuasion have gotten nowhere. Among the measures being proposed on Capitol Hill are a moratorium on takeovers of U.S. energy firms by Canadian-owned companies and restrictions on the leasing of U.S. resources by Canadian interests.

There are also indications that the anger over Canada's behavior may spill over into other areas. For example, congressional action to ease the financing and construction of the Alaska gas pipeline system through Canada to the lower 48 states may be held up.

The Administration seems reluctant to take retaliatory action: generally, because it favors the free flow of investment capital into the United States and does not want to get into an exchange of protectionist slaps with a major trading partner; and specifically, because the measures being suggested probably wouldn't work and would only solidify support for Trudeau's program within Canada.

Trudeau's energy program covers much more than Canadianization of the petroleum industry, although that is the section that naturally draws Washington's attention. It also represents an effort by Canada's federal government, mainly on behalf of the populous but energy-poor provinces of Ontario and Quebec, which give Trudeau the bulk of his Liberal Party support, to slow the flow of wealth to the oil producing provinces of the west.

Through a continuing of price controls on Canadian crude oil and new federal taxes and revenue sharing formulas, Ottawa is attempting to reassert its authority over the western provinces as well as the foreign oil companies.

Canada exhibits an extreme case of political tensions between energy-rich and energy-poor regions—tensions that are similar to but much more pronounced than those within the United States.

COOLER WELCOME

While much of Trudeau's program has proven to be highly controversial within Canada, the Canadianization policy evidently is being well received.

As the Canadian government explains it, the national energy program sets a modest goal of putting half of the nation's petroleum industry into Canadian hands by 1990.

In defense of this objective, Canadian officials ask whether any oil producing nation—including the United States—would tolerate having more than 70 percent of its industry owned and operated by foreign interests. Judged by the outcries occasioned here by a few Canadian takeover bids for U.S. oil firms, the answer is negative.

And as Canadian Ambassador Peter M. Towe said soothingly in a recent Washington speech, even after implementation of its new energy program, Canada will still offer "a warmer welcome to foreign investment in the energy sector than does almost any other producing country in the world."

According to the Trudeau government's report on its national energy program, U.S.-controlled companies hold the top positions in Canada's petroleum industry. In 1979, the report said, 9 of the top 10 oil and gas producing companies and 17 of the top 25 were controlled by foreign interests, all but a few Canadian firms. The top three were the Canadian subsidiaries of U.S.-based Exxon Corp., Mobil Corp. and Texaco Inc.

Takeover fever runs rampant north of the border: U.S. oil companies operating in Canada have become targets for takeover moves by private Canadian firms and Canadian government organizations.

In some cases, the Canadian subsidiaries of the U.S. firms have been acquired outright. In others, Canadian bidders have tried to gain enough stock in the parent U.S. firms to pry away their Canadian assets or gain control of the companies themselves.

The acquisitions were launched by Petro-Canada, the federal oil company established in 1974. Petro-Canada bought the Canadian subsidiary of Atlantic Richfield Co. for $320 million in 1976 and the Canadian subsidiary of Phillips Petroleum Co. in 1979.

The action picked up this year after Prime Minister Pierre Elliott Trudeau issued his "national energy program," which calls for greater ownership of the petroleum industry by government companies. The program gives incentives to Canadian-controlled private firms and puts new controls on investments and transfers of assets by foreign-controlled firms.

In February, Petro-Canada bought the Canadian subsidiary of Petrofina S.A., a Belgian firm, for $1.5 billion, using the proceeds of a new federal tax of 8 cents a gallon on retail gasoline to finance the purchase.

In April, U.S.-based St. Joe Minerals Corp., fighting a takeover by Seagram Co. Ltd., sold its Canadian subsidiary to another Canadian firm, Sulpetro Ltd., for $546 million. St. Joe was then acquired by Fluor Corp. of California.

In June, Dome Petroleum Ltd. of Calgary acquired Hudson's Bay Oil and Gas Co. Ltd., a subsidiary of Conoco Inc., for $1.96 billion, a deal described by Maclean's, the Canadian news weekly, as the biggest corporate takeover in the nation's history. Dome got Hudson's Bay after buying a block of Conoco shares through a tender offer and then swapping the stock for Conoco's subsidiary.

Also in June, Canada Development Corp., a federally sponsored firm, purchased Aquitaine Co. of Canada Ltd., a subsidiary of the French multinational firm Societe Nationale Elf Aquitaine. Elf Aquitaine then bought control of U.S.-based Texasgulf Inc. in a complex, multi-billion-dollar arrangement by which Canada Development Corp. will pick up Texasgulf's Canadian assets. "Elf Aquitaine said on July 28 that it had purchased more than two-thirds of the stock of Texasgulf through a $3 billion tender offer, enabling the French company to enter the U.S. oil industry with the cash it receives for pulling out of Canada.

Next, Conoco became the target of a takeover move by Seagram's U.S. subsidiary, Joseph E. Seagram and Sons Inc., which earlier had tried to get St. Joe. Seagram netted about $2.3 billion from the 1930 sale of a U.S. firm, Texas Pacific Co., and was thus ready and able to attempt a major acquisition.

Conoco is the ninth-largest U.S. oil company, according to Oil and Gas Journal, with 1980 revenues of $18.3 billion. It also owns Consolidated Coal Co., one of the top U.S. coal companies.

Conoco's management, opposing Seagram's move to gain a controlling share of the company's stock, negotiated a merger agreement with E. I. duPont de Nemours & Co. Then Mobil Corp. jumped into the competition, opening a three-way, high-level bidding war between Seagram, duPont and Mobil over Conoco.

Cities Service Co. of Tulsa, Okla., which earlier had talked with Conoco about the possibility of a merger deal, then became the target of a takeover campaign by Calgary-based Nu-West Group Ltd. Cities Service is trying to stop Nu-West from buying additional shares in the firm. In a suit filed in the U.S. District Court for the Northern District of Oklahoma, Cities Service has charged that Nu-West acquired more than 6 per cent of Cities Service stock—thus making it a major shareholder—by using borrowed funds that exceeded Nu-West's net worth.

Cities Service complained that Canadian companies, using loans from Canadian banks, are operating outside of U.S. securities regulations on borrowing limits. The intent, the company said, is to get enough stock in U.S. firms to force them to surrender their Canadian holdings in exchange for the stock.

Maclean's said that Canadians bidding for U.S. companies "are immunized from a reverse takeover bid" because Canada's Foreign Investment Review Agency "would simply disallow any U.S. attempt that succeeded."

Canadian officials deny that U.S. interests in Canada are being raided through unfair means. "No one is being obliged to sell their properties or assets, and certainly not at distressed or fire-sale prices," according to Peter M. Towe, Canadian ambassador to the United States. The Canadian government says, for example, that the price paid by Petro-Canada for Petrofina's Canadian subsidiary was more than adequate.

The turmoil within the oil industry over Canada's energy program meanwhile has generated new lobbying and legal work in Washington.

Kenneth S. Levine, who was director of congressional and public affairs for the Federal Energy Regulatory Commission, now represents Seagrams in Washington.

One of the law firms retained by Seagrams is Andrews, Kurth, Campbell & Jones, the former firm of White House chief of staff James A. Baker III. Another is Van Ness, Feldman, Sutcliffe, Curtis & Levenberg; Charles B. Curtis, a partner, was chairman of the Federal Energy Regulatory Commission.

Others representing Canadian interests here include the law firm of Prather, Seeger, Doolittle & Farmer, on behalf of Seagram and the Royal Bank of Canada, and Blatchford, Epstein & Brady, for the Independent Petroleum Association of Canada and American Hunter Exploration Ltd., a Canadian petroleum company, according to filings with the Justice Department's foreign agents registration office.

The firm of Mayer, Brown and Platt is representing Dome Petroleum, which opposes restrictions on the leasing of U.S. firms by Canadian interests. Richard M. Smith of that firm was a policy adviser in the Energy Department.

Petro-Canada's consultant in Washington is Norman C. Chappell, former energy adviser at the Canadian Embassy.

U.S. companies fighting Canadian takeovers meanwhile have lined up Washington law firms to protect their interests.

Conoco's lawyers include the firm of Patton, Boggs & Blow, a major lobbying force, while Cities Service has retained James T. Lynn, former director of the Office of Man-

agement and Budget and now with the firm of Jones, Day, Reavis & Pogue, according to the Washington Post.

Mobil, to fend off objections about the antitrust ramifications of its bid for Conoco, has retained Sanford A. Litvack, former assistant attorney general for antitrust.

Among the top 25, the foreign-owned firms accounted for 72 percent of total industry revenues while the Canadian firms got 19 percent, the report says.

The same report says that net oil and gas production revenues jumped from $1.2 billion in 1970 to $11.1 billion in 1979, with foreign companies reaping the greatest gains. The petroleum industry, Canada's biggest, has been a net exporter of capital since 1974, the report says, speaking of "a massive transfer of wealth, now and in the future," from Canadian consumers to foreign-owned companies.

To attain Canadian control of at least 50 percent of the industry by 1990—from about 30 percent now—the program calls for a combination of actions.

First, the role played by federally owned oil companies such as Petro-Canada, established in 1974, is to be enlarged. Petro-Canada or other crown corporations will get a 25 percent interest in all production concessions in federally owned frontier areas, both onshore and offshore. Acquisitions of foreign-owned assets by Petro-Canada and other crown corporations—which already are well underway—also will be accelerated, financed by a special tax on oil and gas consumption.

"For most Canadians, the only way to ensure that they do share in the wealth generated by oil, and to have a say in companies exploiting that resource, is to have more companies that are owned by all Canadians—more companies like Petro-Canada," the report says.

Meanwhile, the Foreign Investment Review Agency, which operates under their Cabinet's control, has been directed to enforce its authority "vigorously" over foreign investments in the energy sector. The agency can stop acquisitions by foreign firms operating in Canada and can prevent the sale of assets by one foreign company to another. The companies can thus be pressured into accepting Canadian takeover bids.

The program also provides preferential treatment for private Canadian as opposed to foreign companies that look for oil and gas on their federal lands, known as Canada lands, and on provincial lands.

The government, contending that the current tax and leasing systems have worked to the advantage of foreign companies, has drawn up pro-Canadian systems to replace them. Under the program, depletion allowances would be phased out and replaced by petroleum incentive payments.

The payments would be tilted to the advantage of Canadian-controlled companies. A company with 75 percent or more Canadian ownership would qualify for payments equaling 80 percent of exploration costs and 20 percent of production costs on Canada lands. A company with less than 50 percent Canadian ownership, by contrast, could get payments covering only 25 percent of exploration costs—and could not get permission to produce on Canada lands unless it teamed with Canadian companies to meet the 50 percent ownership standard. When all the incentives are added up, said an executive at a leading U.S.-controlled Canadian oil firm, "it really means a Canadian company is playing with 7- or 8-cent dollars."

Although the national energy program has not yet been formally enacted, it is generally agreed that its main elements—notably the Canadianization portions—will be put into place. Critics say the Foreign Investment Review Agency already is operating as if the program had been approved by Parliament.

"Canadianization is here to stay," and the retaliatory actions being talked about in Washington will not force Canada to back off from that goal, said a State Department official.

"Rightly or wrongly, the Canadians have been harboring a grudge for years" about the role of U.S. oil companies there, said Bernard J. Picchi, vice president of the New York investment firm of Salomon Brothers. "I don't think Trudeau is going to back off."

And a Canadian energy adviser in Washington said, "Canadianization is the political heart of the program."

IMPACT ON INDUSTRY

The program also calls for a continuation of price controls on Canadian crude oil. Currently the price of domestic oil is held at $18.75 per barrel, about half the world oil price. And the program includes a new 8 percent federal tax on oil and gas production, which further crimps the profitability of Canadian operations.

Canadian oil companies may welcome the Canadianization sections of the Trudeau energy program, but they are just as upset as foreign-owned firms about the extension of price controls. Drilling activity has slumped in Canada so far this year while drilling rigs have been moved across the border into the United States, where price controls no longer are in effect.

Picchi estimates that a newly discovered barrel of oil in the United States now will realize an after-tax profit of $10 a barrel, while the comparable figure in Canada is about $3.75.

Even without the Canadianization program, he said, there would still be an exodus of drilling rigs because the United States offers far more profitable treatment.

The effects of Trudeau's program already are showing up on the ledgers of major U.S. oil firms.

Exxon, in announcing a 77 per cent increase in worldwide profits in the second quarter of 1981 over a year ago, said exploration and production earnings in Canada were "disappointing." Imperial Oil Ltd., Exxon's Canadian subsidiary, has suspended work on a major tar sands production project until the Canadian government and the province of Alberta agree on oil pricing and revenue sharing arrangements.

And Standard Oil Co. of Indiana said it has cut its 1981 exploration and production budget in Canada to about half the 1980 figure "as a direct result of the Canadian government's announced national energy program."

According to data gathered by the House Energy and Commerce Subcommittee on Oversight and Investigations, the Canadian subsidiaries of nine major U.S. oil firms plan significant reductions in exploration spending this year from the amounts budgeted before Trudeau's program was announced.

ADMINISTRATION'S RESPONSE

U.S. officials have expressed strong concern about Canada's energy policy but have not found a way to get Canada to change it.

"What we want to do is convince the Canadian government that it must change its policy," Beryl W. Sprinkel, Treasury undersecretary for monetary affairs, told the Oversight and Investigations Subcommittee at a July 9 hearing.

The U.S. officials say that Canada's policy is clearly discriminatory, jeopardizes investments in Canada and runs counter to Canada's obligations under international trade agreements.

"Although these investment policies apply to all non-Canadian companies," deputy U.S. trade representative David R. Macdonald said in a statement at the same hearing, "it is fair to say that their impact will fall most heavily on Americans. U.S. direct investment in Canada amounts to more than $40 billion, . . . about 80 percent of total foreign investment in that country." (According to Treasury Department figures, U.S. direct investment in Canada in 1979 totaled $41 billion, with about $9 billion in oil and gas, the $41 billion represented about a fifth of total U.S. investment abroad.)

Macdonald called parts of the energy program "expropriatory in nature" and said the Foreign Investment Review Agency's operations are "clearly in violation" of the General Agreement on Tariffs and Trade.

Robert D. Hormats, assistant secretary of State for economic and business affairs, told the subcommittee: "Canada's policies toward foreign investment have since the mid-1970s been moving in a restrictive and discriminatory direction, contrary to that of other developed countries. . . . It is puzzling to me how Canada can expect to have it both ways—seeking benefits from participating in the Western industrial club, while claiming special rights to promote indigenous development by curtailing certain foreign economic activity."

This is relatively strong language, especially in a public forum. But since the program was issued in Ottawa last year, the steady stream of U.S. objections hasn't made much of a dent in Canada's policy.

President Reagan brought up the subject in his pre-summit meeting with Trudeau in Washington, according to a State Department official, again with no noticeable effect.

The question of what to do about Canada has been kicking around the Administration through several interagency groups.

One such "working group" was recently formed within the Cabinet council on economic affairs, chaired by Treasury Secretary Donald T. Regan, to review U.S. policy toward foreign investment.

A committee on foreign investment in the United States, another interagency group chaired by Treasury, has been gathering information on Canadian corporate spending here. The Commerce Department's international trade office compiled a list of Canadian acquisitions in the United States during the past year for use by this group.

The Interior Department has been studying the 1920 Mineral Leasing Act to see whether Canada's energy program offers grounds for declaring that country a nonreciprocal nation, a finding that could lead to restrictions on the leasing of federal lands in the United States by Canadian-controlled firms.

Whether such a finding could be enforced or would result in a change in Trudeau's energy policy is doubtful.

The Interior Department has no idea how many leases issued under this law are held by Canadians through U.S. subsidiaries of Canadian firms or through Canadian holdings in U.S. companies. And even if the department traced the ownership of all leases, the resources leased to Canadians under this law would represent a small portion of the comparable U.S. investments in Canada.

An Interior official estimated that on the basis of Commerce Department figures on Canadian investments in 1979, holdings by Canadians in U.S. petroleum totaled $900 million, or about a tenth of U.S. petroleum investments in Canada. And the $900 million figure covered all U.S. petroleum investments, not just oil and gas lease holdings under the Mineral Leasing Act, which make up a minor amount of actual U.S. petroleum production.

Moreover, as a Washington lawyer representing Canadian oil firms said, the effect of a clampdown on leasing might be to send Canadian exploration firms back into Canada after they came here to escape Trudeau's program. "All their weapons are aimed at Alberta, and none are aimed at Ottawa or Quebec," he said of the U.S. government's options.

CONGRESSIONAL RUMBLINGS

Congressional interest in Canada's energy program and its ramifications here was aroused last spring, when Seagram Co. Ltd., through its U.S. subsidiary, Joseph E. Seagram and Sons Inc., moved to take over St. Joe Minerals Corp.

In the House, members of the Missouri delegation introduced legislation designed to thwart the acquisition of St. Joe, which has mining operations in Missouri.

Seagram had raised the cash for this offer through the sale of another U.S. oil firm it had bought years ago, but that did not deter the Missourians from trying to stop the Canadian distillery company.

The Seagram bid was foiled when California-based Fluor Corp. stepped in and acquired St. Joe. By that time, however, there were other takeover moves under way by Canadian companies. The potential effects of the Trudeau program on U.S. firms in Canada were coming to light, and the rumblings on Capitol Hill have grown louder ever since.

In the House, the action has been centered in the Energy and Commerce Committee and in the Interior and Insular Affairs Subcommittee on Mines and Mining.

The Interior subcommittee on July 16 approved by voice vote a bill putting a nine-month moratorium on foreign acquisitions (starting at 5 per cent) of any U.S. company holding a lease under the Mineral Leasing Act—which would encompass virtually all companies in the energy mining businesses. The Interior Department would be required to study whether foreign ownership of U.S. resources served the national interest while the moratorium was in effect.

In the Energy and Commerce Committee, the Oversight and Investigations Subcommittee has been pressing Administration officials to take action against Canada. The Telecommunications Consumer Protection and Finance Subcommittee has also reported a bill that limits borrowing by foreign firms involved in takeover bids.

Rep. John D. Dingell, D-Mich., chairman of the Oversight Subcommittee as well as the full committee, has repeatedly complained about Canada's discriminatory treatment of U.S. firms.

Republican committee members have joined with Democrats in denouncing the Canadian policy, for example, by signing a July 16 letter to Reagan in advance of the Ottawa summit session. The letter complained that Canada is depressing the value of U.S corporate assets in Canada, thus making these assets available at "fire-sale" prices to Canadians.

The letter warned that legislative action would be pursued if the summit session failed to produce a change in Canada's policy.

Dingell also has drawn a link between the Trudeau program and the Alaska gas pipeline. In a July 9 statement at his Oversight Subcommittee, he said, "Current efforts to facilitate the financing and the construction of the Alaska natural gas pipeline are not assisted by Ottawa's Canadianization policy."

This statement signaled a warning that a package of legislative waivers being prepared by the Administration to assist the pipeline might not clear Dingell's committee unless the Administration makes some headway with the Canadian government.

In the Senate, a bill regulating foreign purchases of U.S. firms is before the Banking, Housing and Urban Affairs Subcommittee on Securities. The panel, chaired by Alphonse M. D'Amato, R-N.Y., is looking at legislation that would require foreign companies to put up the same amount of cash as U.S. firms in making takeover bids. One complaint about Canadian takeover attempts is that Canadian companies can line up all the credit they need from Canadian banks and do not have to put cash up front as U.S. firms do.

OUTLOOK

The Administration has been hoping that Trudeau will agree to rewrite his program because of the troubles it stirs inside and outside Canada.

The Liberal Party Prime Minister, however, has stuck with that section even as his ministries negotiate with provincial governments on the other parts of the program.

There is some recognition in Washington that anti-Canadian rumblings here make Trudeau's policy more popular in Canada, but no one seems to know what else to do but make retaliatory gestures.

"The more heat we give him here, the more political good he can get up there," said a Democratic aide who has been pushing for a moratorium bill.

There is some speculation that Trudeau may step down as prime minister by the end of this year if his government can conclude an agreement with the provinces on oil pricing and revenue sharing.

If the Alaska pipeline project gets entangled in the controversy, that could further jeopardize the pipeline's prospects and widen the rift between the United States and Canada.

As for U.S. oil companies operating in Canada, Picchi of Salomon Brothers said of the Trudeau program, "My conclusion was that the cards in the game were going to be clearly stacked against U.S. companies and other foreign companies."

Nevertheless, he advises companies to try to stick it out. "God hasn't made too many Canadas," he said. "Governments come and go, but the oil in the ground is always going to be there."

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MURKOWSKI). Without objection, it is so ordered.

## EXECUTIVE SESSION

Mr. STEVENS. Mr. President. I ask unanimous consent that the Senate go into executive session for the purpose of considering the nomination on the calendar of Langhorne A. Motley, of Alaska, to be Ambassador of the United States to Brazil.

Mr. ROBERT C. BYRD Mr. President, reserving the right to object. this matter has been cleared on this side of the aisle. The minority is very agreeable to proceeding with the consideration of the nomination at this time. particularly in view of the interest of the distinguished acting Republican leader. So, there is no objection.

Mr. STEVENS. Mr. President. I thank my good friend from West Virginia, the distinguished minority leader, for his cooperation and his friendship.

I am happy to note that the Presiding Officer in the chair today at this time is my colleague, the junior Senator from Alaska (Mr. MURKOWSKI).

Mr. President, has the request been approved?

There being no objection, the Senate proceeded to the consideration of executive business.

## DEPARTMENT OF STATE

The PRESIDING OFFICER. The clerk will state the nomination.

The bill clerk read the nomination of Langhorne A. Motley, of Alaska, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Brazil.

Mr. STEVENS. Mr. President, it is with a great deal of pleasure that I have been able to make this motion today to request the Senate to confirm this distinquished Alaskan as the U.S. Ambassador to Brazil. Tony Motley is a close personal friend of mine. We have been through many experiences together. He will be the first Alaskan to become an Ambassador of the United States.

Mr. President, we have now been a State for some 22 years and it is, a significant day for Alaska that we now have this honor of having one of our citizens become a U.S. Ambassador.

Tony and I have worked together for many years on many issues, including the Alaska lands legislation. He was, during the time the Senate and the Congress were considering the Alaska lands bill, the executive vice president of Citizens for the Management of Alaska Lands, Inc. (CMAL). Prior to that he worked on a variety of other important State matters when he was commissioner of the State of Alaska's Department of Commerce and Economic Development

Tony is highly qualified for the job. He was born in Rio de Janeiro, Brazil, where his father headed the Atlantic Refining Co. Tony speaks fluent Portuguese and he has spent a great deal of time in personal and business contact with Brazil and other Latin American countries.

He demonstrated his administrative and political skills during the last Congress when, as chief officer of CMAL, he represented our State's interests by debating the Alaska lands issue with Members of Congress and high-level U.S. Government administrators.

Tony's record in public service is also quite distinguished. As commissioner of Commerce and Economic Development for the State of Alaska in the mid-1970's, Tony's accomplishments included a restructuring of the Alaska State Housing Authority from a dormant entity to a first-class public housing corporation. As commissioner, he revitalized the State's veterans' loan program. which had a 25-percent delinquency rate when he took over, and, within 18 months under his administration, decreased to less than

1 percent. Under his leadership the State tourism industry prospered, and he was responsible for many innovative economic development programs, including fishery enhancement in Alaska and hydroelectric power projects for small Alaskan communities.

Tony Motley's distinguished record of military service included serving as executive officer to the commander in chief of the Alaskan command in the 1960's.

Mr. President, I am delighted that President Reagan has sent to us this nomination, because Tony Motley is quick, loyal, and capable. I am also delighted that he has received the unanimous support of the Senate Foreign Relations Committee. He will represent the United States with honor and dignity. I have every confidence that his exceptional abilities will prove to make him an excellent Ambassador to the great country of Brazil.

I urge the Senate to confirm his nomination as the U.S. Ambassador to Brazil. Tony Motley is the first Ambassador ever to come from Alaska. I speak for all Alaskans in saying that we are proud of him, and that we are grateful to the President and to all those who have taken part in the selection and confirmation process.

Mr. MURKOWSKI. Mr. President, I am pleased to support the President's nomination of Langhorne "Tony" Motley to the post of U.S. Ambassador to Brazil. This is particularly gratifying to me, for the Ambassador-designate is not only a distinguished citizen of my home State of Alaska, but he is a very close and longtime friend.

Mr. President, I believe that President Reagan has made an excellent choice in his selection of Tony Motley to this important post. Tony Motley was born and raised in Brazil. He remains fluent in Portuguese. He focused on Latin American studies in college and continued to develop that expertise throughout his Air Force career—much of which was spent in Latin America as well as Alaska. In 1970, Tony resigned his Air Force commission and remained in Alaska. He then began and operated a most successful real estate development business prior to his appointment in 1975 to the State cabinet as commissioner of commerce and economic development.

Under Tony Motley's leadership, the State made great progress in public housing, finance, economic development and regulation. Subsequently, from 1977 to 1980, Tony Motley served as the chief executive officer and primary government relations representative for an organization known as Citizens for the Management of Alaska Lands, Inc., which was very active during the recent congressional debate over the Alaska lands legislation. That experience, Mr. President, has given Tony Motley an excellent understanding of the Congress, its operation, and procedures. He fully appreciates the role of Congress in the conduct of U.S. foreign policy and the importance of working with Congress on froeign policy questions. In short, Mr. President, Tony Motley's background in government and commerce make him well suited to represent our Nation in the largest of all our South American Embassies.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the nomination was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Again, Mr. President, I thank the distinguished Senator from West Virginia, my good friend, and I thank the Senate.

Mr. ROBERT C. BYRD. The Senator is welcome.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

## ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business.

## IMPACT OF INTEREST RATES ON EXPORTING

Mr. BOREN. Mr. President, I rise again today to call attention to the serious impact of high interest rates upon another sector of the economy, those businesses which are involved in exporting.

The relationship between interest rates and exporting can be explained in this way. The rates of interest available through investment in American securities and bonds provide a much higher return than is available through comparable investments abroad. Given this incentive, foreign investors are converting their currencies into dollars for investment in the United States. This increased demand for dollars has driven the exchange rate value of the dollar up very high in relation to other currencies. The result is that U.S. products are much more expensive abroad than in recent years and demand for American exports has declined very dramatically in some cases.

One example of this is the Monsanto Co., the Nation's 16th ranked exporter. Last year Monsanto made more than $1 billion in foreign sales. This year they are reporting a decline of 15 percent in their export business because foreign purchasers are not willing to pay the much higher prices. The Ditch Witch Co. in my own State of Oklahoma, a smaller firm which exports machinery, has experienced severe difficulties because foreign customers are hesitant about paying higher prices. Eighty percent of their dealers abroad have delayed their purchases amounting to a 20- to 30-percent decline in business, all related specifically to the higher prices brought on by the high exchange value of the dollar.

In an article in Time magazine, Otto Eckstein predicted that U.S. exports, which grew by 15.2 percent in 1979 and 9.6 percent in 1980, will decline this year by 1.3 percent. This factor becomes even more ominous when we look at the significance of exports in the economy as a whole. In 1970, exports accounted for 7 percent of the total GNP. In 1980, exports had risen to 13 percent of our GNP. We simply cannot afford to depress a sector of our economy which has demonstrated significant growth in recent years and which has the potential to serve as a source of stimulus to a great deal of the economy. Former Treasury official, C. Fred Bregsten, contends that unless the dollar weakens somewhat up to 1 million workers could lose their jobs because of this decline in export business.

Mr. President, we are facing a potentially dangerous situation with the export business which could have negative repercussions throughout the economy. Again, we see, through this particular sector of the economy, that the President's economic recovery plan cannot succeed until interest rates go down.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

## AGRICULTURE AND FOOD ACT OF 1981

The PRESIDING OFFICER. The clerk will state the pending business.

The bill clerk read as follows:

A bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. The pending question is the amendment of the Senator from Georgia (Mr. MATTINGLY).

The Senator from Georgia.

AMENDMENT NO. 545 (MODIFICATION)

Mr. MATTINGLY. Mr. President, I send to the desk a modification of my amendment No. 545.

The PRESIDING OFFICER. The amendment will be so modified.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that reading of the modification be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The modification is as follows:

Page 3, line 25 after "poundage on such farm," insert: "or in the event that peanuts are not actually produced on such farm in at least one of any three consecutive crop years,"

Page 4, line 1 after "production poundage that cannot be produced," insert: "or which is not produced,"

Page 4, line 7 after "production in 1980 or 1981," insert: "or any subsequent year."

Mr. MATTINGLY. Mr. President, we are now considering the bill S. 884, legislation which will govern and control commodity programs for American farmers for the next 4 years.

My home State of Georgia has a broad variety of agricultural interests. Agribusiness is a major part of my State's economy. I am committed to the task of encouraging not only agribusiness as a whole, but the survival of the family farm.

At this point, the combination of drought and high interest rates has put many farming operations into or on the verge of bankruptcy. While there may be little the Senate can do about drought, I hope we can do something about interest rates. The key to that is in holding down Federal expenditures. The farm bill should not be exempt from the scrutiny we are giving other programs.

There is a great disparity of opinion as to just what is the best policy that will adequately reward agricultural producers for their investment of time, talent, and capital. I believe in a free market system for the economy as a whole, and I have yet to be convinced that all those free market principles go out the window when we reach the farm bill.

I have, for example, been unconvinced that the peanut farmer is better off for having to pay an allotment owner rental fees before he can plant peanuts. Over 70 percent of the Nation's peanuts are grown under just those circumstances.

A railroad company or some timber conglomerate owns the allotment and Joe Farmer pays them for the right to plant. How can it hurt the farmer, the one who is doing the work, to have the direct right to plant peanuts.

It is my belief that the farmer's biggest worry is the general health of the economy, the same worry that plagues the housewife. We cannot solve the farmer's problems by artificially increasing, through governmental interference, the prices at the supermarket. That will just not work.

For over 40 years, the President, the Federal Government has been deeply involved in peanuts: who could grow peanuts, how many peanuts they could grow, the circumstances under which those peanuts could be sold, and so on.

Like many of the Government's commodity programs, the peanut program has been basically crisis oriented. And, like many programs, it has often-times caused farmers more problems than it has solved. But, in spite of its problems, the peanut program has indeed lent a great deal of price stability and supply dependability over the years.

We are now embarking upon a new era in the history of America, a new era which promises a return to the people of this country the control of their destinies. In the short span of the past few weeks and months, we, the elected representatives of this unique breed of individuals known as "Americans," have made tremendous changes in the nature and direction of the Federal Government—changes which were mandated upon us by the people of this Nation. We have passed legislation which reverses the half century old notion of "tax and tax and tax, and spend and spend and spend." We have endorsed laws which again reward that sector of the society which is productive, and which encourage others to become more productive. We have expressed our faith in the ingenuity and work ethic of the average American.

So, what does this new direction, this rebirth of federalism, have to do with the peanut program? Whay is MACK MATTINGLY standing before you in this Chamber, and just what is he advocating?

I shall tell you what I am advocating, Mr. President. I am here before the Senate to argue for fairness, for equity, for justice. I am here to ask that we give the average producer of peanuts an opportunity to benefit from the same new lease on life that we in the U.S. Senate have just so recently granted to other segments of our society—the chance to invest their capital, their labor, and their expertise. All for the promise of a fair return on these investments.

Now, I would be the first one to admit that the peanut program as it now exists needs some fundamental changes, changes that many Senators are concerned about. On the other hand, it is only fair and equitable that those hardy American farmers who have grown peanuts the way the Government dictated for the past 40 years not be penalized by what we do here today.

In keeping with the new directions that we have forged in recent weeks, I am today asking that we also set a new direction in the peanut program—but a new direction which gives our producers a reasonable opportunity to adjust to this new and innovative atmosphere.

In this amendment, I seek to accommodate each and every concern which has been expressed regarding the present program—concerns of the administration about the budget levels and a reorientation toward a free market system; concerns of my colleagues about the right to grow peanuts without penalty or restriction; concerns of present growers about their economic future and security.

Well, enough of the standard rhetoric. I can hear each of my colleagues asking, "Why all this fuss about peanuts? What are we really talking about here? What does any of this mean to me?"

The present program is rather complicated. However, I shall try to simplify the problem as best I can.

Currently, only a specified few can even grow peanuts under the present acreage allotment system. Of this designated number of persons who have the right to grow peanuts, only about 30 percent actually grow their own peanuts, while about 70 percent of our Nation's crop is grown on acreage allotments leased or rented from the owners. Many peanuts are grown under acreage allotments which are owned by timber companies, railroad companies, corporations, and even subdivision owners who do not have even 1 acre of suitable acreage, but who are in the business of renting the right to grow peanuts to farmers who do have available land, equipment and expertise.

S. 884 and the Committee Modification thereto would only extend and perpetuate this system. It does not address the vital problems posed by "endowed, nonproducing, absentee landlords" and by the desire of those without access to an allotment to grow peanuts in our supposedly free agricultural society. The amendment which I ask the Senate to consider will help solve some of these basic problems. For instance, my amendment will:

First, suspend the allotment system, and allow anyone anywhere to grow peanuts:

Second, reduce the possibility of any loss to the Government by lowering the amount of peanuts for domestic use that the Commodity Credit Corporation is obligated to buy;

Third, provide that former allotment owners who do not have adequate, suitable acreage to grow peanuts will forfeit the right to grow the crop to the person who previously had to rent or lease that right; and

Fourth, help guarantee an adequate supply of peanuts and peanut products to the American consumer at a reasonable price, while also assuring our farmers of an opportunity to receive a fair profit in return for their investment of time, labor and capital.

Mr. President, it would be very easy to single out the peanut program for extinction. It is a very small program—it impacts on a very few States. It is a complicated program, and one which is difficult to understand. In short, it lacks the "sex appeal" of many of the other commodity programs. And yet, I think we in the Senate on both sides of the aisle have some obligations. We have an obligation to the consuming public to stabilize prices and supplies of this high-protein food source. We have an obligation to the thousands of farm families, who depend on this crop, to make substantive changes in a reasoned and orderly fashion. And we have an obligation to the taxpaying citizens of the country to live up to our promise of lowered Federal expenditures.

Mr. President, I submit that my amendment to the peanut title of the farm bill presently before us will meet each of these obligations. It will also allow expanded American exports of peanuts for the world market—an expansion which we desperately need to offset our balance-of-trade deficit.

Mr. President, today, and I say this also to those Senators in their offices listening, when we vote today, there are going to be three choices. There is going to be the farm bill, S. 884, as amended by Senator HELMS, which really offers no real change. It is still allowing selling allotments and restricts freedom and prohibits farming.

Then we have an amendment by Senator LUGAR, which is good, except that when we grow more peanuts in the United States, it is going to cost the Federal Government more money. There is no safety net for the farmers.

Then there is the amendment I offer, which insures freedom. It ends the feudal system of socialized farming. It allows the farmers to grow and expand and export. That is what freedom is all about. That is what this small increment of a farm bill that came up is all about. It is about freedom.

I sincerely urge the adoption of this amendment to the peanut title.

Mr. HELMS. Mr. President, I am a little puzzled by the attacks on the peanut program, which has to be one of the most successful farm programs ever devised by this Government.

I am a bit puzzled, also, that such a far-reaching attempt would be made to jerk the rug from beneath people who have had faith in their Government and faith in the governmental program. The Senate floor, during debate on this farm bill, is neither the time nor the place to do it.

I reiterate the repeated suggestion I have made to some who feel that they see imperfections in the program: I will be delighted to hold hearings on any legislation to revise the program. We will study the impact of any proposals. This will be done promptly. There will not be any of this business of the chairman of the committee sitting on a bill because he personally may have some doubts about it.

However, Mr. President, more than that, the Committee on Agriculture, Nutrition, and Forestry has included in its modifications a provision to make the cost of the peanut program absolutely zero.

So, in the parlance of the teenagers who used to roam around my house, what is the big deal? Why not wait? Why not let the legislative process function?

It is not like some other issues that have been sat on in various committees. The chairman and the ranking minority member of this committee have guaranteed that there will be hearings on any legislation offered, so that fairness and equity can prevail.

Let us now talk about this peanut program a bit. It provides a livelihood for some 60,000 peanut farmers who work the soil in 16 of our great States. My State is one of them, yes, and I am proud of it.

I heard a Senator say yesterday, "We cannot grow peanuts in my State." Of course, he cannot. He does not have the climate. He does not have the soil. He might grow one in a pot in his livingroom.

This issue should not be obfuscated by irrelevancies. The truth of the matter is that the people participating in the peanut program have paid, and paid through the nose, to participate. To come here without any hearings whatsoever and jerk the rug from under them borders on being unconscionable.

I could give the Chair a list of thousands of widows in my State whose husbands invested in the peanut program rather than in gold or in stock. They invested in land. Are we going to say summarily, arbitrarily, here today, "That's tough, Madam Widow; your husband should have had more sense than to have faith in a Government program"? I do not think the Senate is going to do that. I would be amazed if the Senate does.

I reiterate, with all the sincerity I possess, that if any Senator introduces a bill proposing to modify, change, adjust, reconstruct the peanut program, it will go to the Committee on Agriculture, Nutrition, and Forestry, and this chairman will call hearings on it promptly.

The 16 States primarily involved in the peanut program are primarily in three growing areas in the Nation—the Virginia-Carolinas, the Southeast, and the Southwest.

What about the peanut title in this farm bill, S. 884? The peanut title was approved overwhelmingly by the Agriculture Committee by a vote of 12 to 3. It maintains the current program with modifications and improvements, among them being, as I said earlier, reducing the cost of the program to zero.

I will be fair and square about it, Mr. President: If we are going to abolish a program that costs nothing, I am going to be seriously tempted to say that perhaps all the other farm programs should cost nothing. As they say in North Carolina, "How do you like them apples?"

The truth is that there should not be all this fractious debate about this farm bill. I am not noted as the biggest spender in the U.S. Senate, but I am here to say that if we do not take care in this Congress about the overt actions we take, there may be some hungry people in the United States; because farmer after farmer is going down the tube, as well as all the businesses related to farming. Who is going to produce the food? Not the media. They may produce food for thought. Not many Senators till the soil. I cannot think of one.

The modified peanut provision in this bill adjusts the price support level, while at the same time reducing the poundage quota, so that the net results midway through the program are going to be zero in terms of costs. This will be accomplished while providing a plentiful supply of good, edible peaunts at a reasonable cost to the consumer.

I have taken note of the criticisms of the program. I have tried to look at them objectively.

Without fail, I detect that these criticisms ignore the basic fact that the program has worked extremely well for a long time, and it has benefited both consumers and producers of peanuts in this country.

Throughout the years, the program has resulted in stability for the entire peanut industry—producers, handlers, manufacturers, and ultimately consumers of peanuts and peanut products.

If you will check the record, Mr. President, you will find that this program has prevented wild swings in production and prices, which would have resulted in oversupplies in some years and shortages in other years. And I daresay that had it not been for this program, it is most likely that the net result would have been higher prices for peanut butter and peanut products in general to the consumers.

Mr. President, if you want an indication of that, just look at 1980 when the only major drought in the last 20 years occurred. There was a short crop of peanuts. Indeed, without this peanut program as it has been carefully crafted and updated over the years, it is likely that there would have been no substantial edible peanut products available to consumers at all.

The quality control and market discipline features of the program serve to provide for the availability of an edible food crop—as opposed to an oil crop—for peanuts.

I think it is demonstrable, Mr. President, that without the stability of the allotment system, boom-and-bust agriculture also would have resulted, making it extremely difficult for the small family farmer who grows peanuts to stay in business. It is volatile enough as it is. But I can guarantee that if this Senate does severe damage to this program in this bill, there are going to be problems.

The stability provided by peanut allotments and production controls has enabled producers to obtain, generally speaking, adequate financing to adopt latest production technology, which has provided consumers with a constant supply of peanuts. To dismantle this acreage allotment and price support program would replace stability with economic chaos in hundreds of rural communities stretching from Virginia to New Mexico.

I imagine that there are going to be a number of Senators who will validate that in their comments here today.

It would have a severe impact in terms of what we are doing to human beings. It would be absolutely contrary to the suggestion made by some who would criticize the program. It would bring economic disaster to many small farmers, and it would have other far-reaching results.

As an economic study by Tarleton State University in Texas has noted, an end to the peanut allotments would means—

A loss of tax base jeopardizing the stability of many rural communities, including the loss of young farmers and many small rural schools, churches, et cetera.

Mr. President, others wish to speak in connection with this matter, and I am going to forgo for the time being further comment except to say again that this Chamber on this day is neither the time nor the place to make a drastic, overt, adverse move against a successful program which will cost the taxpayers not 1 cent.

That is what we are talking about in terms of this farm bill. We have been trying to minimize the cost of it. I do not know how the peanut farmers can be asked to minimize the cost any more than they have been willing to do in terms of the modification that Senator HUDDLESTON and I, on behalf of the Agriculture Committee, sent to that desk a day or so ago.

Fairness and equity require, Mr. President, that we approach this thing, if it is to be approached at all, through the legislative process of a Senator introducing a bill, not proposing an amendment in this Chamber, a bill to be referred to the Agriculture Committee where I reiterate, Mr. President, it will be given prompt and full hearings and consideration.

The present program also provides stability and order in the marketing of peanuts. Those unfamiliar with the production do not understand that this commodity cannot be stored by the producer like grains and soybeans to await a higher market. Peanuts are semiperishable, and must be marketed as they are harvested. Price stability and quality control at the marketplace, therefore, is dependent upon controls afforded under the allotment and quota system, as well as the marketing provisions of current law.

If the allotment system were to be terminated, two fundamental and potentially devastating changes will occur in peanut production. First, production could shift to large corporate-type farm operations, dealing another blow to the family-farm system in America. Second, much of the production will likely shift to one geographic area of the Nation, leaving behind economic havoc in the areas of former production.

The dispersal of peanut production in three distinct geographic areas is good insurance against the uncertainties of weather. When adverse weather harms the crop in one area, the production in another generally offsets the impact. This has been proven repeatedly. Only once in the past 25 years has a general drought like last year affected the entire peanut belt, though localized droughts have frequently disrupted production in one region or another over the years.

The peanut provisions in S. 884, as amended, would be substantially less costly than the original administration bill and vastly less than the proposal to go to a straight loan program with unrestricted production.

Not of least concern to the Senate is the question of the impact of the costs of the peanut program without the allotment/quota system. Unlike most other farmers, peanut farmers have made an agreement with the Government. They agree—in referendum, I remind Senators—to limit production in return for the advantages of the price support program. If all other commodities were to operate that way, farm program costs would be a fraction of what they are today.

Now, not for one minute do I intend to criticize other programs. We believe peanuts are uniquely suited for the allotments and quota production controls for reasons I have already outlined—the semiperishability, the restricted geographic adaptability, the dual market for oil and edible peanuts, and all the rest.

However, it is irrefutable that the costs of the peanut program would be immensely greater if we were to alter it or eliminate it along the lines which have been suggested today.

In fact, the committee bill would bring quota production substantially into balance with domestic usage in 1982. Consequently, under our plan, there would be little, if any, cost to the Government. Virtually all loan outlays would be recoverable, and we could sharply reduce the amount of CCC loans in the first place.

The proposal to dismantle the program and permit unrestrained production would—as explained by its advocates, most especially the Senator from Indiana—be based on a loan level of either 68 percent of parity or $340 per ton and unrestricted production. I might add that the 68 percent of parity level would be $566 per ton.

Assuming a production of 2 million acres in an unrestrained production environment, with an average yield of 2,600 pounds per acre—which is really likely to be much greater if production migrates to the very high yield areas of the Southeast—cost estimates of the adversary proposal range from a low of $108 million annually to a high of $153 million annually, depending upon the sales price received for CCC stocks taken under loan.

Now, here I use the term "cost" advisedly. That is the loss to the Government—the "nonrecoverables" as the budget people say.

The outlays per year under the open production system with a price support of an extremely modest—and entirely inadequate—$340 per ton would involve outlays in the range of $200 million per annum. This must be contrasted, of course, to the likely potential of just a few million dollars in outlays—if that—for the program provided for in the committee bill.

At the risk of getting bogged down into numbers which may sound confusing to Senators, permit me to explain.

Current acreage production is established in law at 1,614,000 acres. It is my understanding that in 1981 some 1,500,000 acres were planted in accordance with the national poundage quota. At an average yield of 1,281 tons per acre, that would result in a yield of some 1,921,500 tons. Present domestic disappearance is expected to be about 1,300,000 tons. Plus, at the extremely lower price of $340 per ton we would expect about 400,000 tons to move into the edible export market. Now, that would result in some $75 million in outlays with a one-price $340 ton support—compared to some $38 million in outlays with the present two-price quota program at 1.3 million tons in the original bill, and zero outlays in the modified version.

However, that $75 million in outlays—almost double the cost of the present program—would be based upon identical production that we have with the present program, that is, with strict production controls and growing limited to those assigned a farm-base production poundage.

With the dismantlement of the program and attendant unlimited production, every observer acknowledges that production would likely increase. Several years ago USDA informed the committee that in such circumstances production would increase to 2 million acres. Using the same formula applied above, that would result in program outlays of $306 million per annum, with net losses of some $108 million.

If there are Senators who would dispute the 2 million acre production level without controls—an increase of some 500,000 acres—we can apply the same formula to half that increase in production, to say, 1,750,000 acres. That would result in outlays of some $195 million, or some $150 million greater outlays than provided for under the committee bill peanut provisions.

Now, this $195 million in outlays per year. Most of the debate on the dollar figures in this farm bill has been in 4-year costs; that is an outlay of $780 million for the Lugar amendment.

Clearly, this is an extravagance we cannot afford. The money is just not there. We have a program that works with little cost, and which supplies consumers with a wholesome edible crop. It just makes no sense to increase outlays by several hundred million dollars to correct a problem that does not exist.

It is important that the committee understand that the cost of the peanut program this bill extends has declined dramatically over the first 3 years under the 1977 act. According to figures provided to the chairman by Deputy Secretary Lyng on April 17, the net 3-year cost of the program for fiscal year 1978–80, was $15.4 million, or an average of $5.1 million per year. These costs reflected a 96-percent reduction in average annual program costs when compared with the program prior to the 1977 changes. The costs of the existing program also are far below those projected for the administration's own proposal for the 1982–86 fiscal years.

The modified peanut provision in S. 884 calls for a quota support price of $596 a ton. While this is up from the present $455 a ton, it is based on a realistic appraisal of today's production

costs. I might add that the current support level is only about 8 percent higher than it was in 1977—but production costs have risen almost 40 percent during this time.

Since S. 884 as modified calls for reducing the national poundage quota from 1.44 million tons to 1.24 million tons, the supply of peanuts should equal demand, bringing Government costs to zero or near zero for the support program.

I urge my colleagues to support the peanut program, and in turn support the thousands of farmers who depend on this commodity for a livelihood.

The peanut program has served the Nation well. The program is supported by the National Peanut Growers Group, which represents every peanut farmer organization in the United States, and has been endorsed by all general farm groups. The program has been regularly approved by growers in referendum—by overwhelming margins.

In short, it is a program that works. It provides a wholesome food commodity to consumers and livelihood to 60,000 family farmers.

I ask unanimous consent that factsheets and supporting data I have available be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

I. SUMMARY OF PEANUT PROGRAM

The present peanut program—based on acreage allotments, poundage quotas, quality controls, and export market development—has worked well over the years and has benefited both consumers and producers of peanuts.

As modified by Congress in 1977, the program has—

1. Reduced government costs dramatically;

2. Made the U.S. the number one exporter of edible grade peanuts; and

3. Assured a plentiful and constant supply of high quality peanuts at fair and reasonable prices; (1980 was the first crop shortfall in a quarter of a century, and this was due not to any failure of the program but to the drought that devastated all three producing areas).

4. Maintained a strong production base in three geographic areas of the country.

The Food and Agriculture Act of 1977 made major modifications in the peanut program that has its origins in the 1930's along with other basic commodity programs. In 1977 Congress established a two-price program that provided one level of price supports for domestic production and a lower level for peanuts produced for export. Poundage quotas were instituted among producers to bring higher-supported domestic production into line with domestic need over a phased-down period, while at the same time allowing growers to produce for the export market at competitive world prices.

As a result of 1977 modifications, net program cost have been dramatically reduced to an annual average of $5.1 million for the first three years of the new law (FY 1977–80). Prior to the 1977 Act, net annual cost had climbed above the $100 million level to $121.1 million in FY 1975 and $210.3 million in FY 1976. (Letter from Deputy Secretary Lyng to Chairman Helms, April 17, 1981.) Moreover, U.S. peanut exports for food use have zoomed, with the U.S. becoming the world's leading exporter of edible peanuts.

As it has developed over the years, the peanut program of allotments and quotas has prevented the boom-and-bust cycles that many other commodities have experienced—and are experiencing at the present time. By contrast, the peanut program has resulted in stability for the entire peanut industry—producers, handlers, manufacturers, and ultimately consumers of peanuts and peanut products. It has prevented wild swings in production and prices, which would have resulted in market gluts in some years and scarcities in others.

The present program also provides stability and order in the marketing of peanuts. Unlike grains and soybeans, this commodity cannot be stored for extended periods by the producer to await a better market. Peanuts are a perishable commodity and must be marketed as they are harvested. Without the existing program, producers at harvest would be at the mercy of buyers, without the option of holding or storing their crop in hopes of obtaining higher prices. This is a major difference that many overlook when considering commodity programs.

Quality control is tied directly into the peanut allotment program. Peanuts is the only major American food commodity that is marketed under a voluntary but very strict quality assurance program, providing U.S. consumers with the highest quality peanuts in the world. Marketing supervision and checks built into the allotment and quota system provide the mechanism for identifying at the buying point and removing from the food chain any lot of peanuts found to have mold or to be otherwise unfit for human consumption.

Under the allotment system, peanut production in this country remains primarily in the hands of family farm operators and is dispersed among 17 states in three geographic areas: Virginia-Carolinas, the Southeast, and the Southwest. If the allotment system were to be terminated, two fundamental structural changes would occur in peanut production in the future, neither of which would be in the best interest of the Nation. First, production advantage would shift to large, corporate-type farming operations, and another blow would be dealt the family farm system in America. Second, production would shift over time to one geographic area of the country, leaving behind havoc in the areas of former production.

The dispersal of peanut production over three distinct areas is insurance against uncertainties of weather. When adverse weather harms the crop in one area, production in the other two generally offsets the impact. This has happened repeatedly. Only once in the last 25 years has general drought like last year's affected the entire belt.

The peanut program has served the Nation well. The program is supported by the National Peanut Growers Group, which represents every peanut farmer organization in the United States, and has been endorsed by all general farm groups. The program has been regularly approved by growers in referendum by overwhelming margins.

In short it is a program that works. It provides a wholesome food commodity to consumers and a livelihood to 60,000 family farmers.

---

II. SPECIFIC POINTS OF THE PEANUT PROGRAM

1. ALLOTMENTS—QUOTAS PREVENT OVER-PRODUCTION, PROVIDE STABILITY

The peanut is a unique commodity . . . unique because we possess the ability to vastly over-produce peanuts in a very short time. It is a perishable commodity that cannot be stored for any extended period in its raw form. Though domestic demand is growing at a healthy 3 percent annual rate, yields also are improving. In addition, even more prolific strains are now being perfected in the laboratory.

Thus, boom-and-bust agriculture can be avoided for peanuts through production controls provided under the existing allotment and marketing quota system.

Without acreage allotments and poundage quotas, production would increase rapidly, quickly surpassing demand, and causing farm prices to fall. A recent study at the University of Georgia College of Agriculture forecast a 23 percent production increase if allotments were to be terminated. Under such conditions, many smaller producers, particularly in lower yield areas, would be forced out of business. This would shift production to the high yield area of the Southeast, thus concentrating production into one limited area and increasing the risk of weather loss.

Such a shift in production would also have severe impact in human terms. It would mean larger farms, fewer people in farming areas, and fewer jobs. An economic study by Tarlton State University reports that abolishment of peanut allotments in the Southwest would result in "a loss of tax base jeopardizing the stability of many rural communities, including the loss of young farmers, many small rural schools, churches, and etc." The same type of economic and social upheaval would occur in other traditional production areas.

The stability provided by peanut allotments and production controls has enabled producers to obtain adequate financing to adopt latest production technology, which has provided consumers with a constant supply of peanuts. To dismantle this acreage allotment and price support program would replace stability with economic chaos in hundreds of rural communities stretching from Virginia to New Mexico.

2. ALLOTMENT SYSTEM PROVIDES ABUNDANT SUPPLY

The peanut allotment system, coupled with minimum price supports, have provided U.S. consumers with a steady and abundant supply of peanuts year after year. During committee testimony this year, a spokesman for the peanut product manufacturing industry acknowledged that the last shortage (before 1980) of domestically produced peanuts was "about 25 years ago." Indeed, prior to modifications in the peanut program made by Congress in the 1977 farm act, the major concern was over chronic surpluses of peanuts—not shortages.

3. 1980 PEANUT SHORTAGE DUE TO WEATHER, NOT PROGRAM

The 1980 peanut crop in the United States was reduced drastically—by some 42 percent—as a result of the worst drought and most severe heat wave of this century. All three producing areas of the country were devastated.

The shortage of domestic peanuts has been offset in part by imports from India, Mainland China, and other foreign producers at prices far above those paid to U.S. growers for last year's crop, resulting in sharp increase in consumer costs for peanut products. Although the price growers received for farmer stock peanuts last fall averaged only 24 cents per pound nationally, shelled peanuts imported sold for as much as $1.25 per pound, a level that would have justified a price over 2½ times greater than that paid to U.S. peanut producers. Despite the price paid for imported peanuts, some of the major peanut butter manufacturers have reported sharp increases in profits in 1980.

4. ALLOTMENT LEASING NORMAL AGRICULTURAL PRACTICE

Much of the criticism directed against the peanut program centers on the leasing of allotments. This practice is made to appear as some type of evil.

The fact is that the leasing and renting of farmland is a common practice in the U.S. for all types of commodities. According to the latest census data, over 40 percent of all crop land in this country is rented and formed by someone other than the owner.

In the case of peanut allotments, in the vast majority of cases, when a producer leases an allotment, included in that lease is the land on which to grow the crop. There is no difference in that process than a corn or soybean farmer renting his neighbor's cropland to grow those crops.

Leasing also is frequently necessary to bring together several small allotments into an economically viable family farm unit. Some 22,500 peanut allotments—or 38 percent—are less than 10 acres, and another 14,400 are between 10 and 20 acres in size. These smaller allotments are frequently combined with others to make up a practical family farm size allotment.

The impact of allotment rental costs on peanut products has been greatly exaggerated. For example, it has been alleged that "more than 20 percent of the cost of each peanut product . . . goes to pay the additional rental value" of peanut allotments. This is absurd. Even if an average rental cost of $115 per acre is assumed this would amount to only 1.71 percent of the consumer price of a 12 oz. jar of peanut butter selling for $1.75 today.

5. BUILT-IN QUALITY CONTROL

Acreage allotments and the peanut price support program have included a marketing agreement for quality control assuming the highest standards in the world. Peanuts is the only major American staple food commodity which is marketed under a voluntary but very strict quality control program. Every ton of peanuts grown in the United States undergoes vigorous scrutiny at the buying point by the Federal/State Inspection Service, including testing under a 20-power microscope for undesirable molds. If any are found, the entire lot is removed from edible food channels. Further, every lot of shelled or clean in-shelled peanuts moving from approved shellers into edible channels is chemically analyzed to determine wholesomeness. Lots failing to meet rigid requirements are removed and diverted to non-food channels. The Southeastern Peanut Association (handlers) has testified that: "It is very doubtful our quality program could have been effective if it had not been closely tied to the peanut price support program."

6. PROGRAM COST DRAMATICALLY REDUCED

The cost of the peanut program has declined dramatically over the first three years of the 1977 Act. According to USDA, the net 3 year federal cost of the program for FY '78–'80 was $15.4 million, or an average of $5.1 per year. These costs reflect a 96 percent reduction in average annual program costs when compared with the program prior to the 1977 changes.

These cost savings are brought about by matching supply with demand through the allotment and production quota mechanisms. It is the surplus peanut that causes government expenditures. Growers agreed to a mandated reduction in quota peanuts in the 1977 Act to reduce government costs and have again agreed to a reduction under the bills now being considered. These decisions, while lowering government costs, also reduce total grower income.

The effort behind the bills now before Congress is to continue this reduction in government costs. Both CBO and Senate Agriculture Committee staff project a virtual $0 cost of the program by 1985.

7. PRICE SUPPORTS, A VITAL PRODUCTION INCENTIVE

The peanut loan program is uniquely different from other commodity loan programs, in that the perishability of peanuts forces their sale to occur quickly. This fact prevents the peanut farmer from "holding" his production for a better price the way a corn or wheat farmer is able to. Thus, in a vast majority of years, the "loan price" has been the market price for the peanut farmer. When the "loan price" falls below the cost of production, as it has in recent years, the peanut farmer is not compensated for his labor or investment. Thus, a support rate above the cost of production is vital to enable farmers to continue to produce.

One fault of the current program is that the cost of production has greatly exceeded the peanut price support level. This situation has held down returns to producers and creates a strong disincentive to produce. Over the four years of the 1977 Act, price supports were increased only once for an 8.3 percent increase. Yet the cost of production, according to USDA figures, has increased 44.6 percent, even excluding land cost increases. (House Report 97–106, May 19, 1981). Although a quota support in $600 per ton range would not totally off-set these cost of production increases, it would offer a reasonable degree of protection to encourage growers to produce a stable, abundant supply of peanuts for the U.S. peanut industry and consumer.

8. PENALTIES FOR PRODUCTION OUTSIDE THE PROGRAM
